MUNICIPALITIES AND THEIR FINANCING

Calgary to Place Notes—Prince Rupert's Mayor Investigates

Negotiations whereby the Bank of Montreal will place $2,000,000 of Calgary treasury notes in the London market at 5 17-40 per cent. have practically been concluded and approved of at a special meeting of the council. The notes will be sold at 5¼ per cent. interest, plus ⅛ per cent. for commission and 1-20 per cent. for stamp tax, a total of 5 17-40 per cent.

Prince Rupert's mayor and city solicitor have been empowered to dispose of that city's debentures by the city council in the following comprehensive resolution:

Whereas, the city of Prince Rupert is authorized to issue debentures in the following by-laws for the following amounts: By-law No. 59, for $550,000; by-law No. 97, for $600,000; by-law No. 63, for $115,000; by-law No. 11, for $40,000; by-law No. 29, for $66,000;

And whereas, by by-law No. 98, the city was authorized to convert all said debentures into stock under the Municipal Clauses Amendment Act, 1911, Section 11, to bear interest at 4½ per cent. per annum, but no such stock has yet been sold nor have any of said debentures been sold;

And whereas, the said city is also authorized to issue debentures on the following by-laws for the following amounts: By-law No. 144, for $90,200; by-law No. 146, for $7,437.73; by-law No. 148, for $29,800; by-law No. 156, for $25,000; by-law No. 158, for $140,000; by-law No. 180, for $35,000; by-law No. 181, for $350,000; by-law No. 182, for $12,000; by-law No. 183, for $46,000; bear interest at 5 per cent. per annum.

And whereas the city is also authorized under by-law No. 178 to borrow the sum of $20,000 on debentures;

And whereas, by by-law No. 109 the city was authorized to issue treasury certificates to the extent of two hundred thousand pounds under the provisions of the Municipal Amendment Act, 1912, to be repaid out of the proceeds of the sale of stock to be sold under by-law No. 98 and the said certificates were sold and are now outstanding;

Have Fullest Authority.

And whereas, His Worship Mayor Pattullo is about to proceed to such points in Canada, the United States and Great Britain as he may deem advisable for the purpose of disposing of all the said debentures, and it is deemed advisable that he should have the fullest authority to make all necessary arrangements on behalf of the city;

Therefore, resolved that His Worship the Mayor shall have the following authority: 1—To sell and dispose of all or any part of the debentures authorized by the said by-laws at such price and on such terms as he shall see fit. 2—To dispose of inscribed stock with the like authority. 3—If a sale is made of the debentures or stock against which treasury certificates have been issued, then to purchase back with the proceeds of such sale such treasury certificates at such price as he can obtain them at, or, if such purchase cannot be made, to make proper arrangements for investing the proceeds of such sale so that the certificates will be duly retired when due. 4—Generally to do everything necessary to dispose of the securities of the city.

Canadian Municipal Market.

Moose Jaw city commissioners have made a recommendation to the council to the effect that, having received advice from Messrs. Wood, Gundy and Company, Toronto, of the purchase of $50,000 public library bonds, under by-law 656, and a request that they be made payable in New York, this change be officially authorized by the council.

The North Vancouver Council has had an offer for $500,000 worth of debentures. It was 92¾ for the half million in general debentures and a quarter of a million local improvement stamped bonds. The offer was considered a good one, and it was decided to sell $[illegible] of debentures.

"The present Canadian municipal market has undoubtedly been greatly benefited by the recent cleaning up of a large number of outstanding issues," say Messrs. Wood, Gundy and Company, Toronto, in their May bond list. "Up to the close of last year the market was more or less crowded with offerings. Most of these have now, however, been disposed of.

"It is evident that the municipal bond market in Canada should continue to broaden. A number of large corporations, who were one time heavy municipal buyers, and who have in recent years turned their attention principally to mortgages, have swung back to the old attitude."

A communication was received by the North Vancouver District Council at its regular meeting from the Schoo Board asking the council to hypothecate bonds to supply the board with funds in accordance with a loan previously arranged at interest at the rate of 8 per cent. for two months The sum of $20,000 was asked for, most of which was needed for school sites. The council, after some discussion agreed to the request.

Sherbrooke city council have decided to increase the rate of interest on a bond issue of $615,000 from four and one half per cent. to five per cent., as a result of the stringency of the money market. The bonds are now deposited with the Canadian Bank of Commerce as security for the temporary loan pending the sale of the bonds.

The city has found it impossible to make a satisfactory sale of bonds, which are for the term of thirty years at 4½ per cent. It is felt that the increase of one-half per cent. in the rate will result in the immediate and satisfactory sale.

New York's Bond Sale.

The advertisement of Mr. William A. Prendergast, New York's city comptroller, relative to the city's sale of bonds reads as follows:—A safe investment for small investor and large investors, individuals, corporations, and a legal investment for trustees, exempt from all personal taxes. On May 20th, 1913, the comptroller will sell at his office in th city of New York, $45,000,000 4½ per cent. gold corporat stock of the city of New York, payable March 1st, 1963, issued in coupon or registered form, interchangeable at wil after purchase; coupon interest payable at option of holde in New York or London. The Greater New York charte provides that bids may be made for as small an amount a $10 and in multiples of $10. Send bids in a sealed envelope enclosed in another envelope addressed to the comptroller A deposit of two per cent. of par value must accompany th bid. Such deposit must be in money or certified check upo a New York state bank or trust company, or any Nationa bank.

◆

DEBENTURES AWARDED

Moose Jaw, Sask.—$150,000, to Messrs. Wood, Gund and Company, Toronto.

Neepawa, Man.—$160,000 6 per cent. 30 years, to Messr Spitzer, Rorick and Company, Toledo, Ohio.

Trenton, Ont.—$15,000 5 per cent. 30 instalments, Messrs. C. H. Burgess and Company, Toronto.

◆

Of the 1,877 fires in Chicago from January 1 to Apr 15, according to The Argus, 229 were caused by the careles use of matches, 147 by overheated stoves, 110 by overheate furnaces, 103 by thawing water pipes, 96 by defective flue 94 by sparks from chimneys, 93 by explosions of gasolin 86 by spontaneous combustion.

That Saskatchewan needs more creameries, is the beli of the Regina Board of Trade. President H. G. Smith ha studied the matter thoroughly, and recently asked what wa the good of encouraging mixed farming if more creameri are not established. The outcome has been that the boar of trade has petitioned the government to take steps withou delay to provide more creameries.

In closing the estate of the late David Ward, of Ponti Michigan, there will be sold, at a great sacrifice, during ne November, the only remaining large group of available r wood timber in California. This is an investment opport ity in valuable timber lands, and by addressing Mr. Char Willis Ward, P.O. Lock Box 106, Eureka, Calif., or M John H. Patterson, Pontiac, Michigan, full particulars, ter of sale, etc., can be secured.

SELLING ANNUITIES

The comparatively small success of Canadian gov- nment annuities was discussed in the House of Com- ons recently, and many reasons were advanced for isting conditions. Undoubtedly, the absence of personal liciting is most largely responsible. Life insurance d annuities, broadly speaking, cannot be sold except personal solicitation. The Dominion Government have nducted lecture campaigns. They appointed postmas- rs as their agents. They have adorned walls with sters advertising the benefits of annuities. The lecture mpaign did only little good work. Postmasters were o busy with the mail and their private affairs to worry out the sale of government annuities. How much life surance would a company sell were it to depend upon ctures and posters and uninterested agents for returns?

One step to remedy matters has been taken by the ising of the limit annuity from $600 to $1,000. Two embers drew attention to the fact that life insurance mpanies depended for their success upon agents, and til the government adopted something of the same ea it could not hope for much interest in the public. The postmaster-general will find it necessary to send t agents to explain the matter to the public," said Mr. aw; and Mr. Graham suggested that "some agent go to the country, staying at the different points a week, necessary, to meet the people personally and discuss e matter with them."

The government will have to recognize the personal uch between salesman and prospective purchaser in der to make highly successful the disposal of Canadian overnment annuities.

Experiments in government and state insurance are ultiplying. The State of Wisconsin is selling life insur- nce and the legislatures of several other states are con- dering the proposal. It will be interesting to observe the success which meets these experiments. Mr. Forbes Lindsay, in a discussion on the subject, does not hesitate to state that there is, perhaps, no public service which a state government is less calculated to render effectively, nor one for which there is less need for state activity. "The advocacy of state life insurance," he says, "is based on several fallacies, the chief of which is that an organization controlled by the government can adequately furnish the people with this almost universal necessity at less cost than can a private company. The assumption is that by employing state officials to write the business without remuneration, enough will be saved to make the rates attractive to the general public. The experiences of the governments of Great Britain and New Zealand in this field of endeavor indicate the futility of any such expectation."

State life insurance, such as Wisconsin is trying, starts with the same handicap as does the Canadian government annuity—the business is not personally solicited. Experience has proved that such solicitation is the only way to write life insurance.

UNION LIFE AFFAIRS

No one in authority denies that the Union Life Assurance Company is, to say the least, in an unenviable position. The Department of Insurance, in its usual paternal way, is apparently giving the company time to try to mend the breaks.

Official silence presumably is accounted for by high hopes respecting the English shareholders. Will they come forward with £75,000 for a general reorganization? The answer seems doubtful. Even if they do, will all the troubles of the Union Life be past?

In the meantime, the complete silence of the Union Life offices should be broken by a complete statement of affairs by the company's management.

FIRE INSURANCE ADJUSTERS

The presence of the fire insurance adjuster for the insured is not objectionable. His endless multiplication is undesirable. There is a point where the number of fire insurance adjusters for the insured becomes a fire risk.

THE TRADE BALANCE

We are pleased that Mr. D. R. Wilkie, president of the Imperial Bank, drew attention in his interesting address at the bank's annual meeting this week to Canada's balance of trade. There is a disposition in some quarters to cite the unfavorable trade balance as a sure sign that the country is, as a New York writer has said, "headed toward the trough." The exports for the year 1912 amounted to $393,000,000 and the imports $692,000,000, indicating an adverse balance of trade of about $300,000,000. As Mr. Wilkie pointed out, that is not necessarily an unfavorable feature. It has been more than compensated for by borrowings from abroad on capital account amounting to about $250,000,000, by government, municipal, railway and loan companies and by the cash value to us of an additional 400,000 people who have come to settle amongst us from Great Britain, the United States and elsewhere. It is estimated by the Departments at Ottawa that these immigrants have brought with them at least $200,000,000 in money and goods, and that of the 141,000 immigrants included coming from the United States each one brought an average of $1,000. Included in the excess of imports over exports is the value of these immigrants' effects, and also the very large investment being made by United States manufacturers in the business of the country.

Almost the whole amount of the excess in imports was occasioned by our trade with the United States, the imports from the United Kingdom having fallen short by about $40,000,000 of the value of our exports thereto. The exports of the mine are assuming very large proportions and are likely to continue to increase. Of the total exports, amounting to $355,754,000, the mine accounted for $57,442,000; the forest (which at one time was the principal article of export), for only $43,255,000, while manufactures amounted to $43,692,000, and agricultural products, including animals and their produce—all of which we might say was the handiwork of the farm—amounted to $195,000,000. The fisheries of Canada yielded a value of $34,667,872, and the mineral products in value amount to $133,127,489.

It is extraordinary, thinks Mr. Wilkie, that, notwithstanding all that the country has done to build up manufacturing industries in our midst, manufactured goods of the value of $348,500,000 were imported during the past year, as against exports of the same class amounting to only $35,800,000. Until Canada's manufacturing industries have grown to a point when the home market can be supplied fairly well within the country, the gap between imports and exports will not become smaller or closed.

MINING IN ONTARIO

There are signs that interest is to be revived in Ontario mining stocks, particularly Cobalt and more particularly Porcupine. The effort is unlikely to succeed, because Northern Ontario is busy with real mining and will not for many years indulge again in a wild gamble. Mr. Arthur A. Cole, the mining engineer of the Ontario Government railway, has just issued his report for 1912. Two of its invariable attractions are accuracy of statement and the reliability of its writer. Mr. Cole, as do all others interested in the country's development, wishes to see the cult of gold mining in the north, and the inflow of capital for that purpose.

"The occurrence of gold in Northern Ontario," he says, "has been known for many years, but the few mines that did pay for a time only strengthened by their early failure the belief that gradually spread throughout the country that gold mining in Ontario must necessarily prove unprofitable. This idea will account for much of the scepticism that greeted the news of gold finds in Porcupine in 1909. Fortunately for the district, the largest finds early passed into the hands of strong financial interests that insured their thorough testing and development. Lack of adequate transportation facilities retarded the opening of the new camp in 1910, but good progress was beginning to be shown in 1911.

"The Temiskaming and Northern Ontario Railway built a branch line thirty-three miles from the main line to serve the district. The construction of several mills was well under way when the disastrous fire of July 11th, 1911, swept through the country, not only causing the destruction of these mills along with most of the mining plants on the ground, but also entailing a large loss of human life. Construction, however, was immediately recommenced, with the result that Porcupine became a regular producer early in 1912."

The estimated value of the gold output from the Porcupine camp last year is $1,800,000. Accepting that estimate, the value of the output since the opening of the camp is $1,852,726. While three or four mills are busy in Porcupine—and there is little reason that others should not become so—yet caution should be exercised as to what ventures are patronized by the investor.

The silver industry is still the first mining industry in Ontario's Northland. Mr. Cole draws attention to the outstanding feature of the past year, viz., the revival of interest in silver properties in the district, manifested in the re-opening of a number of claims that had been worked for a while in the infancy of Cobalt and later closed down on account of the indifferent success met.

The finding of a high-grade vein on the 200-foot level of the Seneca-Superior under Cart Lake doubtless had some influence on this revival. The sensational change also in the fortunes of the Cobalt Townsite Mining Company, one of the few Cobalt companies financed by English capital from deep indebtedness to a dividend basis, and the bonanza silver find made on the lower levels of the sister English company, the Casey Cobalt Mines, also had a marked effect. Another discovery that is likely to have far-reaching effects in the future is the location of good ore in both the Temiskaming and Beaver properties in the diabase below the Keewatin.

Mr. Cole predicts a likely decline of a million ounces of Cobalt's production for 1912 compared with 1911. The increased value of silver during the year, however, will probably be responsible for an increase of about $2,000,000 in the total value of the output. Professor H. E. T. Haultain, another well-versed mining authority, has previously stated in these columns that the output from Cobalt has reached its summit. A rapid decline is not to be expected, but rather a gradual one, with final extinction many years away.

SMALL CHANGE

CROPS IN ONTARIO

all Wheat Wintered Well—Frost Affects Fruits—Spring Sowing

Fall wheat has wintered well notwithstanding the light
otection of snow, and the early spring wheat was also favor-
le, there being comparatively little heaving or other injury
m frost. There was an unusually rapid growth in the latter
rt of April and the first few days of May, which gave a good
ad to the plant, but subsequent cold weather has acted as a
eck. Taken all together, however, the present outlook for
e crop is most promising, except on late sown fields or on
v or poorly drained land. Only a comparatively small
reage has been plowed up or resown with barley or other
ring grain, states a bulletin of Ontario's department of
riculture. Much less injury than usual from insects is re-
rted.

In the western half of the province, in the northern dis-
cts, and in most of the Lake Ontario counties, clover has
ne well, especially in the case of the younger fields. In the
ore eastern part of the province, however, much of the crop
s been more or less killed out during the winter and spring,
hough even there some good fields are also reported.
veral correspondents point out that late pasturing was re-
onsible for some of the poor fields of both clover and alfalfa.

falfa and Vegetation.

Reports regarding alfalfa are not quite so enthusiastic as
ual, as both winter and spring conditions were trying to
is crop, and many of the fields are somewhat patchy. As in
e case of fall wheat and clover, alfalfa has done best on
ll drained land.

Unusually warm weather in the latter half of April and
e early part of May caused growth in the field, orchard, and
rest to go ahead with a rush, and vegetation was estimated
be from a week to two weeks ahead of the normal. Cool
eather with night frosts coming in about the 8th of May, how-
er, gave an almost complete check to growth from that date
time of reporting; and while orchards seem to be more
rward than usual, pastures are now only about ordinary. In
ost cases cattle are on the grass and are getting a good
te. Very timely rains were falling as our later corre-
ondents wrote.

In the first week of May orchards gave promise of a large
eld. The trees were covered with fruit buds—many in full
oom—and small fruits were also blossoming profusely. Be-
een the 7th and 11th of May, however, a series of severe
ght frosts occurred, the effects of which are variously de-
ribed. A careful sifting of the reports shows that early
rawberries were badly nipped, but that the later varieties
ppily escaped.

ruit and Fodder Supplies.

Some bush fruits, such as currants, were also caught in
me of the more advanced sections. In the fruit lands along
e lake shores—more especially in the Niagara district—fruit
ees sustained comparatively little harm from the frosts, but
me of the orchards farther inland were injured to some ex-
nt.

Of the orchard trees apples have suffered the least and
ums and cherries the most, but in no case as seriously as
as at first expected. To sum up, the injury from the severe
osts of May has turned out to be much less general than was
ared at the time of the frosts, and a good yield of all classes
fruit may still be had should favorable conditions prevail.
he presence of the tent caterpillar in unusually large num-
ers is complained of by many correspondents in the eastern
alf of the province.

Farmers are in a better situation as to fodder supplies
an for many years. In most localities there is a sufficiency
hay, and in many quarters a plentiful supply. There is
so a sufficiency of oats on hand in most cases, although this
d other grains are now fed more freely than formerly to
ve stock. Wheat is somewhat scarcer, but there is enough
r all requirements on the average farm. The only deficiency
ppears to be in the quantity of straw on hand.

Spring sowing was well advanced when correspondents re-
orted, and in many quarters, all spring grains had been got
. While there are complaints of some of the stiffer clay soils
eing hard to work, and remaining somewhat lumpy, most of
e reports speak of the condition of the seed bed as being
om fair to excellent. All the spring grains made a good
atch as a rule; but several correspondents stated that more
ain was necessary in order to ensure the best results.

Thorold, Ont., has been chosen as the location of
essrs. Pilkington Brothers, Limited, the well-known British
lass manufacturers, Canadian plant. This firm's head-
uarters are at St. Helens, England.

LEASES MODIFIED FOR CANADA

United States Shoe Machinery Company Refers to Canadian Combine Case

The Canadian leases of the United Shoe Machinery Company have been modified to meet what is believed by that concern to be the intention of the board appointed in October, 1912, to investigate the corporation's activities in the Dominion. President Winslow in his annual report just published says:—"On October 18th, 1912, the board appointed under the provisions of the combines investigation act made to the minister of labor at Ottawa its report of an investigation of the United Shoe Machinery Company of Canada. In general, the report was in the highest degree commendatory of the company's service and methods. As a result of the finding, we have endeavored so to modify our Canadian leases as to meet what we believe to be the intention of the board, while retaining so far as practicable the advantages of continuity in operation."

Troubles in the United States.

The company is having legal trouble, too, in the United States, and its officers have urged the speedy trial of the criminal suit against them, but the department of justice has preferred to delay the trial of the criminal suit until after the equity suit entered three months later shall have been disposed.

Mr. Winslow gives some interesting details of his company's business. On March 1st, 1913, the company had on lease in the United States 98,516 machines, increase of 1,495 machines over preceding year. Machines turned out have not increased in proportion of former years, because the company has suspended the system by which it formerly gave every shoe manufacturer option of either buying outright machines in its general department or leasing them at a nominal rental. Shoe manufacturers no longer have the option of leasing the general department machines, but have to buy them outright. As one result, operating expenses at the Beverly factory have decreased. Since it has been unnecessary to make and deliver so many general department machines, increase in operatives has not kept pace with normal increase in company's business. Under present conditions they can no longer equip small factories with new and up-to-date machines of the general department from which no adequate direct pecuniary return is to be expected, but thanks to a machinery equipment in most factories which up to the present time has enabled them to keep abreast of the demands of trade, the output of shoes has steadily increased and the revenue of the company has increased accordingly.

During the fiscal year of 1912-13, the company placed on the market 30 new types of machines.

Have Many Branch Companies.

"When machinery can be brought in duty free from Europe," says Mr. Winslow, "there will no longer be the slightest excuse for any one to say that American shoe manufacturers cannot equip their factories without patronizing the United Shoe Machinery Company, and it will then be obvious that whatever advantage we enjoy is due to the superiority of our machines and service.

"The business of our English, French and German companies is constantly increasing. At Leicester, England, we employ over 2,000 men—and the average rate of wage paid in the English factory is much less than the average rate paid at Beverly, which is the highest paid to any considerable number of workers in any one place in the world. It would be regrettable if economic conditions, arising from placing shoes and shoe machinery on the free list, should compel an increase in the work done in European factories at the expense of work done at home; but it is hard to see how small manufacturers, either of shoes or shoe machinery, who have kept up competition in the United States can cope with manufacturers abroad who hire labor far more cheaply.

Wide Distribution of Stock.

"The company is distributing among its lessees of Goodyear machines common stock purchased in the open market from the fund created by setting aside a percentage of the amounts received from such lessees during the period of three years beginning with January 1st, 1910. Lessees among whom stock is being distributed is about 1,100; shares purchased was 32,975; average price was $52.53 per share."

Stock of the corporation is more widely distributed than at any previous time. There are 8,366 individual stockholders, of whom 3,777 are holders of common stock only and 3,014 are holders of preferred stock only, while 1,575 are holders of both preferred and common stock.

FIFTEEN MILLIONS FOR CANADIAN NORTHERN

Heavy Subsidies Voted and Government Gets Seven Millions of Stock

The Canadian Northern Railway benefits most as a result of the railway subsidies to be voted this session. The company will get the following assistance:—

Line.	Miles.	Per mile.
Ottawa to Port Arthur	910	$12,000
Edmonton to British Columbia boundary ..	260	12,000
Toronto to Ottawa	250	6,400

These total $15,640,000. The subsidies are to be paid by instalments upon completion of each ten-mile section. A condition is the transfer to the Receiver-General of $7,000,000 of fully paid-up shares of common stock of the company, to be held for the benefit of his Majesty absolutely.

Ontario Government Railway.

The Ontario Government is subsidized at $6,400 on the following lines of the Temiskaming and Northern Ontario Railway:—North Bay to Cochrane, 258 miles; Englehart to Charlton, 7.8 miles; Cobalt to Kerr Lake, 3.9 miles; Iroquois to Timmins, 33.2 miles; Earlton to Elk Lake, 28.5 miles; Iroquois Falls Station to Iroquois Falls, 7.25 miles; a total of about $2,135,000.

Other subsidies at $3,200 per mile are to the Margaree Coal and Railway Company, Orangedale to St. Rose, 46 miles; McIntyre to Caribou, 4 miles; Northern New Brunswick Railway, Drummond and Austin Brook, 16 miles.

Railways Throughout Country.

Tobeque and Campbellton Railway, 25 miles; St. John and Quebec Railway, Andover to St. John, 200 miles; Lotbiniere and Megantic Railway, 60 miles; Megantic to international boundary, 35 miles; Little Nation Railway, Thurso to Montebello, 30 miles; Erie, London and Tillsonburg Railway, 35 miles; St. Mary's to Embro, 10 miles; Alberta Central Railway, 70 miles; Kettle Valley Railway, 335 miles; Calgary and Fernie Railway, 100 miles; for bridge over Burrard Inlet, $350,000; Canadian Pacific Railway, Gimli to Icelandic River, 30 miles.

The subsidies are governed by the usual conditions.

◆

MURRAY-KAY, LIMITED

Murray-Kay, Limited's, balance sheet for the year ended January 31st, 1913, shows increased gross profits amounting to $20,129, the total being $651,889. in addition to this cash discounts were $31,846. Operating expenses were increased during the year, thus the profits were lower than in the preceding year by $7,866. They were $204,375, and were apportioned as follows:—Reserve for bad and doubtful debts, $5,473; reserve for depreciation fixtures, $6,282; written off catalogue account, $20,000; organization expenses written off, $5,000; dividends Nos. 6, 7 and 8, $77,096.25; reserve for dividend No. 9, $25,698.75; balance to surplus account, $64,825.80.

These figures show a continuance of this company's progress.

The company's earnings for the last three years are given below:—

	Total income.	General charges.	Net income.
1912-13	$683,736	$479,360	$204,375
1911-12	661,706	449,464	212,241
1910-11	583,687	387,645	196,042

Assets which in the previous balance sheet amounted to $3,719,305 are now shown as totalling $4,083,675.

At the annual meeting, the following directors were elected:—Messrs. W. Parkyn Murray, president, Toronto; Douglas K. Ridout, vice-president, Toronto; Watson T. Bradshaw, Toronto; A. E. Dyment, Toronto; Geo. H. Gooderham, Toronto; John W. Drynan, Toronto; Major J. A. Murray, Toronto; and C. A. Barnard, K.C., Montreal

◆

A large brick plant is being erected at Varennes by the Mount Royal Brick Company. The company is capitalized at $1,500,000, of which $1,200,000 is common and $300,000 seven per cent. preferred. A bond issue of $1,000,000 is authorized. The money necessary for the flotation of the company has been found in London, Montreal and Brussels. The board of directors is as follows:—Messrs. Robert Bickerdike, M.P.; Hon. J. A. Ouimet, K.C.; C. A. Barnard, K.C.; D. W. Ogilvie, Clarence S. Smith, F. H. Manley, W. K. McKeown, and R. F. McCaffrey, of Montreal, and Frank Carrel, of Quebec. The Belgian interests are represented by an advisory board, consisting of Baron Louis van der Straten-[illegible] and M. Lucien Cognier, while a third may be added.

NEW PLAN TO SELL MUNICIPALS

London's Proposal to Sell Bonds to Purchasers Wh Will Issue Certificates

The city of London, Ontario, talks of trying a new pl to sell $764,500 debentures for which bids are invited. is rather late in the day to discuss such a plan, as tend are to be received on June 2.

It is proposed that part, or all of the issue, be purch ed by one of the local banks, loan companies, or capitalis The debentures will be held by the purchasers. Certificat in small denominations—$10 or $25—will be issued agai these debentures, and placed on sale for the benefit of t small investors.

Plan Recently Tried.

The plan was tried recently at St. Paul, Minn. M James J. Hill, of the Northern Pacific and Great Northe Railroads, and his associates of the Northwestern Tru were, it is said, responsible for the idea. From now on t city bonds of St. Paul may be purchased by the Hill cote of capitalists. They will be placed in the hands of truste and certificates issued by the Northwestern Trust Compa

All certificates will be of $10 denominations, and will sold by the Northwestern Trust Company. The certificat will pay high rates of interest, the rate paid by the city, a the certificates will be protected by the bonds, guarante by the trustees.

Absorbs Local Capital.

City Treasurer Bell, of London, Ontario, is said to fav the idea, but has raised an important question as to wheth or not it would not be more beneficial to the municipality have $764,500 brought into the city from the outside th use that amount of capital already there.

Mr. Hume Cronyn, of the Huron and Erie Loan Co pany, has been working on a somewhat similar scheme. T Huron and Erie proposal is to purchase municipal bon and issue certificates against them for sale in the old count market. "Canadian municipal bonds are not understood the old country," he says, "and we propose to issue certi cates against them, believing that the certificates wou find a readier market than the bonds themselves."

◆

LIFE INSURANCE AND CANCER

Mr. Frederick L. Hoffman, statistician of the Prudential I surance Company of America, in an address on "The Menace Cancer," before the American Gynecological Society in Was ington, recently, said that it was safe to estimate the ann mortality from cancer in the United States at 75,000 person and in the civilized world, at half a million. The cancer dea rate in the United States was increasing at the rate of per cent. a year, he asserted, and a corresponding increa was occurring, practically, throughout the world. The ave age age at death in cancer of all forms was 59 years—60 years for men and 58.2 for women. Of the total mortali from cancer, 90 per cent. of the victims were 40 years old more.

The cancer death rate in this country for men 25 and ove he added, had increased 29 per cent. in the last decade, an the rate for women had increased 23 per cent.

Mr. Hoffman said cancer was a great menace to the Ar erican people and that the tendency was toward a further i crease in the mortality, regardless of the cancer deaths pr vented by early surgical operation. The cancer death rate large American cities, he added, had increased from 37.2 p 100,000 of population in the five years ended with 1876 to 80 in the five years ended with 1911. The rate in New York Ci had increased from 37.5 per 100,000 in the three years end with 1872 to 81.4 in the five years ended with 1912.

Since the disease invariably was fatal, unless the canc were removed in its entirety in the very early stages of th disease by qualified operative treatment, said Mr. Hoffman, obviously was of the utmost importance that the elementa facts concerning cancer should be better known and unde stood. He expressed the opinion that there was urgent nee of a National society for the prevention of cancer, and tol his hearers such a society was in course of formation.

◆

The Montreal city treasurer's report for the year shows revenue of $9,190,656, an increase of $1,533,823 over the pr vious year. The chief sources of revenue are:—Assessment $4,186,000; water tax, $872,000; business tax, $740,000 licenses, $424,000. The tramways company contribute $41 000 to the city coffers.

LIFE ASSURANCE LEGISLATION

Whither Are We Drifting?—Italy's State Programme —Dominion Government's Annuity Campaign

BY R. W. BARTON, A.I.A.

"A large element of the public seem to be obsessed with the idea that every kind of ill can be cured speedily and every popular want gratified by legislation. Public taste and public morals are put under the special custodianship of the legislators, no less than the furtherance of the ends of justice. The abolition of poverty and improvidence is sought through the beneficent intermediary of State bounties," is how a writer in a United States journal aptly sized up the modern craze for legislation. To support this we have the report of the New York Legislature that 3,895 bills have already been introduced there this year.

The same tendency in our own and other countries is so obvious as to need only its recital to the reader.

The executives of the great life companies are watching this craze for legislation with some concern. It affects them vitally.

Life assurance contracts from their very nature extend over a long term of years. The contingencies of 20 or even 50 and more years hence have to be provided for by a premium unalterably fixed to-day. Yet legislation of all kinds is continually being introduced without regard to this fact. Not only legislation which compels the companies to do this for their policyholders or restrains them from doing that and the other, but also in the form of taxation. Dominion and Provincial taxation we know; but what shall we say when even municipalities controlling villages of a few hundred people exact a $50 tax before the company can write business therein.

Built by Thrifty Folk.

The fact is, the accumulated funds of life companies are attracting the lustful eyes of socialistic and spendthrift governments and councils.

It is the thrifty amongst the people who have built up these funds for the protection of their families and homes. It behoves them to watch, and to help the companies to watch, and to resist any drastic legislation or insidious taxation that may from time to time be brought forward, whether federal, provincial or municipal.

The activity in insurance legislation reached its limit in Europe last year when Italy passed a law granting to the government a monopoly of life assurance. Even their domestic companies are compelled to retire from business within 10 years of the passing of the act. While to gain favor with the masses it is further enacted that this government company shall pay all profit derived from the thrifty middle and business classes to the aged and invalid workmen's pension fund. This is not the time to discuss all the motives for this act or its probable effects, but it seems likely to tend to discourage life assurance in Italy—a surely undesirable consummation.

Dominion Government and Life Annuities.

Life annuities are so generally associated with life assurance companies that any active encroachment in this field by a government may be considered a general one. It has certainly been the custom for governments to grant annuities to such as seek that class of protection, but it has not been the custom to actively compete with the life companies by extensive advertising and canvassing. Our own Dominion government has, however, gone actively into the field. Witness the new posters advertising the government annuities. There is an element of Gilbertian humor in being in the position to tax one's competitors. Is it possible the provincial government will join the scramble? Or perhaps the city of Toronto instead of hawking debentures might raise funds by selling life annuities.

◆

The chairman of the Scottish and Canadian General Investment Company, at the recent annual meeting at Edinburgh, said in part: "As a large portion of our capital is invested in Canadian securities, it is gratifying to observe the continued prosperity of the Dominion. Notwithstanding the condition of the money market, trade in Canada has never been more active, and her agricultural interests are in a very sound position. The railways are making preparations for gigantic developments which cannot fail to have an appreciable effect on the prosperity of the country. The enormous flow of immigration of the best class appears to increase rather than to diminish, and this influx of population augments the demand for money.

BRITISH COLUMBIA

Land is in Demand—Federal Estimates—Work on Vancouver Island

(Staff correspondence.)

Vancouver, May 26th.

That there is a big demand for land in British Columbia was shown this week by the large number of people who gathered at New Westminster, when two hundred forty-acre blocks of homesteads were thrown open. The apportionment took place on Monday, but by Saturday last over three hundred applicants had gathered, and later this number was considerably augmented. It is stated that even in this instance speculators were able to get some of the land. In cases of this kind, the authorities should see that bona fide settlers have first chance. The present trouble is that all good land anywhere near any line of railway or town is held by people who have no intention of turning it to account, but who have been able to secure possession at a low price and are waiting for a buyer.

Adapted for Use but High Priced.

The man who cultivates the land is not always the man who has the money to spare to buy land.

The same point came up in an indirect way when Mr. John A. Lee, former mayor of New Westminster, spoke before the Progress Club. Mr. Lee mentioned particularly the need of industries, and pointed out what excellent sites were available on the Fraser River, and also the land on the south side of the river that might be closely cultivated. The whole of the lower Fraser valley is particularly well adapted for the growing of the produce that is used in the big cities on the coast, but which now is imported to a very large extent. If people get on the land, the question of a working population for industries will be largely solved. As it now stands, however, land in the Fraser valley is very high in price, tracts being laid out in town lots for the benefit of people in the east and other places distant to a more or less degree, who know little of what they are buying.

Development and Finances.

Mr. R. Marpole, western executive of the Canadian Pacific Railway, has returned from a trip to Vancouver Island, on which he was accompanied by Mr. H. J. Cambie, chief engineer; Mr. H. E. Beasley, general superintendent of the Eastern and Northern, and Mr. Campbell Sweeny, general manager of the Bank of Montreal in British Columbia. Much money is being spent on Canadian Pacific Railway construction on the Island, and the officials report that development of the lumber industry is so great on the east coast that transportation facilities will have to be materially increased.

General development on the Pacific Coast of Canada is indicated by the large amount in the federal estimates this year. In the supplementary estimates are appropriations of $1,370,000, and the aggregate figures include grants for grain elevators, harbor improvements, post office improvements, drill hall, wharves, dredging plant, in short, for every line of which expansion is being made. That these amounts are necessary show that development outlined from time to time is actually taking place.

The Marquis of Exeter is a visitor to the coast, along with him being Mr. N. Goddard Jackson and Mr. Fleetwood Heskell, two capitalists of London, England. The Marquis of Exeter already owns land north of Ashcroft which he bought last year. Discussing the financial situation, the visitors were of the opinion that while it might create a temporary dullness in business in Western Canada, it will not be without its good effect since it will help to eliminate much of the speculative features in real estate operation. They do not look for much improvement in the money market, for after present difficulties are removed England will require money to carry on industrial and commercial enterprises, trade being now of record proportions.

That considerable money is still available for real estate buys was shown this week when government land in the vicinity of Vancouver was auctioned. If there is a chance to make money, the purchaser is to be found, and these lots, some distance from the heart of the city, went as high as $2,750.

◆

The capital stock of the Cattanach Advertising Agency, Limited, of Winnipeg, has been increased from $20,000 to $50,000, by the issue of 300 shares of new stock of $100 each.

The British America Assurance Company has been licensed to transact hail insurance in Canada, in addition to the business of fire insurance for which it is already licensed. Mr. W. B. Meikle, Toronto, is chief agent for the company.

PRICES OF CANADIAN WOOL

How United States Tariff Changes Might Affect Them —Views and Statements of a Toronto Dealer

An interesting discussion as to how free trade with the United States would affect the price of Canadian wool is sent to The Monetary Times by Mr. John Hallam, the well-known Toronto wool dealer. The United States does not produce all the wool she requires for domestic consumption, and, while she exports a quantity of wool to other countries, there are some grades that she requires that are produced in Canada and other countries, and which she is forced to import.

"In 1911," says Mr. Hallam, "there was produced in the United States 318,547,900 pounds of wool, and during the same year, under a protective tariff amounting to about twelve cents per pound, they imported about 190,000,000 pounds of wool. The tariff, acting as a barrier to the importation of this commodity, and had a tendency to raise prices on wool in the United States, the excess being paid by the ultimate consumer, the people. This artificial barrier is about to be removed, and provide for a more free and uninterrupted commercial intercourse between these two great nations. Anything that tends to remove barriers to commerce must be of a certain advantage to the exporting as well as to the importing country. That the removal of the tariff on wool will give Canada a great market that has been practically closed to her is shown by comparing the export of 442,654 pounds of Canadian wool to the United States during the fiscal year of 1912, while the tariff was in force, with that of 3,851,432 pounds in 1896 and 7,499,949 pounds in 1897, when there was no duty upon wool entering the United States, as is shown on page 570 of the report of the Dominion Department of Trade and Commerce for 1912.

Tariff and the Wilson Bill.

"In order to obtain an idea of the effect the removal of the tariff at present will produce, let us examine the effect on prices in the United States and Canada before and after the removal of the tariff under the Wilson Bill. On August 1st, 1892, while the tariff was in force, the Boston quotation for Ohio fine unwashed wool was 20¾ cents, while in Toronto on the same date unwashed wool was quoted at 10 cents. On August 1st, 1896, after the tariff was removed, the same wool was quoted at 12 cents in Boston, and on the same date it was quoted at 11½ cents in Toronto, so you can see that the prices were practically the same after the tariff wall had been removed.

"At present, in anticipation of the removal of the tariff, the Boston quotation on Ohio fine, unwashed wool is 21 cents, and dealers in the United States are quoting the prices paid for wool there last year, although the prices on wool in England, Canada, and the world's markets have advanced about 15 per cent. over last year. The trading in the United States is light and prices have declined to a free wool basis in anticipation of the removal of the tariff, while the prices in Canada have advanced, so that the quotations for the same grade of wool in the United States and Canada at the present time are practically the same.

Question of Grades.

"As is well known by all persons engaged in the different branches of the woolen industry, there are many grades and classifications of wool, depending on the different varieties of sheep and their environment, each class of wool having its particular use in the trade, adapted to the particular quality and kind of goods to be manufactured. For this reason no country produces all the grades of wool which are best adapted to all the uses to which wool is put; hence each country exports its surplus of a particular grade and imports the grades of wool which it requires to manufacture its products to the best advantage. This explains the reason for the exporting of 1,196,924 pounds of wool from Canada during the fiscal year of March 3rd, 1911 (416,166 pounds being exported to the United States), while during the same period 6,422,396 pounds were imported into Canada (876,406 pounds being imported from the United States), according to the report of the Department of Agriculture of the Dominion of Canada in their publication, entitled "The Sheep Industry of Canada, Great Britain, and United States," page 162. This shows that we imported 5,855,472 more pounds of wool into Canada during that year than we exported, and when we take this amount in connection with approximately 11,000,000 pounds which is produced in Canada, it gives an idea of the great importance the manufacture of woolen goods is to the Dominion.

Regarding Market Conditions.

"There is a wrong impression prevailing among some growers and dealers, that in case of free trade with the United States, that Canada would have that market practically to itself. This is wrong, as the United States in 1912 imported 193,400,713 pounds of wool, which is about seventeen and a half times the total production of wool in Canada, and in 1894, when the Wilson Bill went into effect, removing the tariff from wool, as an example to show that other nations are alive to the situation, and are ready to take advantage of all opportunities to expand their trade at the earliest possible moment, a vessel laden with wool lay outside Boston harbor for three days, waiting for the time to arrive when the duty would be removed and she be enabled to land her cargo on a free trade basis.

"At present, some woolen mills in the United States are buying on a hand-to-mouth basis, others have already closed down, while others are reducing their force and output, waiting to see what Congress will do with the woolen schedule before making up a line of goods. While a tariff bill has passed the House of Representatives, the real fight has just commenced, and it will probably be several months before the bill will finally be acted upon by Congress and the matter definitely decided. In the meantime, great pressure is being brought to bear upon Congress to defer the time that the tariff bill will go into effect until January 1st, 1914, to enable the dealers and manufacturers of that country to dispose of their stock of wool and woolen goods before the new schedule shall take effect. If Congress acceeds to their demands, the tariff barrier will still stand until that time, and a large majority of the Canadian clip of this season will be disposed of in the ordinary course of trade before the markets of the United States are opened to Canadian wool.

Open to all Buyers.

"With the tariff removed, with the world's production of 2,952,782,985 pounds to draw upon, with the normal production and consumption of wool in other countries, with the markets of the world open to all buyers, there cannot be any great change in prices of wool in countries outside of the United States on account of the removal of the tariff, and Canadians will have to be satisfied with receiving the preference over other nations in the trade with the United States on account of their proximity to the American markets, with prices practically the same as at present, subject only to the usual fluctutation in the world's market occasioned by the universal law of supply and demand."

The Monetary Times would be glad to have the comments of its readers, more particularly interested in wool, regarding the views and statements of Mr. Hallam.

◆

BRITISH LIFE ASSURANCE BUSINESS

During 1912, new life assurance business effected by the ordinary British companies consisted of 245,137 policies, for a total of £49,769,241, within the United Kingdom, and 19,886 policies for £8,231,890 outside. The decrease in new business inside the United Kingdom as compared with the previous returns amounted to 2,478 policies for £3,905,478, but the other business increased by 602 policies for £487,152. The largest business was done by the Prudential, who secured 60,012 new policies for a total of £5,396,721. Industrial companies established within the United Kingdom made returns showing 7,907,177 policies for £76,506,272, while companies established elsewhere did new business in these islands amounting to 6,548 policies and a total of £2,606,960 assured.

The summary of the revenue accounts shows that the ordinary companies in the United Kingdom had a total life assurance fund at the beginning of the year of £348,209,716, and at the end, £359,775,216, an increase of £11,565,500. The income from premiums was £29,703,217, and from annuity business, £2,271,467. The claims were £22,557,498, the surrenders, £2,404,180, and the annuity payments, £2,567,360. Management expenses are put at £2,435,088, and shareholders' dividends at £476,624. The figures generally represent increases with the exception of the income from annuities, commission, and the dividends (which fell £12,067). The life assurance funds of the industrial companies increased from £46,284,974 to £49,240,823, and that of companies outside the United Kingdom from £410,754,416 to £431,986,161. Three of these companies—the New York (£138,363,760), the Mutual of New York (£119,014,706), and the Equitable of the United States (£102,219,122)—have life insurance funds running into nine figures, as compared with that of the biggest English company, the Prudential, with £43,050,370.

The number of life assurances in force is given as: Ordinary companies, 2,968,398 for £827,137,470; industrial companies, 35,475,381 for £353,109,702.

◆

Montreal and Eastern Ontario interests have completed the re-organization of the Napanee Brick and Tile Company, Limited, taking over the old plant of the Whittington brickyard which has supplied the building trade in the Bay of Quinte district. The new concern is capitalized at $100,000. The directors of the company will be Messrs. F. M. Young, Picton, Ont.; John L. Madill, Napanee, Ont.; C. S. Madill, Montreal; G. R. Wright, Kingston, and M. E. Madole, Napanee.

INDUSTRIAL BONDS AS INVESTMENTS

Points to be Investigated—Staple Industries versus Luxuries—Net Earnings

As in any other investment, the objects to be attained by an investment in industrial bonds are, in the order of heir importance, the safety of the principal, regularity of ncome and amount of yield, writes Mr. Oscar Newfang in he Bankers' Magazine.

The safety of the principal depends primarily upon the margin in the value of the property pledged over the amount f the bond issue; or, as it is usually called, upon the equity. Among conservative lenders upon bond or mortgage, it is ustomary to expect a minimum pledge of property worth about twice the amount of the bond issue, although choice properties may safely be bonded up to sixty per cent. or ixty-five per cent. of their value. The prospective purchaser f a bond should, therefore, first ascertain the total amount f the issue which he contemplates buying, and should know upon what property it is a lien, and the value of that property, which (as stated) should be at least twice the amount of the bond issue. If there are prior liens upon he property, they must be deducted before the ratio f property value to the bond issue is determined; but in uch a case the investor in a junior issue takes the addiional risk of a second mortgage holder; that is, the prior ien must first be satisfied in full before he will obtain anyhing whatever.

Regularity of Income.

The second requirement of the bond buyer, regularity of ncome, depends mainly upon the margin of net earnings above interest requirements. The fluctuations of income in an industrial corporation are apt to be wider than in a railroad or public service company, and the careful investor demands a minimum average income for a period of years of at least twice the interest charges on his bond issue. He also prefers the bonds of companies that provide a safe surplus account to those of companies that pay out in dividends the entire or nearly the entire earnings above interest charges.

In making a bond investment it is well to remember that over a long period of years the regularity of income is greater for a staple industry than for a luxury. It must also be noted that certain industries, such as coal or other mining, lumbering etc., exhaust their resources by the very nature of their operations, and such properties are rarely desirable as bases for bond issues. Other industries depend, more or less, upon artificial conditions, such as tariffs, etc., for their prosperity, and the regularity of their earnings is for that reason less certain than that of industries which rest wholly upon natural conditions of trade. The bonds of the former are, therefore, not so safe an investment as those of the latter class.

In determining the net earnings available for the interest charge of a bond issue, the policy of the corporation in charging off an adequate amount of its gross profits for depreciation of its plant is a very important factor. If this is not done, a company may show a handsome margin of earnings above fixed charges, and may pay most of the amount to stockholders as dividends, but when the bonds mature it will be found that the plant has depreciated so greatly that its value is much less than the amount of the bond issue. The proper percentage to charge to depreciation, of course, varies in different industries; but the best practice seems to be to make an annual charge of ten per cent. against machinery and five per cent. against real estate. A well-managed corporation ought to appropriate to the upkeep of its plant a part of its earnings sufficiently large to maintain the plant in full efficiency; or, better still, to improve its productiveness. In order to judge an industrial bond intelligently, both the amount charged to depreciation and the amount of replacements and improvements should be known. Otherwise it is difficult for an investor to know that the property is properly maintained.

Twice As Large As Current Indebtedness.

The last of the principal financial factors determining the regularity of income on an industrial bond is the amount of working capital possessed by the corporation. It is a generally accepted principle that the safe operation of an industry demands a quick or circulating capital twice as large as the company's current or floating indebtedness. To operate with a much narrower margin endangers the solvency of the corporation in times of financial stress, and thus adds an element of uncertainty to the corporation's continued operation and the continuous payment of its interest charges. The working capital should be large enough to operate the plant to full capacity, and as a rule the larger the ratio of circulating capital (that is, capital which is being turned over at a profit) to the plant (that is, capital which is diminishing by depreciation) the stronger the corporation may be regarded and the more desirable its bonds will be as an investment.

The provisions for a sinking fund made in a bond issue must also be taken into account in judging the bond

NEW YORK IS MAKING OUR DEPRESSION

But the Signs in Canada Are Good — What the Bankers Say

What is all this talk in New York about a coming trade depression in Canada? There appears to be an organized effort there to send abroad word of a supposed impending crash. But Canadian bankers in New York are wrestling with the doubtful views expressed in certain quarters on the business outlook in Canada. "They are inclined to scout the alarmist talk," says the Wall Street Journal, "that the country is on the verge of a pronounced trade recession as a sequel to the rapid expansion characterizing the last half dozen years or so. Commercial transactions, by and large, they affirm, are conducted on safe and conservative lines, thanks, for one, to the vigilance of the banks, with their network of branches spreading over the land, which keep them in close touch with economic developments.

Money Is Tight.

"Money is tight in Canada, in keeping with conditions prevailing the world over, and borrowers are paying 6 per cent. for loans. No one, however, who can prove a legitimate need of capital, is being turned away. Naturally, in the present state of the market, lenders are discouraging any extension of commitments and are scrutinizing narrowly all applications for accommodations. Requests for loans on the security of inflated real estate are given little consideration.

"It is not deemed likely that this denial of capital to weak speculators will induce any widespread and drastic liquidation in real estate, and cause the collapse of its value. Undeniably the rate of its appreciation has received a check, and in many sections prices have suffered actual declines. But, it is pointed out, the tremendous influx of immigrants, with thrifty and settled ways of living, is helping to sustain values. Besides, those in possession of a good deal of the newly-opened land are people of means, who are threatened with no financial embarrassment, which would force them to dispose of their holdings before a turn for the better sets in in the real estate market.

Capital From Immigration.

"Stress is laid by those who indulge in gloomy forebodings over the situation on the huge trade balance which Canada is rolling up against herself. In the past four years the imports have annually exceeded the exports in the neighborhood of a quarter of a billion dollars, which adverse balance is undoubtedly absorbed by external borrowings of capital. But the point is made that due weight is not given to the important fact that 400,000 people, who are far from being in needy circumstances, are yearly added to the population. It is conservatively estimated that each of these immigrants brings with him $500 in cash on the average. On this basis the country receives every year from this source an aggregate of $200,000,000. It is maintained, therefore, that she cannot be accumulating as vast a foreign indebtedness on balance as would appear simply from the record of her commodity imports and exports.

"Of course, her capital borrowings from Europe and the United States remain. In this, as it was when our own country was in its early development stage, Canada is building up a debt for future generations, perhaps, to pay off. It is figured that we owe Europe in this way something like $7,500,000,000. In and of itself this is not a sign of bankruptcy or of poverty."

◆

BRANDON LINKS UP WITH ITS PORT

For many years the Canadian Pacific Railway had only one track between Brandon and Fort William, its port on Lake Superior. Last summer a second track between the two cities was completed, and the company recently announced to the Railway Commission that they intend to lay two more tracks from the progressive Manitoba city to Fort William, making a four-track system between that city and the Lake Superior port. The Canadian Pacific Railway will be one of three Canadian railway systems connecting Brandon with the lake ports of Fort William and Port Arthur, while the Great Northern Railway runs from Brandon to Duluth. The future importance of Brandon as a railway centre is obvious.

Brandon's westward connections are also good. When the Grand Trunk Pacific and Canadian Northern Railways are both completed to the Pacific coast, Brandon will have four railway systems connecting it with Pacific ports, the three Canadian transcontinental railways and the Hill system, which already connects Brandon with Vancouver, British Columbia, and Seattle, Tacoma, Portland and Everett on the Pacific coast of the United States. These four systems have many branches, so that Brandon has connection with every part of Western Canada.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Duluth-Superior Traction Company.—Gross passenger earnings of the Duluth-Superior Traction Company for the third week in May were $23,684, an increase over the same week last year of $2,120.

Twin City Rapid Transit Company.—For the second week of May the earnings of the Twin City Rapid Company were $160,578, an increase over the corresponding period last year of $9,440, or 6.25 per cent.

Canadian General Electric Company.—The Canadian General Electric Company, Limited, who own and control as subsidiary companies the Canada Foundry Company, and the more recently acquired Canadian Allis-Chalmers, Limited, have decided to consolidate the selling organizations of the two latter companies, dropping the name "Canada Foundry Company, Limited," and conducting the selling organizations of both companies under the name of "Canadian Allis-Chalmers, Limited."

Nova Scotia Car Company.—The Nova Scotia Car Works directors have decided to issue $200,000 of additional first preferred stock. Subscriptions are to be sent in by June 20th, and payments are due July 1st. The stock is offered to holders of the ordinary stock at par with six per cent. commission, making $94 net. The present output of the works is stated by General Manager Brown to be ten steel cars daily, and he says in the circular that he expects a turnover for the year of $2,200,000.

Toronto Paper Company.—Shareholders of the Toronto Paper Company at their annual meeting approved the financial statement for the past seven months, which showed earnings of $80,973 at the rate of 14 per cent. on the capital. On this basis the earnings for the year would be over $138,000. The directors re-elected were: Messrs. G. P. Grant, T. H. Watson, Rev. Dr. William Briggs, R. S. Waldie, R. A. Lyon and R. J. Ward. Mr. Albert Brown was elected to succeed his father, Mr. Richard Brown, retired.

Moose Jaw Electric Railway Company.—The gross receipts of the company amounted to $77,996 for the past year; 1,607,770 passengers were carried. The assets of the Moose Jaw Electric Railway are placed at $573,367, of which $570,128 is in plant, property and equipment, and the balance of $2,239 is in accounts receivable. The liabilities are: capital stock (paid up), $480,271; bills payable, $15,359; accounts payable, $22,581; and a profit and loss surplus of $15,359. The company's officers and directors are: president, Mr. A. A. Dion; vice-president, Mr. Newton J. Kerr; secretary-treasurer, Mr. D. R. Street, and Messrs. E. J. Daly, E. O'Connor, T. Frank Ahearn, P. B. Mellon, A. H. Dion and Charles E. Armstrong.

Toronto Street Railway.—Mayor Hocken has intimated that he will attempt to get Sir William Mackenzie to submit any agreement that may be reached to the shareholders of the Toronto Railway Company before a plebiscite is taken from the ratepayers. It is pointed out that Sir William Mackenzie has not offered to sell the stock of the Toronto Railway Company. That must remain in a corporation because the company has other investments than those represented in the tramway. With a capital of $15,000,000, the Toronto Railway Company owns a controlling interest in the Toronto and York Radial Railway Company, the Toronto Power Company, the Electrical Development Company, and the Toronto Electric Light Company, which, combined, have a capital of over $15,000,000.

Consolidated Mining and Smelting Company.—The Consolidated Mining and Smelting Company of Canada, Limited, ore receipts at Trail smelter for week ending May 16th, and from July 1st to date, in tons:—

	Week end May 16th.	July 1st to date.
Company's mines—		
Centre Star	3,199	140,005
Le Roi	901	43,212
Sullivan	618	29,151

Other mines	1,313	73,702
Total	6,534	293,929

Canadian Northern Express Company.—The Canadian Northern Express Company reports to the United States interstate commerce commission, for March and nine months, compared as follows:—

	1913.	1912.	Changes.	
Total receipts from op.	$ 65,810	$ 47,996	Inc.	$ 17,813
Express privileges	25,512	18,576	Inc.	6,935
Total operating rev.	40,297	29,419	Inc.	10,877
Total operating expense.	30,467	15,865	Inc.	14,602
Net operating rev.	9,830	13.554	Dec.	3,724
Taxes	631	540	Inc.	91
Operating income	9,198	13,014	Dec.	3,816
Nine months:				
Total receipts from op.	$693,169	$437.390	Inc.	$255,778
Express privileges	269,959	169,456	Inc.	100,503
Total operating rev.	423,210	267,934	Inc.	155,275
Total operating expense.	269,329	144,924	Inc.	124,404
Net operating rev.	153,880	123,009	Inc.	30,871
Taxes	4,421	2,891	Inc.	1,530
Operating income	149,459	120,118	Inc.	29,341
Mileage, steam roads	5.741	4,022	Inc.	1,719
Mileage, other lines	22	22		......

The Porto Rico Railways Company, Limited.—The comparative statement of earnings for April, 1913, shows following results:—

	1912.	1913.	Inc. or dec.	Per cent.
For April—				
Gross	$71,418.48	$70,214.03	—$1,204.45	—1.68
Net	30,843.47	33,291.55	+ 2,448.08	+ 7.94
For four months—				
Gross	293.755.39	290,097.93	— 3,657.46	—1.25
Net	136,452.60	135,452.40	— 1,000.20	—0.73

Brazilian Traction Company.—According to the Wall Street Journal, Canadian interests, who have been following Brazilian Traction ever since the stock was listed, have been trying to find out why the London syndicate should regard Brazilian Traction so favorably as to take over 10,000 shares of the common stock. The conclusion they have come to is that the syndicate which underwrote the new preferred issue of Brazilian Traction has also made arrangements to purchase the large block of common on the practical assurance that the dividend on the common would be increased before the end of 1913 to a 7 per cent. basis, which would result in the stock selling at 115, at least.

At this price they would have a profit of 20 points from 95, which is the price paid on the recent accumulation, and this profit would bring down the price of their preferred to 80, or a little less, allowing for the commission that is to be paid for the placing of it.

Approximate gross earnings of the Brazilian Traction Company for the week ended May 17th were $451,198, against $394,682 in the same week last year, an increase of $56,516.

The April statement of earnings and expenses of the Brazilian Traction Company shows net profits slightly less than in March. Gross earnings for the month are $1,933,317; operating expenses, $904,154, and net earnings, $1,029,163. Net earnings are increased by $97,994 over those of April, 1912. Aggregate net earnings for the first four months of 1913 are $4,093,298, an increase of $627,414 over the same four months of last year.

Maple Leaf Milling Company.—The annual statement of the Maple Leaf Milling Company showed net earnings for the year ended March 31st of $440,393. Interest to banks on direct advances was $134,604; dividends on preferred stock were $175,000, and the balance is carried forward for $241,884. Grain, etc., on hand amounted to $1,858,285, as compared with $2,230,407 a year ago. Bankers' advances were $1,988,547, against $2,050,236 in the previous year.

Particular attention is being paid to establish the company's grades of flour in foreign markets, and it was the intention to pay more attention to foreign trade than to domestic, remarked Hon. D. C. Cameron, president of the Maple Leaf Milling Company, at the annual meeting.

A short time ago contracts were let with the Allis-Chalmers Company, Milwaukee, for machinery, which will increase the capacity at Port Colborne from 4,000 to 9,000 barrels per day, stated Mr. Hedley Shaw, the general manager. We are also adding to our grain elevator forty new tanks, which will give us grain capacity at Port Colborne of 1,500,000 bushels, and this without adding to our liability. All the work will be completed and ready for the growing crop.

"On account of the great growth in Western Canada, and the probability that when the Panama Canal is open for traffic, some of our Western grain will find an outlet by the Pacific Coast, the directors have secured a valuable property in the city of Medicine Hat, consisting of about sixteen acres of land, and a supply of natural gas free, also exemptions, for the purpose of erecting a milling plant to take care of the Western business, and also to put the company in a position to do a trade in the far east."

CANADA'S TEXTILE MANUFACTURERS

Dominion Textile Company's Annual Report — Two Years' Results Compared—Extent of Operations

The annual reports of the various cotton companies, in hich Montreal is more particularly interested, have now een presented, the last of these reports being that of the ominion Textile Company, Limited, the annual meeting of hich took place on the 26th inst. The report bore out the xcellent showing made by the other cotton companies, the eports of which have already been presented.

It is generally accepted in commercial circles that the ndustrial condition of the country is most accurately reflect-d in the earnings of the iron and steel and textile manufac-uring companies. Further reference to the iron and steel ompanies is unnecessary at the moment. So far as the extile companies are concerned, the results add their testi-ony to the generally accepted claim that the year 1912 sur-assed all previous years in industrial activity within the ominion of Canada.

It is only a few weeks since the Canadian Cottons, imited, issued its statement, the earnings of the oncern being greater than in any previous year. The Do-inion Textile Company now reports a similar condition of ffairs.

hanges Shown in Comparative Statement.

Following are some of the figures extracted from the nancial statement for the year ending March 31st, last, to-ether with the increases or decreases in the different items s compared with the corresponding items of the previous ear:

The appended statement shows in concise form where he increases or decreases occurred in the various items as ompared with the corresponding items of the previous year. s a matter of fact, there was only one decrease either in eceipts or charges, this being of $15,000 in the rent and nterest account paid the Merchants' Cotton Company.

hanges in Dividend.

The amount of preferred stock issued is $1,911,000, that f common stock being $5,000,000. It will be seen, there-ore, that the earnings remaining for the payment of dividends after the various appropriations had been made and he fixed charges met was the equivalent of almost 30 per ent. on the amount of preferred stock issued. After the referred dividend had been paid, the amount remaining for he payment of common dividend was at the rate of 8½ per ent. The surplus carried forward after all the charges and dividends of the year had been met was the equivalent of ractically 3 per cent. on the common stock of the company. This would mean that the amount paid out in dividends would be 5½ per cent. for the year. It will be recalled that he dividend on Dominion Textile for many years was at the ate of 5 per cent. per annum, but that not long since it was ncreased to 6 per cent. As a matter of fact, the dividend during the first half of the past year was paid at the old rate and during the second half of the year at the new rate, making the rate paid out for the total year, 5½ per cent.

It will be observed that the company now has a surplus at the credit of profit and loss of practically $800,000, or the equivalent of about $16 per share of common stock issued. If this were deducted from the recent selling price of the stock, it would leave a price of about $60 a share, without the surplus.

The manner in which the surplus earnings for the various years has increased during the past few years, together with the total surplus, is shown in the following table:

Year.	Year's surplus.	Total surplus.
1908-09	$ 8,934	$457,173
1909-10	35,732	492,905
1910-11	37,105	530,011
1911-12	100,225	630,235
1912-13	149,723	779,959

In the statement of assets and liabilities appear the following items:—

	March 31, 1912.	March 31, 1913.
Raw cotton	$1,053,609	$ 753,252
Goods in process of manufacture	1,548,570	901,490
Cash	22,778	24,177
Accounts receivable	1,740,942	2,053,853
Supplies	292,154	295,082

Land, buildings, machinery, etc., are taken at $10,564,384, which is an increase of more than $500,000 for the year. Total quick assets amount to $4,070,854, as against $5,035,306 a year ago.

Liabilities and Operations.

On the side of the liabilities, the following are some of the comparisons:—

	March 31, 1912.	March 31, 1913.
Loans, commercial	$2,544,362	$1,817,046
Loans, special	912,188	673,163
Open accounts	241,038	294,938
Deposits	61,386	114,781

Altogether the quick liabilities amount to $3,256,479, as against $3,916,051 a year ago.

Sales for the year amounted to $9,824,101, this comparing with $9,038,463 the previous year, being an increase of $785,638.

At the present time the company is operating 10,237 looms, 459,786 spindles and employs over 7,500 hands. These figures compare with 9,335 looms, 427,533 spindles and 7,500 hands. The wage bill was $350,000 more than paid three years ago.

During the past year a new mill has been erected at Magog, adjoining the present cotton mill, and 500 additional looms have been installed in it. This addition to the plant is required for manufacturing grey cloths for use in the print works, owing to the increased demand now experienced for printed goods. The power to operate the machinery in this new addition is supplied by the electric power plant erected recently and owned by the town of Magog. Extensions also took place at the Mount Royal mill and the St. Ann's mills. All the Merchants Cotton shares have now been turned in and the "B" bonds become first mortgage bonds.

	Year ended March 31, 1913.			Comparisons with previous year.	
Manufacturing profits		$1,230,706	Inc.		$ 93,152
Dividend Dominion Cotton Company	$ 68,540		Inc.	$ 80	
Dividend Merchants Cotton Company	51,884			......	
		120,424	Inc.		80
Total income		$1,351,130	Inc.		$ 93,232
Rent and interest Dominion Cotton Co.	$359,110		Inc.	$13,935	
Rent and interest Merchants Cotton Co.	42,325		Dec.	15,774	
Rent Mount Royal Co.	165,000		Inc.	11,570	
	$566,435		Inc.	$ 9,731	
Bad debt account	12,290		Inc.	6,961	
		578,725	Inc.		$ 16,692
Net		$ 772,405	Inc.		$ 76,540
Interest on Dominion Textile bonds	189,286		Inc.	$ 1,131	
Interest on Montmorency bonds	27,000		Inc.	.....	
		216,286	Inc.		$ 1,131
Remaining for dividends		$ 556,119	Inc.		$ 75,409
Preferred dividends		131,396	Inc.		911
Remaining for common dividends		$ 424,723	Inc.		$ 74,498
Common dividends		275,000	Inc.		25,000
Surplus for year, forwarded		$ 149,723	Inc.		$ 49,498
Brought forward 1st April, 1912		630,236	Inc.		100,225
Total profit and loss surplus		$ 779,959	Inc.		$149,723

INVESTMENT OF LIFE INSURANCE COMPANIES' FUNDS

VII.

Points to be Considered in Investments—Bonds I.

By **M. P. LANGSTAFF, A.I.A., F.A.S.**

The last article dealt with points to be considered when investing in mortgages. The following points should be considered when bonds of any description are being investigated:—

1. Although there are certain fixed rules for proper guidance in selecting a bond, yet, in order to be analyzed correctly, every bond should be considered on its own merits, e.g., because a mortgage is a first mortgage does not guarantee its safety.

2. Do not assume a bond is safe because it is secured on part of a large railroad system, and "underlies" one or more issues of secondary bonds.

3. A bond that is listed on a stock exchange is not necessarily safer or of better quality on that account.

4. Security.—In some cases a bondholder is absolutely protected by the pledge of property—in which case he virtually holds a mortgage—while in other cases he is more or less dependent upon the success of the business. In the latter case consider:—

(a) The company's earning capacity over a period of years. (b) The margin of safety over a period of years as demonstrated by the surplus earnings, and the relation of such surplus earnings to gross, net, and fixed charges. (c) The financial stability of the company—working assets and working liabilities. (d) The character of the lien of the bonds. (e) The relative proportion of capital stock and bonds outstanding. (f) What is the company's attitude in the matter of publicity?

5. What rate of interest does the bond bear? Is it subject to taxation?

6. When does it mature? Caeteris paribus, buy short-time securities when prices are high, and the net return consequently small, and buy long-time securities when prices are low and the net return high.

Convertibility and Appreciation.

7. Convertibility.—How easily may it be sold if the owner wishes to sell on short notice, or converted temporarily by hypothecation?

8. Appreciation.—What are the chances of the value behind the bond appreciating? Increased security would mean an advance in the value of the bond. It should be remembered that the prospect of appreciating in value of any bond depends a great deal on the activity of the market for that particular bond.

9. Study the earnings, not only at the present times, but in previous years.

10. What is the personnel of the directors? Are those behind the concern experienced, conservative, and honest men? This point is a very important one. A well-managed mediocre company is often to be preferred to an institution which, while theoretically sounder, is controlled by an untrained or vacillating management.

11. Is there any danger of political entanglements?

12. What is the prospect of competition, and what effects might competition have?

13. It is very easy to be misled by the manner in which a corporation's books are kept. For example, investigate carefully whether too high dividends are being paid on the company's securities, or whether sufficient charges are being made for depreciation.

14. The object for which the company is equipped must be considered. Is it alive to the effect of competition and changing conditions? What is the present and probable future demand for its products or services? If the company is a local concern, and affected by the population and industries of the community, ascertain their extent and the prospects of their increase or decrease.

15. Has due care been taken to prevent over-expansion and inflation?

16. What is the general reputation which the company enjoys among persons competent to appraise its management and progress?

17. Has the company been established long enough to enable you to make a reasonably accurate forecast of its future success? How has it passed through those crises common to its scope and area of operation?

Government Securities and Municipal Bonds.

When Government securities are thought of, market conditions should be studied, and it should be seen whether the security is selling above or below its normal value.

As to municipal bonds, consider:—

1. Legality.—See that the debentures are valid and proper in every respect. The entire municipality should be liable for the debenture debt.

2. Inquire into the past financial standing of the municipality and its future prospects, the character of its administrators, and how previous obligations have been met. What is the character of the population? For example, bonds of a municipality where there are frequent strikes should be avoided.

3. Other points:—

(a) The "net indebtedness" and its ratio to the assessed valuation. (b) Value and character of municipal assets, and revenue, if any, derived therefrom. (c) Situation. (d) Industries.—If the success of a municipality depends largely upon one industry, e.g., the lumber business, its bonds are not of the best. Conditions would be changed, however, if the industry were based upon some physical characteristic of the place (such, e.g., as the presence of great and inexhaustible coal mines), which renders the industry permanent. (e) Population.—If there is any danger of a decrease in the population, leave the bonds alone. Consider the surrounding country and its resources. Stability of population is increased by diversity of industries, and a municipality which is a natural thoroughfare of commerce has a distinct advantage. (f) Taxation.—What is the assessment and debt per head and rate of taxation? Is this rate becoming burdensome owing to over-rapid increase in the debt? The community may be experiencing a boom, and its debts increasing along the same lines. (g) Is there a sound "sinking-fund" plan or other method established for the ultimate payment of the bonds, rather than "refunding" the indebtedness? (h) What is the nature and amount of the debenture? Is it straight or instalment?

4. What rate of interest does the debenture bear? This should be compared with the ruling rate of interest in the given locality. A municipality which sells its bonds at so low a price as to yield the investor an income materially in excess of the ruling local rate of interest on time money—taking the average rate of four or five years rather than that of one time—thereby concedes that its own credit is poor, unless there is some special explanation.

5. Municipal securities are bought either through bond houses or by direct tender to the offering municipality. The circulars of bond houses set forth with much exactness most things necessary to know and relieve considerably the task of investigation.

Industrials as Investments.

The following are the points relative to industrial bonds:—

1. Where the security behind the bond consists in part of real estate, such real estate being substantially in excess of the bonded indebtedness, the obligation practically becomes a real estate mortgage.

2. Failing this ideal condition, we must look into the net quick assets, composed of current assets less current liabilities. Current assets should be at least double current liabilities, and, except in the case where real estate holdings are considerable, should be at least equal to the amount of the bonded debt. This is an important consideration, when it is remembered that a large part of the assets behind a bonded indebtedness may be almost valueless in case of a foreclosure, e.g., the plant, machinery, good-will, patents, etc. Also, the very reasons which make a company unable to meet its interest on other obligations make it also a difficult property to sell. As a matter of fact, the truth of the statement that the ultimate safety of the bondholder lies in the ability of his corporation to earn interest and other charges finds its greatest substantiation in the case of industrial bonds.

3. Has the company a product in constant demand, and, therefore, a steady business with regular earnings?

4. Marketability.—Some industrial bonds are much easier to market than others, and it should be decided beforehand whether this feature is desired.

5. In buying industrial bonds, the dangers that might be in competition or tariff legislation must not be overlooked. Determine the likelihood of such, and to what extent the business would be affected thereby.

6. How would the earnings of the industrial be affected by business depression? As a rule, the earnings of an industrial company are more acutely affected by business depression than are even those of steam railways, and the margin of safety needs to be considerably greater.

7. An industrial company whose bonded debt exceeds 50 per cent. of its total assets should not be considered strong enough to render its bonds attractive—unless, of course, its earning power possesses exceptional stability. In ascertaining the assets and earning power, a period of years should be considered to allow for years of depression as well as for normal or prosperous years.

8. A company producing necessities of life which enter almost universally into consumption is in a better position than one which produces luxuries or specialties of any kind.

Public Utility Companies' Bonds.

To determine the safety of public utility bonds we must consider three influencing factors: physical, financial, and political.

2. As regards the franchise, consider its length and nature and the powers conferred by charter on the company

t is not generally considered wise to base a bonded debt n such an intangible asset as a franchise, even though hey may have a substantial cash value. Moreover, public utility corporations are particularly subject to government nd municipal legislations and interferences. Ascertain what ffect this may have on the company's earnings and prosperity. For example, where the attitude of the legislatures s strongly socialistic, a franchise depends for its value on he length of time it has to run, because there may be an gitation to reduce fares, or lighting rates, or otherwise to ffect a company's income.

2. Consider the physical condition of the property.

3. Examine the company as to its present and past inancial condition, and ascertain whether it has been run onservatively and successfully.

4. The character and progressiveness of the management of the company and of the community served, and he matter of fairness of rates, are all points that an investor hould consider when buying any public utility.

5. Competition.—This question is always important. Ias the public utility a "natural" monopoly of the field, or s competition easily created?

6. The size and character of the population must always e considered.

The following articles in this series have already appeared:—

(1) April 12th and 19th: The Importance of a High Rate of Interest.
(2) April 26th: Interest Earnings.
(3) May 3rd: Real Estate Mortgage Loans.
(4) May 10th: Bonds.
(5) May 17th: Stocks, Loans and Real Estate.
(6) May 24th: Points to be Considered in Mortgages.

VALUE OF LIFE INSURANCE

XIV.

Partnership Protection

By C. A. HASTINGS

When two or more men enter into partnership deeds are sually drawn up protecting each other against the possibility of anyone withdrawing from the firm, but when it omes down to protecting themselves against the one dissolver of partnership, death, what very few concerns have aken this protection, and what a very small proportion of hese have done so adequately. Life assurance not only elps to alleviate what cannot be prevented, but also steps n when the withdrawal of capital might hamper very seriously the credit of the firm.

The procedure is as follows: A policy is taken out on he joint lives of one or more partners, which matures at irst death. In the case of two lives, the premium on a Joint with Profit policy works out at about 3 per cent. at age 25 o 6½ per cent. at age 50. Of course, the premiums vary good deal, for one partner may be young and the other nuch older, or both middle-aged or both elderly, and so on.

olicies have Usual Advantages.

The policies have the usual advantages with regard to oan values, freedom from limitations, non-forfeiture regulations, and so forth, but some of the leading companies dd a clause whereby—in the event of dissolution of partnership—separate policies may be maintained pro rata by ach or any partner without further medical examination, nd, of course, at the premium at the age of entry. The est policy to take out is a participating policy with limited umber of premiums, for, at a given date, payments cease ltogether and the premiums accumulate bonuses until the olicy becomes a claim, or until it is cashed in.

or Business Purposes.

Although this type of policy is essentially for business urposes, it will be readily seen that it does protect the amily as well, when the necessity for business reasons has eased to exist, and I propose to explain it in my next article.

The following articles in this series have already appeared:—

(1) March 1st—How to become one's own master.
(2) March 8th—How depreciation of assets can be met.
(3) March 15th—How to borrow at a profit.
(4) March 22nd—The automatic production of capital.
(5) March 29th—How to redeem debentures.
(6) April 5th—Value of goodwill and how to preserve it.
(7) April 12th—How to protect capital in land, etc.
(8) April 10th—Short-term policies.
(9) April 26th—Endowment policies.
(10) May 3rd—Single premium policies.
(11) May 10th—The policy for the professional man.
(12) May 17th—A life policy as collateral security.
(13) May 24th—Lucrative investment.

CANADIAN BANKER GOES TO THE SENATE

Of the four new Senators, Colonel James Mason, general manager of the Home Bank of Canada, has most interest for the Canadian financial and business world. Colonel Mason is a prominent citizen and military man of Toronto. He is well known in Western as well as Eastern Canada, his bank having strong connections in the prairie provinces, and a large number of grain growers being shareholders of the institution.

The new Senator, whose appointment is generally popular, was born in Toronto on August 25, 1843. He was educated at Toronto Model School, of which he was head boy. After leaving school he entered the banking business, and later became managing director of the Home Savings and Loan Company, which afterwards was merged into the Home Bank.

SENATOR MASON.

Lieutenant-Colonel Mason is an outstanding military man, having served for three years in the Queen's Own Rifles during the Fenian Raid troubles. In 1882 he was gazetted Captain in the Royal Grenadiers. During the Northwest Rebellion he commanded the first company to cross the Saskatchewan at the Fish Creek engagement. At Batoche he was severely wounded. He became Lieutenant-Colonel in command of the regiment in 1893, and was second in command of the Canadian officers sent to the Queen's diamond jubilee in 1897. He was appointed to the command of the Fourth Infantry Brigade in 1899. He holds several military decorations, and is one of the founders of the Canadian Military Institute and the Empire Club of Toronto.

Messrs. A. M'Call, Mr. E. D. Smith, and J. J. Donnelly are to fill the remaining Senate vacancies.

◆

VISIT OF A PRODUCTION ENGINEER

Mr. Willis Bell Richards, of the firm of Gunn, Richards and Company, New York City, was a visitor at The Monetary Times office last week. Mr. Richards is well known in Canada as a production engineer, having been of valuable service upon many occasions to various departments of the Dominion government, as well as to many private corporations throughout the country.

The firm recently opened new offices in the Eastern Townships Building, Montreal, with Mr. H. Victor Brayley as manager for Canada. Mr. Brayley was formerly secretary of the Ottawa Branch of the Canadian Society of Civil Engineers, and held a government engineering position. Mr. James Newton Gunn, the president of the company, is one of the best known production engineers in the United States. He has been connected for many years as lecturer with New York University and the Massachusetts Institute of Technology. The firm employs over fifty trained engineers and also a number of expert accountants, who work in co-operation with the engineers in organizing the shops, offices, buying departments, etc., of industries of all types, in making appraisals and in scientifically analyzing production costs and power costs.

Mr. Richards was called to Canada by one of the leading Canadian capitalists to advise in regard to improving the organization, decreasing the running expenses and increasing the sales of two of the largest manufacturing concerns in the Dominion.

CANADA'S NEW COMPANIES

Paper Companies Merge—New Cement Firm—Many Loan and Investment Companies

Two large companies head the list of incorporations this week, viz., the Provincial Paper Mills Company, of Toronto, which company secures control of the original mill of the St. Lawrence Paper Company at Mille Roches, near Montreal, the Montrose Paper Company, at Thorold, Ont., where extensive improvements have recently been made, and also the Barber Paper and Coating Mills, and the Canada Coating Mills at Georgetown, Ont.

The other company is the Prince Rupert Cement Company, of Vancouver. Their capitalization is as follows:

Company.	Capital.
Provincial Paper Mills Company, Toronto	$5,000,000
Prince Rupert Portland Cement Company, Vancouver	1,000,000

Altogether one hundred and eleven corporations received charters, the total capitalization amounting to $15,708,300.

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province	No. of companies.	Capitalization.
Saskatchewan	25	$2,971,000
Alberta	23	1,860,000
Quebec	19	1,792,000
British Columbia	16	1,885,000
Manitoba	14	1,534,800
Ontario	12	5,490,000
New Brunswick	2	175,000
Total	111	$15,708,300

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Olds, Alta.—Home Realty Company, $500.

Duncan, B.C.—Hadwen Syndicate, $100,000.

Grouard, Alta.—Peace River Agencies, $10,000.

Lethbridge, Alta.—Atlas Coal Company, $50,000.

Yorkton, Sask.—Dominion Investments, $500,000.

McLean, Sask.—McLean Hotel Company, $20,000.

Taber, Alta.—Taber Industrial Company, $20,000.

Conquest, Sask.—Axness Bros. & Company, $50,000.

Halbrite, Sask.—Nordquist Bros. & Anderson, $10,000.

Kamloops, B.C.—Marcus Electrical Company, $15,000.

Medicine Hat, Alta.—Redcliff Park Company, $80,000.

Bassano, Alta.—Bassano Wine and Spirit Company, $25,000.

Bow City, Alta.—Bow City Car and Foundry Company, $500,000.

Moose Jaw, Sask.—International Linseed Company, $500,000.

Kerrobert, Sask.—Nicholson Herity Hardware Company, $15,000.

Weyburn, Sask.—Weyburn Storage and Cartage Company, $50,000.

Fernie, B.C.—South East Kootenay Development Company, $60,000.

Sedgewick, Alta.—Pythian Castle Association, of Sedgewick, $10,000.

Victoria, B.C.—British Columbia Mausoleum and Crematory Company, $250,000.

Vernon, B.C.—Vernon Brick Company, $10,000. British Columbia Distributors, $10,000.

Dauphin, Man.—Dauphin Investments, $40,000. H. F. Caldwell, W. Buchannon, D. Sutherland.

Humboldt, Sask.—Lux Amusement Company, $5,000. Landing Park Townsite Company, $50,000.

Streetsville, Ont.—Photo Specialty Company, $40,000. A. G. Robertson, J. J. Kew, Miss A. Lawrie.

Redcliffe, Alta.—Redcliffe Garage Company, $25,000. S. M. Knechtel Furniture Company, $100,000.

Prince Albert, Sask.—Weldon Townsite Company, $10,000. Carrothers Construction Company, $6,000.

Moncton, N.B.—Maritime Cap, $75,000, (furs, etc.). W. F. Ferguson, W. P. Walmsley, G. A. Robinson.

London, Ont.—McGrenere Brick and Tile Company. $40,000. W. M. McGrenere, M. P. McDonagh, F. Snell.

St. Romuald, Que.—St. Romuald Hardwood Flooring Company, $49,000. O. A. Gravel, P. Etchemin, L. Lemieux.

Cull Lake, Sask.—Burgess Patent Tire Company of Canada, $600,000. G. F. Sharp, P. H. Thomson, J. S. Tweed.

St. John, N.B.—Mckee Furnace Company, $100,000. J. T. Mckee, Union Point, Fairville; T. E. Powers, J. S. Tait, St. John.

Stratford, Ont.—Kastner, White and Bricker Glove and Coat Company, $50,000. B. F. Kastner, H. S. White, Mrs. M. Kastner.

St. Hyacinthe, Que.—La Compagnie Hydro-Electrique d'Aston, $60,000. T. D. Bouchard, A. S. Commeau, J. Bissonnet.

Calgary, Alta.—Jackson Water Supply Company, $50,000. Calgary Seventh Avenue Syndicate, $150,000. A. E. Hofues & Company, $50,000. Press Publishing Company, $100,000.

Sherbrooke, Que.—Sherbrooke Cigar Company, $50,000. F. R. Darche, W. J. McManus, E. D. Kelly. C. F. Olivier Company, $75,000, (dry goods). C. F. Olivier, E. F. Olivier, H. E. Olivier.

Quebec City.—Rimouski Brick and Terra-Cotta Company, $100,000. J. M. McCarthy, W. Price, G. H. Thomson. L'Imprimerie Populairie, $20,000. A. W. Dion, V. P. Bechard, A. J. Deguise.

Saskatoon, Sask.—Wards, $25,000. Saska Manufacturing Company, $200,000. Marshall, Sons & Company (Canada) $100,000. Northland Milling Company, $150,000. McNabb-Chubb Flour Mills Company, $30,000.

St. Boniface, Man.—Dowse Sash and Door Company, $40,000. F. R. Dowse, St. Boniface; J. Desourdis, St. Boniface; J. Wuckert, Sr., Winnipeg. Norwood Construction and Realty Company, $100,000. A. B. Desrochers, Winnipeg; R. A. Martel, P. Bissonette, St. Boniface.

Regina, Sask.—Canadian Financial and Land Company, $50,000. Victoria Rink Company, $20,000. Regina Hardware Company, $30,000. Business Exchange Company, $5,000. Regina Retail Merchants' Association, $5,000. Saskatchewan Gravel and Supply Company, $50,000. Roseland, $20,000. C. W. Sherwood Company, $500,000.

Edmonton, Alta.—Dominion Gravel and Dredging Company, $30,000. Edmonton Sons of England Building Association, $50,000. Wabamun Beach Company, $6,000. Edmonton Properties, $150,000. Ferintosh Gravel Company, $24,000. Edmonton Stock Farms, $300,000. Desilets & Company, $20,000. Great Northern Harness Company, $100,000. Capital Cigar Company, $10,000.

Vancouver, B.C.—Prince Rupert Portland Cement Company, $1,000,000. North Coast Electric Company, $25,000. Maple Club, $10,000. Harry Hooper's Auto and Taxi Company, $10,000. Skeena River Fisheries, $250,000. Steveston Canning Company, $10,000. Copper Hill Mining Company, $25,000. Arctic Creamery Company, $30,000. Fleck Timber Company, $50,000. North Pacific Development Company, $30,000.

Toronto.—Sulphide Chemical Company, $40,000. G. M. Kelley, J. D. Falconbridge, D. W. Cooper. Ladies Tailors Association of Toronto. W. Gold, M. Chaplan, D. Teich. Rose Coal Company, $40,000. A. Rose, H. Rose, N. E. Arnot. Cross Town Realty Company, $100,000. H. Riley, W. R. Anderson, J. F. MacGregory. H. M. Kipp Company, $40,000, (motor cycles) H. M. Kipp, H. W. Kipp, F. H. Lemon. Provincial Paper Mills Company, $5,000,000. G. H. Sedgewick, A. G. Ross, A. E. Langman. Hebrew Publishing Company of Toronto, $40,000. S. Goldenberg, A. Rabinowitz, H. Lapiner. Canadian Charcoal Company, $40,000. G. H. Gray, W. F. LeBarr, J. J. Gray. Instantaneous Cleansers, $60,000. A. P. Pousette, Toronto; C. Gray, New Madden, Surrey; G. Foulsham, Walhem Green, England.

Winnipeg, Man.—Canadian Farm Products and Trading Company, $600,000. C. S. Jennison, N. P. Ladd, F. B. Redmond. Bourdon Investment Company, $20,000. J. E. Robertson, C. N. Bourdon, F. C. Troupe. Eastern and Prairie Lands Investment Company, $200,000. C. W. Jackson, D. C. Philip, F. G. Warburton. Eastern Terminals of Canada, $200,000. C. W. Jackson, D. C. Philip, F. C. Warburton. Fort Garry Loan Company, $100,000. E. J. Stephenson, W. T. Pirt, V. Johnston. Real Property Investment Company, $100,000. F. C. Mighton, W. Drysdale, C. E. Simonite. Belcher & Company, $5,000, (general carriers). F. B. Belcher, E. J. Bingham, D. J. Flood. Central Investments, $49,800. C. Lang, B. W. Miller, H. Polson. Security Storage and Transfer Company, $50,000. I. M. Winslow, N. T. Macmillan, T. A. Irvine. Winnipeg Market Farms, $20,000. J. Calder, T. A. Vanvliet, R. H. Nunn. Winnipeg Swimming Club, $10,000. T. Cull, T. Boyd, P. T. Cox.

Montreal, Que.—Farmers' Trust Company, $50,000. A. ergne, C. Smith, E. Taschereau, Quebec City. St. Cathe Road Land Company, $150,000. G. I. McFaul, Brownsg; B. R. Poulin, L'Orignal; J. M. Dorion, Lachute. ninion Undertakers, $25,000. P. St. Germain, L. Guerin, P. Raymond. Montreal Daily Mail Publishing Company, ,000. C. Gaudet, E. W. Parker, S. C. Marson. Boileau lty Company, $45,000. E. Boileau, E. Benard, B. V. nery. Lockwood, Greene & Company of Canada, $20,000. E. Woodworth, A. B. Wright, St. Lambert; A. Charters, ntreal. Sherwood Estates, $50,000. A. H. Duff, W. A. rill, H. E. Walker. Financial Underwriters, $50,000. H. Ross, O. F. Shearer, F. Salmon. K. & R. Realties, ,000. W. W. Skinner, W. G. Pugsley, G. G. Hyde. rison-Valois, $25,000, (boots, etc.). W. J. ◆

SOUTHERN ALBERTA LAND COMPANY

The annual meeting of the Southern Alberta Land Comy, Limited, was held in London the other day. Majorneral Sir Ronald B. Lane, presiding, stated that comparing company's balance sheet with last year's, it was seen that issued capital stood at £700,000, the balance of options ing been exercised. "Our five per cent. debenture stock is increased to £690,000," he continued. "Share premium ount stands at £100,000, after writing off £19,541 9s. 3d. depreciation on investments and transferring £19,852 10s. to the credit of profit and loss account. We also have a erve of £25,000, which was referred to last year. Bills able and sundry creditors amount to £65,400 odd. We e a liability of about £51,400, representing the balance able on additional land purchased, and a liability to Canan Wheat Lands, Limited, under our guarantee for last r's dividend, amounting to £20,000.

"On the credit side our property of, say, 369,240 acres nds at £443,867. Options have been given, as mentioned our report, to Canadian Wheat Lands, Limited, on 56,000 es at $27.50 per acre, and to other parties on 25,000 acres $40 per acre for irrigable, and $27.50 per acre for nongable lands. Expenditure upon irrigation, surveys, and rks during the year amounts to £246,115, and the total der this head is now £836,818. Mr. Taylor's report, which s referred to at our last meeting, called for an expenditure $1,392,000, say, £278,400, excluding laterals, and of this al we are informed by Mr. Hays that about £65,000 to £70,- was spent during November and December last year, and refore figures in the present accounts. I may mention t during the year nothing has been written off on account the accident at the intake, and it is practically impossible state exactly what the figure should be, as advantage is ing taken of the opportunity to make various improvement the head works and in the system generally, as recomnded by Mr. Taylor.

"Sundry debtors, etc., amount to £127,000, and is made largely of the balance of purchase price due to us from nadian Wheat Lands, Limited, Investments, £83,346, and h at bank and in hand, £261,224, I think complete the b ce-sheet. In the profit and loss account we have the usual penses of administration, directors and trustees' fees, adtising, legal expenses, etc., and the provision of £17,500 dividend to Canadian Wheat Lands, Limited. You will see the balance-sheet that our liability to that company is £20,- , but the difference of £2,500 is repayable to us out of their ure profits. On the credit side land sales have been small, ounting to 2,880 acres. Early last spring, as you know, decided not to make sales, and after the accident to the ake our policy was to remedy the defects we then found, to nplete the irrigation system as soon as possible, and to ay any sales of land until we have practically completed our igation works. We are satisfied that such action will for re than pay any loss of interest, and will be productive of ch better results for our shareholders in the future.

LONDON MARKET IS QUIET

So Far as Canada is Concerned—Few Issues are Being Made

The London market, so far as Canada is concerned, is resting. Very few of our public issues were made during May. The reception accorded many loans was sufficiently poor to cool the enthusiasm of would-be borrowers. The only issues by Canada this month were as follows:—

Phœnix Bridge and Iron Works	£ 318,483
Amalgamated Land and Mortgage Company, of Winnipeg	102,917
City of Montreal	1,440,329
Canadian Car and Foundry Company	185,185
City of Victoria	482,870

The Columbia-Western Lumber Yards are about to issue in London $2,500,000 six and a half per cent. preference shares, guaranteed by the Canadian-Western Lumber Company.

Some Forthcoming Loans.

South Winnipeg Land Company, owners of Tuxedo Park; Canada Glass Company; a merger of the Alaska and other bedding Companies; Stanley Mineral Water and Malting Company, are negotiating loans in London, states Windermere, in a cable to the Montreal Star. The aggregate sum involved is $4,000,000, in seven per cent. preference shares and six per cent. bonds. The tendency is to harden the rates for industrial securities of this class.

A number of cities, not liking the appearance of the money markets, are financing their requirements by short term notes. It is difficult to trace these issues, many of them being kept private, but they are numerous. Calgary is issuing $2,000,000 short term bills.

Money is decidedly tight and Canadian borrowers in London may have to pay yet higher prices. If conditions should change favorably, there would be a long procession of municipal borrowers, especially.

Sounded a Warning.

At the bankers' annual dinner, last week, a warning note was sounded by Lord Faber and Sir Felix Schuster. Lord Faber said, in reference to the high terms now being paid by industrial borrowers: "You know that there are certain charges which no trade will stand. Let such charges get high enough in raw material and high enough in money, and you are going to have a debacle at some time."

The following issues have been listed: Province of Alberta, £1,000,000, fours; Calgary Power, 18,500 shares, $100 each; Canadian General Electric Company, $1,900,000, common; Grand Trunk Pacific, £2,000,000, fours; Port Arthur, £415,700, fives; Prince Albert, £102,700, four and a halves; Riordan Pulp and Paper Company, 10,000 shares, $100 each, sevens, and $1,500,000 sixes; Province of Saskatchewan, £1,000,000, fours.

◆

RAILROAD EARNINGS

The following are the railroad earnings for the week ended May 21st:—

	1913.	1912.	Increase or decrease.
Canadian Pacific	$2,663,000	$2,551,000	+ $112,000
Grand Trunk	1,069,065	928,883	+ 140,282
Canadian Northern	507,400	453,200	+ 54,200
Temiskaming & N. Ont.	37,507	31.823	+ 5,684

The net earnings of the Canadian Pacific Railway Company for April for the first time in many months show a falling off from those of the same month last year. Gross earnings were $11,750,913; working expenses, $7,805,836; net profits, $3,945,077. In April, 1912, net profits were $4,115,752. Accordingly the loss in net profits for April is $170,675. For ten months ended April 30th figures are as follows:—Gross earnings. $115,816,291; working expenses, $76,702,201; net profits, $39,114,090. For ten months ended April 30th, 1912, net profits were $35,771,125. The increase for ten months over the previous year in net profits is $3,342,965.

The following is a statement of earnings and operating expenses for the Canadian Northern Railway during April:—

	1913.	1912.	Increase.	From July 1st, 1912, to May 30th, 1913.
Gross earnings	$1,745,300	$1,608,100	$137,200	$18.583,200
Expenses	1,242,200	1,205,000	37,200	13,656,000
Net earnings	503,100	403,100	100,000	4,926,300
Mileage in operation	4,297	3,981	316	4,297

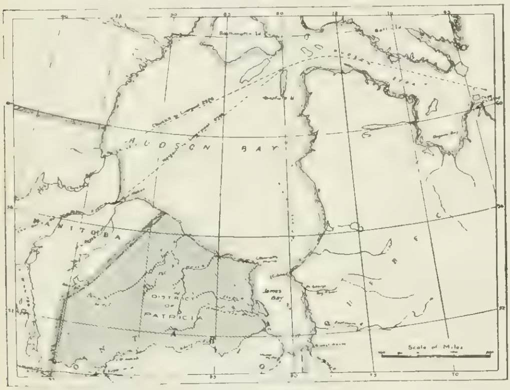
PORT NELSON WILL BE TERMINAL

Government Decides on Outlet for Hudson Bay Railway

Port Nelson is to be the terminal of the Hudson Bay Railway. In July, work will be commenced on the harbor development. These announcements were made in the House of Commons this week. The length of the railway line to be built from Saskatchewan River, at the Pas station on the Canadian Northern Railway, to Port Nelson, is 410 miles.

Linked With Ontario.

From the accompanying map, it will be seen that from Cochrane, the present terminus of the Temiskaming and Northern Ontario Railway, to Port Nelson, the railway can be extended in a line continuous with that of the part of the Ontario Government railway already constructed. It is hoped that mineral areas will be found in the more distant parts of older Northern Ontario and in the new district of Patricia that will justify the extension of the Ontario Government railway to Port Nelson. The people of Ontario will, in that event, possess a semi-transcontinental railway ending at a seaport.



On to Hudson Bay.

While the harbors in, at least, the southern part of James Bay are poor, it is likely that within a few years they will be utilized as terminals for one or more railways. Examinations are being made of the mouths of the Nottaway and the Rupert, and of the coast of the bay farther to the south and west.

Some Comparative Distances.

The distance from Port Nelson to Liverpool is 2,966 miles; Montreal, via the Strait of Belle Isle, is 2,761 miles, and via Cape Race, 2,927; New York, by the northern route, is 3,079 miles distant from Liverpool. Winnipeg, by the Canadian Pacific Railway, is 1,422 miles from Montreal.

Discussing the project in the House this week Hon. Mr. Oliver said the Government was not well advised in making Port Nelson the terminal until the cost of creating a harbor had been established. Owing to the shallow water in the harbor it would be necessary to dredge a channel for fourteen or fifteen miles. It would not be possible for vessels to navigate the channel in rough weather.

At Port Churchill, on the other hand, there was a good harbor, he contended, although not a large one. There was a twenty-foot channel leading to the harbor. Until the utility of the channel was definitely established he thought it would be unwise to make any great expenditure at Nelson.

Mr. W. M. German (Welland) said he hoped the minister of railways would not go ahead and spend too much without being sure of the project. He said he had always had doubts as to the ultimate success of this railway. He had been against the idea when the late government was in power, and was of the same opinion still.

◆

CANADIAN COMPANIES IN MEXICO

In Mr. P. Tamayo's remarks relative to Canada's trade with Mexico in the last issue of The Monetary Times, the word "harm" was inserted instead of "alarm." The sentence should read: "It seems that political disturbances have caused more alarm to them (Canadians) than to the rest of the world's traders."

REORGANIZATION OF PAPER MILLS

New Company Will Control Several Plants—Capital is Five Millions

To secure better marketing facilities and to increase the general production of all the mills, a reorganization of several paper mills has been effected. The Provincial Paper Mills Company, Limited, has been incorporated with the following capitalization:—

Common stock	$2,600,000
Preferred stock	2,400,000
	$5,000,000

This sum is not only sufficient to take over the properties desired, but leaves besides a substantial amount of treasury stock for future developments.

Will Acquire Companies.

The new company proposes to acquire the stock of the St. Lawrence Paper Mills Company, Limited, and the Barber Paper and Coating Mills Company, Limited. It is necessary to secure the majority of the stock of each company to make the plan operative, but already 80 per cent. has been secured

Through the new organization, the company secures control of the original mill of the St. Lawrence Paper Company at Mille Roches, near Montreal; the Montrose Paper Company at Thorold, near Niagara Falls, where extensive improvements have recently been made, and also the Barber Paper and Coated Mills, and the Canada Coating mill at Georgetown Ontario, near Toronto.

Will Own Several Machines.

The head office of the company will be at Toronto. The companies at the present time are under the management of Messrs. S. F. Duncan, I. H. Weldon, Geo. Copping, of Toronto, and T. A. Weldon, of Thorold, who have been prominently identified with the paper industry in Canada for some years.

There are six paper machines in the mills that have been taken over by the Provincial Paper Mills Company, and seven coating machines. The new machine which was recently installed in the mill at Montrose will be started in about two weeks. A large power plans has been erected at this place which is now furnishing power for the Montrose mill, and also the Interlake Tissues Mills Company, Limited, which started about two months ago. This mill is controlled by the interests owning the other mills, but it is not included in the organization.

Prominent Canadian interests will become identified with the new company.

◆

BUSY AT FORT WILLIAM

Fort William is almost too busy to tell of its activities Lake commerce is brisk in every line. An average of nearly 1,000,000 bushels of grain is being shipped from the Fort William elevators daily.

The receipts of coal continue heavy with prospects of the movement continuing during the summer months. Package freight is being brought to Fort William in large quantities. The passenger boats, too, are carrying capacity cargoes of merchandise. Large quantities of steel rails will be delivered in the local harbor. There is an average of from four to six boats there with rails every week. These are being shipped from the Soo, Sydney and Chicago.

Some idea of the proportions of the carrying capacity of vessels navigating the great lakes can be gained by the arrival in Fort William of the steamer The Sydney, Jr., of the Shenango Steamship Company's fleet, with a cargo of 26,000,000 barrels of soft coal, practically enough coal to supply the fuel requirements of the city of Fort William for a year. The Sydney is one of the largest vessels on the great lakes, is 590 feet long, has a 64 foot beam and a depth of 35 feet.

The latest grain report issued from the head office of the Grain Commissioners at Fort William, dated May 16th, states there were 18,288,571.97 bushels of grain in store at the terminal elevators in the twin cities, as compared with an amount of 13,628,588.17 bushels for the same period of last year. Grain receipts for the week were 4,442,688 bushels and shipments 5,015,374 bushels. There is a large number of vessels in the grain trade this spring. There are few, if any, idle vessels on the Great Lakes.

The W. H. Dwyer Company, Limited, have signed contracts for the erection of a 100,000 bushels elevator, fully equipped with drying and cleaning machinery, on the property recently purchased from Messrs. Graham and Horne on Island No. 2.

Headway is being made on the excavation at elevator "D" and builders are expecting to make a start shortly.

NEW STEEL PRODUCTS COMPANY

Another Industrial Amalgamation Formed—Will Have Capital of Two Millions

Several Canadian steel industries are to be merged as the Steel Products of Canada, Limited. The participating firms re the Gananoque Spring and Axle Company, Limited; the D. F. Jones Manufacturing Company, Limited, of Gananoque, nd the Dowsley Spring and Axle Company, of Chatham, Ont. The capitalization of the new company is as follows:—

Six per cent. bonds	$600,000
Preferred stock, 7 per cent.	750,000
Common stock	750,000
	$2,100,000

Companies Will Take Stock.

Seventy-five per cent. of the securities in the new company has been taken in lieu of cash by the holders of stock in he amalgamated companies, and that the rest will shortly be ffered to the public for subscription, by Messrs. Richardson nd Company, of Montreal.

Mr. W. T. Sampson, for many years manager of the Gananoque Spring and Axle Company, will act as managing irector of the new company. His long association with the ones Company and the Chatham concern, the latter of which was a subsidiary of the Spring and Axle Company, render him particularly well qualified to direct the Steel Products Company, and the future of the consolidation is looked upon as xceedingly bright.

As To Manufactures.

The Gananoque Spring and Axle Company has been engaged in the manufacture of steel springs and axles for upwards of fifty years, while the Jones Company has been in xistence for an equally long time, and is among the foremost oncerns of the Dominion manufacturing shovels and other teel specialties. The Chatham company is a comparatively ecent organization.

◆

TELEPHONE COMPANIES IN SASKATCHEWAN

Rural telephone companies are likely to multiply in Saskatchewan as the result of the new rural telephone act passed by the provincial government early this year. Bond houses will also be introduced to a new class of debenture, as the legislation permits the companies to raise funds for the construction of telephone systems by the sale of fifteen-year debentures.

In case five or more persons residing in any portion of the province desire to construct, maintain and operate a rural telephone system for their mutual benefit, they may present a petition to the minister asking for the organization of a company for this purpose.

The company's capital must not exceed ten dollars for each pole mile of line to be constructed, but with the approval of the government the capital may be increased from time to time if satisfactory reasons are given. The company's capital has to be divided into equal shares of $5 per share. A subscriber may take not more than four and not less than one share.

Every debenture issued by these companies under the provisions of the new act must comply with the following requirements:

(a) It shall run for such period not exceeding fifteen years.

(b) It shall not carry interest at a greater rate than eight per centum per annum.

(c) It shall be sealed with the corporate seal of the company and shall be signed by the president and secretary of the company;

(d) It shall be payable in equal annual instalments of principal and interest combined and shall have attached thereto coupons for the several instalments so payable which coupons shall be signed by the president and secretary of the company.

(e) It shall be registered by the department and countersigned by the minister.

More than a hundred rural telephone companies have written the Saskatchewan government for permission to organize.

◆

New Westminster ratepayers have approved by-laws aggregating nearly $600,000, as follows: street, $200,000; light, $40,000; waterworks, $45,000; schools, $55,000; sewers, $150,000; firehalls, $25,000; civic stables, $15,000; exhibition, $25,000.

GROWTH OF LAKE COMMERCE

Small Welland Canal is an Obstacle—Ore in Lake Superior Region

That Canada must do much to hold its lake commerce was apparent from the remarks of Mr. H. Coulby, president of the Pittsburgh Steamship Company, in an address to the American Steel and Iron Institute. He predicted that the growth of lake commerce will be just as great during the next twenty-five years as it has been in the past. The country tributary to Lake Superior is rapidly becoming populated and new business for water transportation is springing up every year. Large bodies of limestone have been found in the Alpena district on Luke Huron, and this material is now being shipped as far east as Buffalo and also to Chicago and Duluth.

"The Dominion of Canada," said Mr. Coulby, "is very rapidly contributing to our lake commerce. The Northwestern Provinces of Manitoba, Saskatchewan and Alberta in the year 1900 produced 43,250,000 bushels of grain. In the year 1912 their production was 453,000,000 bushels, and it is to-day taxing the railroads to their utmost limit to get this product to the consumer. In fact, in 1911 and 1912 some of this grain was spoiled on account of lack of railroad facilities to transport it. The nearest and cheapest way to get this grain to the consumer is via the Great Lakes to Buffalo, and thence by rail to the seaboard for export.

Connected by Welland.

"Lake Erie and Lake Ontario are connected by a system of locks in the Welland Canal. These locks will not accommodate a boat longer than about 265 feet, on a 14-foot draught, which restricts commerce to Lake Ontario to boats of this size. Appreciating the necessity of clearing away this obstruction, the Dominion Government has, I understand, appropriated $200,000 for a preliminary survey for a contemplated improvement to cost $50,000,000 completed, with which it is proposed to straighten and deepen the Welland Canal, reduce the number of locks from 25 to 7, and give 30 feet of water for navigation through the canal available for ships 300 feet long and 80 feet wide.

"Our own Government, (the United States), with great forethought, has realized that every dollar spent in widening and deepening these canals connecting the Great Lakes brings the producer and consumer just that much closer together. And I firmly believe that in years to come either our own Government or the Dominion Government, or probably both working together, will carry on the work of deepening the channels connecting Lake Erie with Lake Ontario, and Lake Ontario with the Atlantic Ocean, until the day will arrive when ships will load cargoes of grain at the northwest end of Lake Superior and carry their cargoes to the markets of the Eastern Hemisphere.

Estimates of Iron Ore.

"Estimates have been made of the amount of iron ore that is available in the Lake Superior district, but with new developments each year and the necessity of using the leaner ores, I do not believe there is any man living who can make an estimate that is worth anything of the available tonnage of ore that will eventually be brought down from the Lake Superior district before the ore bodies are exhausted. The other day I was speaking with a practical mining man who had spent his whole life in the iron mines of the Lake Superior region, and it was his opinion that on the older ranges there would be large tonnages of ore found at greater depth. No estimate has been made of the tonnage of what is called low-grade ore that would not become marketable until some of the richer ores are exhausted, but the known area of the ore-bearing formation of this so-called low-grade material is very large and will eventually come into its own."

◆

SASKATCHEWAN'S FIRE DEPARTMENT.

With the idea of placing a number of matters which relate to fire protection and questions of health, under the Fire Department, Mr. R. J. McLean, provincial fire commissioner, has drafted a by-law, copies of which have been sent to the four principal cities of Saskatchewan.

The proposed by-law will give the fire chief, or any officer of the fire department, the right to enter and examine any business building and premises; and all business buildings must be thoroughly inspected by the chief or his officers or men at least four times a year. If he finds rubbish there, or obstructions of any kind likely to hinder the firemen in their work in case of a fire, he can order them removed, and if the owner does not comply within a reasonable time, he can be fined from $10 to $50.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Montreal, Que.—18 Brunswick Street. Loss unknown. Cause, oil stove.

Brantford, Ont.—May 20.—Scarfe Varnish Factory. Loss $7,000. Cause sparks.

Forest, Ont.—May 25.—Mr. H. J. Pettypiece's residence. Loss slight. Cause unknown.

Calgary, Alta.—May 26.—Mr. T. Burns' arena. Loss $35,000. Cause, supposed incendiary.

Cobourg, Ont.—May 22.—Mr. C. Glenn's barn, Percy Township. Loss and cause unknown.

Newcastle, N.B.—May 26.—Mr. M. Murphy's residence. Loss unknown. Cause, exploded lamp.

Ottawa, Ont.—May 19.—Mr. A. McA. Nulty's automobile. Loss $2,000. Cause unknown.

St. Catharines, Ont.—May 25.—O. Pee Chee gum factory. Loss $1,500. Cause unknown.

Moose Jaw, Sask.—May 19.—Dr. Harwood's residence, Beech Avenue. Loss $30. Cause chimney.

Inverness, N.S.—May 18.—Queen Hotel block. Loss $20,000. Insurance $6,000. Cause unknown.

Westboro, Ont.—May 16.—Mr. G. Leslie's cottage, Bluff Lane. Loss $1,500. Cause, overheated stove.

Scarboro, Ont.—May 20.—Mr. Glen Morgan's residence. Loss $5,000; insurance $3,000. Cause unknown.

Chamcook, N.B.—May 20.—Messrs. C. Reach and Roy Hatt's two buildings. Loss $9,000. Cause unknown.

Peterboro, Ont.—May 19.—Corner of London and Division Streets. Loss $100. Cause, defective chimney.

North Sydney, N.S.—May 20.—Baptist Church. Loss $9,000; insurance $4,000. Cause, supposed incendiary.

Saskatoon, Sask.—May 22.—Mr. H. H. Tomlinson's automobile. Loss $1,500. Cause, engine back firing.

Milton, Ont.—May 17.—Mr. C. Jarvis' barn at Boyne. Loss $6,000; insurance small. Cause, probably tramps.

Belleville, Ont.—May 25.—Mr. W. Donaghue's bungalow. Loss unknown. Cause, children playing with matches.

Quebec, Que.—May 22.—Mr. L. Dechene's boot and shoe factory. Loss $17,000, fully insured. Cause unknown.

Winnipeg, Man.—May 23.—Sunderland Construction Company shed. Clifton Street School. Loss $950. Cause unknown.

Ancienne Lorette, Que.—May 15.—Mr. E. Matte's residence, 2 cows, implements, etc. Loss $5,000; insurance, $1,000. Cause unknown.

North Vancouver, B.C.—May 13.—Mr. G. A. Hoswell's residence, Ninth Street and Boulevard. Loss unknown. Cause, defective chimney.

Selkirk, Man.—May 25.—Mr. Millidge's livery barns. Loss $4,000; insurance $2,800. Mr. Loxdal's bakery. Loss $1,300. Two stables, etc. Cause unknown.

Victoria, B.C.—May 17.—Victoria Paint and Paper Company, 852 Yates Street. Loss, contents $300, building $250. Insurance $3,000, Ontario Fire Insurance Company. 935 Moss Street. Loss $500. Insurance $3,500, Canada National Fire Insurance Company. Causes unknown.

New Westminster B.C.—May 12.—Mr. T. Butterfield's residence, 5th Avenue and 14th Street. Loss $250; insurance $1,000. Cause, defective chimney.

May 16.—Messrs. Grant Brothers' bakery, 3rd Avenue and 10th Street. Loss $500; insurance $2,000. Cause, spark from chimney.

Edmonton, Alta.—May 24.—North Edmonton hotel. Loss $135,000; a hardware store belonging to A. Priere, loss $8,000; the real estate office of J. C. O. Brier, loss $2,000; butcher shop, owned by Arthur Bryant, loss $1,500; restaurant owned by Thomas Flynn, loss $3,000; ice house belonging to the hotel, also the stables; a house occupied by J. C. McArthur, at the rear of the hotel; two shacks; dry goods and grocery store combined, owned by Mr. Priere, loss estimated to be about $7,000; pool room and the dance hall owned by Mr. Martel. Cause unknown.

Toronto, Ont.—May 20.—183 Royce Avenue. Loss $20. Cause, gas stove. 612 Richmond Street. Loss $25. Cause mice and matches.

May 21.—Messrs. M. Granastein and Sons' premises, 486 Wellington Street W. Loss $90. Cause, short circuit.

May 23.—Mr. Hancock's lumber mill, 1327 Bloor Street West. Loss slight. Cause, wood alcohol generated.

May 27.—211 Wilton Avenue. Loss unknown. Cause, defective wiring.

May 26.—669 Richmond Street West. Loss $50. Cause firecracker. Salvation Army premises, Wilton Avenue and Victoria Street. Loss unknown. Cause, supposed incendiary. Mr. C. Legge's residence, 261 Silverthorne Avenue, Earlscourt. Loss $400. Cause, children playing with fireworks.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

The following fires were adjusted by J. S. Rankin, Vancouver:—

Vernon, B.C.—May 5.—Royal Bank of Canada building. Loss on building, $580. Cause of fire, supposed tramps sleeping in building. Insurance, London and Lancashire building, $2,000.

South Vancouver, B.C.—May 10.—Mary Ann Scully's dwelling. Loss on building, $1,350; on contents, $900. Cause of fire unknown. Insurance, Protector Underwriters, building $1,200.

Kamloops, B.C.—Mr. Alex. Demorchi's dwelling. Loss on building, $30; on contents, $220. Cause of fire, sparks, building next door. Insurance, Royal, building $800; contents $400.

Britannia Beach, B.C.—May 5.—Britannia Mining and Smelting Company's saw mill. Loss on building, $7,500; on contents, $9,000. Cause of fire, sparks from boiler fire box. Insurance, Phoenix of London, building $5,000, contents, $5,000.

Vancouver, B.C.—April 22.—Mr. O. D. Lampman's dwelling. Loss on building, $205; on contents, $275. Cause of fire, sparks from building across street. Insurance, Liverpool-Manitoba, building $2,000, contents $3,000; Commercial Union, building $4,500.

North Vancouver, B.C.—May 21.—North Shore Drug Company, stores and rooms. Loss on contents, $200 drugs stock; on fixtures, $50. Cause of fire, coal oil stove. Insurance on contents, National General, $1,000; British Empire, $1,000; Equity, $1,000; Republic Underwriters, $1,000.

Castlegar, B. C.—April 6.—Edgewood Lumber Company's planing mill. Loss on building, $2,600; on contents, $7,000. Cause of fire, gasoline torch. Insurance, National-Hartford, $6,000; London and Lancashire, $1,000; Northern, $1,500; Royal, $1,500; Queen, $3,000; Guardian, $2,000; Western Union, $2,000; Scottish Union, $2,500; British and Canadian Underwriters, $2,500; Rochester German, $2,500; Agricultural, $2,500; Michigan Commercial, $3,000; Phoenix of London, $5,000—$35,000. The above amounts covered under schedule on whole plant, of which $2,000 applied on building destroyed and $6,000 on machinery, being a total loss.

Vancouver, B.C.—May 6.—R. H. Wall's dwelling. Loss on building, $1,300; on contents, $305. Cause of fire, spark from chimney on roof. Insurance, National Insurance Company, building $1,250; Phoenix of Hartford, building $1,350; London and Lancashire, contents $1,000.

May 15.—Isabel McGregor's dwelling, occupied by F. Page. Loss on building, $75; on contents, $360. Cause of fire, unknown—probably lighted match in clothes closet. Insurance, Liverpool and London and Globe, building $2,500, contents $1,400.

May 21.—Mr. Thomas Harvey's dwelling. Loss on building, $100; on contents, $120. Cause of fire, lighted match. Insurance, Montreal, Canada, $2,500 on contents; London and Lancashire, $2,250 on building.

ROYAL COMMISSION ON GEORGIAN BAY CANAL.

A Royal Commission will be appointed to investigate the commercial advantages of the Georgian Bay Canal project. Whether the Government will proceed with a twenty-two foot waterway from Montreal through to the head of the lakes via the Ottawa River and the Georgian Bay, or whether it will proceed to deepen the St. Lawrence Canal to a depth of twenty-two or possibly thirty-five feet will depend upon the report of the Commission.

FIRE MARSHAL'S POWERS EXTENDED

Among the bills passed by the New York legislature, was one requiring the filing of annual reports with the State Fire Marshal on the condition of local fire departments and wat supplies, with recommendations to increase their usefulness, extending the jurisdiction of the fire marshal to incorporated villages; requiring fire insurance companies to report fi losses monthly to the fire marshal, and providing that service of orders issued by the marshal may be made upon th owner and lessee, as well as upon the occupant.

Another bill provides that in the absence of any local ordinance, it shall be the duty of the assistants to the State Fire Marshal to inspect or cause to be inspected by the fire department officers or members, not less than twice a year in outlying districts, and four times a year in closely built portions, all buildings, premises and public thoroughfares, except interiors of private dwellings, for the purpose of ascertaining and causing to be corrected conditions liable to cause fire.

IMPERIAL BANK OF CANADA

Proceedings of the Thirty-Eighth Annual General Meeting of the Shareholders Held at the Banking House of the Institution in Toronto, on Wednesday, 28th May, 1913, at 12 noon

The Thirty-eighth Annual General Meeting of the Imperial Bank of Canada was held, in pursuance of the terms of he Charter, at the Banking House of the Institution, 28th May, 1913.

THE REPORT

The Directors have much pleasure in submitting to the Shareholders the Thirty-eighth Annual Report and Balance Sheet of the affairs of the Bank as on 30th April, 1913, together with Statement of Profit and Loss Account, showing the result of the operations of the Bank for the year which ended on that day.

The net profits of the Bank after making full provision for all bad and doubtful debts, for interest on unmatured bills under discount, and for payment of all Provincial and other taxes, amounted to	$1,125,971.61
being at the rate of 17.28% upon the average paid-up Capital, or rather, of 7.61% upon Capital, Reserve Fund and Undivided Profits, all of which sources of profit must, of course, be taken into the calculation in determining the actual percentage of profit earned upon Capital from the operations of the year.	
There was received from Shareholders by way of premium upon new stock (issue 1912) the sum of........	788,169.18
which, with the balance of Profit and Loss carried forward from 1912	1,022,787.88
makes a total available surplus as on 30th April of........	$2,936,928.67
This surplus has been applied as follows:—	
(a) Dividends have been paid at the rate of 12% per annum amounting to	$ 780,668.91
(b) Special contribution to Officers' Pension Fund, as per By-law No. 29	20,000.00
(c) Annual contribution to Officers' Pension and Guarantee Funds	7,500.00
(d) Transferred to Reserve Fund	1,000,000.00
(e) Written off Bank Premises and Furniture Account........	124,771.21
Balance carried forward to Profit and Loss Account, 1913	1,003,988.55
	$ $2,936,928.67

New Branches have been opened during the year:—

In Ontario—At Aurora, Fort Frances, Sparta, and a second sub-branch at St. Catharines.

In Saskatchewan—At McLean.

The Branch at Golden City (Porcupine) has been closed.

The desire of your Directors to establish the Pension Fund of the Bank upon a firm and substantial basis, and the advantages to the Bank which your Directors believe will accrue therefrom, induce them to ask your authority to grant a urther special contribution of $20,000 to the Fund. This sum will do little more than keep the Fund abreast of the robable requirements of a steadily-increasing number of employees and maintain a proper proportion of the one to the ther.

The Bank Act is undergoing its periodical revision by Parliament; several important changes have been made, dditional powers of a minor character have been granted, restrictions have been introduced and safeguards have been rovided by way of the establishment of a system of audit which will add to the strength and security of the Chartered Banks without interfering with legitimate sources of profit nor with the best interests of the Shareholders. It is intended that the new Act should come into operation on 1st July, 1913.

The Head Office and Branches of the Bank, now numbering 125, have been carefully inspected during the year, and our Directors have much pleasure in testifying to the faithful and efficient manner in which the staff have performed their espective duties.

The whole respectfully submitted.

D. R. WILKIE,
President.

38th Annual Statement, 30th April, 1913

PROFIT AND LOSS ACCOUNT.

vidend No. 88, for three months at the rate of 12% per annum (paid 1st of August, 1912)	$ 182,678.88
vidend No. 89, for three months at the rate of 12% per annum (paid 1st of November, 1912)	195,298.22
vidend No. 90, for three months at the rate of 12% per annum (paid 1st of February, 1913)	199,689.85
vidend No. 91, for three months at the rate of 12% per annum (paid 1st of May, 1913)...	203,001.96
	$ 780,668.91
ecial Contribution to Officers' Pension and Guarantee Fund	20,000.00

		$77,964,108.10

D. R. WILKIE,
General Manager.

E. HAY,
Assistant General Manager.

THE PRESIDENT:—Gentlemen, I have very much pleasure in rising to move the adoption of the Report. It is, I think, one of the most satisfactory Reports that has been presented to you over the 38 years during which the Bank has been in operation.

PROFIT AND LOSS ACCOUNT.

The profits for the year, based upon the average paid-up capital, represent 17.28 per cent. thereon, but if calculated upon capital and surplus combined represent 7.61 per cent. only. There has been for years a misconception with regard to the actual earnings of banks owing to the misleading custom prevailing of quoting a percentage of profits based upon paid-up capital alone, instead of upon capital, reserve fund and undivided profits. The premiums received from shareholders upon new capital subscribed and the accumulated undivided profits are just as much a portion of the capital employed as the paid-up capital itself. However, we are grateful for a good year—the best we have had for a length of time.

DEPOSITS AND CIRCULATION.

Our total deposits on 30th April stood at $57,026,187.43, as compared with $55,106,589.75 on the same date in 1912. Circulation of our notes has grown from $5,303,642 to $5,803,704, and would have gone still higher but for the restrictions placed thereon by the present Bank Act, and which, as I shall explain to you later, have been to some extent ameliorated by new regulations which will come into force on 1st July.

CASH RESERVES.

Gold, silver, bank balances, etc., which stood at $21,490,915 last year, are now $22,754,556, equal to 36 1/5 per cent. of liabilities to the public, whilst our total liquid assets amounted to $34,904,459, equal to 55½ per cent. of our liabilities to the public, as compared with $31,537,448 last year.

LOANS AND DISCOUNTS.

The growth in ordinary loans and discounts has been from $40,171,085 to $40,502,609. The increase is more than represented by additional capital stock and premium thereon paid in, amounting to $1,788,000. The figures for all Canada indicate an increase in this class of assets from $833,000,000 to $898,000,000. With due regard to the legitimate requirements of our customers we have adopted a restrictive policy during the year, having in view the very unsatisfactory condition of the money markets of the world, the wars and rumors of wars, the unsettled condition of affairs in the United States—the result of the uncertainty regarding tariff revision—and the tendency throughout the Dominion towards undue and speculative expansion in real estate values.

NEW CAPITAL.

The new stock allotted to Shareholders on the 30th June last has been satisfactorily taken up, the total amount outstanding being only $90,000, representing fractional shares and allotments to executors and individuals who have found it inconvenient to take up their allotments, preferring to allow the shares to be disposed of as provided for in the Act and on the understanding mentioned in their allotment letters.

SHAREHOLDERS.

Our Shareholders now number 1,586, as compared with 1,470 in 1912.

STAFF.

The staff of the Bank are 905 in number, an increase during the year of 87.

PENSION FUND.

This very important fund is steadily growing from your contributions and from accumulating revenue, and is $39,199 in excess of the previous year, after providing for all deserving cases. The Board has not so far called for contributions to the fund from the staff of the Bank, and the resources of the fund are entirely under the administration of the Directors.

NEW BRANCHES.

There has not been the usual expansion in the number of branches, and I should say from present appearances that a contraction is more likely. The difficulty in obtaining well-trained clerks owing to the cost of living, even quietly, at outlying places, in newly settled districts and the absence of home comforts, the opportunities afforded them to enter upon what to them appears to be more lucrative employment outside the Bank; the difficulties in new districts for a bank to make profit after providing for heavy expenses and the restrictions imposed upon banks in their charges for interest and commission, to which is to be added Provincial taxation, which is assuming from year to year a threatening and dangerous attitude (the annual taxes paid by banks to the various Provinces amount to no less than $315,838)—all make one hesitate to enter upon the establishment of branches in new parts of the country, even where banking facilities may be needed. The animosity to banks in and out of Parliament, which we cannot but recognize, appears to have risen from much misconception and from an alliance of divergent opinions. We are told, on the one hand, that banks are making too much money, and that their powers and profits must be curtailed; we are told, on the other, that banks are losing too much money, and that they must be inspected and reinspected and inspected again. It is a fact that banks are not making enough money considering the risks, the responsibilities and the turnover of the business, the indispensable assistance they are called upon to extend to the country—to the west in particular—and the severe competition with which they have to contend from within, and from all kinds of licensed competitors from without, who are free from unreasonable restrictions and can attract deposits by the offer of high rates of interest, with no obligation to maintain cash reserves, and who can charge rates proportionate upon loans. The situation seems preposterous; it is certainly unfair. Banks are compelled to furnish all kinds of information to the Governments for publication, lay bare their monthly balance sheets and statements of cash reserves, etc., whilst their competitors are comparatively free from restraints and publicity, free from the necessity of holding cash reserves, free from the obligation of furnishing monthly returns, free to give for deposits and take for loans as may suit their circumstances.

BANK PREMISES.

We have expended in connection with bank premises during the year the sum of $364,771; from the sale of premises we have applied the sum of $140,000 upon Bank Premises Account, and we have credited a further sum of $124,771 from the profits of the year.

RENEWAL OF BANK CHARTERS.

The Decennial Revision has been under way in Parliament since December 17, 1912. The Act has had its third reading in the Commons, and is now before the Senate. It is expected that the final revision will be concluded and the Act receive the Royal assent in a few days. The unfortunate circumstances connected with the recent failures of banks were reflected upon existing institutions, and we have had much prejudice and ill-will to contend with. The revised Act is, however, on the whole, a good, workable piece of legislation, and in many respects an improvement upon the present Act. One cause of censure in the Legislature is the reputed profits which it is said that banks have made in underwriting ventures. Complaints have been made regarding the financial starvation of the East through the transfer of deposits to the West, attracted by the high rates of interest following upon Western development and the opportunities to invest in lands at comparatively low cost. The elaborate proportions and extravagant expenditures upon bank premises have created very unfavorable comment. The vexed question of inspection or audit has been solved, and a system of audit by auditors selected by the shareholders of each Bank from amongst a Board of Auditors approved of by the General Managers of chartered banks and by the Minister of Finance has been agreed to. I take the opportunity to give you in a few words a resume of the important additions to and alterations in the Act so far as they have gone:—

Sections 12 and 16—Additional safeguards have been introduced in connection with the incorporation and organization of banks to ensure the bona fides of original subscriptions for stock, and to facilitate the recovery of unpaid liability thereon, while statements of disbursements for preliminary expenses will require to be submitted to the Treasury Board for approval before a certificate to commence business is issued.

Sections 18 and 20—Changes have been made in the internal regulations in providing for Shareholders being kept advised of the by-laws of the Bank in force from time to time by being furnished with copies of the current by-laws every five years, commencing with December 31, 1913, and by limiting the qualification shares of Directors to those of which they are absolute and sole owners in their individual rights.

Section 34—Facilities for speedier collection of original unsubscribed or new capital stock allotted to Shareholders are given by shortening, in the Directors discretion, the period within which acceptance of allotments must be made.

Section 43—Proposals have been introduced making the keeping of share and transfer registers in each Province in which Shareholders are resident compulsory, but it is hoped these provisions, which have many objectionable features, may yet be amended.

Section 54—The annual statement to be submitted to Shareholders has been somewhat enlarged, so as to make it more in keeping with the monthly return to the Government. Many new headings have been added, which make for a clearer and more detailed statement of affairs. The Monthly Government Return has also been improved in some respects.

Section 56—As already referred to, an important departure has been made in the introduction of an annual audit by qualified auditors appointed by the Shareholders from a panel selected by the General Managers of the Banks and approved of by the Minister of Finance. It will be the duty of these auditors, who are given the widest powers of access to the books, accounts and securities of the Banks, to check the cash and verify the securities, and make a report annually to the Shareholders. It is placed in the power of the Minister of Finance to call upon the auditor of a Bank, or any other auditor whom he may select, to make a special report at any time upon the affairs or business of a Bank.

Section 61—In addition to retaining the present emergency period, extending from September 1 in any year to the last day of February in the ensuing year, provision for a much required increase of circulation has been made against the deposit of current gold and Dominion notes, or either, in what is termed the "Central Gold Reserves." These Central Gold Reserves will be under the control of trustees appointed by the Canadian Bankers' Association and the Minister of Finance, and will be subject to frequent inspection and audit by the Department of Finance. It will be the duty of the trustees to receive and, when proper and required, return the gold and notes deposited with them by the Banks, who will be entitled to issue increased circulation to the extent of the amount from time to time on deposit. In this way not only is additional circulation assured, but also the anxiety of over-circulation when nearing the present limits can be avoided.

Section 72—Regulations providing for the disinfection and sterilization of bank notes may be made by the Treasury Board.

Sections 79 and 91—Additional returns will in future be made to the Government annually of the fair market value of real estate held by the Banks for their use and occupation, and quarterly of the rates of interest and discount charged upon loans and discounted paper.

Sections 84A and 88—Additional powers have been given to banks in the interests of those concerned to lend to receivers and liquidators appointed under the winding-up Act upon the property and assets under their charge, and also to farmers upon the security of threshed grain grown upon their farms, while definitions have been provided of "products of agriculture," "products of the forest," and "products of the sea, lake and rivers," which will materially assist in removing doubts which previously existed regarding the power to lend on certain classes of goods now comprehended therein.

Section 93—The limits of collection and agency charges exigible by banks have been somewhat reduced, but not so as to seriously interfere with business.

Section 99—It has been made compulsory to obtain the written consent of the Minister of Finance before an agreement by one bank to sell the whole or a portion of its assets to another can be entered into.

Sections 131A and 156—Additional offences and penalties have been inserted, including for the payment of preliminary expenses otherwise than as authorized by the Act and for officers and others obtaining gifts or showing favor to anyone in relation to the bank's business, while additional protection has been afforded to banks from the use of the word "banker," or words of similar import by unauthorized persons.

The Act is to go into force on July 1, 1913, and will continue the charters of existing banks until July 1, 1923.

We are much indebted to the Minister of Finance for the faithful and diligent manner in which he has supervised the creation of the new Act and its consideration by Parliament. He has been thoroughly impartial as regards all of his conclusions, and has presented to the country an Act which, although containing many new features, is likely to outlast the usual decennial period.

THE HARVEST.

Reports have been received from our own branches and from our valued correspondents in the Provinces where we are not represented regarding crop prospects for 1913, and these I will now give you in detail. Province of Ontario—The agricultural statistics obtainable at this season of the year are not as exact or as voluminous as those that are registered in the western Provinces; but we have heard enough to lead us to believe that we may look forward to a satisfactory harvest. The present outlook for fall wheat is most promising, and spring grains have made a good catch, as a rule. Clover is doing well, but alfalfa, which has become a very important product, has been somewhat tried by weather conditions. There is promise of a splendid yield for all classes of fruit, and this crop has now become one of the most important in the Province. Notwithstanding very high wages throughout Ontario, complaints are general that labor is scarce, owing to the migration of young men of the Province to our western cities; the immigration does not compensate for the depopulation. Is it the case that the hired man does not receive the comforts to which he has every right to lay claim? Want of help must induce careless farming. If I were a farmer dependent upon the hired man I should be inclined to offer him every reasonable comfort. This suggestion is by no means original; no farmer in England, whether he be a landlord or tenant, would think of asking his farm laborer to lead the happy-go-lucky existence that farm laborers in this country are expected to enjoy. From Quebec we hear that the season is backward, and that crops are retarded. It is satisfactory to learn, however, that the large quantities of butter and cheese produced in Quebec find a satisfactory and lucrative market in the western Provinces of the Dominion, and that there is a wonderful advance in agricultural science through the benefit received from experimental farms and public lectures. It is extraordinary that the great inducements which are offered by the Province of Quebec to immigrants are not availed of to a greater extent. From New Brunswick we learn that there has been no unusual increase in the amount of acreage under crop, but that the outlook is good. From Nova Scotia that there are 66,000 acres under crop more than there were last year; 70 per cent. of the total is in hay. The total value of agricultural products in 1912 is estimated at $28,880,000; of fisheries, $9,367,000; of forests, $6,000,000, and that there was coal mined during the year valued at $20,700,000. Business is reported to be favorable and trade active. From Prince Edward Island we have most cheerful news. The amount of acreage under cultivation is increasing, and the development of the lobster and oyster industries shows good progress, but most wonderful of all is the development of what is known as the Black Fox industry. Seventy-eight companies are now incorporated with $5,500,000 capital. As much as $10,000 per pair has been paid for puppies, and $25,000 for breeders. The establishment of a better car ferry will bring the Province into closer touch with her sister Provinces. From Manitoba we hear that the acreage under cultivation will exceed but slightly that of 1912. About 3,000,000 acres will be under wheat, and the balance will be given up to other grains; mixed farming appears to be more in favor—crop conditions are very favorable. In the Province of Saskatchewan we learn that the acreage under crop for 1913 will be 9,641,000 acres, or 2½ per cent. in excess of the acreage of 1912. Although somewhat late, the ground is in splendid condition; in fact, so far as prospects are concerned, there is everything that could be wished for. From Alberta we hear that the harvest of the northern part of the Province will be a little late, but that in the southern portion of the Province everything is well advanced. Farmers are going more into mixed farming year by year, and there has been a wonderful increase in sheep-raising. Owing to the high price of hogs and cattle, farmers are induced to feed their grain rather than ship it. The estimated total acreage under crop in Manitoba, Saskatchewan and Alberta is twenty million acres, of which about eleven millions are under wheat.

The lumber industry in the West is by no means in a satisfactory position. The free entry of American lumber into Canada for years past has discouraged our lumbermen and sawmillers, without being of any great value to the consumer. The reduction in the tariff upon imports of lumber into the United States may be of some value, but I fear that Canadian millers and lumber dealers will not receive all the benefits they may now anticipate therefrom.

From British Columbia we hear of satisfactory increases in all departments. The products of agriculture amounted to over twenty-two million dollars, an increase for the year of one million dollars, and home productions to the value of $22,270,000, an increase over the year 1910 of $7,870,000. The population of the Province is increasing at the rate of about 100,000 people yearly.

POPULATION.

The estimated population of the Dominion on March 31, 1913, was 7,758,000, being an increase of about 500,000 people.

IMPORTS AND EXPORTS.

It is the occasion for some disappointment to find that, although the exports of Canada for the year 1912 amounted to $393,232,057, the total value of the imports was $692,032,392, indicating an adverse balance of trade of about $300,000,000. This is not necessarily an unfavorable feature. It has been more than compensated for by borrowings from abroad on capital account amounting to about $250,000,000, by government, municipal, railway and loan companies and by the cash value to us of an additional 400,000 people who have come to settle amongst us from Great Britain, the United States and elsewhere. It is estimated by the Departments at Ottawa that these immigrants have brought with them at least $[illegible] in money and goods, and that of the 141,000 immigrants included coming from the United States each one brought an average of $1,000. Included in the excess of imports over exports is the value of these settlers' effects and also the very large investment being made by American manufacturers in the business of the country. Almost the whole amount of the excess in imports was occasioned by our trade with the United States; the imports from the United Kingdom having fallen short by about $40,000,000 of the value of our exports thereto. The exports of the mine are assuming very large proportions and are likely to continue to increase. Of the total exports, amounting to $355,754,000, the mine accounted for $57,442,[illegible], the forest (which at one time was the principal article of export) for only $[illegible], while manufactures amounted to $43,692,000, and agricultural products, including animals and their produce, all of which we might say was the handiwork of the farm, amounted to $105,000,000. We have information to the effect that the fisheries of Canada yielded a value of $34,667,872, and that the mineral products in value amount to $133,127,489. It is extraordinary that, notwithstanding all that the country has done to build up manufacturing industries in our midst, manufactured goods of the value of $348,500,000 were imported during the past year, as against exports of the same class amounting to only $35,800,000.

PUBLIC DEBT.

It is satisfactory to note that the net public debt of the Dominion of Canada on March 31, 1913, was $297,588,095, as compared with $321,998,940 on March 31, 1912—quite a substantial reduction—notwithstanding the expenditure on capital account of $30,600,936. The total surplus revenue for the year ended March 31, 1913, was $33,624,828.

I now have pleasure in moving the adoption of the report.

The following proposed By-law was moved by Mr. D. Kidd and seconded by Mr. A. Semple, and the same was approved and adopted as By-law No. 30:

BY-LAW NO. 30 OF THE IMPERIAL BANK OF CANADA.

"The Shareholders of the Imperial Bank of Canada, assembled at the Annual General Meeting of the said Bank, enact as follows:—

"That, in addition to all other sums which the Directors may be authorized to contribute to the Pension Fund for the officers and employees of the Imperial Bank of Canada, the said Directors are hereby authorized to forthwith contribute to the said Fund, out of the accrued profits of the Bank, the sum of $20,000."

The customary motions were made and carried unanimously.

The Scrutineers appointed at the meeting reported the following Shareholders duly elected Directors for the ensuing year:—Messrs. D. R. Wilkie, Hon. Robt. Jaffray, Wm. Ramsay (of Bowland Stow, Scotland), Elias Rogers, J. Kerr Osborne, Peleg Howland, Sir Wm. Whyte (Winnipeg), Cawthra Mulock, Hon. Richard Turner (Quebec), Wm. Hamilton Merritt, M.D. (St. Catharines), W. J. Gage.

At a subsequent meeting of the Directors Mr. D. R. Wilkie was re-elected President, and the Hon. Robert Jaffray Vice-President for the ensuing year.

BUILDING AT REGINA

Building operations in Regina are good. Seldom in the history of the city have so many large buildings been in course of erection at one time as at present. The list includes the Grand Trunk $2,000,000 hotel; Sherwood $1,000,000 department store; E. A. McCallum's office block, facing Victoria Square (10 stories); churches, colleges and hundreds of residences.

Owing to slackness in building branches in other parts of the province, there is no dearth of labor. The troublesome feature of the building trade in Regina is the possibility of a disagreement between the builders and bricklayers.

◆

DRAWING THE NET ON BANK ROBBERS

Half of the $271,000 stolen by four bank robbers from the Bank of Montreal's branch in New Westminster, B.C., in September, 1911, was brought to Chicago, according to Mr. J. H. Schumacher, of the Pinkerton detective agency. Nearly $100,000 of the loot has been changed into United States currency by saloon keepers in Chicago, says Schumacher.

Three of the robbers who tunneled into the vault of the branch of the Montreal bank, bound and gagged the Chinese guard, and took $271,000, are in prison awaiting trial. The fourth man, whose name has not been made public, is known to the police and the Pinkertons.

◆

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt station for the week ended May 23rd:—Hudson Bay, 62,100; Bailey Cobalt, 40,000; McKinley-Darragh, 87,600; Cobalt Lake, 57,693; Temiskaming, 61,135; Dominion Reduction, 81,700; Cobalt Townsite, 78,390; Crown Reserve, 40,000; Coniagas, 157,788; La Rose, 143,062; Nipissing, 126,378; total, 935,846 pounds or 467 tons. The total shipments since January 1st are now 15,988,617 pounds, or 7,994 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

◆

MEDICINE HAT'S STREET RAILWAY

Medicine Hat ratepayers have sanctioned a by-law giving an exclusive franchise to the Montreal Engineering Company to operate an electric street railway in the city. The franchise is for a period of 25 years. Work is to commence immediately on the construction of the plant.

The Montreal Engineering Company, which has secured the franchise represents Sir Max Aitken and his associates and is the company which built the Porto Rico railways, the Demerara Electric, the Camaguey Company and the Trinidad Electric. It numbers among its directors Messrs. R. O. Sweezey, A. R. Doble, F. P. Jones, Fred. G. Clarke and, Victor Drury. [illegible]

LEGISLATURE'S REPORT ON FIRE UNDERWRITING

The Wisconsin legislative investigating committee, which has made an exhaustive investigation into fire underwriting conditions in that state, has made its report, and it appears to be a fair treatment of the subject, quite in contrast to the drastic Missouri legislation. A summary of the principal recommendations is as follows:

"That fire insurance is the management of a mutual fund for the payment of losses, which fund is created from the premium paid by the policyholders.

That fire insurance is of a public nature, and is inconsistent with the idea of competition in rates or premiums.

That competition in rates practically does not exist; such as there is results in discrimination favoring a few and over-charging the many.

That the rates should be apportioned to the hazard of each risk, and be collected without discrimination.

That co-operation between companies is necessary to secure such apportionment of rates.

That economical and satisfactory rating of risks required co-operation.

That such co-operation is not contrary to public policy, providing all agreements are made public and may be prohibited after review by some public authority.

That agents should probably be paid for the work they do.

That the interest of the agent who gets his pay in a per centum of the premium is against property improvements and other reduction in rates.

That the agent acts in a professional, advisory capacity to the insured, and that the state should see that only fit persons become agents.

That money due the companies for insurance should be paid without discriminations promptly by the agent and by the insured to avoid loss and expense in collection.

That the reduction of losses and the prevention of fires must be brought about through inspections, changes in the methods of insurance, and improvements in construction of buildings and city planning.

That effective inspection must cover all property insured and uninsured and is a public duty.

That fire departments have the force available for such inspection practically without additional expense.

That effective fire department inspection requires a central state supervision, which can be furnished through the state fire marshal.

That the thorough revision of the standard policy should be made through joint action, if possible, of the states, and the National Convention of Insurance Commissioners be asked to do this work.

That the revision of the standard policy should include provisions for or action on questions relating to the valued policy, co-insurance, and the proportion of insurance to value or of recovery to loss."

◆

The annual meeting of the Toronto branch of the Canadian Manufacturers' Association will take place on June 12th. Through the courtesy of the commodores, officers and members of the Royal Canadian Yacht Club it will be held in the club dining room at the Island.

NEW EDITION

MANUAL OF
CANADIAN BANKING

¶ The third edition of the "Manual of Canadian Banking" has been exhausted. We had intended to get out a new edition right away, but owing to the fact that the revision of the Bank Act will necessitate certain changes in the text, and so as to bring the book up-to-date, it has been decided to defer publication until the text of the new act is known.

¶ We are quite sure that all those who have recently sent in orders for Mr. Eckardt's work will appreciate the desirability of deferring the getting out of the new edition until it can be brought thoroughly up-to-date.

¶ We appreciate the many orders we are getting for the work, and hope those who have copies under order will bear with us for a few weeks.

MONETARY TIMES

H. Brown, city clerk.

PERSONAL NOTES

Mr. H. A. Herbert, late chief accountant of Steel and Radiation, Limited, and formerly with Messrs. George A. Touche and Company, has opened an accountancy office in the Cosgrave Building, Toronto.

Mr. E. S. Crocker, manager of the Bloor and Dovercourt Branch of The Royal Bank of Canada, Toronto, sailed on the Empress of Ireland from Quebec on the 29th inst. for a three months' motor trip of the British Isles.

Mr. G. T. Bell, assistant passenger traffic manager, has been appointed passenger traffic manager of the Grand Trunk Railway system and Grand Trunk Pacific and steamship companies, to succeed the late Mr. W. E. Davis.

Mr. John Taylor, founder of the J. and J. Taylor Safe Works, Toronto, died at the residence of his son, W. A. Taylor, 4 Laurier Avenue. Mr. Taylor was born in Perthshire, Scotland, in 1828, and came to Toronto when he was ten years of age. He is survived by four sons.

Mr. Kingo Hara, manager of the Meiji Fire Insurance Company of Tokyo, Japan, was in Montreal recently inspecting the fire department, with the view of improving his knowledge of fire prevention systems, and applying the information gained during his world trip to the improvement of the home systems in Japan.

Mr. John A. Kelly has retired from the joint management of the United States branch of the General Accident Assurance Corporation, of Perth, Scotland, and his associate, Mr. Claude Norie-Miller, assumes the position of sole manager in the United States. The general manager of the company at the home office, Mr. F. Norie-Miller, states that when Mr. Kelly accepted the position of joint manager, it was with the stipulation that it could only be for a short period so as to assist in the reorganization of the business necessary upon the change of management in 1911.

I have made a continuous audit of the City Accounts for the year ended December 31st, 1912, and in my opinion the Financial Statement is so drawn up as to exhibit a correct view of the standing of the City as at December 31st, 1912.

SIDNEY MALCOMSON, Auditor.

MONTREAL LIGHT, HEAT AND POWER COMPANY

City's Development Necessitates Large Expenditures for Works and Additions—Company's Progress

Progress and expansion are shown in the annual report of the Montreal Light, Heat and Power Company. The surplus earnings from the year's operations, less appropriations, amount to $627,137.02 which, added to surplus earnings from the previous year's operations, brings the accrued surplus as at the close of the year to $3,521,242.85.

The company's financial statement shows:—

Gross Revenue		$5.509,556.62
Operating and Maintenance Expenses		2,328,440.14
Net Revenue		$3,181,116.48
Fixed Charges		463,979.46
Net Income		$2,717,137.02
Dividends Paid	$1,147,500.00	
Dividends payable May 15th, 1913.	382,500.00	
		1,530,000.00
Surplus from year's operations		$1,187,137.02
Less appropriated to:		
Depreciation Renewal Reserve Account	$550,000.00	
Officers and Employees Pension Fund	10,000.00	
		560,000.00
Transferred to General Surplus		$627,137.02

Financial Arrangements.

Montreal's development is reflected in the financial arrangements which the company finds it necessary to make in view of the extensive works and additions under way and in contemplation. The directors have passed a by-law authorizing the increase in the capital stock of $5,000,000 which the shareholders will be asked to ratify at the annual meeting.

The concessions granted the consumers in the gas rate is equal to over 5 per cent., and in the rate for incandescent electric over 9 per cent. It is expected, as heretofore, that additional business will compensate the resultant loss in revenue.

The needed extensions in the immediate future in both gas and electric departments in order to meet the demand for service consequent upon the rapid development of the city and suburbs will be large, and in this connection in the gas department the company has planned a new manufacturing station of a capacity of 4,000,000 cubic feet per diem, designed so that it can be increased to 8,000,000 cubic feet; also an extension of coal gas plant to its present Elm Station of additional capacity of 1,250,000 cubic feet per diem. These works are now under way, and will be completed in part during the current year, and partly during next year. The new district gas holder now under construction in the northwest section of the city will be ready for operation in the autumn, and when started will facilitate the distribution of gas in that section.

Cedar Rapids Contract.

In the electric department the directors during the year entered into a long term and favorable contract with the Cedars Rapids Manufacturing and Power Company for the supply of 60,000 horse-power from their Cedars development to be taken as and when required, and in virtue of the agreement it is incumbent upon our company to transmit the power to Montreal. For this purpose a steel tower transmission line will be constructed, and the work which is already in hand will be completed simultaneously with the Cedars development. Consequent upon the acquisition of additional hydraulic power from the Cedars Rapids Company as intimated, and with a view to maintaining a definite ratio between steam reserve and hydraulic power, your company has planned a new central auxiliary steam station of a capacity of 25,000 horse-power (with provision for an ultimate capacity of 50,000 horse-power) to safeguard the company and its customers against possible interruptions and variations affecting its hydraulic supply.

A ten story annex for office purposes is also being constructed.

◆

WANT HIGHER BOND PRICES

The $5,000 6 per cent. 15-year debentures of Stoughton, Sask., have not been placed on the market as yet, as the bids received have not been sufficient to justify selling.

◆

The National General Insurance Company, Limited, has ceased to carry on the business of fire insurance in British Columbia.

IMPERIAL BANK'S REPORT

One of the strongest and most conservative banks in the Dominion, the Imperial Bank of Canada, has still further strengthened its position during the past twelve months. The balance sheet for the year ended April 30th, 1913, shows a reserve fund of $7,000,000 as compared with paid-up capital of $6,788,169 and authorized capital of $10,000,000. The bank's profits for the period under review, after making the usual deductions, amounted to $1,125,971. On the new stock, premium of $788,169 was received and was transferred to reserve fund.

The officers' pension and guarantee funds received $20,000 of the profits and the usual annual contribution of $7,500 was made to those funds. The sum of $124,771 was written off bank premises and furniture account. The balance carried forward totalled $1,003,988.

Some idea may be obtained of the large business conducted by the Imperial Bank by a glance at the assets and liabilities. The deposits exceed $56,000,000. There are liabilities to the public of $62,000,000. Notes of the bank in circulation total $5,803,704. Current loans amount to $40,000,000 and call loans at home and abroad to $5,000,000. The securities held by the bank as assets include: Dominion and Provincial Government securities, $566,986; Canadian municipal securities, etc., $4,107,048; and railway and other bonds, debentures and stock, $730,152.

The Imperial Bank paid four quarterly dividends at the rate of 12 per cent. per annum. The cash reserves are 36 1-5 per cent., and the total assets 55⅕ per cent. of liabilities. The thirty-eighth annual report of the bank is a highly satisfactory document.

DIVIDENDS AND NOTICES

By order of the Board,
Winnipeg, April 14th, 1913.

ROBERT CAMPBELL,
General Manager.

BRITISH SHAREHOLDERS AND UNION LIFE'S MANAGEMENT

Mr. William Schooling, chairman of the London advis-
y board of the Union Life Assurance Company of Canada,
ade a statement to the British shareholders this week.

Mr. Schooling, according to a Canadian Press Associa-
on cable, said that the Canadian law was unnecessarily
vere on industrial life assurance, and the insurance de-
artment had refused to renew the company's license, al-
ough it had allowed the company to continue business till
e end of the month.

Mr. Schooling declared roundly that the company's pre-
nt position was due to rotten investments and reckless ex-
avagance. The London board had been kept in ignorance
the true facts, but Messrs. Scott and Muckle had come
er from Canada and given awful facts very frankly.

Mr. Schooling finally advised the British shareholders
find £75,000 which, with a general reorganization, would
able the company to maintain its corporate existence, but
bsequent discussion was very long and occasionally
cited.

Manager Scott declared that the company's reputation
Canada was good with policyholders, and that under new
anagement it would be made to pay. The shareholders
entually appointed a committee to report.

Mr. H. Pollman Evans, president of the Union Life,
enies the reports of extravagance and reckless invest-
ents. "We shall have all the money needed for a reorgan-
ation if that is needed," he says, "before the end of
ay. We are in close touch with the authorities at Ottawa,
it these reports leave a bad taste. We have many policy-
olders who will not understand them and therefore it is
amaging to our and their interests. We are in a position
continue business in the usual way."

LAST YEAR'S FIRE RESULTS SHOWED IMPROVEMENT

The National Board of Fire Underwriters's figures for 1912 representing the consolidated returns of 183 stock fire insurance companies reporting to the New York insurance department shows an underwriting profit of 2.52 per cent. of the net premiums written, which is less than the ratio of taxes paid during the year. . . . The results for 1912 were better than the average, and yet the average profit ratio was a meagre 2.52 per cent. of the net premiums written and 2.70 per cent. of the capital employed.

The ten-year table shows an underwriting loss for the years 1903-1912, inclusive, of 13/100 per cent. During all those years the same taxes were assessed and collected as would have been had the business been profitable.

The underwriting results for 1912 were:

Premiums, fire, marine and inland	$307,287,313	
Losses paid, fire, marine and inland		$161,917,069
Increase in liabilities during year		16,842,087
Expenses		120,783,626
Profit (2.52 per cent.)		7,744,531
	$307,287,313	$307,287,313

And the ten-year table, 1903-1912, inclusive, shows the following results:

Premiums, fire, marine and inland	$2,550,290,543	
Losses paid, fire, marine and inland		$1,427,214,115
Increase in liabilities during period		153,413,427
Expenses		973,030,796
Loss (.13 per cent.)	3,367,795	
	$2,553,658,338	$2,553,658,338

DEBENTURES FOR SALE

CITY OF MERRITT, B.C.

Sealed tenders will be received by the undersigned up to 8 p.m., June 30th, 1913, for the purchase of the following debentures:—$45,000 Water Works, six per cent., repayable 30 years; $25,000 Electric Light, six per cent., repayable 30 years; $10,000 Sidewalks, six per cent., repayable 10 years. Full particulars and information furnished on application.

HARRY PRIEST,
Treasurer.

SCHOOL BONDS FOR SALE

Tenders addressed to the undersigned will be received up to nine o'clock a.m. of Thursday, June 12th, for the purchase of $500,000 of 4½ per cent. thirty-year bonds of the Protestant Board of School Commissioners of the City of Montreal.

WANTED IMMEDIATELY, three real wide-awake stock salesmen, to sell stock that the public will buy up rapidly; lists of men actually interested will be furnished in any quantity; this is a great proposition, and is worthy the attention of the very best man. Apply immediately, Mr. McIntosh, 818 Somerset Block, Winnipeg, Man.

COMMENTS ON MONTREAL LIGHT, HEAT AND POWER REPORT

Monetary Times Office,
Montreal, May 29th.

The Montreal Light, Heat and Power Company is paying a dividend at the rate of 9 per cent. per annum. For some time it has been predicted that the company would be placed on a 10 per cent. basis, and it is generally believed that this increase will shortly be made. The earnings of the past year amount to almost 16 per cent. on the outstanding capital of the company. The company cannot continue to place large sums each year to the credit of surplus account and to other accounts which are perhaps larger even than they should be, so that it is freely predicted that not only will the dividend be increased to 10 per cent., but there will be a new stock issue, or in some other way, advantages will be given shareholders in order to distribute to them some of the surplus earnings which the directors have so far been putting back into the property.

It has been suggested recently that something in the nature of an amalgamation may take place between the Power Company and the Shawinigan Water and Power and the Cedar Rapids Manufacturing and Power Companies. From time to time the argument has been offered that there would be no advantage in bringing about a merger between the three companies, inasmuch as they are now virtually under one control and each is largely interested in the other. While this is perfectly true, an amalgamation would give the desired opportunity of increasing the capitalization and distributing more shares amongst the present shareholders. In future, a comparatively small dividend would mean as much to the present shareholders as a large dividend on the present capitalization. After the dividend reaches 10 per cent., it is not likely that the directors will care to increase it to a higher figure owing to the sentimental effect upon the citizens of Montreal.

Another indication that the company intends to make an extra distribution to shareholders is seen in the recent announcement on the part of the Power Company to the effect that the rates for lighting would be lowered. The rates on both gas and electric lighting were reduced a peg, making the net cost of gas 90c. per 1,000 cubic feet, and the cost of electric lighting 6 2-5c. per kilowatt hour. It has been the practice of the company to declare a reduction in lighting rates shortly before declaring an increase in dividend, and there seems little doubt that the recent announcement is a forerunner of a declaration of a dividend at the rate of 10 per cent. if, in fact, other advantages are not at the same time granted.

◆

VICTORIA'S LOAN IN LONDON

The underwriters of the stock issue in London of the city of Victoria, B.C., for £482,870, 4½ per cent., issued at 95, will take up 82 per cent. The result, in comparison with other recent issues, is not unsatisfactory. The underwriters have been left with about eighty per cent. of the Chilian Northern Railway five per cent. debentures; and 72 per cent. of the Royal Mail Company issue. Nothing has yet been decided regarding the New Alberta provincial loan.

◆

ONTARIO BANK DIVIDEND

Those shareholders of the Ontario Bank who paid the double liability in full will receive twenty cents on the dollar of their holdings. The dividend will probably be paid in July. The amount will be in the neighborhood of $200,000. The assets of the defunct bank have been disposed of at much greater advantage than was at first expected.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

MORTGAGE LOAN CONDITIONS IN CANADA

Further Replies to Inquiries of The Monetary Times Reveal Satisfactory Conditions

Replies to The Monetary Times' inquiries respecting the loaning situation in Canada continue to be received. A well-known company with headquarters in Winnipeg state that on the whole their cash collections of principal and interest, since October 1st last have been satisfactory. They have found collections rather more difficult than for some years past, but though the percentage of interest collected to the principal invested, is somewhat smaller than usual. They have actually received a considerably larger sum on interest than for the same period of the previous year.

As to Crop Damage.

The damage to the crops by the wet and unfavorable weather during the harvest, and the early snow storm which visited a large part of eastern and southern Manitoba about October 27th, is mainly responsible for collections being somewhat slower than usual.

"Another factor was," says a correspondent, "that the banks pressed the farmers to repay them their loans as soon as they were able to market their grain, promising them, or allowing them to understand, that they could obtain a new credit soon after the new year. This accommodation they failed to give them when the time came. We found that many farmers had relied upon the loans they expected to obtain from the banks to pay us our interest."

The company's arrears of interest, though somewhat larger than usual, are not at all heavy considering the large sum they have invested. They have not the slightest uneasiness as to collections, and expect a material reduction to be made during this spring and summer. Many farmers still have grain to thresh and others have not yet marketed all their crop.

Western Canada and Ontario.

These remarks refer to the company's business in Manitoba alone, though the situation in Saskatchewan is about the same and the arrears there are small, considering the conditions. Collections on loans in the city of Winnipeg have been entirely satisfactory.

An Ontario company which does a large business in that province says that all their borrowers with few exceptions are meeting their payments promptly with cash, in fact, their collections have never been better.

◆

FRUIT, FROSTS AND THE OUTLOOK

The winter of 1912-13 was particularly favorable for both small fruits and tree fruits in Canada. The conditions for growth during the late summer and fall months of 1912 were excellent, except that growth continued too late for safety. Fortunately the weather of December, January and February was very mild. A severe sleet storm in March did some damage in the fruit districts of Ontario. Another most noticeable feature has been the early opening of spring. Most correspondents in Eastern Canada report the spring at least two weeks earlier than usual.

In Eastern Canada the weather during March, April and the first part of May has been all that could be desired, except that the majority of correspondents qualify their optimistic reports with the condition that frost may intervene.

The weather reports for the last two months from British Columbia are by no means so favorable. The winter frosts were much heavier than usual, sufficiently so to slightly injure the tenderest trees and varieties. Light frosts have injured apricots, peaches and cherries. In one or two districts plums are reported affected by the frosts of April 29.

In the Maritime Provinces trees have wintered well. More rain has fallen this spring than usual. The season is fully two weeks in advance of the average.

Many correspondents of the Dominion's department of agriculture reported before the severe frosts of May 8, 9 and 10. Telegraphic reports from the chief tender fruit districts of Ontario would indicate that little injury was done except, perhaps, on the north shore of Lake Ontario, particularly between Toronto and Hamilton, and then only to small fruits, but it is safe to say that the full effects of such a frost cannot be fully estimated until some time has elapsed.

Upon the whole the weather conditions for fruit generally have been good, but it must not be forgotten that complications may arise any time between now and harvesting. This is particularly true, for instance, with reference to the cherry crop, which promised last year to be very large, but was seriously injured by excessive precipitation, especially in Eastern Ontario, between the growing and harvesting months.

ONTARIO'S NEW TREASURER

Ontario is fortunate in having such an excellent man as Honorable I. B. Lucas as its provincial treasurer. His ability is well known and we think that both sides of the House recognize the fact that they have a very suitable citizen to handle the funds of the province.

Mr. Lucas is by no means strange to his new duties as during the illness of Colonel Matheson last year, he became acting provincial treasurer and has performed the work o the office since last February.

HON. I. B. LUCAS,
Provincial Treasurer of Ontario.

He was born at Warwick, in Lambton County, Ontario on September 19, 1867. Educated at the University of Toronto, he chose law for his profession, and is head of th firm of Messrs. Lucas, Wright and McArdle, of Owen Sound also of Messrs Mills, Raney, Lucas and Hales, Toronto. Mr Lucas has sat in the Legislature for the riding of South Grey since 1898, and during the term of the Whitney Governmen has been chairman of the private bills committee.

◆

DOES SHEEP RAISING PAY?

Does sheep raising in Ontario pay? was the questio which the Ontario Sheep Breeders' Association wished t have answered in a manner which would be satisfactory t all concerned. While every other class of live stock was increasing and receiving increased attention from the farmer of the province, sheep were receiving less attention ea succeeding year, and were decreasing in numbers, having decreased from 1,797,213 in 1900 to 1,040,245 in 1911.

To be able to give a satisfactory answer to this questio and to promote a greater interest in sheep raising throughout the province, it was felt that it would be an advantage t have a number of illustration stations located at differe points throughout the province; with the object of demonstra ing the profits which could reasonably be expected under o dinary conditions from a small flock of grade ewes. The c operation of the Live Stock Branch of the Ontario Department of Agriculture was obtained in this work and a gra received to defray the cost of supervising the work.

The results of the experiments showed that sheep raising in Ontario does pay.

The flocks in this set of experiments were handled unde ordinary farm conditions and under every condition likely to be met with throughout the province, and every one them showed a reasonable and some of them a remarkably gratifying surplus in each of the two years during which th experiment was carried on. It would appear from one o the reports that where a farmer is so situated that he can cater to the early spring or Easter trade, that it is an unusually profitable line to follow, this flock in the second year giving almost as much profit as the value of the flock. The flock where the lambs were sold for the summer hotel trade was also very profitable, giving an average profit of $30 4 per year. While these two flocks may have had especially favorable conditions, the other seven flocks which were kept under conditions no more favorable than any farmer in the province enjoys, gave a total profit for two years of $543 4 an average of $38.81 per year per flock.

NEW WESTMINSTER'S FINANCES HEALTHY

Statement for Past Year is Published—City Owns Its Waterfront

The city of New Westminster has issued a satisfactory financial statement for 1912. In examining the figures, one recalls that what is therein termed "Capital Adjusting Assets," is the cash on hand from the sale of bonds, and the incomplete expenditures on capital account, all of which, when the works are completed, will adjust themselves into completed works, and then re-appear as assets or otherwise, according to the nature of the works.

On the other side of the account some of the same amounts appearing as "Capital Adjusting Liabilities" are, in the meantime, to maintain a proper balance and prevent the city's nominal surplus from appearing excessively large. In other words, these adjusting assets and liabilities show exactly the trend and position of unfinished expenditures.

Provision for Sinking Funds.

In the matter of sinking funds, an amount is deposited in the savings department of the Bank of Montreal, annually, sufficient to retire the city's debentures at maturity, an extended date of maturity being set in the case of bonds issued prior to the fire of 1898, as per special act of Parliament, separate savings accounts, which were opened in 1910, being kept for these.

The city's regular assets are particularly strong. These are inventoried at a low valuation, land values in a number of cases being entered as low as one-third or one-half the actual value.

Of the city's public utilities, the electric light system, for instance, is down as valued at $313,580. This branch is producing a net profit of about 6 per cent. on $1,000,000 after paying for operating expenses, interest and sinking fund. The gross earnings for 1912 exceeded $122,000. This year the receipts are about 15 per cent. ahead of 1912.

In the case of the city's water system, an additional 25 inch steel main has recently been completed, new reservoirs built and improved, and large amounts have been expended on the source of supply intakes and dams, placing the city's water system in value largely in excess of the figure as inventoried.

Owns Its Waterfront.

The city owns the land of its water frontage on the river where the conditions are excellent, with deep water dockage. These are of permanent and increasing value.

With the backing of the fertile Fraser Valley, and this magnificent river at its door, the city occupies a position of rare strength and stability. The population, according to the census just completed, has increased about 45 per cent. during the last three years. The taxation is on land only. Improvements are taxable, but not taxed.

◆

DEBENTURES AWARDED

Windsor, Ont.—$60,000 5 per cent., to Messrs. Brent, Noxon and Company, Toronto.

Miami S.D., Man.—$16,000 20 instalments, to Messrs. H. O'Hara and Company, Winnipeg.

Darlingford S.D., Man.—$5,000 20 instalments, to Messrs. H. O'Hara and Company, Winnipeg.

North Qu'Appelle R.M., Sask.—$10,000 6 per cent., 10 years, to Messrs. H. O'Hara and Company, Winnipeg.

Broadview S.D., Sask.—$12,000 6 per cent. 20 instalments, to Messrs. H. O'Hara and Company, Winnipeg.

◆

The Pacific Great Eastern Railway Company has placed an order with Messrs. Evans, Coleman and Evans, of Vancouver, for 15,000 tons of open hearth steel rails for delivery at Newport, beginning in October next and ending in June, 1914. This quantity will be sufficient to lay the track for 140 miles. The railway company is also negotiating with various manufacturing companies for rolling stock and other equipment aggregating over $400,000.

DOMINION CANNERS SELL BONDS

Million Dollars Placed in London — Underwriting System Criticized

Mr. Garnet P. Grant, president of the Dominion Bond Company, has placed in London, according to cable message received this week, the entire issue of $1,000,000 6 per cent. first mortgage bonds issued by Dominion Canners in connection with improvements and additions to plants, costing about $1,500,000, which were purchased by the Dominion Bond Company, Limited.

Dominion Canners profits last year were over half a million dollars, which sum is more than four times the amount required for interest on the bonds outstanding, including the present issue of one million dollars.

Public and Underwriters.

The underwriting system is coming in for criticism. The public subscribes scarcely a penny to any of the new issues on their first appearance, says the New York Annalist. It keeps its money in its pocket; the issuing house has to announce (as Rothschilds had, in the case of the Brazilian loan) that underwriters will take up 94 per cent.; the price of the loan falls, say, to 1½ discount, and then the public comes and buys in the open market. It has learned, in fact, how to get a share in underwriters' profits. The circumstance forcibly suggests that the whole business of underwriting has been overdone. The commissions allowed are too high; hence the prompt fall in price after subscription. Loans are underwritten that would do better without; small loans just now have a better chance of attracting the well-instructed investor, if he knows that there will not be a number of underwriters in the market as soon as the subscription lists are closed, eager to sell stock with which they have been "landed." Underwriting is spread too wide.

Municipal Forces.

The Nelson, B.C., city council has adopted the report of the finance committee recommending that the city guarantee interest and principal of a bond issue of $40,000 to finance the street railway company under conditions which have been agreed upon by the directors of the company.

After considerable discussion as to the denomination of Toronto city bonds the board of control referred the matter to the treasury board for adjustment. Controller Foster favored the selling of bonds of the $100 denomination as an attractive investment for the man whose savings were limited. Mayor Hocken believed that $500 should be the minimum and that considerable trouble would be encountered were the city to place the face value of the bonds as low as $100.

◆

WANT MORE RAILROADS

Discussing government assistance to the Canadian Northern Railway, the Canadian Manufacturers' Association says:—

"The government should give financial assistance to the Canadian Northern Railway only on condition that it will be used to provide better service for the country. If this assurance is given, a great enterprise like the Canadian Northern Railway should not be crippled for lack of funds.

"For the past sixteen years the Canadian Northern has built railroads at the rate of a mile a day, with capital secured largely through the untiring energy of Sir William Mackenzie. At the end of 1912 their total mileage was about 7,000. During that year their gross earnings were $20,860,093, an increase of 27.5 per cent. over 1911. They have let every contract on their transcontinental line between Quebec and Port Mann. These great efforts are made, of course, in the interests of the directors and shareholders, but the quality and quantity of the service they sell are vital matters to shippers and receivers of freight.

"We need more railways, more engines, more cars, more of everything that is included in the operation of a railroad. If the Canadian Northern Railway wants money to buy these things, the government will benefit the country by giving it to them, but there should be a clear agreement concerning expenditure and service."

ON THE SITUATION

The New York financial mind has a reputation for uick action. On the Canadian situation, however, it s working about two months behind time, having only ust discovered that matters generally are quiet in Canda. In order to counterbalance belated thought, exciting tories come weekly from Wall Street as to "the imending Canadian crash," "the coming Canadian panic," nd "Canada's trade balance running wild." As a matter f fact, what may be truly termed a period of rest is eing experienced in the Dominion, and the banks preared some time ago to adjust matters. That is far emoved from a crash, a panic or trade balance insanity, nd at the same time it is a good thing for the country.

The primary cause is the world-wide money stringency. Canada is a heavy borrower, and prevailing onditions abroad making loans possible only at a high ate of interest, Canadian borrowing has been curtailed o a considerable extent. In consequence, railroad and ther construction work, municipal improvements, especilly the latter, have been reduced to the point of bare ecessity. No blame can be attached to the Dominion or being a borrowing country. It is in the process of aking, and for many years to come its main needs ust be financed by outside capital. It can commit financial indiscretion by over-borrowing, a sin which has yet o be proved against it—besides which London has a nack of closing the door to Canadian applications for oney, when it thinks they are becoming too numerous.

Another cause of the general business quiet is the eaction from real estate gambling last year. Much land as purchased at unreasonable prices, with a view to e making of large and early profits. It has now become apparent that it was easier to buy than it is to sell. Consequently, considerable funds are locked up. Those who follow Canadian affairs must not, however, take this incident as branding Canadian real estate generally as a poor investment. The rapid growth of the country makes real estate one of the best investments, but it must be purchased at the proper price and with due regard to location and general prospects. Both East and West have erred.

Those who have analyzed conditions throughout the Dominion, find that basic conditions are perfectly sound. There is no hint at a serious check to development and prosperity. We are suffering partly from minor indiscretions, but mainly from the general financial stringency. Some of the London experts anticipate a relief to that condition in the early fall. It is thought probable that by that time, the accumulation of gold in the great monetary centres will be sufficiently large to prevent further stringency. One prophet asserts that if the various continental loans which will be issued in the next two or three months bring back to the monetary centres the large amounts of cash that have been hoarded, London may get through the coming autumn not only without stringency but with ease. In the course of his budget speech Hon. W. T. White, Minister of Finance, stated that he looked for improved conditions, so far as interest rates are concerned, towards the end of the calendar year. Notwithstanding, he thought that during the coming year generally, we may look for reasonably high rates of interest.

The Canadian situation, therefore, needs no alarmist reports from New York, or even the sympathy of well-wishers. Canada is passing through the present year with the economic brakes slightly applied and can afford to take the breathing spell. Perhaps, too, a little time will be devoted to reflection as to how the country will economize when money again becomes plentiful.

BONDS FOR THE SMALL INVESTOR

The Monetary Times recently mentioned the experiment in municipal financing which is being made by the city of St. Paul, Minnesota. Several inquiries having been made for details, some further particulars are here given. The scheme was outlined by Mr. James J. Hill, the well-kown railroad magnate, and a Canadian born. The various bond issues of the city will be purchased by Mr. Hill and his associates. The bonds will be placed in the hands of trustees and certificates issued by the Northwestern Trust Company.

All certificates will be of $10 denominations, and will be sold over the counter of the Northwestern Trust Company. The certificates will pay the same rate the city pays, and the certificates will be protected by the bonds, which will be guaranteed by the trustees.

St. Paul appears to be the home of a movement to obtain the interest of small investors in the city's securities. The popular touch to the movement even went so far as a sale of city bonds in one of the large departmental stores. That idea, it appears, also emanated with the trust company mentioned, who purchased from the city $200,000 short-time paving certificates. The suggestion of the sale was made to the store, which offered them to its customers. While the certificates will be issued only as the city requires the money, during May, June, July and August, practically the entire issue of $200,000 has been sold to small investors. Each purchaser was limited to $1,000, and most of the sales were in amounts of $500 or less.

The Hill coterie having proved the investment strength of the small investor, decided to feature the 4½ per cent. trust certificates, as stated above. A first batch of $25,000 4½ per cent. playground bonds has been purchased and against these, certificates in $10 denominations will be issued and sold by the Northwestern Trust Company direct to investors. As soon as the certificates are disposed of, another lot of city bonds will be bought, and so on until the entire amount which the city has for sale is taken up and sold.

Speaking to the Commercial West, Mr. Louis W. Hill, of the Northwestern Trust Company, said: "It is our intention to foster and encourage saving among this class of investors by offering them from time to time choice securities, with a ready market, that will enable them to realize quickly, should they need their money. This experiment demonstrates that the small investor will buy good securities at a reasonable rate, and will place his confidence in reputable institutions, even to paying his money before the bonds are ready for delivery.

A similar plan for the disposal of Canadian municipal bonds has been suggested in London, Ontario. It is a matter of doubt, however, whether such a scheme would succeed. When money market conditions are good, there is little difficulty in satisfying the legitimate demands of Canadian municipalities for funds, outside of the borders of the municipalities themselves. The small investor locally is then busy in other channels. It is when money is tight, that we hear of novelties in finance. Taking the example of London, Ontario, which had $764,500 for sale, greater benefit would accrue to the city by the subscription of that amount by outside rather than inside capitalists.

A WORD ON THE CROPS

With the crop reports of the West, one must sometimes take a grain of salt. Many of the views on crop conditions in this country sent from Winnipeg are undoubtedly colored by the literary paint of the grain dealers in the Western metropolis. The reliable advices of *The Monetary Times* are that crop conditions could hardly be better than they are at present. Whether the crop is a week early or a week late at this season of the year is absolutely without significance. We are receiving the most favorable weather, and it would be difficult to find a dissatisfied farmer at the present time. Crop predictions thus early in the season are of little value in any event, but the least useful are such discouraging stories as some which have appeared recently.

TWO KNIGHTS AND THE DAY

Sir Rodolphe Forget in a recent interview predicted further declines in the Canadian stock markets. He mentioned, for instance, such a figure as 200 for Canadian Pacific. And his talk generally was strangely pessimistic. To the current situation and outlook he gave several nasty digs with knightly weapons. But Sir Henry Pellatt came to the rescue, and contradicted Sir Rodolphe's prophesies. Instead of low stock prices, Sir Henry says that next spring we will be more prosperous than before.

Now it is usually difficult to find a bear in the Canadian stock market. When in evidence, there is often a reason for his hug. May we ask on what grounds Sir Rodolphe bases his mournful conclusions? If only in self-interest, he would scarcely disturb the market with his wails were he carrying an armful of stock certificates. Perhaps the Montreal Knight has a light stock of scrip and is balancing accounts with a little innocent chatter.

The time when Sir Rodolphe sallied forth to capture control of the Nova Scotia Steel Company and came back a sad man is fresh in memory, as is also his bank enterprise. Sir Rodolphe, therefore, must not feel grieved if his counsel regarding the outlook is discounted considerably. One prefers to take Sir Henry Pellatt's view of the situation. While the Canadian stock market slumbers to-day, it slumbers only.

PAVING THE WAY FOR LOANS

To be received in England as if he were a mere company promoter desirous of propounding some financial scheme, good, bad or indifferent, is the complaint of the Honorable W. A. Watt, prime minister of the State of Victoria. His was not a personal lament, but was made on behalf of the overseas dominions generally when seeking loans in London. He thought it strange that no official organization was prepared to receive the bearer of such a mission and assist him in the delicate matters which appertain to the floating of an important loan. This omission is remedied to a great extent by powerful financial interests which assist the Dominions, but at the same time, says Mr. Watt, it does seem remarkable that no official organism is in existence to mold in some measure such operations. A financial board attached to the Colonial Office, or some similar body, would seem to be in the mind of Mr. Watt. But as loans of all kinds are usually raised solely upon their merit, it seems doubtful whether such a financial organization would prove of any material assistance.

OCEAN FREIGHTS

The question of advances in ocean freight rates, both import and export, has again been discussed by the Montreal board of trade. It was decided to call the attention of the government to the matter, with a view of learning whether Great Britain and the other maritime nations could be induced to take joint action for the control of rates. As a preliminary step the transportation bureau committee of the board recommended that the Dominion government should be asked to appoint a commission of inquiry with a view to arriving at all the facts in connection with the advances in rates that have taken place within the last few years.

Mr. Thomas Robb, secretary of the Shipping Fed-ation, at Montreal, is reported to have declared that e local board of trade would do well to mind its own siness, and that only a few of its members understand ything about the shipping business. But surely it is e business of the Montreal board of trade to keep a tchful eye upon ocean freight rates, and if their ignor-ce is as great as Mr. Robb suggests, efforts for en-htenment should be encouraged.

The question of ocean rates arises periodically. It alleged, and generally believed, that they are regu-ed by combination. The question was investigated to me extent by Mr. Richard Grigg, chief Canadian Trade mmissioner, when he held the position of British ade Commissioner in Canada. In a report to the Im-rial Government in 1907 he said: "It must be a matter opinion as to whether rates of carriage are higher an the service warrants, and if they are, it is perhaps sier to state the fact than to formulate a remedy. suming them to be so, it would appear that part of e preference designed to encourage the import of itish manufacture goes into the pockets of steamship ners, and thereby to some extent defeats the intention the preference by checking the import of British ods. Of course, no such conditions operates in regard American goods, which are not subject to ocean rriage.

"It seems only reasonable to suppose that the officers a company or conference whose employment and ad-ncement must be justified by results, will strive to use ery means placed at their disposal for the advancement d profit of the service to which they are attached unless strained by policy imposed upon them by higher au-ority, and if this be so, the question is considerably rrowed. The condition with regard to the deferred bate by means of primage (which is incapable of con-alment) appears to establish the desire of the confer-ce to discourage competition, and so to maintain rates; d the remaining problem is the extent to which the line policy indicated is pursued. The answer is important British trade, and it appears desirable that it should sought and the whole facts made known upon com-tent authority."

That was apparently an appeal to the Imperial Gov-nment to investigate the matter. The subject of the ntrol of ocean freight rates has frequently been brought their attention, but little progress has been made with view to an unbiased investigation. Meantime shippers ss sheafs of resolutions and the shipping companies ind their own business.

CANADA'S PROVINCIAL SECURITIES

When will the Canadian provincial securities be cluded in the British trustee list? A document was cently issued by the Imperial government containing copy of the treasury list of colonial stocks in respect which the provisions of the Colonial Stock Act, 1900, e for the time being complied with. For the stocks ecified and the dividends thereon, the revenues of the spective colonies alone are liable. The Consolidated und of the United Kingdom and the Commissioners of is Majesty's Treasury are not directly or indirectly able or responsible for the payment of the stock, or the dividends thereon, or for any matter relating to em. The stocks in question are in Barbados, British uiana, British Honduras, Canada, Cape of Good Hope, eylon, Fiji, the Gold Coast, Grenada, Hong Kong, maica, Mauritius, Natal, Newfoundland, New South ales, New Zealand, Queensland, St. Lucia, St. Vin-nt, Sierra Leone, South Australia, Southern Nigeria, raits Settlements, Tasmania, Trinidad, Victoria, and estern Australia.

While loans of the States of the Australian Common-ealth are inserted, loans of the provinces of Canada are t. *The Monetary Times* has persistently pleaded for the removal of this anomaly. The provincial treasurers of every province have notified their willingness to take joint action to achieve the desired result. The first step, however, must come from the Dominion government. It is to be hoped that the Minister of Finance will find time in the near future to give the matter serious consideration.

Premier Flemming, of New Brunswick, dodged a court subpœna in order to attend the Toronto Presbyterian congress. What Proverb covers his action?

* * * *

The survival of the Niagara Falls youth who was shocked by 12,000 volts is surpassed only by that of the Opposition shocked by $16,000,000 of railway subsidies.

* * * *

Because of Lloyd George's interest in Marconi shares, the brokers call them "Chancellors." Canadian Northern shares may, therefore, be dubbed "Cochranes."

GOVERNMENT GETS CANADIAN NORTHERN STOCK

It Has a Speculative Thrill—Twenty-five Millions Convertible Stock Issued to Date

The most interesting feature of the subsidy granted to the Canadian Northern Railway is the giving of $7,000,000 of the railroad's common stock to the Dominion government. The total subsidy granted to the coming transcontinental was $15,640,000. This is made up of $12,000 per mile, or practically a double subsidy for the portions of the transcontinental now under completion between Edmonton and the Yellow Head Pass, a distance of 260 miles, and between Ottawa and Port Arthur, a distance of 910 miles. In addition there is a subsidy at $6,400 per mile for the 250 miles of line now under construction between Ottawa and Toronto.

Held by Finance Minister.

In return for the double subsidy on the 1,170 miles, the government will receive from the Canadian Northern Railway fully paid up shares of the common stock of the company to the par value of $7,000,000. It is provided that this stock shall be held by the Minister of Finance in trust for the people, and that it may be disposed of at any time under the authority of the Governor-in-Council, and the proceeds paid into the consolidated revenue funds of Canada.

The common stock of the Canadian Northern Railway, according to the latest annual report, is $70,000,000. The par value is $100. No dividends have been paid on the stock, which was increased from $55,000,000 during the fiscal year ended June 30, 1911. The amount of capital stock has grown during recent years as follows:

1906	$30,750,000
1909	55,000,000
1911	70,000,000

Speculative Thrill for the Stock.

Questions have often been asked in the market about the capital stock of the Canadian Northern. Every year the amount appears in the company's annual report without comment. Mr. W. R. Lawson, the well-known English banker, once said that the government guarantees obtained by the Canadian Northern and the net earnings per mile rendered the holding of the Canadian Northern bonds a very prosaic operation. "It offers neither risk nor excitement—nothing but a prospect of steady appreciation in the years to come. All the speculative thrill has been reserved for the stock."

The Dominion Government will, therefore, have an opportunity, by its proposed acquirement of $7,000,000 common stock, to participate in that "speculative thrill." While discussing the Canadian Northern's common stock, it must be remembered that $25,000,000 5 per cent. income charge convertible debenture stock has been issued by the road. Of the authorized issue of £5,144,030 or $25,000,000, $10,000,000 or £2,057,612 was issued in London in October, 1912, and $15,000,000 or £3,086,418 was issued previously in London and Toronto. The holders of this stock on January 1st, 1916, and each half-year afterwards until January 1st, 1919, have the option of converting their debenture stock into fully paid common stock at the fixed rate of $100 of the debenture stock for each $100 of shares.

Was Issued at 106.

The first issue of Canadian Northern convertible debenture stock was made, we believe, at 95. The latest one was made at 106, while the previous issue had been selling at 108 to 110.

In view of the forthcoming completion of the Canadian Northern transcontinental, the position of its common stock begins to create new interest. This is enhanced by the acquisition of $7,000,000 of Canadian Northern shares by the Dominion Government.

◆

The capital stock of the Belmont Black Fox Company, Limited, has been increased from $48,000 to $125,000.

The capital stock of the following Alberta companies has been increased: Sandeman-Cope Company, Limited, from $25,000 to $100,000 by the issue of 7,500 new shares of capital stock of $10 each; Great Northern Oil and Asphalt Company, Limited, from $500,000 to $2,000,000, by the issue of 1,500,000 new shares of $1 each; Frith, Townsend and Company, Limited, from $25,000 to $200,000 by the issue of 1,750 new shares of capital stock of $100 each; and the Empire Hotel Company, Limited, from $50,000 to $250,000 by the issue of 2,000 new shares of capital stock of $100 each.

BANK CLEARING HOUSE FOR MEDICINE HAT

Bankers Have Organized an Association in the Progressive Gas City

The bank managers at Medicine Hat have organized a local clearing house association. The eight following banks have branches in that city: Commerce, Dominion, Imperial, Merchants, Montreal, Quebec, Royal and Union.

Three bank clearing houses were established in 1910, one each at Brandon, Lethbridge and Saskatoon. Three, Moose Jaw, Brantford and Fort William, were established in 1911, and two, New Westminster and Medicine Hat, have been opened this year. There are now twenty-two clearing houses in Canada, twelve of which are in Western Canada and ten in the east.

The following is a list of the clearing houses:—

Clearing House.	Commenced Business.
Halifax	1886, 1 July.
Montreal	1889, 7 January.
Hamilton	1891, 15 June.
Toronto	1891, 21 July.
Winnipeg	1893, 4 December.
Vancouver	1898, October.
Victoria	1898, 2 November.
Quebec	1901, 1 May.
Ottawa	1901, 9 September.
London	1902, 1 June.
St. John	1896, 1 May.
Calgary	1906, 18 April.
Edmonton	1906, 11 July.
Regina	1909, 1 October.
Brandon	1910, 1 April.
Lethbridge	1910, 1 September.
Saskatoon	1910, 15 October.
Moose Jaw	1911, 9 February.
Brantford	1911, 1 January.
Fort William	1911, 19 October.
New Westminster	1913, 2 January.
Medicine Hat	1913, 1 May.

The following are the Canadian clearing house figures by provinces for the past three years:—

	1910.	1911.	1912.
	$	$	$
Ontario	1,956,049,935	†2,298,228,008	2,728,432,820
Quebec	2,212,268,621	2,501,810,415	3,003,128,011
Manitoba	973,694,051	1,202,192,416	1,571,114,599
British Columbia	546,555,892	678,414,170	827,663,115
Alberta	231,690,244	368,939,005	529,704,867
New Brunswick	77,843,546	77,328,182	88,969,218
Nova Scotia	95,855,316	87,994,038	100,467,672
Saskatchewan	59,743,982	*176,461,973	294,716,462
Total	6,153,701,587	7,391,368,207	9,143,196,764

* Moose Jaw started February, 1911, and the total clearings for the 11 months were $39,988,342. † Fort William started October, 1911, and the total clearings for 3 months were $7,865,923.

The clearing house figures for the current week appear elsewhere in this issue.

◆

NATIONAL DRUG COMPANY TO SELL STOCK IN ENGLAND

The capital of the National Drug and Chemical Company of Canada, Limited, has been increased from $6,000,000 to $8,000,000, the increase consisting of £200,000 6 per cent. first preference shares and $1,000,000 7 per cent. preference. The company has no bonds. The capitalization is now:—

£600,000 6 per cent. first preference stock.
$2,500,000 7 per cent. preference stock.
$2,500,000 common stock.

The Monetary Times is informed that the recently created £200,000 first preference shares are all underwritten and will be offered to the public in Great Britain some time this month at 105. It is expected most, if not all these shares will be taken by old holders of the first preference shares, as a large number of proxies were sent forward by them to the special meeting of the company which was called to sanction the increase. Besides, this security appears to be attractive as it has been actively traded in at from ten to fifteen per cent. premium on the stock exchange in England.

The new 7 per cent. preference stock will not be offered until further capital is required. The new capital will be used in paying bank advances, in new buildings in Toronto, Winnipeg, Edmonton and Vancouver, and in other development.

SIXTY-SIX COMPANIES INCORPORATED

British Molassine Company Forms Subsidiary Company with Headquarters at St. John—Several Realty Companies

Sixty-six companies received charters this week with a capitalization totalling $7,816,000, the largest company being McCoy Process Refrigeration Company, Winnipeg, with $1,000,000 capital.

Another British firm has formed a subsidiary company to look after the Canadian business, namely, the Molassine Company, of Canada.

Province.	No. of companies.	Capitalization.
New Brunswick	2	$ 349,000
Ontario	15	1,160,000
British Columbia	15	2,365,000
Quebec	17	1,502,000
Manitoba	17	2,440,000
Totals	66	$7,816,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Ashcroft, B.C.—Atlas Power Company, $10,000.

Victoria, B.C.—Union Investment Syndicate, $250,000.

Tete Jaune, B.C.—Crummy & Lambert, $50,000 (haberdashers).

Vernon, B.C.—Okanagan United Growers, $10,000. Ranchers' Club, $25,000.

North Vancouver, B.C.—North Vancouver Dock and Storage Company, $200,000.

Hamilton, Ont.—Ontario Theatre Company, $40,000. H. Levitt, H. Hayes, J. Richards.

Barrie, Ont.—Barrie Country Club, $40,000. H. J. Grasett, H. E. Jory, S. McAdam.

Portage la Prairie, Man.—Crescent Rowing Club, $5,000. C. S. B. Burley, A. H. Logan, A. Taylor.

New Liskeard, Ont.—Hill-Clark, Francis, $50,000 (contractors). L. Hill, J. Clark, R. F. Francis.

Kettle Island, Que.—Capital Park Company, $50,000. E. G. Laverdure, J. A. Faulkner, R. F. Berlinguet.

Victoriaville, Que.—Victoriaville Jewellery Company, $99,000. C. J. Ouellet, A. L'Heureux, P. Prevost.

Simcoe, Ont.—Phœnix Club Company, of Simcoe, $40,000. W. E. Tisdale, D. R. Tisdale, F. E. Curtis.

Welland, Ont.—Electric Steel and Metals Company, $50,000. R. Turnbull, J. H. Lefevre, B. J. McCormick.

St. Thomas, Ont.—Western Ontario Electric Company, $25,000. C. A. Branston, C. F. Goodwin, G. J. Warney.

Transcona, Man.—Transcona Wine and Spirit Company, $5,000. J. Stott, S. J. Burgess, W. T. Hooper, Winnipeg.

Scotstown, Que.—Scotstown Manufacturing Company, $50,000 (furniture). A. McKenzie, R. A. Scott, L. H. Couillard.

St. Hyacinthe, Que.—Compagnie Immobiliere de la Providence, $20,000. T. D. Bouchard, H. A. Beauregard, J. E. Lanoix.

Brandon, Man.—Brandon Grocery Company, $150,000. W. K. Nash, F. P. Nash, Minneapolis; H. B. Finch, Grand Forks, N.D.

Sherbrooke, Que.—C. H. Swift & Sons, $150,000 (timber). C. H. Swift, Jr., Utica, N.Y.; A. C. Bissell, E. H. May, Sherbrooke.

St. John, N.B.—Molassine Company of Canada, $250,000 (stock foods). B. Hordon, J. Proser, London, England; L. C. Prime, St. John.

Roberval, Que.—Compagnie des Granites de Roberval, $40,000. P. Deschene, J. Giguere, Hebertville Station; A. Bernier, Roberval.

Great Shemogue, N.B.—Shemogue Oyster Company, $99,000. R. O'Leary, Richibucto; M. G. Siddall, Port Elgin; M. Lodge, Moncton.

Dryden, Ont.—Western Hotels, $40,000. A. G. Robertson, J. J. Powers, M. R. Edgar. Dryden Park Association. $5,000. C. A. Pitt, H. L. Blair, H. R. Day.

Quebec City.—Compagnie F. X. Drolet, $199,000. E. Drolet, F. X. Drolet, G. Drolet. Acme Tanning Company, $20,000. H. S. Ross, A. Lepine, J. Limoges.

Vancouver, B.C.—Graham Island Settlement Company, $100,000. Standard Art Settlement Company, $25,000. Bowena Copper Mines, $250,000. Seymour Arm Estates, $750,000. New Zealand Sulphur Company, $500,000. Star Realty Company, $100,000. Hotel Elysium, $1,000. Crescent Sand and Gravel Company, $75,000. International Pool Club, $10,000.

Toronto.—Herbert Morris Crane and Hoist Company, $100,000. J. S. Lovell, W. Bain, R. Gowans. Rous & Mann, $100,000 (printers). J. S. Lovell, W. Bain, R. Gowans. Taylor Stoker Company, $40,000. H. W. Hand, G. R. Rebmann, W. F. Sauter. Sun Investments, $40,000. W. O. Jarrett, O. D. Cadotte, H. S. Rupert. M. A. Holladay Company, $50,000 (dry goods). J. R. L. Starr, G. Cooper, M. C. Cameron. Gravel, Sand and Crushed Stone Company, $50,000. J. Kerr, L. V. McBrady, J. S. McLaughlin. Pyne-Upton Manufacturing Company, $40,000. F. R. Pyne, H. M. Upton, W. S. Hargott.

Montreal.—Waldersee Heights, $100,000. G. T. Jenkin, E. Wheeler, L. T. Oman. Tannenbaum, $50,000 (dry goods). M. Tannenbaum, J. Roston, A. Cohen. Montreal Southern Realties, $75,000. S. B. White, W. H. Draper, U. Letourneau. Sterling Blend Tea Company, $50,000. D. McLennan, P. Lacoste, T. J. Shallow. Printers, Limited, $50,000. M. A. Phelan, Westmount; R. Fleet, W. R. Hastings, Montreal. Tuthman Packing and Provision Company, $50,000. T. B. Lyons, T. F. Lyons, W. E. Power. Canadian Trades Institute, $250,000. H. J. Curtis, Woodmere, N.Y.; E. M. Carroll, Toronto; A. Lafontaine, Montreal. Le Pret Foncier, $149,000. D. L. Debois, L. O. Delage, V. Delage. Viewbank Realties, $100,000. W. R. Lorimier Shanks, F. G. Bush, G. R. Drennan.

Winnipeg, Man.—Federal Mortgage Company, $200,000. G. A. Metcalfe, Winnipeg; T. H. Metcalfe, Mrs. E. Metcalfe, Portage la Prairie. British Estates, $250,000. J. O. Newton, E. P. Thompson, E. D'H. McMeans. McCoy Process Refrigeration Company, $1,000,000. C. W. McCoy, A. J. Beatty, W. R. Rundle. Lloydminster Original Townsite Company, $40,000. M. H. Garwood, M. R. Perrin, W. D. Shaw. Monarch Clamp Specialty Company, $50,000. W. J. Powell, Winnipeg; E. W. Meadows, Rapid City; W. Moffat, Winnipeg. Naidanac Builders' Corporation, $60,000. E. A. Hudon, J. McIntyre, G. A. E. Bury, Brandon. International Investment Company, $50,000. F. N. Donnelly, W. A. T. Sweatman, W. P. Fillmore. Sterling Canadian Investment Corporation, $250,000. I. Pitblado, E. H. Bennest, A. R. Pattinson. Sterling Security Company, $100,000. W. H. Walker, C. G. Stewart, A. B. Wright. University Heights Realty Company, $200,000. D. McDonald, A. D. Anderson, J. K. Moore. Manitoba Free Loan Association. M. Waisman, M. Bartfield, B. Freedman. Grey & Davidson, $50,000 (contractors' supplies). A. Grey, H. C. Davidson, W. P. Davidson. D. A. Chisholm Track Weeder Company, $60,000. M. G. MacNeil, T. Little, A. C. Miller. Manitoba and Saskatchewan Bible Society. T. Ryan, E. Brown, C. W. Gordon.

◆

VANCOUVER TO RENEW TREASURY NOTES

Owing to the financial stringency, which is delaying the selling of Vancouver's bonds in the London market, it has been decided to renew for a period of six months $1,500,000 6 per cent. treasury notes.

◆

ATLAS ASSURANCE COMPANY

The Atlas Assurance Company, Limited, of London, England, in its annual report shows assets totalling $21,070,905. Railway and other debentures, and debenture stocks, home and foreign, constituting the chief item and amounting to $4,607,335.

The company's fire department's net premiums were $5,412,220 and the losses $2,743,630, being 50.6 per cent. of the premiums. The underwriting surplus of the account was $717,889, and after adding $82,549 to the reserve for unexpired risks, there remained a profit of $635,340, which was carried to profit and loss account. Out of this profit a sum of $353,325 was transferred to the fire insurance fund, making it $5,768,760.

This is the highest figure it has reached and represents considerably more than a year's premiums.

The new business in the Atlas Company's life department has reached a total of $2,280,000, or a net amount, after reassuring surplus risks, of $2,100,000, nearly $100,000 more than in 1911. The premiums on this new business amount to over $80,000, and more than make up for the loss of premiums consequent upon deaths and surrenders, so that the premiums for the year, new and renewals, reached the amount of $961,150.

A successful year's operations was reported in the other branches of the company's business.

The company's activities in Canada are directed from Montreal, where Mr. M. C. Hinshaw is manager. Departments are also located at Toronto and Winnipeg.

CANADA'S TRADE AND THE TRADE BALANCE

Minister of Finance White Presents Some Interesting Figures of Our Commerce and Hints at an Illusory and Misleading Theory

Fiscal year.	Total imports.	Total exports Canadian and foreign produce.	Aggregate trade.	Percentage of value of imports with aggregate trade. %
1908	$370,786,525	$280,006,606	$650,793,131	56.97
1909	309,756,608	261,512,159	571,268,767	54.22
1910	391,852,692	301,358,529	693,211,221	56.52
1911	472,247,540	297,196,365	769,443,905	61.37
1912	559,320,544	315,317,250	874,637,794	63.94
1913	691,943,515	393,232,057	1,085,175,572	63.76

Now that Canada has entered a period of comparative quiet, due largely to the world-wide money stringency, financial critics are turning attention to the trade balance. How it has moved during the past few years is seen at a glance in the above table, showing the total trade of Canada with all other countries, including coin and bullion.

During the past three years, the percentage of the value of imports to the aggregate trade has materially risen and in 1912-13 represented nearly sixty-four per cent. of the total trade. This condition has called forth criticism on the part of some who put forward the view that if imports continue greatly to exceed exports a country may expect to be drained of its gold in order to meet its international obligations.

This question, The Monetary Times proposes briefly to discuss in these columns next week. In the meantime Hon. W. T. White, the Minister of Finance, has put on record some significant facts and figures respecting the trade position.

HON. W. T. WHITE, FINANCE MINISTER,

Who Recalls that the Adverse Trade Balance Theory Has Frequently Been Proved Illusory and Misleading.

Often Proved Illusory.

"Without attempting to deal the balance of trade theory," he says, "which has so frequently been shown to be illusory and misleading, it may be pointed out that in five years our total exports have grown from $280,000,000 to $390,000,000, and that while our imports have increased in greater degree, explanation is to be found in the fact that during this period of rapid material development and national progress a vast amount of capital expenditure has been and is being made upon railway construction and equipment by our three transcontinental systems, upon great public works and undertakings, in industrial and commercial enterprise and in municipal services and improvements to meet the needs of rapidly growing communities.

Era of Construction.

"That is to say, we are in the era of the construction of railways and great national works, and our cities have been growing so rapidly in population and area that the public needs have greatly increased, with the result that they have had to make large expenditures of a capital nature upon their various public services. The greater portion of the funds required for this capital and productive expenditure has been borrowed from the British public by the Government of Canada, by the several provinces and by cities and towns, and railway, industrial and other corporations. The money so borrowed has come to Canada not in the form of cash or gold, but in importations of commodities and of materials from Great Britain or elsewhere. In addition to this we must bear in mind the important fact that the stream of immigration coming to our shores from year to year, while bringing sufficient capital for its temporary maintenance and adding to our consumption, does not immediately become a producing element in the community. In the light of these considerations it would appear that the apparent adverse balance of trade is due to causes making for the development of the Dominion, and need be the occasion of no anxiety."

Trade with Great Britain.

Here is a statement showing imports and exports, establishing the fact that the United Kingdom has shared in the marked expansion of our trade in recent years:—

Fiscal year.	Imports for consumption from United Kingdom.	Exports to the United Kingdom, Canadian and foreign produce.	Aggregate. trade.
1908	$ 94,417,314	$134,477,124	$228,894,438
1909	70,682,101	133,745,123	204,427,224
1910	95,336,427	149,630,488	244,966,915
1911	109,934,665	136,962,971	246,897,636
1912	116,906,212	151,833,379	268,739,591
1913	138,652,198	177,982,002	316,634,200

For the past six years, with the exception of one year, 1909, when there was a temporary retrogression, there has been a steady advance in the aggregate trade between Canada and the Mother Country. Whereas the amounts of increase for the period covered in imports and exports are nearly the same, namely; $40,000,000, in each case the percentage of increase in imports is greater than of exports. This is due partly to the considerations mentioned by Mr. White as to national expenditure upon capital account, and partly owing to the increased demands of the home market for the products of mixed farming, especially that class described as animal products, such as bacon, poultry, cheese, butter and eggs. There is scarcely anything more indicative of the increase in the demands of the home market than the falling off that has taken place in the exports of some of the principal items under the heading of animal products, such as butter, eggs, and bacon.

Trade With the United States.

Of greater volume than our trade with the United Kingdom, and particularly as showing market increase in imports, the statistics of our commercial dealings with the United States:—

Fiscal year. (Merchandise).	Imports for consumption from United States.	Exports to the United States, Canadian and foreign produce.	Aggregate trade.
1908	$204,648,885	$ 96,020,138	$301,560,023
1909	170,056,178	91,022,387	261,078,565
1910	217,502,415	110,614,327	328,116,742
1911	274,844,858	112,208,676	387,053,534
1912	330,428,502	112,056,205	443,384,707
1913	435,783,343	150,961,656	586,745,018

Thus it will be seen that our total trade with the United States has doubled in the past six years, but it will be oberved that whereas the imports have more than doubled in e period mentioned until they now reach the large aggregate f over $400,000,000 the exports to the United States show nly a fifty per cent. increase and reach a total of but $150,00,000 or a so-called balance of trade in favor of the United tates of $250,000,000 during the past fiscal year.

"As to this vast yearly increase in imports it must be orne in mind," says Mr. White, "that it has been much more an counterbalanced by the aggregate of capital brought to anada by the steady influx of American settlers who have ken up land in our great West, and who speedily assume a ommanding place among our most capable, energetic, and rosperous agricultural producers. Speaking generally, the nports from the United States embrace almost all classes of ommodities, the principal being manufacturers of iron and eel and other metals. Anthracite coal, corn and cotton ggregating over $40,000,000 are on the free list.

"With regard to our exports to the United States, for the most part they consist of our raw material, the product of the forest and the mine. A tariff representing an average of over forty per cent. upon dutiable goods has been effectual practically to close their markets to our manufacturers."

Classification of Exports.

Here is a table classifying the values of Canadian exported produce since 1908. The largest increase has been in the chief item of agricultural produce (consisting principally of grains and flour), totalling $66,000,000 in 1908 and $150,000,000 in 1913.

The mineral production of Canada has more than doubled in the last ten years. In 1912 the total output was set down as $133,000,000 or an increase of over $30,000,000 over the preceding year. The increase was principally under the headings of coal, copper, nickel, gold and silver.

Fiscal year.	The mine.	The fisheries.	The forest.	Animals and their produce.	Agricultural products.	Manufactures.	Miscellaneous.	Total.
1908	$30,177,133	$13,867,368	$44,170,470	$55,101,260	$ 66,069,939	$28,507,124	$ 67,674	$246,960,968
1909	37,257,690	13,319,604	39,667,387	51,349,646	71,997,207	28,957,050	54,931	242,603,584

REVIEW OF THE MONTH

anadian Flotations in London—Investment Offerings —Dividend Changes

NEW LISTINGS

The Montreal Tramways have listed 9,993 additional ommon shares on the Montreal Exchange.

The following securities of the Dominion Canners, Limed, have been listed on the Montreal Exchange:—8,514 adtional shares of common stock, and 8,300 additional shares preferred stock.

The Dominion Bridge Company, Limited, have listed ,000 shares of common stock on the Montreal Exchange.

Nine thousand additional shares of preferred stock of anadian Car and Foundry Company, Limited, have been sted on the Montreal Exchange.

SPECULATIVE AND INVESTMENT OFFERINGS

The following speculative and investment offerings were mong those made in Canada during May:—

Provincial Silver Black Foxes, Limited, Charlottetown.—ffering of shares at $100.

Garvey's Mines, Limited, Vancouver.—200,000 shares at cents per share. Capital, $1,000,000, divided into 4,000,00 of 25 cents each.

Amalgamated Moving Picture Shows, Limited.—Offerg of shares at $1 par.

Magnesia Products, Limited.—$200,000 6 per cent. first ortgage 30-year sinking fund gold bonds at 95, with 40 er cent. bonus of common stock.

Weeks Silver Black Fox Company, Limited, North ryon, P.E.I.—Offering of shares. Capital, $100,000, divid into 1,000 shares of $100 each.

Pelican Oil and Gas Company.—100,000 shares at par, 1. Capital stock, $1,000,000.

First Saskatchewan Aviation Company, Limited, Saskaon.—10,000 shares at $1. Capital $20,000.

St. Lawrence Investment and Trust Company, Montreal. ,000 shares of capital stock at $100 each.

Canadian Drednot Motor Trucks, Limited, Montreal.—70,000 7 per cent. cumulative preferred stock at par with per cent. bonus of common stock.

British Columbia Black Foxes, Limited.—$150,000 comon stock at par. Capital $250,000; par value $50.

Phoenix Bridge and Iron Works, Limited.—$700,000 6 er cent. first mortgage bonds at 96, and $800,000 common ock at $50 per share.

Dominion Tobacco Company, Limited, Vancouver.—,000 shares of 7 per cent. first preferred guaranteed interst bearing stock at par.

United Investors, Limited.—450,000 common stock at o, and $300,000 7 per cent. preferred stock at par.

New Brunswick Black and Silver Fox Company, Renous, .B.—Offering of shares at $100 each. Capital $90,000.

Lake Erie and Northern Railway.—Unsold portion of 1,100,000 5 per cent. first bonds due 1942 at 92½ with bonus 25 per cent. common stock.

CANADIAN FLOTATIONS IN LONDON

The following flotations of interest to Canadians were made in London during May:—

Phoenix Bridge and Iron Works.—£154,100 6 per cent. first mortgage bonds at 96 and £164,383 common stock at 50.

Amalgamated Land and Mortgage Companies of Winnipeg, Limited.—£102,917 7 per cent. cumulative preference shares at par.

City of Montreal.—£1,430,600 4½ per cent. sterling registered stock at par.

Columbia Western Lumber Yards.—£514,403 6½ per cent. preference shares.

Canadian Car and Foundry Company.—£185,185 7 per cent. participating cumulative preference shares at 114.

City of Victoria.—£482,870 4½ per cent. debentures at 95.

The following flotation was omitted from the April list:—

City of Maisonneuve, Montreal:—£187,600 5 per cent. debentures at 100.

DIVIDEND CHANGES

The dividend of the common stock of the British Columbia Packers' Association has been increased from 2 to 7 per cent.

The Montreal Loan and Mortgage Company have increased their dividend from 9 to 10 per cent.

The directors of the Cape Breton Electric Company have decided to increase the dividend from 5 to 6 per cent.

Instead of paying a dividend of 7 per cent. and a bonus of 1 per cent. annually, the dividend of the Ottawa Light, Heat and Power Company has been increased to 8 per cent. with bonus of 1 per cent.

The Cobalt Townsite Company declared an interim dividend at the rate of 50 per cent. per annum for the three months ended April 30th, payable May 16th.

THE SITUATION AND OUTLOOK

Commencing next week, The Monetary Times will print a series of special articles on the general situation and outlook in Canada to-day. They will deal with the

Stock Exchange and Investor,
Municipal Borrowing,
Life Insurance,
Crop and Business Prospects.

The articles are compiled from several hundreds of reports received from bankers, business men, financiers and other correspondents, from coast to coast. Men on the spot tell of conditions on the spot.

Mayor Baxter, of Vancouver, has issued a public warning that too many people are coming to Vancouver seeking work, giving up good positions in the old country. The money tightness is checking business.

INVESTMENTS AND THE MARKET

News and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Monetary Times Office,
Montreal, June 4.

The past week has been one of the most discouraging experienced in stock market circles since 1907. On Monday a slump took place which carried the market down many points from the low level which it had reached at the end of the previous week. It will be recalled that the previous Friday was Decoration Day in the United States and that Wall Street took a holiday and extended this to embrace also Saturday. Montreal took Saturday also as a holiday; and the following Tuesday, being the King's Birthday, the stock exchange was again closed. When Sunday is included, it would be seen that there have only been about three days during the week upon which all the exchanges were opened, so that business has been considerably cut into. Whether this had anything to do with the shake-up in the price of stocks or not is difficult to say.

The probabilities are rather that the decline was due entirely to world-wide money conditions.

Some brokers and financiers, doubtless with strong political leanings, take the attitude that the weakness in Canadian Pacific Railway, was due in large part to the action of the Senate in refusing the Borden Navy Bill. This view of the situation is untenable. Canadian Pacific Railway is not the only stock to show weakness.

At Higher Point than Some Others.

In fact, even at this low point on last Monday, it was selling at a higher price, when interest return is taken into consideration, than most of the other large international stocks on the list. The return from it was only somewhere about 4.8% when it was selling at its low point of 213½ to 214, and a great many first class stocks were available to pay all the way from 5% to 7%. Manifestly Canadian Pacific Railway is still selling at a very high price. The decline for the week, however, was very striking, being 20 points.

London recovered slightly after the low point, but predictions are still coming in to the effect that Canadian Pacific Railway will sell lower and that the decline is not likely to be permanently halted under about 200 and thereafter very little recovery may be looked for until the situation, with respect to money, improves, or the return to shareholders increases through dividends, rights, or by other means.

Montreal Power Was Disappointing.

Montreal Power was more disappointing than Canadian Pacific Railway however. The stock fell on Wednesday to an even lower price than on Monday, the low point of Monday being 206, and the low point of to-day being 203½. About the noon hour, the stock suddenly turned strong and went to 208½. This strength was undoubtedly due to the decision reached at the annual meeting to increase the capital stock of the company by $5,000,000, making a total authorized capital of $22,000,000, and to issue $1,700,000 of the new stock to shareholders at par.

The weakness of Montreal Power is explainable on much the same grounds as that in Canadian Pacific Railway, viz., that of the low interest return on the present cost. Comparisons have been instituted between Montreal Power and Ottawa Power recently. Ottawa Power was quoted around 177, yet rights have already been declared on Ottawa Power at the rate of 2 new shares for each 5 shares held. This would mean that the rights are worth $22. a share. Deducting this amount from the present selling price of the stock gives a price of $155. as the actual selling price of the stock, without the rights. The recent action of the directors makes it clear that Ottawa Power is now on a dividend basis of 10%. This would mean that Ottawa Power at the recent low price of 177 is actually giving a return of 6½% to the investor.

Whole List Was Down.

The whole list was down. Textile sold down to 77¾, Richelieu and Ontario to 101, Brazilian to 88½, Canada Cement below 88, Canadian Cottons preferred to 75 and common 38, Dominion Steel Corporation broke to 43½, Laurentide to 200, Tram Power to 24, Ames-Holden preferred to 74 and the common to 14½. At these prices, Canadian Cottons preferred stock would be giving an interest return of very close to 8%, and Ames-Holden preferred one of very close to 9%. The financial statement of the latter company is not yet out, so that it cannot be stated for certain how well protected the preferred dividend is by the earnings of the year, although it is thought that the situation is all right. On the other hand, the Canadian Cottons statement recently published shows that not only was the preferred dividend amply earned, but that sufficient remained to pay a liberal dividend on the common stock, had the directors felt so disposed. The fact that they preferred to withhold the dividend on the common and to install further machinery, promises even greater earnings than ever against the preferred stock, so that the stock sold down to a ridiculously low figure.

The general impression is that price levels are not likely to go much lower and that an improvement may take place.

Hillcrest Collieries.—Shipments of the Hillcrest Collieries for the month of May totalled 26,700 tons. In May last year shipments were 14,500 tons, so in the month just closed the company registered an increase of a little more than 84 per cent.

Canada Iron Corporation.—One of the largest orders for cast-iron pipe received this year by the Canada Iron Corporation, of Fort William, is an order for 4,000 tons, received from the city of Regina, Sask., to be used for waterworks construction. The Canada Iron Corporation's plant has been running full blast, and they are carrying on their pay-roll 425 workmen.

Hamilton Gaslight Company.—The Hamilton Gaslight Company has elected a new board of directors and officers, following the purchase of the stock by Mr. John G. Gauld K.C. The last payment was made last week, and at a meeting of the shareholders the formal steps were taken to put the company under new management. The new officers are: Mr. John G. Gauld, K.C., president; Mr. C. W. Knisely, Chicago, vice-president; directors, Messrs. J. W. Nesbitt, K.C., C. V. Laings, Thomas Croswaite, L. H. Gray, N. Moore. Mr. John Keillor, secretary.

Standard Ideal Company.—Standard Ideal Company, for the year ended December 31st, 1912, after allowing for sinking fund and depreciation, net earnings amounted to approximately twice the interest on the outstanding bonds.

Many improvements and additions have recently been made to the company's buildings and equipment.

The sinking fund will redeem the entire bond issue five years before maturity at not exceeding 110 per cent. and accrued interest.

For the first three months of the present year the sales of the company show a considerable increase over the corresponding period of last year.

Canadian Converters, Limited.—The result of the reorganization effected a year ago in Canadian Converters' Company, Limited, is shown in the seventh annual report.

The earnings for the year on the capital stock of $1,733,500 were at the rate of 5.06 per cent., whereas the surplus available a year ago for dividends was only equal to 2.91 per cent. Manufacturing profits of the subsidiary companies show an increase of $40,805, equal to 45 per cent., while the increase in net profits was at the rate of 73 per cent., the increase being $37,174.

Summarized, the profit and loss statement of the company gives the following figures, with the changes, as compared with 1911-1912, brought out in the second column:—

	1912-13.	Inc.
Profits	$130,485	$40,805
Bond interest	26,265	*900
Balance	$104,220	$41,705
Depreciation reserve	11,500	*469
Balance	$92,720	$42,174
Bad debts reserve	5,000	5,000
Balance	$87,720	$37,174
Dividends	69,340	69,340
Surplus	$18,380	*$32,166
Previous balance	141,770	50,546
Total balance	$160,150	$18,380

* Decrease.

One feature of the statement is a further reduction in the bond indebtedness of the company, and another the creation of a new reserve fund, $5,000 being set aside under the head of reserve for bad debts. The balance sheet shows an improvement in the working capital of the company, current assets being $523,745 in excess of current liabilities.

"The general outlook for business during the coming year is good," states the directors' report. Supplementing this, it may be stated that orders on hand are fully up to those at the same time a year ago. Prices are good, and there are several favorable features in the company's position with regard to new business, the full benefit of which were not felt in the year just closed.

(Continued on Page 976.)

NANAIMO HAS MANY ADVANTAGES

'atural Resources are Valuable—City is Central Distributing Point and Possesses Up-to-date Utilities

(Special Correspondence.)

Nanaimo, B.C., June 2nd.

A trip to the Pacific Coast is not complete unless one sits Vancouver Island, with its large coal-fields, fisheries, mber mills, wealth of raw materials of all kinds; and enery, fishing and hunting.

After leaving the city of Vancouver, one will sail across e Straits of Georgia and pass into Nanaimo Harbor,

The city of Nanaimo, which slopes gradually from this xcellent harbor to the foot of Mount Benson, which is 3,341 et above sea-level, holds a most strategic position, both as distributing and manufacturing point.

Vancouver Island was discovered by Juan de Fuca in 592. In 1778 Captain James Cook roughly surveyed its past. It was more fully explored and circumnavigated by e British Commander, Captain George Vancouver and the panish Commander, Senor Don Juan Francisco de la Bodego Quadra during the years 1790-91-92. Excepting the natives, e island was first occupied by the Hudson's Bay Company 1843, who in 1852 built a bastion where Nanaimo is now cated, and which still stands on the shores of Commercial ay; one of the most historic landmarks on the whole of the acific Coast. The settlement gradually grew, until in 1874 e City of Nanaimo was incorporated, but while this was e most important port on the inland passage to Northern acific Coast points, the city for years did not show any perceptible growth. However, as the inland distribution and anufacturing interests gradually increased, the city eventully attained its present enviable position as one of the most rosperous and, at the same time, one of the most conservave centres in British Columbia.

oal Mining and Fisheries.

At Nanaimo are situated the largest and best equipped oal mines west of the Rocky Mountains. Four mines are ow in operation having an annual capacity of one and a half illions of tons, which will be further increased by an expenditure of nearly $1,000,000 now being made by the Western Fuel Company in opening up a new shaft, to be known s "The Reserve Mine," and which will call for the services f a large number additional wage-earners. It is hoped is new mine will be in operation by the end of July next.

The extensive fisheries are also an important factor in e prosperity of the city, especially the herring fisheries hich are furnishing employment to over nine hundred men, nd annually produce a catch valued at half a million dollars. addition to herring, salmon, cod, halibut, flounders, oyters, clams and mixed fish are caught in large quantities. he bulk of the herring catch is put up in dry salt and hipped to the Orient, especially to Kobe and Nagasaki, the alance practically being sold as bait to the halibut fishing eets in northern waters.

In the immediate vicinity of Nanaimo the highest quality f brick clay and shale lies in large quantities, and at the resent time three brick-yards are working to their full apacity, and negotiations are being carried on with a large merican concern for the establishment of a million dollar lant to manufacture the finest grade of pressed brick, tile nd glazed pottery.

Lumber mills and factories using wood as a raw material aturally play a large part in the industrial life of the city. umber mills, sash and door factories, and a box factory emloying a large number of men are at the present time working overtime to keep up with the demand from the surrounding district.

With the mines, lumber mills, fisheries, sash and door actories, canning factories, breweries, brick-yards, powder orks, cigar factories, and other smaller industries, Nanaimo eaps the benefit of a monthly payroll of considerably over 350,000.

entral Point of Vancouver Island.

To the distributor Nanaimo is really the heart of Vancouer Island. Being only 33 miles from and directly west of ancouver, and 60 miles from and directly north of Victoria, is the natural distributing point for the tourist, the manuacturer, the business man, the prospector and the homeeeker.

A report from the city engineer shows that Nanaimo has 7 miles of concrete sidewalks and one mile of paved streets; miles of sewers and water pipes with 1,800 individual serces. $50,000 will be spent during the coming season in enrging the water-mains and extending the present system. he rate-payers have already voted in favor of spending 50,000 for motor fire-fighting apparatus and an electric arm system covering all parts of the city. Three miles of paved streets will be laid during the coming summer at a cost of nearly $300,000, and a new steel bridge is under consideration, which it is estimated will cost in the neighborhood of $25,000.

The building permits for the month of March, when compared with the figures of the same month of 1912, show a large increase; the customs collections of the fiscal year ending March 31st at the port of Nanaimo, show an increase over the previous year of 20%; the coast-wise shipping is also growing, the number of vessels entering the harbor during the past year being 2,528, the outgoing coast-wise vessels numbered 2,424; the foreign shipping both in and out also showed large increases.

◆

CONSUMERS' GAS COMPANY TO SELL STOCK

By Auction—Standard Bank Will Increase Capital—Hamilton Provident Stock Issue

Four important concerns are making increases in their capital and the shareholders in each case will take up the new stock. They are as follows:—

Montreal Light, Heat and Power Company	$5,000,000
Standard Bank	500,000
Hamilton Provident and Loan Company	200,000
Consumers' Gas Company	515,500

Shareholders of the Standard Bank of record on June 25th will be given an opportunity to subscribe for $500.000 worth of new stock at a premium of one hundred per cent. The present market price is 219. The authorized capital of the bank is $5,000,000, and the subscribed is $2,500,000. The new issue will bring the paid-up capital to $3,000,000.

As forecasted in The Monetary Times, the Montreal Light, Heat and Power Company have authorized an increase in the capital stock from $17,000,000 to $22,000,000, of which $1,700,000 is to be allotted to shareholders at par in the ratio of 1 to 10. Following the policy of other big corporations the shareholders decided to allow officers and employees to subscribe for stock at par to the extent of $100,000. The increase in capital stock was made to meet the cost of extension of works, etc.

Balance of Issue.

The Hamilton Provident and Loan Society is offering to shareholders the balance of the new issue of capital stock authorized in March, 1911, amounting to $200,000. The stock is issued at a premium of $4 per share, and the amount called and to be paid is $20 per share, together with the premium; payments $14 on July 3rd and $10 on October 3rd. The capital of the company is at present $1,000,000 of fully-paid stock and 8,000 shares of 20-per-cent.-paid stock, or $160,000, a total of $1,160,000.

To Sell by Auction.

The Consumers' Gas Company will offer for sale by auction on June 26th 10,310 shares of the capital stock. The par value of the shares is $50.

The conditions of sale provide, amongst other things, that the stock will be offered in lots of 10 shares each, subject to a reserved bid; that 20 per cent. of the purchase money shall be paid down at the time of sale, and the balance in four equal consecutive monthly instalments, the first of which shall be paid one calendar month from the date of sale; that the purchaser may pay the whole of the purchase money at the time of sale, and may pay all or any of the deferred instalments before the same fall due; that every share sold shall, in proportion to the amount from time to time paid thereon, and from the date or respective dates such payment or payments shall have been made, participate in all dividends declared after the date of sale; and that the purchaser shall at the time of sale sign an agreement for the completion of the purchase.

◆

DEBENTURES AWARDED

Birch Hills, Sask.—$10.000 6 per cent. 20 instalments to Flood Land Company, Regina.

Dorval, Que.—$200 000 5 per cent. 40 years to Sun Life Assurance Company, Montreal.

Russell Townhip, Ont.—$10,000 5 per cent. 20 years to Messrs. Brent Noxon & Company.

Prairie Rose R.M., Sask.—$5 000 6 per cent. 20 year to Messrs. O'Hara & Company, Winnipeg.

NEW BRUNSWICK'S MANY ACTIVITIES

Agriculture, Lumbering, Mining, Railroading, Shipping and Building Interests are Busily Engaged

(Special Correspondence.)

St. John, N.B., June 2nd.

Trade conditions generally in New Brunswick are satisfactory. The farmers got an earlier start than usual with their spring work, and, although the latter part of May was somewhat damp and cold, vegetation has a good start. The rainfall was of great benefit to the lumbermen, enabling them to get out logs which it was feared would be hung up in the streams all the summer. The outlook for the lumber trade is, therefore, bright, for prices are high and the demand continues active.

Much attention has been given this spring to the orchard industry of the province. Not only have many orchards been pruned and cared for, but over fifty thousand fruit trees have been planted. This will probably be surpassed next year.

Savings and Financial Stringency.

The financial stringency has not been seriously felt in New Brunswick, although if money were easier there would probably be greater activity in the building trade. The price of building materials of all kinds is high, and there is no speculative building in progress, but merely such as is warranted by immediate demands. These demands are large, and a scarcity of houses is reported, not only in St. John, but in nearly all the towns in the province.

Owing to the activity in real estate and the general money market condition it is said that some difficulty has lately been experienced in St. John in raising money on mortgage. As high as seven per cent. has been offered, with first-class security, but money is scarce. There is more than $5,500,000 in the government savings bank in St. John. There are similar funds in chartered banks. If these funds were available for purpose of local development, there would be no complains regarding tightness of money.

Railway and Shipping Developments.

The Canadian Pacific Railway Company has awarded the contract for new shops to be erected at McAdam Junction. They will be built of concrete and steel at a cost of about $100,000. The company is also making a large expenditure at West St. John filling in an area near the new grain elevator to provide for additional tracks and yard space. The new elevator will be ready for use next winter.

The supplementary estimates brought down at Ottawa recently included $135,000 for the construction of a spur line from the Intercolonial Railway to East St. John, where the great Courtenay Bay harbor works are under construction. Another item provided $50,000 towards the extension of the breakwater at West St. John toward Partridge Island. It is the intention of the government to extend this breakwater all the way to the island, closing up what is called the western channel, and protecting the western harbor from the force of storms in the bay. The total cost of completing this extension will be more than half a million dollars.

Oil Shales Companies.

Some doubts were expressed concerning the value of the deposits of oil shales in Albert county, and there was a rumor that the development work carried on by engineers representing MacKenzie & Mann's interests had not proved satisfactory. This rumor was denied, and there has since been announced the formation of a company with $5,000,000 capital to take over the interests controlled by Senator Domville, Col. F. W. Wedderburn, and R. L. Johnston, of St. John. This company, to be known as the Oil Shales Company, of Canada, Limited, is composed chiefly of Ottawa men, and its engineer has been examining the deposits in Albert county, and is reported to be much pleased with the prospect. This makes two companies with capital now interested in the development of oil shales. The region is to be visited this week by a party of twenty-five business men from Montreal, and will be visited at the end of July by an excursion of the International Geological Congress.—H. T. H.

◆

CATERING TO CANADA'S NEEDS

The United States ranks first as a caterer to Canada's needs and second as a customer of the northern neighbor's supplies, says a report completed by the United States Bureau of Foreign and Domestic Commerce. Canada buys more from the United States than from all others combined, having purchased 65 per cent. of its goods there last year.

The United States in 1912 took from Canada 38 per cent. of that country's exports. The United States to-day, says the report, takes almost the entire export of Canadian minerals of all kinds, the bulk of its forestry exports, more than half of the manufactures it sends out, and a third of its fishery exports.

BRITISH COLUMBIA

Australia-Canada Trade—Development of Shipping—Municipalities Require Money

(Staff Correspondence.)

Vancouver, June 2nd.

A better service between the Antipodes and Canada was inaugurated when the big new turbine steamer Niagara arrived at Vancouver on her first trip from Sydney. Some time ago the announcement was made that betterment had been decided upon, and now one of the best, if not the best, passenger steamer on the Pacific has been put on the route. She indicates great development in the service since the days when the Miowera and Aorangi were on the run. None of the old boats now ply on the route, and if such expansion can take place in a few years what will it be in the next five or ten, in days when development is proceeding much more rapidly and on a larger scale than formerly?

It has been pointed out in these columns what excellent opportunities exist for increased trade between Canada and Australia, and if there are fruits from the trip of Hon. George E. Foster, commercial relationship between these two parts of the empire should become very close.

Expansion of Shipping.

Mention was made recently of the expansion of shipping on the Canadian Pacific coast, and more indications are to be noted in addition to the arrival of the Niagara. The Hamburg-Amerika liner Saxonia will load 1,600 tons of wheat on her outward voyage from this port next month. Shipments of wheat are as yet quite few, but the fact that they are being made shows what possibilities there are along this line. Then, too, the steamer Toledo has been added to the fast-increasing list of freighters coming here from Puget Sound. She will have a regular schedule. The British freight and passenger steamer, operated by Messrs. W. R. Grace & Company, is to be on the regular route recently inaugurated by that company between British Columbia ports and Mexico. She is a fine boat and will cut down the time between San Francisco and Victoria to fifty hours. Being equipped with cold storage accommodation, she will bring fresh fruits and vegetables from the south.

British Financier is Interested.

An important visitor on the coast is Mr. D. A. Thomas, who is regarded as a world authority on coal matters. He comes from Wales, where he is prominent in the industry, his latest achievement having been to consolidate twenty Welsh coal pits, with an aggregate output of twelve million tons yearly. He is identified as a director or in an executive capacity with nearly thirty British industrial institutions. Mr. Thomas has been spending a few days in the Nicola Valley country, where two coal mining properties are located, those of the Nicola Valley Coal Company and the Diamond Vale. He states that it would be premature to discuss the outcome of his mission, but his visit is regarded as highly significant. He will visit also the mines on Vancouver Island. The hope is that British capital may become interested in coal mining propositions here. He will also inspect the Kentucky and West Virginia coal fields on his way back to England.

Money and Municipalities.

Money stringency has affected interior sawmills, and there are not as many operating this season as was expected. With frost in the interior, the mills there close down for the winter. It was expected that this season would continue good, but the lack of money has been the reason why retailers on the prairie have not stocked up as was anticipated. On the coast conditions are better, all the mills being in operation, with a fair amount of business.

Each week the aggregate of money wanted for municipal purposes is increased. More by-laws are being approved in different parts of the province, and with those held back because of the money situation there will be a large amount of debentures available. In North Vancouver ratepayers have approved a by-law to purchase $150,000 worth of shares in the Burrard Inlet Tunnel and Bridge Company. In Revelstoke by-laws were approved for $20,000 for schools and $15,000 for waterworks.

◆

JUNE WILL BE SLIM MONTH FOR NEW ISSUES

New capital issues shows a total for the month of May of £38,454,000, against £28,950,000 in May one year ago, and £24,442,000 two years ago.

For the first five months of the current calendar year the applications have amounted to £147,300,000, comparing with £104,218,000 one year ago, and £100,740,000 in 1911.

The destinations of the issues in May included £7,281,000 for the United Kingdom, £78,000 for India, £2,073,000 for the Colonies, and £28,120,000 for foreign countries.

The total will undoubtedly be much less for June as underwriters have agreed to discourage further issues until the present surplus supply is absorbed.

CANADIAN AND U.S. BANK SYSTEMS COMPARED

lasticity of Note Circulation Helps the Dominion in Times of Panics or Crises—Ex-President Taft Said the Republic's Banking System Lacks That Quality.

THE UNITED STATES SYSTEM

The keynote of the United States system—if it can be called a system—is individuality or personality. In other matters than banking the people are much opposed to centralization. The States are jealous of the federal authority. The State Governments as well as the Federal Government have power to create banks; and both create them, by hundreds, every year. There are at present over 18,000 banking institutions in the States—some six thousand odd under Federal control, the rest under State control. As a rule the business of a United States bank—either National or State—is confined within a single office. Branch banks are not in favor. The bankers do not want them, because many thousands of bank presidents and directors would have to give place to the branch manager; and the business men and people do not know what an enormous amount the little local banks cost them.

The United States banks are of two kinds—commercial and financial. The big financial banks in the centres employ their resources pretty largely in financial loans and investments. Even the commercial banks do not devote their funds to financing of mercantile borrowers to the same extent as do the banks in the United Kingdom and Canada. Taking all the National banks, their commercial paper amounts to less than one-third their total assets. The Canadian proportion is nearly double that.

Owing to the banking methods prevailing in the States considerably more capital is required to carry on manufacturing or wholesale business than is required in Canada. It can be proved that, in this respect the operations of the small local banks have tended to favor monopolies.

In regard to legislation there is all the time more or less tinkering and interfering by Congress and the State legislatures. Sometimes the measures are really designed for political purposes rather than to strengthen or improve the banking edifice.

The banks are subject to examination by Government officers. The National Banks are required to report condition five times a year. The summaries are published.

The United States banks have no branches abroad. A large part of the foreign exchange business of their own country is transacted by foreign institutions. The Canadian bank agencies in New York City have a good share of this business.

THE CANADIAN SYSTEM

Canada has a system in which the banking business while highly centralized yet promises to perpetuate competition. The important banks have their branches spread over an immense extent of territory. The probability is that in number of branches they will eventually be much larger than at present. There are no privileged banks. All are on the same footing. Every one of the Canadian institutions is a commercial bank—that is to say, it devotes its energies and resources to the cultivation of commercial accounts.

One of the strongest points of the Canadian system is the high degree of organization found among the banking interests. In no country in the world are the banking interests united so closely or so harmoniously as the Canadian interests are. The Canadian Bankers' Association represents the whole of Canadian banking. Partly owing to this the relations of the banks with the Dominion Parliament—which is the only legislative body in Canada having control over banking—have been happy and beneficial for the banks and the country. The law-makers have had the good sense to recognize that bank borrowers are the principal gainers from a policy that leaves the banks free from irksome restrictions. The Canadian banks have privileges of note issue beyond those enjoyed by banks in other countries. The effect has been to enlarge their ability to assist the country's trade and industry. And arrangements are in force that make the notes absolutely safe and sound. Each institution has to place its condition in a uniform statement before the public once a month. So the banking position is clearly portrayed. Their business is not confined to Canada. There are over fifty branches abroad—in the States, Newfoundland, the West Indies, Mexico, London.

These outside agencies are a valuable advertisement for the Dominion and assist materially in developing Canadian trade with foreign countries, besides contributing to increase the profits enjoyed by the thousands of bank stock-holders at home.

Another strong feature of the system is found in the manner in which the banks adapt themselves to the conditions and circumstances of the country's trade. Banks are supposed to do this everywhere, but there are few countries in which they do it so well as in the Dominion. Practically every citizen who has banking business to do has the necessary facilities placed reasonably within his reach.

By way of comment on the two systems it might be id that the recent panic in the United States tested them retty thoroughly. Though it had its centre in New York ity and spread from thence to the various States it never- eless put a very severe strain upon the banks in both the nited Kingdom and in Canada. The former country had to pply the greater part of the $100,000,000 gold shipped to ew York, and Canada was affected because the Canadian nk reserves were largely employed in New York City, and cause of the close trade and financial connections of the o countries. It was quite clear to outside observers that e utter lack of cohesion or co-operation of banking offices the States was one of the principal factors in aggravating e crisis. But panics only come once in ten or fifteen years. is a matter of much consequence how the banking system any given country bears itself in the intervening periods.

The Canadian system has grown with the Dominion, d has moulded itself in a ductile manner according to the culiar Canadian requirements. But our neighbors across e Southern boundary are not satisfied with the working of eir system. They are not settled in their minds just how ey will amend it. There are many particulars in which it lls short of what it should be. The disposition evidently to amend some of the defects and not to undertake revo- ionary alterations.

Ex-President Taft thought that the most crying need of the United States is a proper banking and currency system. He admits that the existing one is inadequate, and says any one who has studied the question admits it. His message to Congress last month in view of the somewhat similar conditions existing in the United States and Canada and the different banking systems in operation in the two countries, is usually interesting. He stated that it was the business of the National Government to provide a medium, automatically contracting and expanding in volume, to meet the needs of trade. The present system lacks the indispensable quality of elasticity.

"The only part of our monetary medium," he continued, "that has elasticity is the bank-note currency. The peculiar provisions of the law requiring National banks to maintain reserves to meet the call of the depositors operate to increase the money stringency when it arises rather than to expand the supply of currency and relieve it. It operates upon each bank and furnishes a motive for the withdrawal of currency from the channels of trade by each bank to save itself, and offers no inducement whatever for the use of the reserve to expand the supply of currency to meet the exceptional demand."

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Tees, Alta.—May 24.—Mr. A. C. Hare's residence. Loss and cause unknown.

Bridgetown, N.S.—May 22.—Mr. J. Berne's garage. Loss and cause unknown.

Grand Coulee Regina, Sask.—Mr. W. J. Vancise's barn. Loss, $1,600. Cause, lightning.

Strathroy, Ont.—May 29.—Mr. J. T. McDonald's residence. Loss and cause unknown.

Armstrong, B.C.—May 22.—Mr. T. K. Smith's lumber mill. Loss, $10,000. Cause unknown.

Baden, Ont.—May 26.—Dominion Linseed Oil Company's tanks. Loss, $3,000. Cause unknown.

Alvinston, Ont.—May 26.—Mr. J. L. McKellar's barn and contents. Loss and cause unknown.

Regina, Sask.—May 9.—Building formerly used as an abattoir. Loss, $5,000. Cause unknown.

Glace Bay, N.S.—May 22.—Mr. J. Phillips' house, South Street. Loss, $800. Cause, supposed incendiary.

Lindsay, Ont.—May 21.—Mr. A. Duck's stable, Glenelg Street, and Mr. S. Walker's stable, Sussex Street.

Sutherland, Sask.—April 29.—Dwelling of C. Spence. Loss, $28. Insurance, $2,200. Cause unknown.

Victoria, B.C.—May 19.—Victoria Paint and Paper Company's premises. Loss, $500. Cause, dropped match.

Maple Creek, Sask.—May 12.—S. E. Lawrence's hardware store. Loss, $28,000. Insurance, $22,000. Cause unknown.

Vancouver, B.C.—May 24.—Mrs. E. Patterson's residence, 312 Dallas Road. Loss, $900. Insurance, $2,000. Hudson Bay Fire Insurance Company. Cause unknown.

Saskatoon, Sask.—May 20.—Mr. T. E. Fisher's barn, 1013 Melrose Avenue. Loss, $100. Cause, sparks. Canadian Pacific Railway box car. Loss, $1,000. Cause unknown.

Ottawa, Ont.—May 26.—Mr. Kitchen's cottage, Clarella Park. Loss, $1,000. Cause unknown. Mrs. Ellen Valee's residence. Loss and cause unknown.

New Westminster, B.C.—May 18.—Brick block. Loss, buildings, $25. Fully insured. Cause unknown.

May 20.—Frame storeroom, 325 Eighth Street. Loss, $50. Cause, supposed carelessness.

Kingston, Ont.—May 28.—Government steamer "Dollard." Loss, $100. Cause, boiler.

May 30.—Royal Military College stables. Loss unknown. Cause, spontaneous combustion.

Feversham, Ont.—May 20.—General store owned by Mr. Henry Pedwell. Loss, stock, $1,414.10; furniture and fixtures, $155; building, $300. Ross & Wright, adjusters for the assured, Toronto. H. C. Pedwell, household furniture, $35. Ross & Wright, adjusters for the assured, Toronto.

Montreal, Que.—May 27.—Mr. N. St. Armour's residence, 541 Colonial Avenue. Loss, $500. Cause, defective chimney.

May 28.—100 Jaques Hertel Street. Loss, $800. Cause, gas explosion.

May 30.—15 and 18 Latour Street. Loss, $300. Cause unknown. Rear 124 Nazareth Street. Loss, $300.

May 31.—Dominion Radiator Company's premises, 146 Craig Street West. Loss, $5,000. Cause unknown.

Fort William, Ont.—May 19.—Mr. D. G. McKinnon's residence, 1312 Ford Street, owned by Mr. J. A. Little, Port Arthur. Loss, contents, $400; building, $100. Insurance, contents, $1,000; building, $800. Cause, pan of disinfectant set carpet alight.

May 21.—Mr. M. Geogitza, store, 531 McBain Street, owned by G. Pykosky. Loss, building, $50. 535 McBain Street, accupied by Mr. Harry Sereda. Loss, $1,100. 533 McBain Street, occupied by Mr. M. Roouluk. Loss, $600. 539 McBain Street. Loss, $200. Cause unknown. Started at 535 McBain Street.

May 24.—Mr. A. Brighter's residence, 223 Ogden Street. Loss, $5. Cause, fireworks.

Toronto, Ont.—May 28.—Messrs. Arnold's store, Queen Street and Bolton Avenue. Loss, $150. Cause, boys and matches.

May 24.—Wm. E. Waring, 56 Afton Avenue. Loss, building, $349.85; household furniture, $35.85. Insured in the Merchants. Messrs. Ross & Wright, adjusters for the assured, Toronto.

May 29.—Shed, rear 198 Bellwoods Avenue, owned by S. Greenberg. No insurance. Shed, rear 200 Bellwoods Avenue, owned by Mr. Foley. Shed, rear 202 Bellwoods Avenue, owned by A. E. O'Leary. Fully insured.

May 30.—International Varnish Company, Carlaw and Parliament. Loss, $1,000. No insurance.

May 31.—Mr. A. J. Lainson's brick yard, North Weston Road. Loss, $1,500. Cause, unknown. Mr. A. Tamblyn's automobile. Loss, $25. Cause, engine backfiring.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED.

The following fire losses were adjusted by H. T. Hughes, fire adjuster, Toronto.

West Lorne, Ont.—May 13.—General store. Building, loss $60; insured, Anglo-American, $3,000. Caused by burning building next door.

St. Thomas, Ont.—May 10.—Mr. D. Mannigan, 37 Balaclava Street, dwelling damaged $73, insured $300, Anglo-American. Cause, sparks from chimney.

South Norwich Township, Ont.—May 8.—Eli Barnno, Township South Norwich, County Oxford. Household furniture valued $453, insured, Commercial Union, $500. Cause, defective stove pipes.

Crystal Beach, Ont.—May 3.—Cashin O'Brien's dwelling destroyed, valued $1,600, insured $800; household furniture valued $680, insured $200. Insured with Commercial Union. Cause unknown.

York Township, Ont.—May 5.—Mr. Wm. Scott, Caledonia Avenue. Dwelling valued $330; insurance, $350; household goods, $210; insurance, $150. Insured with Anglo-American. Cause, overheated stove.

Toronto, Ont.—May 27.—Mr. W. R. Ford's residence, 400 Logan Avenue, Toronto. Furniture damaged $370. Insured, Anglo-American Insurance Company, $1,000. Cause unknown.

May 24.—Mr. A. E. Warring, 56 Afton Avenue. Building damaged, $349.85; insured, $1,700; household furniture damaged, $35.85; insured, $200. Insured with Merchants' Fire.

May 26.—Mrs. Lottie W. McAdam, 168 Admiral Road, dwelling damaged $38, insurance $7,500. Insured with Commercial Union, and British Crown. Cause, fire crackers.

Mrs. Sarah Johnston, Northcote Avenue, dwelling damaged $375. Insured, London and Lancashire, $1,000. Cause, gas meter caught fire while being removed.

Fany Olshintsky, No. 2 Morrison Street, dwelling damaged $35. Insured, Liverpool, London and Globe, $750. Cause, spark from chimney.

The following fire losses adjusted by the E. A. Lilly Adjustment Agency, Calgary.

Calgary, Alta.—May 25.—Tommy Burns' Boxing Arena, totally destroyed. Rimouski, $2,500; Winnipeg, $2,500.

Irvine, Alta.—May 9.—Agnes Calkins' restaurant. Loss $1,700. Insurance in Rochester-German, $800.

Michel, B.C.—Imperial Bank of Canada. Loss on building and furniture, $6,000. Insurance, Phoenix of London, $5,000.

Maple Creek, Sask.—May 13.—S. E. Lawrence, furniture and hardware store. Loss on building about $7,000. Insurance $5,000.

Mountain View, Alta.—May 6.—Mountain View Trading Company. Loss on stock and building, $3,500. Insurance in Royal, $4,000. Cause unknown.

Bassano, Alta.—May 21.—Canadian Pacific Railway Department of Natural Resources' blacksmith shop. Loss on building and stock, $1,700. Insurance $700, in Royal, North America, Home.

Medicine Hat, Alta.—May 19.—Building owned by J. C. Reid, and occupied as dwelling by W. Bodie. Loss on contents, $350; loss on building, $600. Insurance, Royal Exchange, $1,500; Liverpool and London and Globe, $1,000.

Nelson, B.C.—May 9.—J. A. Macdonald, jam and confectionery factory. Loss on stock, $2,000; building and plant, $900. Insurance, Phoenix of London, $10,500; London Mutual, $1,000; Commercial Union, $1,000; Franklin, $3,500; New Zealand, $1,500; Liverpool and London and Globe, $4,500.

Calgary, Alta.—May 6.—Alberta Box Factory. Loss about $4,000. Insurance, Guardian, $2,500; Phoenix of Hartford, $2,500; Sun, $2,500; Rochester, $1,600; Delaware, $2,500; Canadian, $1,250; American, $1,250; Connecticut, $1,000; Western Union, $800; St. Paul, $1,500; Germania, $2,000; Rimouski, $1,100; Stuyvesant, $4,500; Dominion, $1,200; total, $26,200.

JUNE FIRES.

Nelson, B.C.—June 2.—War Eagle Mine plant. Loss and cause unknown.

Burdette, Alta.—June 2.—Business section. Loss, $30,000. Cause unknown.

Crowland Township, Ont.—June 4.—Six houses. Loss, 0,000. Cause unknown.

Dauphin, Man.—June 1.—Mr. A. Esplin's barn. Loss, ,500. Insurance, $900. Cause unknown.

Oak Bluff, Man.—May 31.—Mr. G. Wastle's separator. oss unknown, Cause, flax winding on a shaft.

Brantford, Ont.—June 1.—Mr. C. McEwen's new resi- nce. Loss, $4,000. Cause, supposed oily rags.

Halifax, N.S.—June 1.—Nova Scotia Car Company's ant. Loss unknown. Cause, explosion of cupola.

Amherst, N.S.—June 1.—Canada Electric Company's ation, etc. Insurance, Home Insurance, $1,000; Queen, ,000; National of Hartford, $3,000; Norwich Union, $2,- 0; Hartford, $2,000. Loss, $25,000. Cause unknown. able insurance, Sun, $400. Messrs. Eller and Sons' stable. sured with New York Underwriters. Mr. C. C. Black's nements. Partially insured.

Toronto, Ont.—June 1.—Groceries, Limited, 31 and 33 ront Street East. Loss, $55. Cause, supposed incendiaries.

June 2.—Mr. J. Miller's baking and confectionery store, 2 Queen Street. Loss, $3,000. Insured with Queen City aledonia and Hand in Hand. Cause, probably electric res. 624 Parliament Street. Loss, $400. Cause, children aying with matches. Moffat Stove Factory, Denison Ave- ue. Loss, $1,000. Cause, explosion. 446 Dufferin Street. oss, $35. Cause unknown.

◆

LIGHTNING ROD PROTECTION

As will be seen from The Monetary Times fire record, ghtning was the cause of several fires involving much loss ad brings up prominently the question of the advisability lightning rod protection. Town and city buildings, by ature of their environments, are not nearly so much exposed lightning risks as are isolated buildings in the country stricts. Lightning rod systems do not secure complete amunity, but they do secure an immunity which is almost omplete, as Professor Day of the Ontario Agricultural Col- ge has shown in these columns. Returns collected last ear from Farmers Mutual Insurance Companies in the nited States indicate an almost infinitesimal loss on build- gs so protected as compared with the loss in unprotected uildings. The cost of the installation of such systems are nall compared with the risk.

Saskatchewan's fire commissioner R. J. McLean, points ut a simple remedy which would in a large degree tend to minish the heavy losses suffered by cattle and other live ock during electrical storms. It is simply the grounding ordinary fence wires at every sixth or eighth post. Quite considerable loss in live stock is suffered by farmers and ock raisers through their ignorance of the existence of such simple remedy.

◆

RICHELIEU AND ONTARIO COMPANY ARE BUSY

Monetary Times Office,
Montreal, June 4th, 1913.

Mr. Jas. Carruthers, president of the Richelieu and ntario Company, on his return from Port Arthur where he tended the launching of the SS. "Noronic," the new ichelieu and Ontario steamer, made the statement that the ompany's business was showing an increase of close to 25 er cent. over the best previous year. He states that there e still over 40,000,000 bushels of wheat of the crop of 1912 the west. This will provide freight for the company's eamers for a long time to come. From all accounts, also, e growing crop promises a good return, up to date. He ommented on the immigration of the present season, stat- g that there was every likelihood that the influx of popula- on from Europe and the United States was likely to run ose to 500,000 people this year.

Reports so far from the agents of the Richelieu and ntario promise a large passenger business this season and is indication is further strengthened by reports from the nited States which indicate the probability that travel this ar will be more over the Canadian routes than across the lantic.

The Richelieu and Ontario now has a through passenger rvice from Montreal to Winnipeg and reservations are ing made for considerable pullman car traffic by travelers siring to make the trip largely by boat. Mr. Carruthers rther intimated that progress was being made on the com- etion of the financing programme for the Richelieu and ntario, and that in this connection an announcement of a vorable character for shareholders would be made in the urse of a few days.

PERSONAL NOTES

Mr. J. H. Plummer has returned to Toronto from England.

Mr. E. R. Wood has returned to Toronto from a trip to England.

Sir Max Aitken will be a visitor to Montreal and Toronto during the coming week.

Mr. L. S. Fullerton, of the Dominion Securities Corporation, is on a visit to England.

Mr. C. Hamilton Wickes, British Trade Commissioner to Canada, is making a trip to the Pacific Coast.

Messrs. G. M. Anderson and T. C. Edgar Watt have been elected members of the Toronto Stock Exchange.

Mr. Garnet P. Grant, of the Dominion Bond Company, has been elected a member of the Royal Colonial Institute.

Mr. William Wallace, general manager of the Crown Life Insurance Company, has been on a lengthy trip through Western Canada.

Mr. Douglas Spencer, of Orten, Boving & Company, London, was a visitor to The Monetary Times office this week. Mr. Spencer is in Canada on a business trip.

Mr. G. B. Wickes, of Toronto, has left for England, where he will raise capital for the Empire Life Insurance Company, which will specialize on sub-standard business.

Mr. A. B. Evans, vice-president, and Mr. C. W. Tingling, managing director of the National Drug and Chemical Company of Canada, Limited, leave Montreal to-day in connection with the company's issue in London.

At the meeting of the Canadian Fire Underwriters' Association, Mr. Harold Hampson, of Montreal, was elected president, succeeding Mr. H. M. Lampert, of Montreal. Mr. E. F. Garrow, of Toronto, was elected vice-president for Ontario and the west; and Mr. J. Gardner Thompson, of Montreal, for Quebec and the east.

The successful candidates in the recent Saskatchewan chartered accountants' examinations were as follows:—Final, S. G. Lothier, Regina; A. E. Parker, Prince Albert; C. F. Lidster, Regina; R. E. Sayce, Regina; H. J. Palinason, Moose Jaw. Intermediate, Thomas Robinson, Regina; J. B. Watson, Prince Albert; Arthur G. Garrish, Lloydminster; John S. Nicholl, Prince Albert; Donald McTavish, Kindersley; James Scott Hayes, Regina; T. Yates, Gervin; Harold Fox, Regina; H. L. Crossby, North Battleford.

◆

HAVE OPENED A BOND DEPARTMENT

With the rapid growth of western Canadian cities the number of first class municipal securities yielding 5 to 6% and upwards that can now be purchased, has increased greatly, and Canadian Financiers, Limited, of Vancouver and Victoria who have largely extended the scope of operations of their bond and European department, and act as fiscal agents for some of the cities and municipalities of the West are doing good work in making known as widely as possible the excellent opportunities offered by such investments.

In particular they point out that municipal securities can now be bought to yield as high a return as good private mortgages, which in marketability, convenience of transfer, and simplicity in collection of interest, they far excel—while as regards safety, they are in effect a first mortgage on all the property within the municipality, and being restricted in amount, and the issues closely regulated by the laws of the province, they have all the undoubted advantages which public obligations confer. The credit of Canadian cities deservedly stands high.

Canadian Financiers, Limited, also draw the special attention of their clients to that comparatively new form of short term municipal security known as treasury certificates. By the purchase of these, the private investor can acquire a security repayable within one to three years, with all the advantages of safety that municipal debentures confer.

The bond and European department of Canadian Financiers, Limited, is under the management of Lt.-Col. G. H. Dorrell, who is an English and British Columbian barrister, and has made a special study of the municipal and company laws of the province. Lt.-Col. Dorrell has extensive financial connections both in the Old Country and in Europe.

Brandon's street railway was officially opened on Monday by Mayor Fleming.

VALUE OF LIFE INSURANCE

XV.

Home vs. Commerce

BY C. A. HASTINGS

For example, take any large firm or business, and you will find that it has been established on its path of progress by the earnest attention of one man, or a very few men, who have put, not only heart and soul into the business, but have also developed it on lines so sound that they have laid the foundations of wealth for generations to come, in fact, they have insured the patronage of their present patrons' children.

Now it is very true that pride of family is a great incentive to such men, but it is equally true that domestic savings and expenditure does hamper the man who is trying to develop his business.

In fact, this very man, ambitious and determined to make good, always puts back as large a portion of his profits as he can into the business, and intentionally puts off buying protection in order to save, what he very erroneously terms, its cost. He, therefore, undertakes a risk on behalf of his family, a risk which he has no right to accept, and which, under any other condition, he would not dream of accepting.

The only explanation is that he does not know really—obvious though it may be—what are the several advantages that can be provided by life assurance.

Should Receive Protection.

We all know that the one person who ought to have the protection is the wife. She has made a bargain, so surely man should be fair and give her a guarantee of being able to live, and this guarantee should not end at his death, and there is certainly no reason why it should.

But, it may so happen that he is predeceased by his wife, and the children are only dependent on their father for a limited period; then the object of life assurance, to a certain extent, diminishes. Therefore the policy for the case I have described is one that matures only in the event of his predeceasing his wife, and the annual premium for such a policy is much lower, because his death is not bound to become a claim on the life office.

Then again, he can make other provision for his children, still they have not the same claim as the wife. The annual premium on such a policy as I allude to is smaller, if it be arranged that the widow be paid a life annuity from the date of his death, instead of a lump sum.

Can be Applied Many Ways.

The Joint Stock Companies' Journal says: "Policies of this nature can be applied in several cases. For instance, a man leaves his business to his sons subject to a fixed allowance to his widow: quite a common and proper legacy, but it has the drawback that the business may sometimes, if not frequently, be handicapped to make such payments—it all depends on the size of the business, the annual payment, and the number of sons who also have to depend on the business for a living. Then there is the case of a man who wishes to provide for one advanced in years, in the event of his predeceasing the dependent. Yet another is the case of a legacy that will fall due, provided the legatee does not die first, and who, in turn, wishes to make equally sure that his wife will secure the same benefits from a life office in the event of this happening."

In short, by going to a sound life office, it will be found that the company will act as trustee without any extra expense to the policyholder or the beneficiary, and so a man can be relieved of a very real anxiety—though he may never acknowledge it.

SASKATCHEWAN TOWN GETS MANY BIDS

While a number of municipalities are complaining of a paucity of tenders for their debentures, the town of Birch Hills, Saskatchewan, has received nine bids for its recent issue. The amount was $10,000 6 per cent. debentures maturing in twenty years. The money will be used to make permanent improvements on public highways.

The tender of the Flood Land Company, of Regina, was accepted, their offer being $9,670, free of all expense to the municipality. The lowest tender was $9,000. Bids were received from the sinking fund trustees of Winnipeg city and from Sidney Spitzer and Company, Toledo, Ohio.

◆

CANADIAN PACIFIC STOCK MOVEMENTS

A good deal of mystery seems to surround movements in Canadian Pacific, which has been rather a weak spot, says a Central News dispatch from London. When this stock recently advanced over 250, it was quite confidently expected that the quotations were about to travel straight away up to 270 or possibly 280, and the improvement was associated with arrangements for a new capital issue. The fall, which has falsified expectations, is attributed to manipulation in the market, but this explanation cannot be regarded as a final one. Perhaps it is too indefinite to be regarded really as an explanation at all. It is fairly certain that if the international bull pool, which a short time ago resumed operations in the stock in London, New York and Berlin had continued its efforts, the latter would have been on too powerful a scale to have been broken up by anything short of a serious international crisis.

The most satisfactory reason of the reaction, which can be advanced, is that the Berlin members of the bull pool, to use a colloquialism, bit off more than they could chew, and finding their position difficult owing to the stringency in the German money market have been forced to lighten their commitments. Most of the selling of Canadian Pacific has undoubtedly come from the German capital, but it may be shrewdly surmised that a good deal more of stock has been sold than has been offered from the German members of the pool. That is to say, the bears having discovered the position, have probably been selling through Berlin to accentuate the feeling of unsettlement and accelerate the downward movement.

◆

COST OF OIL AND COAL FUEL

Some interesting figures relating to the cost of running a vessel on oil fuel have been prepared by the Canadian Pacific Railway. Two coasting steamers of the company employed in British Columbia waters have for some time past been using oil instead of coal. The following are the figures, showing expenses:

SS. Princess Victoria.

	Cost per day.
100 tons of coal, at $4.50	$450.00
9 firemen, at $55	16.50
9 trimmers, at $45	13.50
Food for 18 men	7.56
Total	$487.56
344.17 barrels of oil, at $0.90	$314.25
6 firemen	11.10
Food for 6 men	2.52
Total	$327.87

SS. Princess Charlotte.

	Cost per day.
100 tons of coal at $4.50	$450.00
13 firemen, at $55	23.80
10 trimmers, at $45	15.00
Food for 23 men	9.56
Total	$498.36
344.17 barrels of oil, at $0.90	$314.25
6 firemen	11.10
Food for 6 men	2.52
Total	$327.87

In the case of the Princess Victoria the difference in favor of oil is thus $159.69, and in the case of the Princess Charlotte $170.49.

CANADIAN NORTHERN SUBSIDY

iscussed at Ottawa—Sir Wilfrid Suggests a Loan—Question of Rate Control

The Canadian Northern subsidy was discussed in arliament this week. Sir Wilfrid Laurier wanted a financial atement of the company and thought a better plan would e to grant a loan, such as is being done in the case of the rand Trunk Pacific. Hon. Mr. Graham said that the first rievance against the road which he thought should be emedied was the refusal of the company to bring under the ontrol of the Railway Commission the rates on the British olumbia section of its transcontinental. Hon. W. T. White, ggested that the company's capitalization should not be laced at an unduly large amount.

alue of Stock.

Hon. Frank Cochrane said the total of the aid proposed as $15,640,000, of which $3,120,000 was the regular subsidy t $6,400 per mile for the 250 miles now under construction om Toronto to Ottawa. The stock of par value of $7,000,00 which the company was turning over to the government, as, he believed, of considerable value, and would become creasingly valuable with the completion of the undertaking. would not be disposed of without the consent of parliaent.

In regard to the Toronto-Ottawa line, he said, the verage cost was estimated at $41,131 per mile. The Ottawa Port Arthur link of the transcontinental line, totalling 910 iles, would cost $49,381 per mile. The company despite e government guarantee of $35,000 per mile on this secon had been able to dispose of its bonds at only 90 3-4ths, ealizing $31,760 per mile. For the 260 miles from Edmonon to the Yellow Head Pass, the guaranteed bonds had rought only 87, or an average of $22,400 per mile, while e average cost of this section was estimated at $38,500 per ile. Taking the Ottawa to Port Arthur line it was seen erefore that the company had been financed to the amount pproximately of $34,578,000, while the cost of construction ould be $54,638,000.

ompared with other Roads.

Mr. Cochrane said that having regard to all circumtances, and the aid that had been granted to the other two ranscontinental lines, the government was only dealing airly with the Canadian Northern Railway in granting the ubsidy. The aid granted to the Grand Trunk Pacific he igured out to be equal to a cash subsidy on the line from Vinnipeg to Prince Rupert equivalent to $22,561,000, while he leasing to the company of the National Transcontinental nder the agreement of 1903 meant practically an additional ash subsidy of $1,125,000 for forty-three years. The aid to he Canadian Northern, including the present subsidy proosals, amounted to a bond guarantee totalling $50,655,000, nd cash subsidies totalling $22,122,398. No land had been ranted directly to the Canadian Northern by the Dominion, ut the company had acquired land grants through the purhase of other charters to the amount of 4,000,000 acres. In ddition there were 1,225,600 acres land subsidies applying n its main line.

uilding One Mile a Day.

The claim of the Canadian Northern Railway, said Mr. White, was based on the general principle that government ssistance must be obtained to carry through a private enterrise of such magnitude. Since 1898 the company had been dding to its system at the rate of one mile per day. It had 5,000 men now engaged in construction work, and 25,000 men employed in the operation of all its lines. This subsidy was only to assist the completion of the main line, and was ot intended to assist branch lines. The total outstanding onds of the company for construction now amounted to $265,000,000, of which $120,000,000 were secured by Federal nd Provincial guarantees, and its subsidiary undertakings The total of Dominion guarantees was $58,000,000.

CANADIAN STEEL TRADE OUTLOOK

According to Mr. J. H. Plummer, president of the Dominion Steel Corporation, the immediate outlook for the steel rade in Canada, is good.

"The demand for steel products in Canada," he said, "is imply enormous, and there is no likelihood of the Canadian mills being able to overtake the demand for some little time o come. The only change in the situation that is at all robable is that there may be a slight decline in the imports f steel."

Mr. Plummer told The Monetary Times that he had arranged in London for the financing of the company's pressing eeds.

CASES OF FORGERY

Fidelity and casualty insurance companies will be interested in the latest official statistics of forgery and other offences against the currency. Here is the table:—

Offences	1910 No. of charges	1910 No. of convictions	1911 No. of charges	1911 No. of convictions
Offences against the currency	10	5	17	13
Forgery and uttering false documents	269	232	387	315
Total	279	237	404	328

According to the above figures, the increase in this class of offences, during the year, is 125 for charges and 91 for convictions by provinces: of the 17 charges for offences against the currency in 1911, there were 16 in Ontario and 1 in British Columbia; for forgery and uttering false documents, 171 charges in Ontario, 64 in Manitoba, 48 in Alberta, 41 in Saskatchewan, 30 in British Columbia, 23 in Quebec and 10 in Nova Scotia.

TORONTO GENERAL TRUSTS CORPORATION

The recent occupation of the handsome head office building of the Toronto General Trusts Corporation is a reminder that this important financial institution is a pioneer company, organized by Mr. J. W. Langmuir in 1882. Mr. Langmuir still presides over the corporations growing affairs as vice-president and general manager. The assets under the care of the corporation which in 1900 totalled $16,047,395 have been augmented to such an extent that in 1912, the total reached $53,852,564. The figures show only those assets remaining with the corporation.

Many and varied are the services of such a trust corporation and at the head office in Toronto no less than eight departments are in operation. They are:—1, estates; 2, real estate; 3, mortgage; 4, rental; 5, bond and stock; 6, insurance; 7, safe deposit and storage; 8, accountancy. Branches of the corporation are established at Ottawa, Winnipeg and Saskatoon. The company's officers are: President, Hon. Featherstone Osler, K.C.; vice-presidents, Hon. J. J. Foy, K.C., M.P.P., and Mr. J. W. Langmuir, who is also general manager; assistant general manager, Mr. A. D. Langmuir; secretary, Mr. W. G. Watson.

ROYAL EXCHANCE ASSURANCE

With branches in many countries and an enviable reputation, the Royal Exchange Assurance has again presented an annual report showing progress in business and a strong financial position. The company's assets total £6,795,099, considerable new business was obtained for the company's life department.

During the year ended December 31, 1912, 2,569 proposals were received for £1,230,766 sum assured and £392 reversionary annuities. Of these, 2,304 were completed, assuring £983,303 sum assured and reversionary annuities of £260 at single and full annual premiums of £37,468 of which £53,500 sum assured was re-assured at annual premiums amounting to £1,152. The total premium income for 1912 (after deducting re-assurance premiums) was £347,473 being an increase of £9,645 upon the figures for 1911. The interest earned was £140,245 being £4 3s. 4d. per cent. on the life funds, but after deduction of income tax the average rate yielded was £3 18s. 10d. per cent. The total income from premiums and interest (less tax) amounted to £480,286 an increase of $16,253 upon the previous year.

The claims paid (excluding endowments matured) amounted to £150,128. This sum was considerably less than the expected amount based on the mortality tables used in the valuation. The sum disbursed for surrenders, including bonus, was £32,361. The expenses of management and commission were £52,604 a liberal allowance having been made for all items outstanding and accrued. The life assurance fund amounts to £3,529,278.

In the annuity department 182 immediate and deferred annuity contracts were issued in consideration of £93,292 purchase money and premiums, for annuities amounting to £10,705; 58 annuities terminated by death and 6 by surrender, representing a total payment of £5,527 5s. 8d. per annum. The annuity fund amounts to £903,961.

The company's annual report contains details of the busines done in the other departments:—capital redemption, fire, marine, employers' liability, personal accident, general, trustee and executor.

The Canadian branch of this progressive corporation is at the Royal Exchange Building, Montreal. Mr. Arthur Barry is the manager and is doing much to popularize the company's policies in this country. The local directors are:—Dr. E. P. Lachapelle and Mr. H. V. Meredith, of Montreal and Mr. J. S. Hough, K.C., of Winnipeg.

MONEY MARKETS.

Messrs. Glazebrook and Cronyn, Toronto, exchange and bond brokers, report exchange rates as follows:—

INVESTMENT NOTES.

P. Lyall & Sons Construction Company.—The statement of the P. Lyall & Sons Construction Company has just been made public, the earnings for the first year, ending March 31st, 1913, amounting to $258,697. This is equivalent to about four times the bond interest, and, after deduction of bond interest and preferred dividend, to over 5 per cent. on the common stock.

The balance sheet shows the company to be in a strong financial position, surplus of liquid assets over current liabilities amounting to $430,866. The company reported the establishment of new plants at Toronto, Winnipeg, Swift Current, St. Andrew's and Wallace, in addition to the plants already established at Montreal, Regina, Moose Jaw and Calgary. These establishments give the company's organization the ability to handle construction work in any part of the country with equal facility. The directors reported contracts on hand amounting to $4,000,000, as compared with $3,000,000 at this time last year, and expressed the expectation that the earnings would be correspondingly larger.

Buffalo Mines, Limited.—The Buffalo Mines, Limited, reports for the year ended April 30th last as follows: Gross income, $1,390,900; total expenses, $499,707; net income, $891,193; less adjustments, $7,742; dividends, $650,000; surplus, $233,450; previous surplus, $389,577; total surplus April 30th, 1913, $623,027.

There were produced 2,235,853 ounces of silver, as compared with 1,525,263 ounces in the previous year, an increase of 710,590 ounces. Ore put in sight during the year amounted to 1,719,900 ounces compared with 1,500,000 ounces in the preceding year, an increase of 210,900.

The development during the year was mainly along the branch of the bottom level of No. 5 with additional ore developed on the Nancy Helen working, also on the first level of No. 7. This is new development, as no work has been done previously on this vein. There were several branches of this series of vein, and during the coming year they should develop into considerable tonnage of milling ore. The total shaft work to date aggregates 1,074 feet, total drifting 11,047 feet, and total stoping 1,607,572 cubic feet. The ore on hand at the end of the fiscal year amounted to 269,641 ounces.

WHAT CANADA WILL SPEND THIS YEAR

Estimated expenditure for the fiscal year ended March 31, 1914, together with the sums granted for the fiscal year ended March 31, 1913, and a statement showing the increase and decrease for each service.

TO RAISE RATE ON BONDS

The Westmount city council have raised the rate of interest on municipal bonds from four to four and a half per cent. on a motion amending a former by-law passed two years ago. Since that time no bonds have been sold owing to the condition of the money market. The new by-law is calculated to obtain a relatively better price than could be obtained by forcing them on the market.

◆

WHERE FORTY-FIVE MILLIONS OF BONDS WENT

The $45,000,000 of New York City bonds, which Controller Prendergast offered at the rate of 4½ per cent., were all sold in one day and at prices lower than at any time within recent years, with the exception of the panic year of 1907. The average price was 100.159 and the average income basis about 4.49.

There were 476 bidders and the total amount of the bids was $76,124,780. The awards range from 100.005 to 100.381. One feature of the awards was that J. P. Morgan and Company got none of them. The firm put in a bid for $6,000,000 at par, and the controller threw out all par bids. Kuhn, Loeb and Company, through a syndicate, offered to take $15,000,000 at par. In the syndicate were the United States Mortgage and Trust Company, the Fourth National Bank, Kidder, Peabody and Company, Heidelbach, Ickelheimer and Company, Hallgarten and Company, and the New York Municipal Railways Corporation.

The European bids showed a decrease, compared with previous years, owing to monetary conditions in Europe. No one individual or firm obtained any large amount of the bonds, Harvey Fisk and Company heading the list with $5,000,000, the Bankers' Trust Company coming next with $4,000,000. The next largest amount, $2,500,000, went to J. and W. Seligman and Company.

Owing to the attractive interest rate financial experts thought that much better prices would be received. In June of 1907 an issue of $29,000,000 at 4 per cent. sold for 100.091, and in August of the same year an issue of $15,000,000, also 4's, brought only 100.004.

The bonds, or, technically, "corporate stock," is payable on March 1, 1963.

NOVA SCOTIA'S PRODUCTS

Shipments of Apples — New Drydock for Halifax — Building is Active and General Outlook is Bright

(Special Correspondence).

Halifax, June 2nd.

Apple shipments for 1912-13 while not much more than over half of what they were for the season of 1911-12 in quantity, far exceeded the estimates of the growers and exporters early in the season. For the past four years shipments have been as follows:—

Date.	Barrels.	Half-barrels.	Boxes.
1909-10	834,207	628	4,885
1910-11	321,513	885	3,161
1911-12	1,730,496	2,086	10,011
1912-13	983.229	4,456	24,199

London continues to be Nova Scotia's largest apple market—of the total amount shipped, 430,847 barrels, 374 half-barrels and 5,064 boxes, were sent for consumption by the people of that great metropolis. Liverpool, England, was the next best market with 189,054 barrels, 1,540 half-barrels, and 1,386 boxes. Glasgow came third, with 47,812 barrels, 24 half-barrels, and 3,823 boxes. The markets shipped to, however, cover not only Europe, but South America, Bermuda, South Africa, etc.

Fisheries and Shipping.

The Halifax local market is estimated at 50,000 barrels, but there are some who consider that it is in excess of that. 18,000 barrels were shipped to points west of Winnipeg, while 80,000 barrels were shipped to Winnipeg and points east of it, not including 44,000 barrels shipped to New Brunswick. It is too soon yet to get estimates, or any idea of what the 1913 crop will be, but so far, everything looks favorable to a good agricultural year in this province. Taking into consideration the great number of young orchards coming into bearing each year, it is estimated that before long the apple belt of this province will produce not less than 5,000,000 barrels of the finest flavored eating apples in the world.

Fresh fish shipments from Nova Scotia to different points in Canada continue to be on the increase. It is not many months ago when we boasted of one car of fresh fish leaving Halifax for the Montreal market daily—it has now increased to five, and it is estimated that this summer not less than eight carloads will be the minimum number per day. A Gloucester fleet of thirty-three fishing vessels arrived here last week for the mackerel fishery.

Labor is Busy.

The announcement of $500,000 in the federal estimates as a preliminary expenditure for a first-class dry-dock for the port of Halifax, was well received by the shipping interests in this city. The want of a second dock was never felt more than the past winter—on account of the lack of accommodation several large repairs were lost to this port. One of these ships, on which a tender of £15,000 was given for repairs when the dock was available, was taken to England on account of immediate repairs to be obtained there, but at a cost of £25,000.

The large number of buildings planned, and now under erection, has made a scarcity in building labor, and contractors are seeking help from outside, offering the maximum wage. The construction work at the present terminals is advancing more rapidly than during the winter months, and a large number of men are now employed at new Pier No. 2, which, the contractors state, will be ready for berthing purposes on December first next.

British capitalists recently visited this city in connection with the establishment of a large industry on the water front.

Immigration through the port increased about forty per cent. during March and April, as compared with the same months of last year, freight will also show about the same increase.

The tram-car strike which occurred here last week, after four days' duration, was amicably settled.

The establishing of an all-the-year-round passenger service between Liverpool, England, and Halifax, commenced with the new Furness liner Digby, 4,000 tons gross register, which made the passage in eight days. She calls at St. John's, Newfoundland, both coming and going. Her first trip was marked with success, her passenger accommodation being taken up both coming and going; her average speed in crossing was 13 knots.—E. A. S.

◆

Mr. W. H. Flood, of Regina, has sold his interest in the Fort Qu'Appelle townsite, also the hotel at Fort Qu'Appelle being erected for him.

NEW YORK BANKERS AT OTTAWA

State Association Will Hold Their Convention in Canada's Capital

The Bankers of New York State have chosen Ottawa as their meeting place for the twentieth annual convention on June 12th and 13th. The invitation to meet in the capital was issued by the bankers of Ottawa, the civic authorities and the Dominion Government. The occasion is the celebration of one hundred years of peace between the English-speaking peoples, and in this celebration the association is in advance of any other organization. For some months to come much will be heard of friendly relations with the Mother Country, uninterrupted during the century past. It is fitting that the bankers of the Empire State should meet with the bankers of Canada at their seat of government, to give prominence to this occasion.

Finance and Farming.

The mornings of June 12th and 13th will be devoted to the business of the association. A debate has been arranged between New York Chapter and Syracuse Chapter, of the American Institute of Banking. The subject is: "Resolved, That it is for the best interests of the State of New York that some new form of financial institution be established in order properly to finance the business of agriculture in said State." Affirmative, New York Chapter—Debaters, E. G. McWilliam and Raymond B. Cox. Negative, Syracuse Chapter—Debaters, A. W. Loasby and W. H. Kniffin.

CORNELIUS A. PUCSLEY,
President, New York State Bankers' Association.

The banquet on the evening of the 12th will be the notable event of the convention. Invitations will be issued by the Dominion Government, and one of the ministers will act as toastmaster. Guests of the occasion will include the Hon. R. L. Borden, Hon. Mr. Lemieux, Hon. William Jennings Bryan, United States Secretary of State, Mr. James J. Hill, and Congressman Andrew Jackson Montague, former Governor of Virginia.

Some Notable Speakers.

Among the other speakers at the convention will be the following:—

Hon. George E. Roberts, Director of the Mint, United States Treasury, Washington, D.C.; George Grafton Wilson, Ph.D., Professor of International Law, Harvard University, Cambridge, Mass.; Senator Robert L. Owen, Chairman of the Finance Committee of the Senate at Washington; Professor L. H. Bailey, Director of the New York State School of Agriculture at Cornell University, Ithaca, N.Y.; Congressman Lemuel P. Padgett, Chairman of the Naval Affairs Committee, Washington, D.C.; and Hon. Adolph O. Eberhart, Governor of Minnesota, St. Paul.

The party will visit the Royal Mint and Parliament Buildings.

◆

Saskatchewan's monetary commission are being granted every facility and assistance in their enquiries in Great Britain, where Mr. Dunning and Hon. George Langley, with Mr. A. F. Mantle, the secretary, have been carrying out their investigations. Mr. Haslam and Dr. Oliver have attended the sessions of the International Institute of Agriculture at Rome.

OTTAWA FOR INDUSTRIES

Canada's Capital Has an Eye to Business—Seeking More Industries

The city of Ottawa, to be visited by a party of New York State bankers next week, is one of the few capitals whose eye to industrial growth has not been blinded by parliamentary dignity. The seat of Canadian Government has all the charm of the capital of a great country. It possesses picturesque parks and architectural beauty. It has also factories and factories keep Ottawa busy. Ottawa is one of the few centres which are not too proud to put aside the plug hat and Prince Albert for a few hours in order to maintain a systematic search for new industries. Ottawa offers opportunities for the establishment of numerous industries, and particularly for the manufacture of the following:—Automobiles, boxes, bags, biscuits, barrels, bottles, clothing, cigars, confections, cereal, foods, elevator and mill building machinery and materials, furniture, flour, gloves, oatmeal, paper, paperwares (and kindred products), pottery, roller mill products, rubber and felt goods, shirts and collars, shoes, steel castings, tiles, textiles, woodenwares, and many other lines.

Has Excellent Transportation.

Twelve steam roads enter the city. Two others and one electric line are under construction; and there are eight water lines. These are the Grand Trunk, Canadian Pacific, Canadian Northern, New York Central, and the water lines, via Rideau Canal to the St. Lawrence and the Great Lakes, Ottawa and St. Lawrence Rivers to the Great Lakes, Montreal and the Atlantic Seaboard.

Freight rates from Ottawa to the markets of Western Canada are identically the same per class, per hundred-weight, as rates from Toronto, Hamilton, London, Woodstock, Welland, Windsor, Walkerville and other industrial centres of Ontario, and with the advantage of one-half to two days quicker service from Ottawa to western points, by reason of direct haul without transhipment, as is necessary on consignments of freight from points not on the main line of the only three transcontinental railway lines.

On eastbound and export traffic, Ottawa has the advantage, in both rates and time, over all other Ontario and Western Canadian cities, by reason of location and more direct lines and transportation facilities between this point, the Atlantic Ocean and the United States.

As to raw materials, woodworking, paper-making, and for kindred industries, raw materials are available in the city and within easy access. Timber and other materials abound throughout the district: Ash, apatite, beech, basswood, birch, barite, corundum, clay (brick, tile and pottery), cedar, elm, granite, graphite, iron, hemlock, limestone, marble, marl, mica, maple, magnesite, peat, pine (red and white), poplar, phosphate, sand and water—good, soft, and cold.

Splendid industrial sites, with trackage, are available—suitable, convenient, and comparatively cheap. Some sites in city limits, with fixed assessments for 20 years, with a variety of labor in the locality, await occupancy.

Favorable labor conditions obtain in Ottawa. Nearly every class of labor is available, especially efficient female help. The situation in Ottawa is particularly free from strife.

Ottawa has large individual factories producing paper, cardboard, tents and awnings, marine signals and cement. The city has now 192 important industries of various kinds, giving employment to about 18,500 persons—male and female—and paying in salaries and wages, approximately $8,500,000 per annum. The total products in 1912 are estimated at $40,000,000.

Ottawa is still the largest individual manufacturer of lumber in the world—the district output of 1912 aggregating 559,000,000 feet, board measure, with a monetary valuation of about $16,800,000.

SASKATOON WANTS TWO MILLIONS

Saskatoon will make a bond issue of $2,000,000 in the near future. This will be used for capital expenditure, outstanding treasury notes and the redemption of street railway bonds. The city's total assessment for the current year has been placed at $55,000,000. Saskatoon's previous issue of £400,000 5 per cent. consolidated stock in November, 1912, at 99½, was a notable success, being over subscribed.

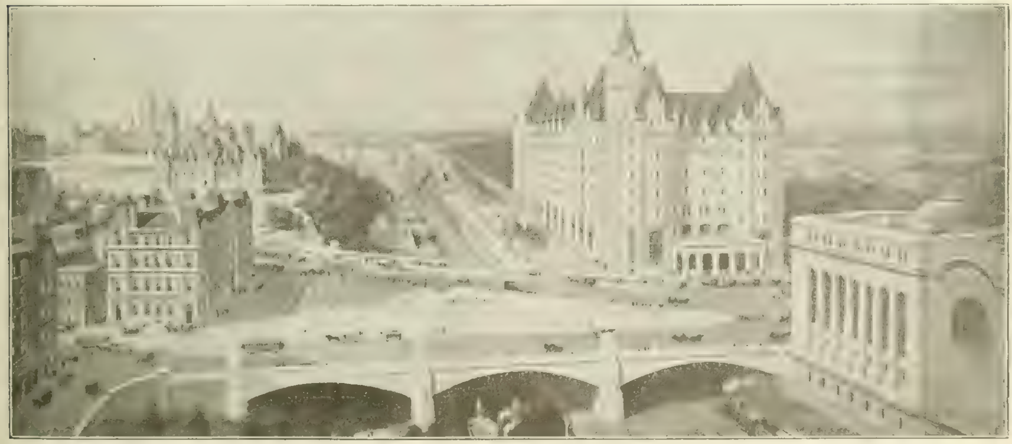
SENATE PASSES BANK ACT

The Senate has completed the consideration of the Bank Act. A number of amendments proposed by the Department of Finance were adopted. They are all of a technical character and do not affect the principles contained in the bill.

An amendment which was also adopted provides that banks "may" establish stock transfer agencies in each province. As the bill came to the Senate this clause declared that banks "shall" establish such agencies.

A circular has been sent to shareholders of the Porcupine Gold Mines Company offering to them $125,000 bonds of Vipond Porcupine Gold Mines Company at par. With each $100 bond will be given a bonus of $25 par value common stock. The bonds are due June 14th, 1915, carry interest at 7 per cent., and may be retired at 102 at any time before the due date. The money is needed to improve plant and resume operations. Vipond stock sold at 14 recently, a new low record. It was as high as 71 in 1911.

The capital stock of the following Saskatchewan companies has been increased:—City Investing Company, from $50,000 to $100,000 by the issue of 500 new shares of capital stock of $100 each; Kent and Brown Company, Limited, from $60,000 to $200,000; the Campbell Company, from $200,000 to $550,000; Saskatchewan Bridge and Iron Company, Limited, from $250,000 to $500,000; American Securities, $100,000 to $250,000; Swanston Rural Telephone Company, $6,500 to $7,000; Hepburn Rural Telephone Company, $6,000 to $7,000; Fleming North Rural Telephone Company, from $1,750 to $3,600.



A VIEW OF CANADA'S CAPITAL,

An important convention of New York State bankers will be held at Ottawa next week.

CANADA'S NEW BANK ACT

Changes Made at the Decennial Revision—Summary of the Important Amendments

The first and handy summary of the changes in Canada's Bank Act has been compiled by Mr. D. R. Wilkie, president of the Imperial Bank of Canada. The act will go in force on July 1st, 1913, and will continue the charters of existing banks until July 1st, 1923.

The following is Mr. Wilkie's summary:—

MR. D. R. WILKIE,
President of the Imperial Bank of Canada.

Sections 12 and 16—Additional safeguards have been introduced in connection with the incorporation and organization of banks to ensure the bona fides of original subscriptions for stock, and to facilitate the recovery of unpaid liability thereon, while statements of disbursements for preliminary expenses will require to be submitted to the Treasury Board for approval before a certificate to commence business is issued.

Sections 18 and 20—Changes have been made in the internal regulations in providing for shareholders being kept advised of the by-laws of the bank in force from time to time by being furnished with copies of the current by-laws every five years, commencing with December 31, 1913, and by limiting the qualification shares of directors to those of which they are absolute and sole owners in their individual rights.

Collection of Capital.

Section 34—Facilities for speedier collection of original unsubscribed or new capital stock allotted to shareholders are given by shortening, in the directors discretion, the period within which acceptance of allotments must be made.

Section 43—Proposals have been introduced making the keeping of share and transfer registers in each province in which shareholders are resident compulsory, but it is hoped these provisions, which have many objectionable features, may yet be amended.

Section 54—The annual statement to be submitted to shareholders has been somewhat enlarged, so as to make it more in keeping with the monthly return to the Government. Many new headings have been added, which makes for a clearer and more detailed statement of affairs. The monthly government return has also been improved in some respects.

Introduction of Annual Audit.

Section 56—An important departure has been made in the introduction of an annual audit by qualified auditors appointed by the shareholders from a panel selected by the general managers of the banks and approved of by the Minister of Finance. It will be the duty of these auditors, who are given the widest powers of access to the books, accounts and securities of the banks, to check the cash and verify the securities, and make a report annually to the shareholders. It is placed in the power of the Minister of Finance to call upon the auditor of a bank, or any other auditor whom he may select, to make a special report at any time upon the affairs or business of a bank.

Section 61—In addition to retaining the present emergency period extending from September 1 in any year to the last day of February in the ensuing year, provision for a much required increase of circulation has been made against the deposit of current gold and Dominion notes, or either, in what is termed the "Central Gold Reserves." These Central Gold Reserves will be under the control of trustees appointd by the Canadian Bankers' Association and the Minister of Finance, and will be subject to frequent inspection and audit by the Department of Finance. It will be the duty of the trustees to receive and, when proper and required, return the gold and notes deposited with them by the banks, who will be entitled to issue increased circulation to the extent of the amount from time to time on deposit. In this way not only is additional circulation assured, but also the anxiety of over-circulation when nearing the present limits can be avoided.

Section 72—Regulations providing for the disinfection and sterilization of bank notes may be made by the Treasury Board.

Value of Real Estate.

Sections 79 and 91—Additional returns will in future be made to the Government annually of the fair market value of real estate held by the banks for their use and occupation, and quarterly of the rates of interest and discount charged upon loans and discounted paper.

Sections 84A and 88—Additional powers have been given to banks in the interests of those concerned to lend to receivers and liquidators appointed under the winding-up Act upon the property and assets under their charge, and also to farmers upon the security of threshed grain grown upon their farms, while definitions have been provided of "products of agriculture," products of the forest" and "products of the sea, lake and rivers," which will materially assist in removing doubts which previously existed regarding the power to lend on certain classes of goods now comprehended therein.

Consent to Bank Mergers.

Section 93—The limits of collection and agency charges exigible by banks have been somewhat reduced, but not so as to seriously interfere with business.

Section 99—It has been made compulsory to obtain the written consent of the Minister of Finance before an agreement by one bank to sell the whole or a portion of its assets to another can be entered into.

Sections 131A and 156—Additional offences and penalties have been inserted, including for the payment of preliminary expenses otherwise than as authorized by the Act and for officers and others obtaining gifts or showing favor to anyone in relation to the bank's business, while additional protection has been afforded to banks from the use of the word "banker," or words of similar import by unauthorized persons.

RED DEER APPOINTS FISCAL AGENTS

The town of Red Deer did not receive a satisfactory tender for its $26,368.97 30-year 6 per cent. local improvement debentures. In consequence it has appointed Messrs. Wood, Gundy and Company, Toronto, as its financial agents. Mr. A. T. Stephenson is secretary-treasurer of the town.

INSURANCE BILLS RECEIVE ROYAL ASSENT

The following bills have received the Royal Assent at Ottawa, and are now law:

An Act respecting the North Empire Fire Insurance Company; an Act to incorporate Beaver Fire Insurance Company; an Act respecting Imperial Underwriters' Corporation, and to change its name to "Imperial Underwriters' Corporation of Canada"; an Act to consolidate and amend the Acts relating to the Supreme Court of the Independent Order of Foresters, and to change its name to "The Independent Order of Foresters."

The annual general meeting of the Saskatchewan division of the Canadian Credit Men's Association, Limited, was held at Regina. The following officers were elected:—President, S. C. Burton, Messrs. Cameron and Heap; vice-president, J. W. Peart, Peart Brothers Hardware Company.

Fort William's elevators, with those under construction, now total twenty-two, which includes the Thunder Bay and Dominion Government elevators. The storage capacity of each ranging from the small cleaning and mixing elevators of 60,000 bushel to the 6,500,000 bushel capacity elevator of the Grand Trunk Pacific. The total storage capacity of all amounts to approximately 23,125,000 bushels with the 1,000,000 bushel annex being added to the Western Terminal, the 1,000,000 bushel annex to the Consolidated, the 4,000,000 addition to elevator D of the Canadian Pacific Railway (all under construction) and the proposed 500,000 bushel addition to the Ogilvie, it will bring the total storage capacity of Fort William's elevators close to the 30,000,000 bushel mark.

COURSE OF RAILROAD EARNINGS

Comments on the Decline in the Ratio of Increase—It is Possible to Take a Cheerful View.

BY H. M. P. ECKARDT

In Europe and in Canada considerable attention has been given to the course of railway earnings in the Dominion during the past two or three months. The critics have not failed to note that the ratio of increase dropped sharply in February. Thus the Canadian Pacific, which had been reporting increases of from 16 to 47 per cent. in January, was able to show but 6 per cent. in the closing week of February; in March and April the Canadian Pacific Railway had one week in which the gain was about 19 per cent. and in all the others it was less than 9 per cent.

As a matter of fact, the Canadian Pacific had been making an exceptionally good showing since the beginning of its fiscal year on 1st July, 1913. From June 30th to February 14th there was not a single week in which the gain was less than 11 per cent., and there were no less than ten different weeks in which the gain exceeded 20 per cent.

January saw the high-water mark as regards percentage increases—for the four weeks of that month the gains were 33, 47, 44 and 16.

Result of Mild Weather.

The largest weekly increase during the ten months to April 30th was that ending July 31st, the amount being $871,000. Then in the weeks ending January 14th and 21st there were increases of $647,000 and $674,000, respectively. The exceptionally large gains shown in January were largely the result of the mild weather, which permitted the movement of freight on an unprecedented scale.

The Canadian Northern's record of increases is not quite as steady as that of the Canadian Pacific. Throughout July and August there were heavy gains—the percentages ranging from 13.2 to 34.5. Then ensued a period, from the second week in September to the second week in October, in which the increases were very small—from 2.4 per cent. up to 8.7 per cent. This was followed by a season lasting throughout February in which heavy gains were scored.

Ratio Dropped Sharply.

In March and April the ratio dropped sharply as in the case of the Canadian Pacific Railway. Taking the whole period, the Canadian Northern Railway has a gain of 16½ per cent. as against the Canadian Pacific Railway's gain of 15 1-3 per cent. But the actual amount of the Canadian Pacific Railway increase was $14,880,826 as against $2,635,900 for the Canadian Northern Railway.

The traffic receipts of the Grand Trunk increased 12½ per cent. in the ten months. The gains from month to month are more evenly distributed—the highest being 24 2-5 per cent. in the last ten days of January.

Grand Trunk earnings are not so much affected by the Western crops; and it is to be noted that they did not drop sharply in February or March as did the earnings of the other two roads.

Grand Trunk's earnings in February and March increased at practically the same ratio as in the preceding months; and, while there is some falling off in the April ratio, it is not as important as in the case of the Canadian Pacific Railway and Canadian Northern Railway.

The manufacturing industries, so plentifully distributed throughout Grand Trunk's territory, have apparently enabled it to show steadier gains.

Some of the critics of Canadian borrowings have pointed to the sharply falling ratio of increase in railway receipts during March and April as evidence that Canadian trade has entered a period of decline.

Hon. Mr. White, the Finance Minister, did not take that view when presenting his budget to the house of commons the other day. He looked for a year of good trade and prosperity. And, indeed, when the traffic returns are studied carefully they do not lend a great deal of support to the theory that we have entered a depression.

It is to be remembered that the Western crops went forward in the fall of 1912 and winter of 1912-13 much more rapidly than in the preceding season. Various circumstances combined to produce that result.

Farmers Held Back.

In 1911 there was a shortage of railway facilities, with consequent blockades. Also, there were speculative possibilities having a strong tendency to induce the farmers to hold back their deliveries and sales.

Again, money has latterly been very tight; and banks and other creditors have been busily engaged in collecting debts ever since last fall. Because of the pressure from the creditor class and because there was no special speculative reason for holding back deliveries, as in 1911, the farmers were impelled to put their stuff on the market at the earliest opportunity.

And, as the railways had increased their facilities, there ensued a great rush of produce to the lake ports before navigation closed. Sir William Whyte remarked in this connection: "The crop of Western Canada this year was dumped on the Liverpool market in great volume. The facilities for handling grain on the railways, on the lakes and on the ocean have been so improved that it was possible to forward the commodity with great speed, and the needs of the producers were so great that the utmost expedition was used by them in sending their produce to the market in Liverpool."

Hauling Last Fall.

This naturally caused a great increase in the railway earnings last fall—the railways hauled out then some of the stuff which usually remained for the spring.

Notwithstanding that the Western wheat crop of 1912 is supposed to have been slightly larger than the 1911 crop, the Census and Statistics Office at Ottawa estimated in mid-April this year that the wheat then remaining in farmers' hands amounted to 44,668,000 bushels for all Canada as against 58,129,000 bushels at the corresponding date in 1912.

When it is remembered that the phenomenal increases of last fall were thus to some extent at the expense of this spring; and that the large increases in January, owing to the exceptionally mild weather, were also in some degree at the expense of the ensuing months, it is possible to take a more cheerful view of the lower ratio of increase prevailing in March and April.

Immigration figures continue to be eminently satisfactory; railway and other construction work is being rapidly pushed. These factors contribute importantly, directly and indirectly, to furnish traffic for the railways.

In a couple of months the 1913 crops will also constitute a factor. On the other hand, the tight money market has a tendency to react adversely on the traffic reports. If the crops are good, the chances are that railway earnings throughout the year will compare favorably with past records.

INVESTMENT OF LIFE INSURANCE COMPANIES' FUNDS

VIII.

Points to be Considered in Investments—Bonds II.

BY M. P. LANGSTAFF, A.I.A., F.A.S.

The various factors of four classes of bonds were discussed in the article which appeared in last week's issue, concluding with the general characteristics to be considered in public utility bonds. These are now investigated under the headings, Telephone and Telegraph Companies, Steam and Electric Railways, Light, Water and Power Companies.

The telephone business of the country may be divided into three groups, namely, the Bell System; the group in the hands of the larger independent companies, and the remaining group consisting of the smaller independent and rural companies and mutual associations.

1. It is difficult to oust a company when firmly established, and an investment in a new company designed to compete with one already established is a dangerous gamble.

2. Do not look favorably upon the security of a company that does not have, either as a part of its own system or through the toll lines of some friendly company, some connection with the outside world.

Finances Capable of Favorable Analysis.

3. The physical property of the company should be modern and the finances should be capable of favorable analysis.

4. Consider carefully the items of maintenance and depreciation. The life of a telephone plant is estimated to be not more than 18 years, and a company that does not provide out of earnings each year a proper amount for the replacement of plant is on the highway to disaster.

Two points of interest regarding bonds of telegraph companies are:

1. More efficient service at a reduced cost is possible if telephone and telegraph companies work together, or come under the same management and ownership.

2. Competition. A telephone company, in large cities at least, is recognized as a natural monopoly. But it is different with a telegraph company. A new telegraph company can give as efficient service to its customers as an old established one, and therefore the factor of competition is important.

Steam Railway Bonds.

It is often difficult to distinguish good steam railway bonds from bad.

1. The best guide to selection is the reputation of the management and of the road, and the history of the bond. Analyze the statement of railway assets, etc. This is oftentimes very difficult, and may not reveal the true state of business affairs.

2. There are often many classes of bonds. Therefore see that there will be no difficulty in determining the rights and equities of the class you are purchasing. Confine yourself as nearly as possible to the issues which are not preceded by earlier mortgages; otherwise, be sure that there is an ample margin of security and earning power over and above such earlier mortgages to protect the later one issued and under consideration.

3. What is the selling price of the stock? If the stock has been selling for some years at a premium and can show a good record for dividends paid, it argues, for safety, in the bonded capitalization. And make sure that dividends are not being paid, the permanency of which cannot be reasonably assured. The paying for improvements out of dividends is a very good feature.

Physical Condition.

4. Physical Condition.—Is this being kept up to the mark, and is the company making proper expenditures therefor directly from earnings? In this connection, consider the location of the railroad, the size or mileage, the character and condition of the equipment, and the operating efficiency.

5. To ascertain whether the road is being economically managed but not too economically—compare other good roads similarly located.

6. Competition.—What is the competition or the likelihood thereof? In this connection ascertain whether rates are so excessive as to tempt competition. Moody's Magazine says, "Ascertain if influx of population around and along the lines of property promises to continue indefinitely; and at the same time determine whether the value of this and the surrounding land is such that the creation of a rival right of way is out of the question. In other words, the fundamental asset (the site) must be practically exclusive, for it is this condition of exclusiveness that gives it most of its value."

7. Investigate the management of its property, how controlled, its rights of way, and the importance of its terminals. What is the prospect of growth in value of the land owned by the company?

8. What is the class of business tributary to it, and what is the volume and character of business carried on? A road might be so dependent upon agricultural products that a crop failure would be disastrous. Ascertain to what extent the railway is affected by business depressions.

9. Earning power.—This is perhaps the most important feature to be considered. A thorough study of the gross and net earnings for some years back should be made. See that the probable earning capacity of the property in the poorest times is well in excess of all requirements for interest on the mortgage under consideration, and for all prior charges, as well as for full maintenance of the property in every respect.

10. Ascertain whether the road is over-capitalized.

Electric Railway Bonds.

The investor should proceed along much the same lines as he would in investigating the bonds of a steam railway. A few additional points may be given:

1. Franchise.—Interurban lines usually have their own right of way, but in cities and towns, a limited franchise is usually obtained. The length and nature of the franchise should therefore be investigated and it should be ascertained what provision is being made toward the redemption of the bonds by a sinking fund or otherwise. Where the franchise is limited, there is a possibility of municipal ownership. How would this affect the security?

In particular, see that the maturity of the bond does not extend beyond the length of the franchise. There is sometimes a temptation where the franchise is limited to get everything out of the property while that is possible.

2. Earnings will be affected by competition, population, extent and character of the industries, territory covered, affiliations in respect of passenger and freight traffic, etc. For example, a road giving service where the riding is more or less for pleasure, rather than for necessity, will show decreased earnings as the novelty wears off. Again, the same speed could not be attained in a hilly country as in a more level one.

3. The revenues of electric companies, as compared with steam companies, are less liable to shrinkage in times of depression. Different roads, however, will vary in this respect, and it should be ascertained how susceptible the earnings are to such periods.

Field of Operation.

4. The field of operation is of immense importance. The company should be situated in a large and growing city or populous locality, and have a monopoly there. Where the street railway company has also control of the lighting of its community, this will add to the strength of its securities. The character of the population is of less importance, because everybody uses the street cars.

5. Ascertain if the road purchases its power or whether it is obtained from its own plant, and if the latter, the capabilities of the plant.

6. Street railways that have as a part of their system interurban lines running out into suburban and rural sections that are steadily increasing in population are in a position to feed their city lines in a most effective way. Naturally, therefore, their securities have added value.

In considering car trust or equipment bonds:

1. See that there is sufficient margin in the security to allow for wear and tear.

2. See that the trustee is reliable, and one who will look after the bondholders' interests, and insist on the equipment being kept in first-class order.

3. What is the financial condition of the railway? Are there any like securities outstanding? How has the railway met similar and other obligations?

Gas Companies' Bonds.

Study the following important factors re gas companies bonds:

1. The mortgage upon the gas establishment securing the bonds should be for only 50 per cent. or 60 per cent. of the replacement value of the property.

2. Is the corporation fully alive to the necessity of broadening its fields of usefulness, e.g., lighting, cooking, heating, and other industrial purposes?

3. To what extent is it affected by electric light companies or other competition? When a gas company develops carefully the industrial end of the business there need be little fear of competition on the part of electric rivals.

4. Has it a contract with the municipality and upon what terms?

5. Examine the net earnings, which should be not less than twice the interest charges; the franchise; the sinking fund, etc.

6. Securities of natural gas companies have attached to them much of the uncertainty found in mining stocks. A considerable risk is taken except where the issuing company

is engaged also in other lines of business, thus affording some security to the investment in case the supply of natural gas should become exhausted.

Eight Points.

Then as to light and power companies' bonds, note:

1. Competition.—A company has not only to consider the likelihood of competition from a local plant, for it has proven possible to transmit electrical power long distances at small loss. Therefore examine if the rates are reasonable and satisfactory to the consumers, or if there is any protective clause in the franchise, so that there will be little or no danger of invasion from an outside company.

2. Franchise.—Ascertain its nature, and make sure that it outlives the bond.

3. Earnings should be double the interest charge and provide a moderate sinking fund.

4. Depreciation is considerable, and proper charges should be made yearly. The plant must be maintained in high physical condition, and expenditures with that end in view should be charged to earnings.

5. Is there a large and valuable capital stock behind the enterprise? If so, the chances are that stockholders will keep the property in good condition for their own sakes.

6. From what source does the company obtain its electricity? A corporation that obtains its electricity from a water power owned by itself is to be preferred to one obtaining its power from coal.

7. Ascertain whether the municipality has any right of purchase at some future time, which might work to the disadvantage of a bondholder.

8. Consider carefully how much importance can be attached to any contract which the company may have with the municipality to furnish the public lighting.

Other Varieties of Bonds.

Enquire into such things as management, location, permanency of supply, amount of business, franchise, earnings, sinking fund, etc., of water companies when investigating their bonds, and:

1. Study carefully the charter of the company.
2. See that there is a satisfactory contract with the municipality.
3. Are rates so high as likely to cause dissatisfaction or encourage competition?

Remember in connection with loan and investment companies' debentures that:

1. A debenture bond is simply a promise to pay the holder a certain sum of money, and, like a government bond, has as security only the good name, or, in the case of a loan company, its record and earning power, which must therefore have the minutest scrutiny. In this connection ascertain the margin between the average rate of interest allowed on deposits and debentures, and that earned by the company on its invested funds.

Capital and Investments.

2. Capital.—Is it wholly or partially paid-up? How do the dividends paid thereon compare with the company's net earnings? What is the amount of the reserve fund and unappropriated profits compared with the paid-up capital?

3. Investments.—Is there any tendency towards speculation in the investment policy of the management? How does the amount of real estate acquired by foreclosure compare with the total mortgages on real estate? Does the company in such dealings show any losses?

◆

COMPANIES INCREASE CAPITAL STOCK

The capital stock of La Compagnie Fonciere de Manitoba, Limited, has been increased from $400,000 to $1,000,000 by the issue of 24,000 new shares of stock of $25 each.

The capital stock of the Winnipeg Stone Company, Limited, has been increased from $60,000 to $150,000 by the issue of 1,800 new shares of capital stock of $50 each.

The capital stock of the Continental Development and Investment Company of Canada has been increased from $100,000 to $1,000,000, such increase to consist of 9,000 shares of $100 each.

MAY MUNICIPAL BOND SALES

Canadian Municipalities Disposed of Over Two Millions of Debentures in Dominion and United States

The municipal bond sales in Canada for May, as compiled by The Monetary Times, amounted to $1,880,630, compared with $3,693,857 for April, and $1,928,748 for the corresponding period last year, and making a total for the year of $8,986,285.

Five provinces were in the market. The largest issues were made by Toronto and Lethbridge.

The amount of Canadian municipal bonds sold in the United States during May was as follows:—

Neepawa, Man., $160,000, 6 per cent. 30 years.

During May several municipalities adopted the plan of selling their debentures "over the counter" to private investors.

The following are the particulars by provinces:—

Ontario	$1,373,130
Saskatchewan	238,500
Alberta	240,000
Manitoba	21,000
British Columbia	8,000
	$1,880,630

The followng are the monthly totals during 1910, 1911, 1912, and 1913:—

	1910.	1911.	1912.	1913.
January	$ 881,838	$ 420,337	$ 2,133,531	$ 1,337,500
February	1,272,977	1,037,287	2,596,378	1,038,806
March	1,169,730	6,271,025	1,926,716	1,035,492
April	6,805,078	3,910,288	927,160	3,693,857
May	5,964,896	3,946,047	1,928,748	1,880,630
June	2,187,588	3,983,670	1,690,344	....
July	1,536,424	1,594,566	1,967,476	....
August	1,312,953	1,493,507	1,649,547	....
September	2,841,486	1,748,778	1,998,605	....
October	2,211,461	1,730,075	1,060,597	....
November	2,292,781	2,915,765	1,396,664	....
December	566,113	1,243,593	491,590	....
Total	$29,043,325	$30,295,838	$19,767,356	$ 8,986.285

The following are the details:—

Ontario.

Toronto	$1,132,000	.	....
Oshawa	76,873	5	1933
Niagara Falls	14,257	5	1928-43

INVESTMENTS AND THE MARKET

Financing, Operations, Developments, Dividends and Future Plans of Active Companies

(Continued from Page 960.)

Dome Mines Company.—Net profits of $509,956 on 101,812 tons of ore treated are shown by the annual report of the Dome Mines Company for the year ended March 31st.

It was decided to increase the capital from $3,500,000 to $5,000,000, in $10 shares, and to issue as much only of the additional stock as will actually be required for the enlargement of the forty-stamp mill to 100 stamps, and to provide the necessary auxiliary plant.

This action was based upon the milling results to March 31st and the proved and possible ore reserves, the balance sheet presenting a practically free-from-overdraft position, the "excess of current liabilities over current assets" amounting to $55,000, having been considerably exceeded by working profits earned since the end of the period covered. The fact that the profit of $509,996, from 101,812 tons milled was almost sufficient to enable the company to begin the year under favorable circumstances suggests that the dividend stage will be hastened by the policy of paying for the new plant from the proceeds of shares to be sold rather than out of profits, which will be augmented by cheaper power facilities and better labor conditions, as well as by more efficient mining.

The reports of Consulting Engineer Mein and Superintendent Meek show the results were:—

Tons milled		101,812
Yield by amalgamation		$ 560,481.62
Yield by cyanidation		483,513.31
Total value		1,043,994.93
Percentage of gold recovery, based on the gold won by amalgamation, plus the sample value of cyanide heads (percentage)		95.63
Mining costs	$157,666.27	
Milling	214,788.15	
General works expenses	131,096.72	
		$ 503,551.14
Gross earnings		540,443.79
Selling expenses—		
Bullion, shipping	$ 1,663.96	
Bullion insurance	1,551.51	
Bullion refining	2,623.07	
		$ 5,838.54
General expenses		24,649.15
Net earnings		509,956.10
Written off—		
Development	$ 61,087.20	
General charge	53,516.21	
Fire loss	24,124.47	
		138,727.88
Transferred to balance sheet		$ 371,228.22

Niagara Falls Power Company.—The Niagara Falls Power Company's report for the year ended December 31st, 1912, shows that the combined income account of the Niagara Falls Power Company and Canadian Niagara Power company compares as follows:—

	1912.	1911.
Gross	$ 2,407,196	$ 2,246,413
Expenses †	465,097	443,587
Net	2,032,099	1,802,826
Other income	148,563	173,020
Total income	2,180,663	1,975,846
Charges tax, etc.	1,252,805	1,288,923
Surplus	* 927,858	686,923
Dividends	460,616	429,412
Surplus	467,242	257,511

* Equal to 16.10 per cent. on $5,760,200 capital stock, as compared with 11.92 per cent. on same stock previous year.

† Includes $100,000 charged in respect of obsolescence, and a reserve against extraordinary casualties.

The combined condensed balance sheet of the Niagara Falls Power Company and Canadian Niagara Power Company, as of December 31st, 1912, compares as follows:—

Assets.

	1912.	1911
Real estate, plant, etc.	$23,975,413	$23,169,913
Invest. secur.	1,500,000	1,500,000
Current assets	1,275,228	1,819,221
Other assets	660,368	462,491
Total	27,420,009	26,951,624

Liabilities.

Capital stock	$ 5,760,200	$ 5,760,200
Funded debt	18,247,000	18,295,000
Current liabilities	745,592	615,724
Reserve for improvements and betterments	811,700	817,855
Surplus	1,855,427	1,462,845
Total	27,420,000	26,951,624

AGENCIES IN NEWFOUNDLAND

United States firms doing business with Newfoundland have there, as elsewhere, the problem of distribution, says United States consular reports. Some firms still sell exclusively to the St. Johns trading companies and forego the market to be reached through other merchants. Others, with resident agents or travelling salesmen, sell to the St. Johns trading companies, and also, in no small amounts, to the independent merchants. Still others do business by mail. The last two classes, especially back up their dealers with effective advertising. The bulk of the business is still in the hands of St. Johns, but the independent dealers are a more important factor than ever before. They should, if possible, not be ignored in the building up of a market in Newfoundland. It is on the west coast and in the outport trade that they are found rather than in the city of St. Johns.

Those firms are most successful who have resident agents in a position to give one or a few lines careful, continued and personal attention. Concerns with large organizations prove good customers and retail the largest amounts, but they do not always push individual lines as thoroughly as is possible or, in fact, as is probable if some resident manufacturers' agent is in co-operation with them.

Newfoundland is not a large, but in most lines is a steadily improving market. The development of the west coast started later than that of other parts of the colony and is less advanced.

A MILLIONAIRE'S SECURITIES

The estate of the late Sir Edward Seaborn Clouston, formerly vice-president of the Bank of Montreal, has filed for letters probate. The estate amounts to $2,672,005, made up as follows: Stocks, $2,109,748; cash, life insurance, mortgage securities, etc., $287,129; miscellaneous, $203,276.

Stocks held by the deceased included 820 half shares Canadian Cottons, Limited, preferred, $61,127.25, and 1,666 common stock in the same company, $53,312; 350 Carleton Hotel Company, $28,000; 10 Mount Royal Lawn Tennis Club, $50; 90 Crescent Turkish Bath Company, $4,500; 10 Montreal Jockey Club, $500; 1,800 Canada Cement Company, preferred, $166,950; 1,000 common stock, $29,000; 1,500 Western Canada Power Company, $116,250; 380 Royal Trust Company, $152,000; 500 Penman's Limited, $27,500; 265 Ogilvie Flour Mills, $33,125; 250 National Breweries, $23,250; 50 Canadian Theatres, $5,000; 110 Canadian Pacific Railway, $29,260; 15 Mount Royal Stables, $900; 600 Canadian Exploration Company, $10,000; 10 Prudential Trust, $1,000; 225 C. Meredith and Company, $32,400; 180 Martin Bennett Asbestos Mines, $7,200; 300 Canadian Converters Company, $13,500; 1,000 Laurentide Company, Grand Mere, $244,500; 1,250 Calgary Power Company, $62,500; 750 Dominion Textile Company, $59,062; 150 Hillcrest Collieries, $11,250, and $9,000 common stock; 500 Bank of Montreal, $122,500; 2,150 Canadian Venezuelan Ore Company, $53,750; 20 Canadian American Appraisal Company, common, $1,000; 40 of the same preferred, $2,000; two St. George Snow Shoe Club, $20; 50 Winter Club (10 per cent paid), $250; 280 Canada Sugar Refining Company, $42,000; 24 Senneville Golf Links, $108; one Boie St. Joseph Club, $7,500; 250 Prince Rupert Hydro Electric Company, $7,500; one Forest and Stream Club, $100; 200 West India Electric Company, $18,400; 20,000 Calumet Metals Company, par value, $1; market value, $5; 5 Theatre Comedie Francais de Montreal, no value; Montreal Cape, no value; 40 Dominion Feed, Water and Purifier, no value; five Dominion Mineral Company, no value; five Canadian Century Publishing Company, no value.

Bonds held in Montreal companies included $5,000 Mount Royal Club; $20,000 Canadian Cottons; $200 Royal Golf Club; $10,000 City Realty Investing Company; $10,000 Western Canada Power Company; $25,000 Canadian-Venezuelan Ore Company. Sir Edward also had $50,000 in the Detroit United Railway Company. He carried life insurance amounting to $22,000.

Sir Edward also held 500 shares in the Royal Securities Corporation, $275,000. His stocks entered as being of no value, included 1,000 Argonaut Gold Mining Company, the Viper Company, Pictou, N.S.; the David Gilmour Door Company, Trenton, N.J.; 2,800 in the Carleton Investing Company, New York, and 500 in the Canada Consolidated Gold Mining Company, New York.

The International Paper Company informs The Monetary Times that there is no foundation for the statement in the daily press that it will build a large branch plant in Quebec province.

Atlas Assurance Company, Limited

OF LONDON, ENGLAND

(Established 1808)

Extracts from the Report for the Year ending 31st December, 1912

FIRE DEPARTMENT

The NET PREMIUMS were $5,412,200, and the LOSSES $2,743,625, being 50.6 per cent. of the premiums. The underwriting surplus of the account is $717,885, and after adding $82,545 to the reserve for unexpired risks, there remains a profit of $635,340, which has been carried to Profit and Loss Account. Out of this profit a sum of $353,325 has been transferred to the Fire Insurance Fund, making it $5,768,760.

FIRE INSURANCE ACCOUNT

Claims under Policies paid and outstanding	$2,715,805	
Contributions to Fire Brigades	27,820

MATTHEW C. HINSHAW, Montreal, MANAGER FOR CANADA

WESTMINSTER TRUST, LIMITED

Satisfactory results are shown by the Westminster Trust, Limited's, annual statement. Net profits for eleven months amounted to $65,359. Adding to this the sum of $4,411 brought forward the amount available for distribution was $69,771. This has been appropriated as follows:—Dividends, $37,160; reserve, $32,129; balance forward, $490. The Trust's reserve fund now stands at $20,000. Paid-up capital which in 1911 was $287,046.23 rose to $363,172.65 in 1912, and to $433,617.78 in 1913.

Deposits have grown in eleven months from $115,505.37 on 30th April, 1912, to $174,376.76 on 31st March, 1913, a 50 per cent. rise.

This must be gratifying alike to management, shareholders and depositors.

The total liabilities, outside of share capital, amount to $231,621, of which deposits are represented by $174,376.

The assets are shown as totalling $886,638, and are as follows:—Real estate, $83,608; office building, $248,547; furniture and fixtures, $9,650.

Investments—shares and debentures valued at $26,700; dividends declared and interest accrued, $460; loans, $318,767; instalments due and accruing on agreements of sale discounted, $127,626; Dominion Timber Licenses (2) valued at $20,000; half interest, $10,000.

Debtors—accounts receivable, $30,329; premium on shares, $525; cash, $29,788; accounts paid in advance, $635.

The investment of trust funds totals $28,458.

CANADIAN CONVERTERS' PROSPECTS

Monetary Times Office,
Montreal, June 12th.

It is satisfactory to shareholders to learn that the directors report the general outlook for business during the coming year is good. Orders on hand, it would seem, are fully up to those at the same time a year ago, and it may be recalled that these were reported to be unusually good last year. Prices are also satisfactory and it is stated that there are several favorable features of the company's position with respect to new business, and that the concern will get the advantage of factors during the coming year, the benefit of which were not felt in the year just closed.

The bond interest is slightly lower. This is due to the fact that the bonds are being retired right along, the amount of such retirement having been sufficient now to reflect an advantage to the company in the way of earnings. The working capital of the company is in a good position, the current assets being $523,745 in excess of current liabilities.

The company is in a good position to meet competition. It has a good distribution of factories at different points, and in this manner the labor problem is to some extent being solved, although this still continues to be one of the serious troubles in the business of the manufacture of whitewear in which the company is engaged.

MAY FIRE LOSSES

Property Destroyed is Valued at Over Two Million Dollars and Dominion's Death Roll Numbers Thirty-three

The Monetary Times' estimate of Canada's fire loss durıg May amounted to $2,123,868, compared with April loss of 1,470,622 and $2,251,815 for the corresponding period of last ear. The following is the estimate for May losses:—

Fires exceeding $10,000	$1,540,500
Small fires	306,342
Estimates for unreported fires	277,026
	$2,123,868

The following are the monthly totals of the losses by fire uring 1910, 1911, 1912, and 1913:—

	1910.	1911.	1912.	1913.

onomic Loss Is Great.

The structures damaged and destroyed were 110 resi-nces, 36 barns and stables, 20 stores, 13 factories, 14 sheds, warehouses, 5 hotels, 4 sawmills, 3 business blocks, 3 lum-r mills, 3 garages, 3 bridges, 3 bakehouses, 3 cafes, 3 urches, 2 business sections, 2 foundries, 2 power stations, 2 [illegible] stations, 2 apartment houses, 2 greenhouses, 2 [illegible], 2 grandstands, 1 restaurant, 1 planing mill, 1 [illegible] mill, 1 city hall, 1 surface mine plant, 1 icehouse, 1 [illegible] office, 1 sash and door factory, 1 canning plant, 1 [illegible] plant, 1 laundry, 1 bank, 1 post-office, 1 rink, 1 pool-[illegible] 1 [illegible] distillery, 1 cold storage plant, 1 incinerator. [illegible] were destroyed 120 horses, 116 cows, 10 calves, 100 [illegible], 10 sheep, 12 pigs.

Hay 110 tons, coal 250 tons, wheat 8,000 bushels, oats 5,300 bushels, pulpwood 10,500 cords, haddie 300 pounds.

Cutters 16, buggies 5, gasoline launches 11, sets of harness 25, automobiles 13, street cars 2, express car 1, box cars 3, freight cars 10, steam barge 1, steamer 1, scavenger wagon 1, boarding car 1.

Of the presumed causes 18 were attributed to sparks, 14 defective chimneys, 13 lightning, 13 matches, 11 incendiary, 7 electrical defects, 6 lamps, upset and exploded, 5 overheated stoves, 5 prairie fires, 4 tramps, 4 firecrackers, 3 cigar and cigarette stubs, 3 engine backfiring, 3 defective stovepipes, 3 persons smoking, 3 bonfires, 2 defective grates, 2 spontaneous combustion, 2 forest fires, 1 boiling tar, 1 hot ashes, 1 heater, 1 overheated grease, 1 friction, 1 heating grease and turpentine, 1 overheated stovepipe, 1 defective hot air pipe, 1 stove, 1 turpentine explosion, 1 gasoline, 1 gasoline explosion, 1 overheated moulding flask, 1 overheated furnace, and in a large number of fires the cause was stated to be unknown.

Thirty-three Deaths.

During May thirty-three lost their lives through fire; this is the largest number of fatalities since July, 1911.

The following are the monthly totals compared with 1909, 1910, 1911 and 1912:—

	1909.	1910.	1911.	1912.	1913.
January	16	27	27	27	14
February	8	15	12	11	21
March	16	20	18	24	22
April	18	37	20	15	11
May	21	15	28	18	33
June	16	52	13	6	..
July	4	15	110	9	..
August	17	11	22	16	..
September	10	10	13	6	..
October	26	16	17	21	..
November	34	19	20	22	..
December	33	19	17	28	..
Totals	219	256	317	203	101

The fires at which fatalities occurred were:—

Quebec, Que.	Burning building	4
Toronto, Ont.	Set clothing alight	1
Moose Jaw, Sask.	Set clothing alight	1
Welland, Ont.	Set clothing alight	1
Kemptville, Ont.	Burning building	1
Chatham, Ont.	Burning building	2
Stratford, Ont.	Church struck by lightning	3
Vancouver, B.C.	Burning vessel	6
Toronto, Ont.	Set clothing alight	1
Causapscal, N.B.	Burning building	1
Sarnia, Ont.	Fell in burning rubbish	1
North Bay, Ont.	Burning building	1
North Sydney, N.S.	Burning building	1
Windsor, N.S.	Set clothing alight	1
Sweaburg, Ont.	Burning building	1
Yarmouth, N.S.	Set clothing alight	1
Eardley, Que.	Set clothing alight	1
Sheho, Sask.	Set clothing alight	1
Brantford, Ont.	Set clothing alight	1
Winnipeg, Man.	Set clothing alight	1
Dartmouth, N.S.	Set clothing alight	1
Montreal, Que.	Burning building	1

Provincial Fire Losses.

The fire waste in each province for first five months of this year has been estimated by The Monetary Times, as follows:—

Ontario	$2,697,806
Alberta	2,649,203
Manitoba	1,542,912
Quebec	1,109,266
Nova Scotia	943,409
New Brunswick	730,801
Saskatchewan	717,295
British Columbia	490,538
Prince Edward Island	374,787
	$11,256,017

◆

WILL BE MORE PROSPEROUS

"Next spring we will be more prosperous than before," says Sir Henry Pellatt. "We are now going through a period of rest, and considering that fact business is extremely good. Money has been tight but there is nothing in the world to warrant the assumption that conditions will become worse. I think the depression in the West has been exaggerated in England when you consider the strides such cities as Vancouver, Regina and Winnipeg are making."

DOUBLE VICTORY

Fort George Wins

(Extracts from the Official Decision of the Railway Commission)

On the 5th of March, 1912, the Board heard an application of the Natural Resources Security Company, the owners of the Townsite of Fort George, for the location of a station on the G. T. P. at or near the Fort George Townsite. No final decision as to the location of a station was reached by the Board at that time, and the matter was, as far as the Board was concerned, permitted to remain in abeyance.

In an application, dated 24th January last, the Grand Trunk Pacific Railway Company applied to the Board for the approval of its station site and station at Prince George at M.466.3, Prince Rupert East. After the usual investigation by the Operating Department of the Board, the approval of the location was recommended and Order No. 18902, dated the 20th March, 1913, was issued by the Board, approving of that station site.

At the time that the Order was made, the Board was not aware that the Prince George station site, for which the Railway Company had applied for approval, in any way conflicted with the Fort George station, which the Natural Resources Security Company had applied for more than a year ago; and, upon it being brought to the attention of the Board that the Prince George site, approved of by the Order above mentioned, was detrimental to the interests of Fort George, this matter was set down to give all parties an opportunity of being heard. Therefore, bearing all interests in mind, I think the site I have decided upon should be adopted by the Board. Order No. 18902 of the 20th March last should be rescinded and the Railway Company should be requested to file a plan showing a station at a point three thousand feet east of the Eastern Boundary of the Fort George Townsite.

Ottawa, May 10th, 1913.

[Signed] A. S. G.
J. M.

[Signed] D'ARCY SCOTT.

The British Columbia Government last week officially refused the application of the G.T.P. Railway to register the Indian Reserve as Prince George. The Dominion Government has refused to rename the Fort George P.O. Prince George.

EXTRACTS FROM EDITORIALS IN ALL FOUR VANCOUVER NEWSPAPERS

NEWS ADVERTISER

"Yesterday's decision in the Fort George station case fully reported in this paper, is of unusual interest, as it affects a large number of settlers and investors at or near the point where the station is to be. The uncertainty which has hung over the future will now be cleared away, and all the parties concerned will know where they stand." (May 11.)

SUN

"This is a great victory for Mr. G. J. Hammond and for those who have supported him in the four-year-long fight against the campaign of slander and misrepresentation conducted against him and his company, the Natural Resources Company, by short-sighted rivals and the G. T. P. itself. This decision means that the contentions of Mr. Hammond and those who have supported him have been soundly based from the beginning." (May 12.)

WORLD

"The decision of the Railway Commissioners has been hailed with satisfaction by those in British Columbia who have followed the case. Prominent among them is Mr. George J. Hammond, of Vancouver, the man who placed Fort George on the map. The decision ends a battle covering a period of three years, at a cost which is said to amount to one hundred thousand dollars. In this affair Mr. Hammond represented the interests of numerous clients resident in many parts of the world. The repute of the Province and the methods followed by its business men was at stake. British Columbia, with its many hundreds of square miles of undeveloped territory has need of men who will go into the new districts, enlist the aid of foreign capital for development of them, and play the game for the men with whose capital they are entrusted." (May 12.)

PROVINCE

"Mr. George J. Hammond, who made a strenuous fight for station facilities for the new town which he fathered and developed, has won his contention. Fort George remains Fort George, and those who bought land in the Fort George Townsite on the faith of Mr. Hammond's representations, have the satisfaction of knowing that he has been justified in the attitude he adopted. Mr. Hammond is one of the few men in Canada who has succeeded in downing a big railroad corporation, and that is an achievement to be proud of." (May 13.)

FORT GEORGE—The Million a Month Pay-roll City

LOCATED at the junction of the main waterways of Central British Columbia, Fort George is on the line of every railway building or projected through this immense territory. Rails are now approaching it from the East, the West, and the South. It has been selected as the main pay-roll centre for the railway construction through Central and Northern British Columbia, and the Peace River District for the next five years. Beginning at once, a million dollars a month will be distributed in wages at Forge George to ten thousand construction men. Fort George is a live-wire town right now. There are openings for all kinds of business. If you want to help handle the million dollar a month pay-roll, go to Fort George. If you want to start at the beginning of the upbuilding of a great city and country of unparalleled natural resources, delightful climate and magnificent scenery, go to Fort George.

It is the best young city in Western Canada. Its progress has been continuous. Its future is certain.

Report of the Ninth Annual Meeting of

Westminster Trust, Limited

The Ninth Annual General Meeting of the Shareholders f the Westminster Trust, Limited, was held in the Company's oard Room in the City of New Westminster, on Tuesday vening, the 20th day of May, 1913.

Among those present were: J. J. Jones, L. A. Lewis, T. Annandale, W. J. Mathers, Dr. A. J. Holmes, Dr. R. E. Valker, Henry Kipp, of Chilliwack, George Mead, L. A. auphinee, Captain Fenton, J. B. Jardine, C. B. Sword, Wil-am Roxburgh, J. B. Kennedy, Oliver Grimmer, John H. prott, Thos. Sampson, H. Koster, Peter Birrell, F. Boutilier, H. Smith, H. Ryall, T. J. Trapp and J. A. Rennie.

Mr. T. J. Trapp, President of the Company, occupied the hair and called the meeting to order at 8.15 p.m.

Mr. J. A. Rennie, Secretary-Treasurer of the Company, cting as Secretary, read the notice calling the meeting. The inutes of the previous Shareholders' Meetings were then ead, and on motion adopted.

The President then read the Directors' Report, as follows:

DIRECTORS' REPORT

Gentlemen,—The Directors have great pleasure in pre-enting to you the Ninth Annual Report of the Company's fairs, together with the Financial Statement for the eleven onths ending March 31st, 1913.

You will notice that we mention that it is for 11 months in-ead of a full year. This was caused by the changing of e date for the ending of the Company's year from April 0th to March 31st, as it was felt that a good deal of clerical ork in the office would be saved by this change so as to oincide with the dates when the returns required by the overnment have to be made up.

As predicted in our Report last year, the year just passed as proven to be another one of continued success and ad-ancement, the affairs of the Company being in a better con-ition than ever before, having shown development in all e different branches of revenue.

Our Subscribed Capital has increased from $415,200.00 to 501,000.00, and our Paid Up Capital from $363,172.65 to $433,-17.78, which shows an increase of Paid Up Capital of 70,445.13.

For the term of 11 months covered by the Auditors' Re-ort, our assets have increased from $743,972.63 to $915,096.92, increase of $171,124.29, which we feel should be as satis-actory to you as it is to your Directors.

Our gross earnings amounted to $92,425.92, which, after roviding for all expenses, interest, etc., and our usual divi-end at the rate of 10 per cent. per annum, enabled us to ansfer $32,120.00 to the Reserve; which, with the sum of 17,880.00 received as premium on Stock, made the amount arried to Reserve, $50,000.00.

As showing the continued confidence which our clients and e public repose in us, we may state that larger and more portant matters of business than heretofore have been en-usted to our care.

Our Fire Insurance business during the year has shown a arked increase, and we have added two more Companies f undoubted strength to our list.

We congratulate you upon our Home Office Block, which now completed and paid for, and of which we are sure you l feel proud, and we have no hesitation in saying it is a edit to, not only the Company, but also to the City of New estminster at large.

The wisdom of the policy adopted by your Directors hich eliminates all speculative features has proven itself to e sound and in the best interests of the Shareholders, and followed in the future will continue that steady growth on a erfectly solid and sound foundation which we are all so xious to maintain.

In conclusion your Directors desire to express their ap-reciation of the very faithful and efficient service of the ficers and staff during the past year.

All of which is respectfully submitted,

T. J. TRAPP,
President.

TRUSTEES' REPORT

Gentlemen,—We beg to say that in company with the Auditors we have examined all the Documents and Securities held in connection with the Mortgages and Agreements for Sale, etc., and have found them all in order.

Yours faithfully,
HUGH McDONALD,
PETER BIRRELL,
Trustees.

Mr. J. J. Jones then spoke as follows:

Mr. President,—In moving the adoption of the report I would like to draw particular attention to the fact that the period covered is only for eleven months and that in making comparisons with the business done during the previous year this has to be borne in mind. Further, it must not be forgotten that we were handicapped by having a large amount of money tied up in our new Building while under construction. In spite of these two drawbacks, we find that we have earned a net profit of $11,139.78 more than we did for the previous twelve months and are again able to transfer $50,000.00 to the Reserve, making a total of $200,000.00 at the credit of that account.

The earnings of the staff as apart from the earnings of the money invested, amounts this year to the respectable sum of $34,320.05, an increase of $16,190.69, and as the total salaries amounted to $13,792.14, it means that the staff earned in round figures $20,500.00 more than was required to run the business, and that all interest earned and discounts on Agreements of Sale was available for the payment of the dividends and building up the Reserve.

On analyzing the figures submitted, we find that we have earned 17.58 per cent. as a net profit on the Paid Up Capital of the Company, which we consider very gratifying.

Another thing which is very gratifying and shows the increased confidence the public has in us is the steady growth in the number of our Savings Bank Depositors. These have grown from 259 in 1911 to 587, and the amount of deposits from $88,284.00 to $174,376.00, an increase in the amount of close on 100 per cent.

Since we moved into our own offices, we have had a very marked increase in the number of, what I might call, casual visitors or inquirers, and situated as we are on what I consider to be the best business corner in the City of New Westminster. I look for a large share of the transient or casual business which we never could hope to get while we were in our old offices on Lorne Street.

Our new Office Block was taken over from the Contractors in March last, and I am pleased to report that 84 per cent. of the rooms are already occupied, which I think amply justifies the investment.

Regarding the future, I am very optimistic, and am confident that the present year will show a marked improvement on the results of the year just closed, and although, as you are aware, the Real Estate Market has every appearance of being flat for some months to come, I hope to show that we have done our share of whatever business was to be done in the way of brokerage, and that we will continue to enjoy the confidence of the public as a Trust Company that is such in the very strictest meaning of the word.

Mr. President,—I have much pleasure in moving the adoption of the report and that it be printed and a copy sent to each of the Shareholders of the Company. Mr. George Mead seconded the motion, which on being put to the meeting was carried unanimously.

Messrs. Henry Kipp, John B. Jardine and others expressed the great satisfaction which they felt, as Shareholders, at the splendid showing made for the past year, and that they were to be congratulated.

The election of Directors for the ensuing year then took place, Mr. George Mead moving, and Mr. Peter Birrell seconding, that the old Board of Directors, consisting of T. J. Trapp, J. J. Jones, Dr. A. J. Holmes, L. A. Lewis, Dr. R. E. Walker, W. J. Mathers, T. H. Smith, H. Ryall and T. S. Annandale, be re-elected. Carried.

Trustees—Mr. J. J. Jones moved, and Mr. Henry Kipp seconded, that Messrs. G. Alers Hankey, Peter Birrell and Hugh McDonald be re-elected Trustees for the ensuing year. Carried.

Auditors—Mr. J. J. Jones moved, and Mr. L. A. Dauphinee seconded, that Messrs. Helliwell, Moore & MacLachlan, Chartered Accountants, be appointed Auditors for the ensuing year. Carried.

Mr. J. J. Jones moved, and Mr. J. B. Jardine seconded, that Mr. Sidney Malcolmson be appointed monthly Auditor for the ensuing year. Carried.

Mr. Jones then moved that a vote of thanks be tendered to the Staff for the very efficient service rendered by them, which was seconded by Mr. George Mead, and carried.

Mr. George Mead moved, and Captain Fenton seconded, that a hearty vote of thanks be tendered to the Board of Directors and Managing Director for their services. Carried. Mr. Rennie, on behalf of the Staff, Mr. Jones, on behalf of himself and Co-Directors, briefly returned thanks.

In commenting on the splendid results achieved by the Company during the year, several of the Directors, and Mr. L. A. Lewis in particular, took occasion to urge on the Shareholders the fact that the Westminster Trust, Limited, acted as Executors under Wills, and that it was to their advantage in every way to appoint their own Company as Executor for them. They had the experience and advice of a competent Board of Management and Staff to look after their affairs, and they had the Trust Company behind them if any of their assets had to be protected.

After some other congratulatory remarks had been passed, it was moved and seconded that the Meeting adjourn.

At a subsequent Meeting of the Directors the following Officers were elected: President, T. J. Trapp; First Vice-President, Dr. A. J. Holmes; Second Vice-President, W. J. Mathers, Managing Director, J. J. Jones; Secretary-Treasurer, J. A. Rennie.

AUCTION SALE
OF THE
CAPITAL STOCK
OF THE
CONSUMERS' GAS COMPANY
OF TORONTO

THE CONSUMERS' GAS COMPANY OF TORONTO hereby gives notice that it will offer for sale by public auction, at the Company's General Offices, Nos. 17-19 Toronto Street, Toronto (Messrs. C. J. Townsend & Company, Auctioneers), **AT 12 O'CLOCK NOON ON THURSDAY, THE TWENTY-SIXTH DAY OF JUNE, A.D. 1913, TEN THOUSAND THREE HUNDRED AND TEN (10,310) SHARES OF THE CAPITAL STOCK** of the said Company (each share having a par value of $50.00), subject to certain conditions, which will be made known at the time of sale, and of which any person desiring to purchase may in the meantime obtain a copy on application to the General Manager of the Company at the General Offices of the Company, Nos. 17 and 19 Toronto Street, Toronto.

The conditions of sale provide, amongst other things that the stock will be offered in lots of 10 shares each, subject to a reserved bid; that 20 per cent. of the purchase money shall be paid down at the time of sale, and the balance in four equal consecutive monthly installments, the first of which shall be paid one calendar month from the date of sale; that the purchaser may pay the whole of the purchase money at the time of sale, and may pay all, or any of the deferred installments, before the same fall due; that every share sold shall, in proportion to the amount from time to time paid thereon, and from the date or respective dates such payment or payments shall have been made, participate in all dividends declared after the date of sale; and that the purchaser shall at the time of sale sign an agreement for the completion of the purchase.

DATED AT TORONTO this 2nd day of June, 1913.
By order of the Board of Directors,

ARTHUR HEWITT,
General Manager.

SMALL BOND ISSUE UNSOLD

The $6,500 5 per cent. 15-year and $7,135.50 6 per cent. 20-year debentures of Lacombe, Alta., for which tenders were called until May 1st, have not yet been sold.

◆

One of the two or three interior terminal elevators to be erected by the federal government in the Canadian West is to be in Calgary. Placed as this city is at the natural gateway from the grain growing area of Alberta and Saskatchewan to the Pacific coast and the Panama Canal, no other decision seemed possible. The Grain Commissioners voiced their disapproval of the city's laissez-faire attitude in not presenting a more elaborate case when the question was under consideration, but to Calgarians, the situation is so apparent that the organizations most particularly interested may be excused for thinking that everyone else ought to see it as plainly as they.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

OTTAWA'S MINT

Ultimately it May Refine all the Gold Produced in Canada

Many of the party of New York bankers to Ottawa will be visitors to Canada's mint. Over five thousand persons visited it last year.

Hon. W. T. White, finance minister, recently stated that ultimately the Canadian mint would refine all the gold produced in Canada. The silver production, however, presented a more difficult problem. The erection and operation of a refining plant would involve a large outlay; moreover, there was but a limited market for silver in the country.

OTTAWA'S MINT.

The total amount of coinage of silver between January 1, 1908, and March 31, 1913, was $5,710,944, divided as follows: Fifty cent pieces, $750,000; twenty-five cent pieces, $2,500,000; ten cent pieces, $1,393,000; five cent pieces, $979,000. Bronze cents were coined to the amount of $222,000 gold sovereigns to the value of $1,400,000, and Canadian five and ten-dollar gold pieces to the value of $1,800,000.

Copyright by Elliott & Fry

DR. JAMES BONAR,
Deputy Master of the Royal Mint at Ottawa.

Gold Received at the Mint.

Gold received at the mint in 1912 for refining totalled 101,636 gross ounces, of which 3,000 ounces came from Nova Scotia, 11,000 from Ontario, 85,000 from the Yukon, and less than 1,000 ounces from Quebec. Fine gold bars were sold by the mint in that year to the value of $296,000. The mint last year brought 755,000 ounces of silver, of which 70,000 ounces came from the Coniagas Mine in Cobalt, and 685,000 from the United States, the purchases being made by tender.

The following comparison of coinage shows the increased operations of the Ottawa mint:—

	1908.	1912.
Silver coined	$313,000	$1,383,000
Bronze coined	23,000	51,000
Gold coined	3,000	1,477,000

The Canadian Finance Department has continued the deportation of foreign silver. In the financial year ended March 31st, 1912, foreign silver to the value of $1,791,187.08 was so deported, of which from:—

Ontario	$ 757,381.03
Quebec	212,506.66
New Brunswick	25,535.00
Nova Scotia	19,811.47
Manitoba	193,231.06
British Columbia	468,394.60
Alberta	61,550.56
Saskatchewan	52,776.70
	$1,791,187.08

Dr. James Bonar is in charge of the Ottawa Mint.

BIG BORROWINGS IN LONDON

Public borrowings in London for the month of May exceeded all modern records. Seventy-two issues totalled $272,000,000. The next highest record was May, 1910, the rubber boon days, when 113 issues totalled $264,000,000. Moreover, this excludes an exceptionally heavy amount of floating loans, such as $10,000,000 temporarily raised by Sir William Mackenzie when in London recently.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended May 30th:—Cobalt Lake, 64,123; Peterson Lake, 60,723; Cobalt Townsite, 126,525; LaRose, 162,508; Cobalt Comet, 160,823; Beaver, 62,500; total, 637,202 pounds or 318 tons. The total shipments since January 1st are now 16,625,819 pounds or 8,312 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

HUDSON'S BAY DIVIDEND

The company of adventurers trading into Hudson's Bay announce a final dividend of 30 per cent. plus a bonus of 10 per cent., making a total distribution of 50 per cent. for the past twelve months. The London Standard points out that the company has made a new departure in regard to announcing the dividend, preferring now to make it in percentage form rather than of the actual amount of the dividend. "On this occasion, too," says the paper, "the management does not announce the balance forward, which makes it impossible to gauge closely how the company has done as compared with last year. Twenty per cent. of the year's distribution is derived from trading and 30 per cent. from land sales."

CANADA'S CHARTERED BANKS

Canada's chartered banks number 25, with a total authorized capital of $190,866,666.

Canadian deposits in the latest bank statement are shown as totalling $996,500,282.

The number of individual chartered banks in Canada has been reduced by amalgamation, the recent transactions being as follows:—

Bank of Commerce absorbed Eastern Townships.
Royal Bank absorbed Traders Bank.
Bank of Nova Scotia absorbed Bank of New Brunswick.
Home Bank absorbed La Banque Internationale.

Canada's bank clearings during the last six years were as follows:—

1907	$4,321,441,616
1908	4,142,233,379
1909	5,203,269,249
1910	6,153,701,587
1911	7,301,368,207
1912	9,143,106,764

There are approximately 3,000 bank branches throughout the Dominion, in addition to which branches are located in United States, Europe, Newfoundland, Mexico, and the West Indies.

LONDON MARKET IS UNRECEPTIVE

Borrowers from All Parts of the World Suffer from the Financial Stringency

Issues in London last week	$32,500,000
Left with the underwriters	$23,500,000

Last week, seven new issues aggregating $32,500,000 and coming from all parts of the world—Canada, Brazil, Chili, Wales, South Africa, and England—were made in London. The condition of the market is indicated by the fact that $23,500,000, or 70 per cent. of that sum, was left with the underwriters.

Underwriters Took Eighty Per Cent.

Private cables from London state that shareholders had subscribed for only 20 per cent. of the new $10,000,000 preferred issue of the Brazilian Traction Company, the underwriters taking the balance of 80 per cent.

Leading underwriting houses in London are trying to put an embargo upon new issues until the undigested securities have passed into the hands of investors. Experience shows that embargoes of this kind are likely to break down before tempting offers from would-be borrowers.

New issues include $2,500,000 in 6½ per cent. participating preference Columbia Western Lumber Yards, for the establishment of retail yards at Edmonton and elsewhere, by Messrs. Mackenzie and Mann.

Left With the Underwriters.

A large number of Canadian borrowers are awaiting improved conditions in order to seek favor in the London market. The results of the majority of Canadian loans overseas this year to date have not been very gratifying on account of the stringency. Here is a list of some of the issues of which the underwriters had to take 40 per cent. and over:

Borrower	Amount	Percentage left with underwriters
Quebec Government	$ 400,600	48
Grand Trunk Pacific Railway	479,300	73
City of Toronto	1,075,000	85
Edmonton, Dunvegan and British Columbia Railway	411,520	98½
City of Winnipeg	750,000	75
Terminal Cities of Canada	679,012	82
Pacific Great Eastern Railway	1,000,000	60
Saskatchewan Province	1,000,000	85
Southern Alberta Land Company ...	250,000	65
City of Edmonton	1,068,000	80
Grand Trunk Pacific Railway	2,000,000	80
City of Maisonneuve	187,600	50
City of Montreal	1,430,600	66
City of Victoria	482,870	82

These Were Oversubscribed.

On the other hand, several of our issues were oversubscribed. These included the following:

Borrower.	Amount.
British Columbia Electric Railway	£ 750,000
City of Quebec	400,600
Toronto Power Company	616,438
Canada Southern Railway Company	411,520
City of Montreal	1,438,300
Manitoba Province	400,000
City of Prince Albert	102,700
City of Port Arthur	415,700

Changes in Canadian bonds occurred during the last week as follows:—

Dominion of Canada, registered, 1930-50, 93-95.

Province of Quebec, inscribed, 1937, 3 per cent., 77-79.

Regarding the issue in London of $900,000 7 per cent participating cumulative preference shares at 114, the Economist says: "The investment may be described as an industrial speculation with fair security and promise." The Statist says: "The shares may be regarded as a fair venture of their class."

MUNICIPAL BONDS

Toronto Guarantees Housing Company's Bonds—Issues of Treasury Notes

At the last regular meeting of the Fort William city council it was decided that an issue of debentures to an amount of $1,212,400 for waterworks should be made.

Retrenchment will mark the North Bay council's actions until its debentures are sold. Councillor Milne sounded a warning note with the fact that there were $300,000 worth of unsold debentures of the town which the Royal bank was carrying. The bank had raised the interest charges to 6½ per cent., and from the state of the bond market there was no immediate prospect of selling municipal debentures at anything but a sacrifice.

May Issue Treasury Notes.

Mayor Roe, of Port Moody, B.C., says that the banks would loan money at 6 per cent. on treasury certificates, taking the city's bonds as security. He also states that he has communicated with eastern financiers regarding the bond issue. It is probable the treasury certificate plan will be adopted.

Saskatoon's board of school trustees have been informed by Messrs. Wood Gundy, Toronto, their fiscal agents that the outlook is not promising and are inclined to think that the trustees' bonds will not find a market unless placed at 90, the same figure as the bonds of Edmonton were quoted. Even then it is doubtful whether the sale could be made.

Guarantee Housing Company's Bonds.

Toronto city council have decided to guarantee the bonds of the Toronto Housing Company to the extent of $850,000. That amount is eighty-five per cent. of the entire issue of $1,000,000, and the remaining $150,000 is guaranteed by the company. One hundred and fifty philanthropically inclined persons are interested in the company, which is incorporated in the regular way. The only salaried official is the secretary, who is paid $2,000 a year. The shares have a face value of $25 and no shareholder can purchase more than forty shares. These are payable at thirty days' notice and may draw dividends up to six per cent. Stock to the value of $100,000 has been sold.

Col. G. A. Stimson of Messrs. Stimson and Company, has conferred with various British Columbia municipalities relative to debenture issues which are being held owing the financial stringency.

Burnaby has an Offer.

Reeve McGregor stated at the Burnaby, B.C., council meeting, that the bonds reported some weeks ago to have been sold in London, were not yet disposed of, owing to a slight hitch having occurred in the negotiations. He stated that a Toronto firm had asked for a fifteen-days' option on the last bond issue of $625,000 and that a net rate be fixed and they would endeavor to dispose of them either at Toronto, Chicago or New York. Also they would consider a further extension of 15 days if this should fail and were prepared to advance 60 per cent. of the face value of the bonds as a ninety days' loan.

After some discussion on the matter and in view of the existing tangle in London, in connection with the other bond issue, a motion was made to the effect that Reeve McGregor be sent to London with power to act in connection with all the bond issues. This motion carried, and the expenses of the trip ordered to be paid by the municipality.

Point Grey will buy the sewers and waterworks of Shaughnessy Heights from the Canadian Pacific Railway. The by-law calling for $324,606, to be used for this purpose, was given its second reading at the council meeting. The amount is payable to the Royal Trust Company, trustees for the two systems. The bonds will be issued at five per cent. interest.

◆

BOND AND STOCK ISSUES

Messrs. G. W. Farrell and Company, Montreal, are offering the unsold portion of $1,100,000 first 5 per cent. bonds, due 1942, of the Lake Erie and Northern Railway at 92½, with a bonus of 25 per cent. common stock.

The Abitibi Pulp and Paper Company is making an issue of preferred stock with a bonus of common.

WHERE THE BUSINESS GOES

A despatch from Washington, discussing Canadian trade, records the fact that geography has been too much for tariffs. The position is emphasized by the statement that Canada buys more from the United States than from all other nations combined. To-day the United States takes almost the entire exports of Canadian minerals of all kinds, the bulk of its forestry exports, over half of the exports of manufactures and a third of its fishery exports. The United Kingdom is the principal market for its agricultural and animal products. The larger takings of Canadian wheat constitute the principal factor that makes England loom larger in the export trade, and the prospects are that in the future the United States will take a much larger proportion of this article.

The main exports from the United States to Canada consist of manufacturers of iron and steel. Next comes coal and coke, of which Canada is one of the largest importers in the world, and its purchases from the United States amounted to $41,102,569, in 1912. Other large imports from the United States were wood and its manufactures, corn, oils, drugs, and chemicals, raw cotton, gutta percha and its manufactures, cotton goods, fruit, and leather and its manufactures.

The same Washington despatch, with true Yankee pride, says that in spite of tariff preferences Great Britain's share of the Canadian market has steadily declined before the advance of American goods. Geography undoubtedly has a lot to do with the fashioning of Canadian trade statistics, which show that in the year of confederation, the United States took 47.9 per cent. of Canada's total exports; in 1880, 37.9 per cent.; in 1890, 41.9 per cent.; in 1900, 35.7 per cent.; in 1910, 37.35 per cent., and in 1912, 38.23 per cent. Of Canada's imports in 1868 the United States furnished 33.77 per cent.; in 1880, 40.33 per cent.; in 1890, 45.99 per cent.; in 1900, 59.17 per cent.; in 1910, 58.81 per cent., and in 1912, 65.09 per cent.

Much has been said about lack of enterprise in Canada on the part of British manufacturers, but that lack is to some extent imaginary rather than real. The British manufacturer has other markets as well as Canada. He has keen competition in the Dominion from the United States, which has geographical advantages, besides knowing thoroughly the trading methods of the American continent. It is not for this country to make excuses for the comparatively small share of its import trade obtained by Great Britain. Commerce is purely a matter of business. All things being equal, however, Canada might well give the best consideration to the country which is financing, with many millions of dollars every year, the development of the Dominion.

THE LADY AND THE CONTRACT

The name of Miss Katrine Ellen Fawns will go down in Canadian history, via Hansard, as the lady who caught the Dominion Government napping and caused an historic verbal battle between Hon. Rodolphe Lemieux and Hon. L. P. Pelletier, past and present postmasters-general, respectively. Miss Fawns obtained a twenty-year contract with the government for placing wherever she may please throughout the Dominion pillars for the sale of stamps and for advertising purposes. Mr. Pelletier said that his predecessor signed the agreement. Mr. Lemieux contended he did not. This contradiction and the terms of the contract engaged the attention of parliament for many hours.

One member enquired if the municipal authorities did not have full control of their streets and highways. He was told that the postmaster-general, in His Majesty's name, has the right to put pillar boxes wherever he likes. That power has been transferred to Miss Fawns, and she is entitled to choose the location for these boxes. Mr. Pelletier made some amendments to the contract, but he admits that the post-office department does not get much out of it. The chief advantage appears to be that the stamp vending machines will accelerate the circulation of postage stamps. In the meantime Miss Fawns has transferred her contract to the Dominion Postage Stamp Vending Company, Limited.

The pillar-box which the company will handle, will receive letters and have as part of its make-up an automatic stamp vending machine. At the top is a revolving drum, which at night is lighted by electricity, and on which advertisements will be displayed. Mr. Nesbitt asked the postmaster-general where the pillars would be placed, and was told that under the contract Miss Fawns has the right to place one at the very door of that gentleman's home. Mr. Nesbitt, therefore, has the prospect of waking up one morning and finding a soap, pickle or mining stock advertisement staring at him from a blood-red pillar-box. Indeed, every good citizen has that prospect, unless they chance to be at church, as Mr. Pelletier has succeeded in amending the contract to the effect that the company "should not have the right to place one of these pillars at the door of a church or any place else merely at their own volition."

Mr. Pelletier said that the agreement was a baby which he found at his doorstep, and he named Mr. Lemieux as the father. The contract was signed on May 20th, 1911. Mr. Lemieux got hold of a document dated May 22nd, 1913, and triumphantly exclaimed: "So it is just signed. It is a new baby." But the postmaster-general claimed that it was the same child clothed in some much-needed amendments.

In the meantime, Miss Katrine Ellen Fawns may smile and the Dominion Postage Stamp Vending Company, Limited, proceed to sell its stock, for it has a fine contract.

CRIMINAL STATISTICS

The moral reformer will find food for much reflection in the criminal statistics just issued from Ottawa. During the year covered by the figures, 1911, there were 16,625 charges and 12,627 convictions for indictable offences. There were also 100,633 summary convictions for everything from food adulteration to larceny. Drunkenness accounted for 41,379 of these convictions. The indictable offences include those against the person, against property with violence, against property without violence, malicious offences against property, forgery and offences against the currency, and other offences not included in the foregoing classes.

The occupations of criminals is always an interesting study. The proportion of criminals who were engaged in commercial pursuits was 18.69 per cent. Only 1.31 per cent. were professional men, while 7.60 per cent. were domestics, 6.36 per cent. agricultural and 10.36 per cent. industrial workers. The percentage of criminals who were laborers was 56.68. This is excessively high compared with the other classes of occupations, and it may be assumed that a large number of offenders given as "laborers" in the returns, should have been credited to the more defined classes of occupations, such as agricultural, domestic, commercial or industrial, to which they properly belong.

The civil condition of the convicted shows that 67 out of every 100 were single, 31 married and 2 widowed. The educational status shows that 7 out of every 100 offenders were unable to read or write, 91 had an elementary education and 2 a superior education.

As to ages, 13.79 per cent. were under 16 years, 15.71 per cent. from 16 to 20 years, 55.53 per cent. from 21 to 39 years, and 14.97 per cent. 40 years and over. The use of liquors is represented by the following figures per 100 offenders: 63 moderate and 20 immoderate drinkers, with 17 not given, or "non-drinkers." Eighty-seven out of every hundred offenders were returned as living in cities and towns, and thirteen in rural districts.

The Canadian born criminals represented 50.5 per cent. of the total convictions in 1911, the British born outside of Canada 15.3 per cent., the United States born 5.8 per cent., and the foreign born 12.2 per cent. According to the Census of 1911, the Canadian born constituted 77.9 per cent. of the total population of Canada, the British born outside of Canada 11.6 per cent., the United States born 4.2 per cent., and the foreign born 6.2 per cent.

The statistics reveal the necessity for more stringent regulations throughout the country regarding the carrying of firearms. One of the most gratifying facts contained in the blue book is that juvenile courts have been established in Montreal, Toronto, Winnipeg, Vancouver, Ottawa, Halifax, Victoria and Charlottetown. Everything should be done to prevent the young delinquent from becoming a hardened criminal.

FARMERS BANK DEPOSITORS

The depositors of the Farmers Bank have been promised by Premier Borden "a reasonable measure of relief." This will be provided by legislation to be introduced at the next session of parliament. Mr. Borden's statement appears in detail on another page of this issue. The government apparently thinks that the Treasury Board which granted the certificate to the bank has some responsibility in the matter, and that this the government must assume. In that connection, the Premier says: "While the direct subsequent cause of the loss was the fraud and dishonesty of the bank manager in the administration of its affairs, there is nevertheless a certain connection between that loss and the power and status with which he became invested upon the granting of the certificate."

The case is of exceptional character, as Mr. Borden stated, and he plainly intimated that the depositors of two other banks which recently failed will not be granted relief as in the case of the Farmers Bank. This is as it should be, for the Dominion Government can scarcely be expected to shoulder the depositors' burdens when banks fail and argument is aimed at the Treasury Board. Perhaps one of the most important lessons to be learned from the Farmers Bank failure is that the Treasury Board cannot be too careful in granting new bank charters.

THOSE ALARM NOTES

The Winnipeg business men's excursion through the prairie provinces was a decided success. The captains of industry of that growing Western metropolis spent nearly three weeks in investigating at first hand conditions in Manitoba, Saskatchewan and Alberta. A paper, "The Overland Observer and Business Man's Bulletin," was circulated every day on their special train. Here is an editorial from the third issue, which appeared when the business men were approaching Prince Albert and Saskatoon:—

"A community spirit is the most desirable factor of a prosperous, contented town. While factories may exist in great number, while a city may have millions going into new buildings every year, while bank clearings soar upwards, and while a city may have thousands of people living in good homes, unless there is a unified interest between the inhabitants, unless each individual feels that all are interested in him and he in all and others, that the institutions are his to share and rejoice in, there can be no real city. No city or town was ever made without the majority of its citizens doing their part toward the common good.

"The Canadian West has infinite resources. The alarm notes from the eastern world are sounding in our ears, but there is plenty of available cash, however, for legitimate needs. It would be economic folly for Western Canada to hesitate, to falter, to become penurious in its necessary or provident purchasing on the threshold of the era of prosperity it has entered upon.

"Let the ringing note of confidence be sounded throughout the western land at this time by the Winnipeg Business Men, and let the courageous note of a purposeful people, sure of themselves and confident of the future, be heard. The proof of the confidence rests with the people, and as they provide the proof so will be the verdict in a continued prosperity throughout the West. It rests with us."

These optimistic sentiments *The Monetary Times* thoroughly endorses. The statement, however, that "the alarm notes from the eastern world are sounding" is a little wide of the mark. Eastern Canada has the greatest possible confidence in the Canadian West. The alarm notes are sounding, not from Eastern Canada, but from the world's money centres. It, therefore, behoves both East and West to be of good cheer and answer those alarm notes with the proper measure of caution and economy.

THE BUSINESS OF PROVISIONAL DIRECTOR

The name of Athol George Robertson is becoming uncommonly frequent as a provisional director. During the past few months, he has appeared as such in connection with the following companies:—

Photo Specialty Company, Limited, Streetsville, Ont., capital $40,000.

Hagersville Furniture Company, Limited, Hagersville, Ont., $40,000.

S. H. Reynolds & Company, Bothwell, Ont., $50,000.

Alonzo Walker, Limited, Enterprise, Ont., $40,000.

Firby's, Limited, Toronto, $40,000.

Western Hotels, Dryden, Ont., $40,000.

Athol George Robertson was also one of the original incorporators of the Amalgamated Moving Picture Shows, Limited, which is offering stock to the public.

The fact that Athol George Robertson on October 23rd, 1908, was sentenced to thirty days in jail on two charges, and on June 9th, 1910, to two years in Central Prison less one day, by Judge Winchester for fraud, should lead the Ontario Government to consider seriously whether Athol George Robertson has not figured as provisional director in a sufficient number of Ontario charters.

SMALL CHANGE

Friday, the thirteenth, has been passed safely.

* * * *

Included among current treasury bills is Sir William Mackenzie.

* * * *

And they could call Grand Trunk Pacific implemented bonds "White Plumes."

* * * *

Now is the season of large hailstones, fish stories, and grandmothers' deaths.

* * * *

Stocks are on the bargain counter, but the excursions from the country have not begun.

* * * *

British cabinet ministers probably wish that "wireless" were entirely a thing of the future.

* * * *

Prince Albert says that Canada is a "ripping" fine country. With which the stockbrokers agree.

* * * *

It is extraordinary, in tight money times, how many people have to sell automobiles at a sacrifice on account of ill-health.

* * * *

The Canadian Forestry Association propose to reforest the Dominion, while Premier Borden will put more timber in the Senate.

* * * *

After the Canadian Press Association had lunched at the Dome Mines, the stock commenced to go down—a deliberate slap at the power of the press!

* * * *

There are now twelve bank clearing houses in the West and ten in the East. Ten years ago the figures were eight and three, respectively. Thus is prairie progress affecting statistics.

ANOTHER UNITED STATES COMPANY IN CANADA

The Canadian Connecticut Cotton Mills Company have decided to locate in Sherbrooke, Que., the ratepayers of that city having endorsed a by-law submitted in their behalf. Mr. C. W. Praray, mill architect of New Bedford, Mass., has been in Sherbrooke looking over the site and is preparing plans and specifications for the factory. This concern will invest about a quarter of a million dollars in plant and equipment, and expect to be in operation by January, 1914. Their principal lines are cotton fabric used in the manufacture of automobile tires and a dryer felt used in paper mills.

BRITISH COLONIAL FIRE COMPANY INCREASES CAPITAL

A special meeting of the shareholders of the British Colonial Fire Insurance Company, of Montreal, has been called for the purpose of making an issue of $250,000 new stock, thereby increasing the subscribed capital to $1,000,000. The company has been doing business since June, 1912, and at the first annual meeting of shareholders, held in February last, an issue of $250,000 was made and immediately subscribed.

The balance of the proposed issue remaining unsubscribed at a certain date will be taken up by a Montreal syndicate, which has agreed to subscribe all the shares not sold, at a premium of $10 per share.

CANADA'S SHARE OF IMMIGRATION

A total of 52,580 British emigrants, left the United Kingdom for countries outside of Europe during April, 1913. As many as 37,948 proceeded to other parts of the Empire, 29,984 going to Canada and 5,533 to Australia. Of the remaining 14,632, all but 603 went to the United States.

In the first four months of the year 133,350 natives of the British Isles emigrated, over three-fourths of whom have been retained within the Empire. They were distributed as follows:—

Canada	66,911
Australia	23,432
New Zealand	4,881
British South Africa	3,366
Other colonies and possessions	3,418
Total British Empire	102,008
United States	25,522
Other foreign countries	2,820
Grand total	133,350

Branches of the Canadian Bank of Commerce have been opened at Readlyn, Sask., and Monitor, Alta., under the management of Mr. G. G. Sutherland and Mr. J. B. Bell respectively.

WORLD-WIDE DEMAND FOR CAPITAL

Old Countries Emerging from Commercial Lassitude and New Lands Adopting Modern Enterprise

"Throughout the world at the present time there appears to be more or less uneasiness as to the money situation, and in this country particularly this apprehension seems to have assumed a somewhat aggravated form. I do not believe this condition affords any legitimate reason for anxiety as far as we are concerned if we have currency reform. The great demand for funds everywhere is largely due to the extraordinary development that is taking place in a number of the old countries that have emerged from commercial lassitude into a state of remarkable enlightenment and accompanying industrial progress, and in several new countries whose latent resources are being opened to modern enterprise," thus writes a well-informed writer, discussing in a recent issue of the New York World the monetary situation in the United States, and attributing to Mr. S. R. Guggenheim these interesting views on the existing worldwide demand for capital.

Should Have Inspiring Effect.

"The old countries that are undergoing this transition are China, Japan, India and Morocco, while the comparatively new nations that are feeling the impulse of this industrial evolution now under way in all parts of the world are Chili, Peru, Argentina and Bolivia, and Brazil in a less pronounced degree. The expanding demand for capital is therefore the result of a thoroughly wholesale condition, and should have an inspiring rather than a restraining influence on financial confidence. The question we in America should ask ourselves is whether we are keeping pace with this great movement and whether we are sufficiently participating in its benefits.

"The extraordinary demand for large amounts of capital is not, however, confined to the nations I have mentioned. Germany, England, France and others of the Old World countries are in the midst of great industrial activity. It is a rather unpleasant commentary upon the United States situation that it should be exporting gold to Europe at a time when it should have ample employment for it at home.

Bankers are Perturbed.

"Foreign countries, however, are ready and willing to pay 7 and 8 per cent. for accommodations, not because, as many of our people here seem to think, that they are preparing for war—the Great Powers know that there is to be no war—but because they can employ this money at home at terms that justify these banking arrangements, or because they sell their products to these newer countries at a handsome profit. The trouble with us is that the United States bankers have been so perturbed over the constant political alarms and uncertainties in this country that they have not had the courage to extend increased credit to our merchants and manufacturers so that they can reach out for the trade in South America and the Orient that Europe is practically monopolizing.

"They are content to limit their banking facilities to the encouragement only of the domestic trade which 90,000,000 people of the United States create, and I must admit that political conditions, at least those in the immediate past, have not permitted any departure from a policy that seems to be lacking in economic foresight.

"While domestic business conditions are good, it would seem to me that if we are to have our legitimate share of the world's trade expansion it would be a wise policy for the present administration to depart from some of the practices, if not the policies, pursued in the past.

Tariffs and Currency.

"Let the government enforce the law resolutely. If there are infractions, punish the malefactors, whether they are of high or low degree, but let not those officers charged with the administration of the law go about with a trumpet sounding alarms that destroy credit and disarm courage. There is, of course, some uncertainty as to the effect of tariff revision. It is more or less of an experiment, and there are many lines of business that will require some readjustment, but I do not believe that there will be any disturbance or more than a temporary halt if the administration will address itself earnestly to the task of securing from the special session of Congress an efficient currency measure, the urgent necessity of which is well understood by bankers and business men of all political creeds. If such a measure is passed and becomes a law before the early fall, when the harvest requirements begin to impose their usual strain upon the money situation in this country, it will largely, if not completely, offset any adverse influences that might result from tariff revision."

There are 2,304 miles of railways under construction in British Columbia.

WORLD FINANCE AND LOCAL FINANCE

Harvard Professor Tells Bankers at Ottawa of International Readjustments

That it is necessary for bankers to keep up with the changes that occur throughout the world, was a reminder given to the New York State Bankers' Convention at Ottawa this week by Professor G. G. Wilson, professor of International Law at Harvard University. Even a prospect of change may seriously affect business, he continued. The recent changes in the rates of exchange, the difficulty in obtaining gold for current use in Europe, the wide fluctuations in the great European money markets had an effect throughout the world.

"While a generation ago banking was for the most part national, it is now in an increasing degree international," continued Professor Wilson. "European bankers often claim that those who are concerned in the business on this side of the Atlantic are in reality not bankers at all because of the provincial point of view which the foreigner believes prevails in North America. In proof of his contention he cites the reluctance of North American Bankers to engage in South American financial undertakings and maintains that the European bankers have obtained the cream of this business. Their latest proof is the withdrawal of American bankers from the proposed Chinese loan leaving it wholly to Europeans.

Bankers of North America.

"Now it can be safely presumed that so successful a group of men as the bankers of North America probably know their own business and have been putting their money to what seemed to them the safest and most profitable use. Such a course would appeal to a novice as being entirely sound and praiseworthy.

"However as the old country bank, which had dealings only with the citizens of the immediate neighborhood has largely passed away and its place has been taken by a branch of some large financial institution which is in a central city and may have other branches, so these central banks are becoming allied to other larger banks. In European and in some Asiatic countries, the process has gone on till banks with names hyphenating those of two states are common. This change abroad is in some cases very recent and due to the readjustment of internation relations.

"This readjustment has been accompanied by a drawing together of the states of the world. The tendency to international union cannot of course be neglected by bankers because their business is one of the first to respond to changed conditions."

Pacific Coast Now the Centre.

Professor Wilson then traced the history of the international postal system and of general international readjustments. "The shifting of the scene of world activities has been to some extent from Europe, from Africa, and even from the Atlantic until now the Pacific Ocean seems destined to be the great theatre of the early twentieth century drama of international politics," he added.

"As the result of the Boxer uprising in China in 1900, the powers of the world demanded of China an indemnity of above three hundred and twenty-five million dollars. Since the recent revolution in China in 1912-13 that country has endeavored to negotiate a loan of 300,000 million dollars. Such sums seem small when compared with national debts which have mounted to enormous figures in recent years, as e. g., the Russian debt of more than four and one-half billion dollars.

"In the same issue of a daily paper in early June, 1913, there is a statement that the Republic of Mexico has made a loan at six per cent. of one hundred million dollars secured by 38 per cent. of the customs revenue, and that the Balkan Allies have demanded an indemnity of four hundred million dollars from Turkey and that Turkey will pay. Such announcements show that the readjustments of international relations have a significance for finance which is quite unlike similar readjustments in the middle of the 19th century or even toward its close.

New Dollar Diplomacy.

"There is, therefore, a dollar diplomacy which is unlike the diplomacy usually named under that term. In diplomacy and in the readjustment of international relations more and more terms of settlement take the form of financial statements. Formerly his sounding treaties, lengthy apologies, formal promises might be made; now ofter marketable securities must be substituted and the formal promise may be omitted.

"Conventional agreements have introduced an element of certainty where uncertainty prevailed previous to the middle of the 19th century. Upon these bases, or sometimes in disregard of them, changes have come in the relations of state to state and people to people."

CANADA'S GROWTH AND THE "ADVERSE" TRADE BALANCE

Many Important Governing Factors Must Be Applied When Considering Excess of Imports over Exports

BY THE EDITOR

LAST week, *The Monetary Times* printed an article which showed clearly the growth in recent years of Canada's adverse trade balance. It was seen that the percentage of value of imports with aggregate trade rose from 56.97 in 1908 to 63.76 in 1913. The imports in the latter year were approximately $300,000,000 greater than the exports. This unfavorable trade balance has been keenly criticized, especially in the United States. Mr. F. R. Macaulay, in the New York Times Annalist, dubs Canada's statistics as "what is perhaps the most absolutely bizarre set of trade figures ever returned by any country during any period of war or peace."

To what extremes such critics are going may be gathered from the following extract from Mr. Macaulay's article. He says:—

"Canada, instead of pausing like nearly all the rest of the world in 1908, used the world-wide monetary ease to inaugurate a tremendous borrowing campaign which has continued unabated up to the present time. It is astonishing that such an expansion as at present exists could have grown up at all, and, of course, the position becomes steadily more and more precarious. There are some reasons for believing that Canada is just at the turn; that the country has, indeed, perhaps already passed the crest of the wave and is headed toward the trough.

Pace of Nineteen-Twelve.

"It is rather recognized in Canada that it will be impossible to continue the pace of 1912 during 1913. It is, however, hoped that 1913 may be a 'normal' year. A normal year is hardly possible in Canada—a return to a 'normal' year would itself probably involve the country in such liquidation as to threaten the whole business structure. London is becoming much less friendly toward Canadian flotations. The Canadian banks are in an extended position. It seems almost inevitable that a recession, if not a collapse, must occur in Western real estate values. This would involve the banks and the whole country. Canada has had so much capital the last few years she absolutely must have more—without more she cannot hold the pace, values must drop and liquidation supervene. It is already evident that the pace at which financial operations have been carried on for some time is slackening, imprudent speculations are beginning to recoil, dealers in luxuries are finding a falling off in demand. Even bank reports begin to recognize the danger signals."

Banks are Adjusting Matters.

Dealing briefly with these statements, it is almost needless to state that the Dominion has not passed the crest of the wave and is by no means headed toward the trough. The pace of 1912 will not be continued during 1913 because of the world-wide money stringency and the determination of Canadian banks to adjust conditions during a quiet period. A return to a normal year is quite possible and without disaster. London is still friendly toward Canadian flotations. The Canadian banks are in the strongest possible position. A recession has occurred in some real estate values, but this was fully anticipated and the banks are by no means involved. Indeed, they have been the chief brakes upon wild real estate speculation. Altogether, the New York view of present conditions is colored by a lack of knowledge of the actual situation. But this is aside from the main question of the trade balance.

An excess of imports over exports is not necessarily an unfavorable feature. Canada being in the throes of nation-making, must consequently be a large borrower. The country is adding to its population at the rate of about 400,000 people a year. Their needs alone necessitate an immense amount of imports. They must be housed and clothed and fed. It is no small task annually to absorb such new population. It means the creation of innumerable new towns, which must have their water and sewerage systems, fire protection and the hundred and one necessities to which the immigrant has been accustomed in old lands and which are also necessities in a new land.

Capital from Immigration.

The trade balance is affected, too, by other items which do not appear in a bare statement of imports and exports. Not only is the immigrant an asset as a producer of wealth, but he brings with him considerable new capital. From compilations made by the Department of the Interior it has been conservatively estimated that the class of immigration Canada receives from the United States, that is to say of farmers who have sold out their holdings in the States and have taken up land in Western Canada, brings with it capital (including settlers' effects) to the amount of over $1,000 per head, or, say, $5,000 per family of five persons. The total number of such immigrants for the calendar year 1912 was 140,143. Applying the rate mentioned per head, the amount of capital and effects accompanying this immigration would reach a total exceeding $140,000,000 in value. When considering the excess of imports from United States over our exports to United States this large influx of capital to be productively employed in our agriculture must not be overlooked.

Development of Natural Resources.

Besides the task of looking after the volume of immigration, there is the general development of the country, natural and necessary, which accounts for a vast amount of capital expenditure. There is railway construction and equipment by three transcontinental systems. A large number of public works require financing, as well as industrial and commercial enterprises. This is the period of Canada's greatest growth. Mr. R. D. Bell, of Montreal, recently expressed the situation with great clearness.

"It is in the past ten years," he said, "that the balance of trade has been growing steadily against Canada—which period is that of her greatest growth. We have here a comparatively virgin country with a tremendously increasing population devoting themselves, for the most part, to the development of her natural resources—agriculture, mines, and lumbering. The products of this development constitute for the present Canada's only exports. But this increasing population requires an enormous amount of manufactured goods. And, in addition, in order properly to develop our raw material, we require an even greater amount of construction materials and equipment for permanent works, such as transportation lines. It could easily be seen, even were the situation to end there, that our imports of all materials for the facilitating of this development would far exceed the sales of products. Such imports are in the nature of capital expenditure. The situation is comparable to that of a single industry commencing to exploit some natural resource. The sales in the first few years would fall very short of meeting the capital expenditures."

Gap Between Imports and Exports.

The excess of imports over exports, therefore, is not in itself a serious feature. The factors contributing to what is called our adverse trade balance are natural incidents in nation-building. The gap between imports and exports will not lessen until the Dominion's manufacturing industries have expanded to a point when the home market can be supplied fairly well within the country.

These facts do not, however, constitute any legitimate reason for undue extravagance, a failing which is sometimes apparent in Canadian business spheres. Prosperity cannot always be founded on borrowed capital. While the so-called adverse trade balance is not alarming, efforts should be made to increase production, both agricultural and industrial. Mr. D. R. Wilkie the other day referred to what he thought an extraordinary fact, that notwithstanding all the country has done to build up manufacturing industries in our midst, manufactured goods of the value of $348,500,000 were imported during the past year as against exports of the same class amounting to only $35,800,000. At the same time, the increasing demands for manufactured goods of the home market must be borne in mind.

Two Countries on One Continent.

In connection with this subject, an interesting point has been raised by a prominent Canadian financier in reply to the article of Mr. Macaulay quoted above. "Countries," he says, "are gradually becoming less and less financially independent. This is particularly true of the three great English-speaking countries—England, the United States, and Canada. The barrier of language is rather effective in preventing other countries from having as complete a knowledge of the financial operations going on elsewhere, but that barrier does not exist between the three named, and there is a strong tendency, further, for these three to segregate themselves more and more from the rest of the world. Canada, in particular, is less independent financially than either of the others.

"Our relations with the United States are very close, and becoming closer all the time, while our financial relations with England are also becoming increasingly close, and Canada, in fact, is becoming the chief outlet for British surplus capital. If there were no boundary line between Canada and the United States you would have no figures for the section of the continent which we call Canada. The movement of goods from the United States proper to Canada would not be recorded at all, and the great excess of imports from the United States would not be noticed.

Three Countries as a Whole.

"In other words, Canada occupies a position somewhat analagous to the section west of the Mississippi when that section began rapidly to develop a few decades ago. If we had had, at that time, figures showing the imports and exports of the section of the United States west of the Mississippi, we would have found that the imports frightfully exceeded the exports, but as the Mississippi River was not a boundary line, this phenomenon passed unnoticed.

"My point," concludes the financier, "is that the territory of Canada must be viewed as being in reality rather the outer and most rapidly growing fringe, or new section, of the one great Anglo-Saxon triumvirate of countries, so to speak, and that Canada's relations to these two countries are so close that we must view the three countries as a whole, and not merely consider Canada alone."

FARMERS BANK DEPOSITORS

Government Will Grant Them Relief Next Session—Is a Unique Case, Says Premier

The depositors who suffered by the Farmers Bank collapse will be granted some relief at the next session of parliament. Mr. Lanctot the other day put the following question to the Government: "Is it the intention of the Government to reimburse the depositors of the Farmers Bank? If so, does the Government propose to act in like manner with the depositors of the Bank St. Jean and the Bank Ville Marie?"

What the Commissioner Found.

Mr. Borden replied as follows: "It appears from the report of the Commissioner appointed to investigate the matter of the failure of the Farmers Bank: (a) that the issue of the certificate of the Treasury Board authorizing the bank to commence business was produced by false and fraudulent representations, on the part of the promoter and subsequent general manager of the bank, W. R. Travers; (b) that in the Commissioner's opinion, it was incumbent upon the Treasury Board before issuing its certificate to have investigated certain charges made to the Department of Finance that the amount required by the bank act to be paid up in respect of subscriptions had not been so paid, and (c), that if the true facts had been disclosed the certificate of the Treasury Board would not have been given, and thus the bank under the management of Travers would not have been authorized to commence business.

Is An Exceptional Case.

"The case is of exceptional and indeed unique character both with regard to the fraudulent means by which the certificate was procured and in respect of the results which followed, involving the ultimate loss of all moneys placed in the bank by the unfortunate depositors. The man who fraudulently procured the certificate in the name of the bank was enabled to abstract those deposits by the unwarranted assumption of powers in violation of plain statutory conditions. While the direct subsequent cause of the loss was the fraud and dishonesty of the bank's manager in the administration of its affairs, there is nevertheless a certain connection between the loss and the power and status with which he became invested upon the granting of the certificate.

Depositors Are Entitled to Relief.

"Having regard to these considerations the Government considers that the depositors are entitled to a reasonable measure of relief, which will be provided by legislation to be introduced at the next session of parliament.

"The case of the other banks mentioned is in no wise similar, and the action which the Government proposes to take in the case of the Farmers Bank will afford no warrant or precedent for reimbursing their depositors."

MAY COBALT ORE SHIPMENTS

The following are the shipments of Cobalt ore during May:—

Mine.	Tons.
Beaver	31.2
Buffalo	32.9
City of Cobalt	37.7
Cobalt Comet	80.4
Cobalt Lake	92.7
Cobalt Townsite	239.2
Coniagas	253.5
Dominion Reduction	126.5
Hudson Bay	62.6
Kerr Lake	30.1
La Rose	195.6
McKinley-Darragh	227.6
Nipissing	126.7
Nipissing Reduction	25.8
O'Brien	32.4
Pennsylvania-Canadian	25.4
Peterson Lake	30.3
Temiskaming	30.1
Trethewey	66.0
York, Ontario, Silver Mining	20.0
Total	1,767.6
Swastika—Gold Ore.	
C. A. Foster	30.0
New Liskeard—Silver Ore.	
Casey Cobalt	30.0
Iroquois Falls—Nickel Ore.	
Alexo Mine	30.0
(Omitted from April Statement).	
Cobalt Townsite	30.9

RETALIATORY DUTY AGAINST CANADA

United States Tariff Committee Discuss Restrictions on Wood and Pulp Exports

A retaliatory duty against Canada on print paper valued at not more than 2½ cents a pound, is being discussed by the United States Senate Finance Sub-committee. The Dominion Government is in communication with Washington on the matter.

A despatch from Washington states that print paper in the Underwood Bill is on the free list, and the amendment being considered would provide "that if any country, dependency, province or other sub-division of Government shall impose any export duty, export license fees or other charge of any kind whatsoever, whether in the form of additional charge or license fee or otherwise, upon printing paper, wood pulp, or wood for use in the manufacture of wood pulp,there shall be imposed upon printing paper when imported either directly or indirectly from such country, dependency, province or other sub-division of Government, a duty equal to the amount of such export duty or other export charge imposed by such country, etc., upon printing paper, wood pulp or wood for use in the manufacture of wood pulp.

Want to Force Canada.

United States manufacturers urge that a retaliatory duty against Canada would force that country to yield on some of its restrictions against American manufacturers on wood and pulp exports.

In his argument, before the sub-committee, Mr. Norris, chairmen of the paper committee of the American Newspaper Publishers' Association, in addition to reiterating his argument against countervailing duty, called attention to a proposal of American paper maunfacturers to establish a system of operating their mills only five days a week instead of six. This, he argued, was another effort to curtail the American output of print paper.

"The consumption of paper has been growing steadily," Mr. Norris said in his brief, "at the rate of 90,000 tons per annum, or 300 tons per day, but in the year 1911 not a single paper machine was built by the manufacturers in the United States.

Position of Manufacturers.

"In the month of March, 1911, at the time they were appealing to your committee for relief, their reports to the bureau of corporations showed that they were restricting their output below normal capacity to the extent of 156,000 tons per annum, or 13 per cent. They were aggravating that restriction by the exportation of 49,755 tons of newspaper in the fiscal year of 1911. Any unusual condition arising during the year, such as a strike, a fire, drought or blizzard, or shortage of cars or congestion of traffic would have precipitated a situation similar to that in the fall of 1907 and the spring of 1908, when a paper panic costs publishers approximately $10,000,000.

"The paper makers inaugurated a campaign to deter investment in new mills, and when they failed to stop construction in any other way, they attacked the credit of the projectors of those new mills, and urged banks to refuse loans to the new enterprises."

Provoked Ugly Complications.

Mr. Norris contended that every measure the United States had directed against the Canadian provinces had reacted against the United States paper maker and consumer that "instead of composing the situation, they provoked an ugly complication, which will require years of intelligent and delicate handling to adjust.

"Nothing can be done," he argued, "by compulsion or tariff threats to provide wood for the American paper industry. That day has passed. Canada controls the pulpwood supply. Its authorities insist that they be dealt with upon a reasonable basis."

◆

Duluth-Superior has declared the regular quarterly dividend of 1 per cent. on the common stock, payable July 2nd to shareholders of record June 21st. This is a reduction of 1 per cent. per annum.

The pulp and paper industry of British Columbia issued manufactured products to the value of $1,250,000 last year, and the output this year is estimated at $3,250,000. Between $12,000,000 and $15,000,000 is invested in the industry.

A Dominion license has been granted to the London and Lancashire Guarantee and Accident Company of Canada for the transaction of the business of automobile insurance, in addition to guarantee, accident, sickness and plate glass insurance for which it is already licensed. Mr. Alexander MacLean, Toronto, is the company's chief agent.

PLEADS FOR CURRENCY REFORM

President Pugsley, of New York State Bankers' Association, Wants a Better Monetary System

An eloquent address was delivered by the Hon. Cornelius A. Pugsley, president of the New York State Bankers' Association, at the opening session of the convention of the association at Ottawa this week, held in commemoration of a hundred years of peace between the English-speaking peoples. The close neighborliness and friendship engendered by this century of peace and good will which has "thriven and ripened in vast trade, in common prosperity and in growing esteem," was discussed by him at some length.

Capital and Labor.

Coming to business matters, Mr. Pugsley said:—

"Within the boundaries of our great countries great railway systems demand just and equitable consideration, if they are to meet the requirements of a rapidly developing continent. Capital and labor must joint forces for the public weal. Every legitimate enterprise and industry, honestly conducted, should receive the sustaining influence of our governments, not their condemnation. Canada is to be congratulated upon an admirable currency system, while in the United States currency reform is a question of vital import now waiting and pressing for solution.

CORNELIUS A. PUCSLEY,

President, New York State Bankers' Association, Which Met At Ottawa this Week

"A sound, stable and responsive currency is one of the great bulwarks of national glory, greatness and power, and one of inestimable value to its business interests. It is the life blood of a nation's commerce and prosperity. It concerns so closely not only the banker, but the manufacturer, the merchant, the farmer, the wage earner and all classes of our citizens, that no measure should be enacted into law unless it shall be the expression and the result of the most painstaking study, calm deliberation and the mature judgment of men qualified and equipped to deal with so great a financial and economic problem.

Currency Reform and Politics.

"I believe that any measure or measures considered by our present Congress should receive intelligent thought, study and discussion by men of all political parties if we are to evolve an ideal currency system. Currency reform should rise above political or party expediency. It should not be made the football of politics. I believe that the financial, commercial, and all other interests of the United States will consistently and conservatively press onward towards the attainment of a monetary system that shall command what the currency system of Canada commands, and which our own country in other particulars enjoys, the respect, the confidence and the admiration of the world."

The new Canadian Pacific trans-Pacific liner "Empress of Russia," tied up at Vancouver the other day, is the largest vessel ever berthed in that port.

RICHELIEU NAVIGATION MERGER

Twelve Companies are Included in Consolidation with Capital of Twenty-five Millions

Monetary Times Office,

Montreal, June 11, 1913.

The Richelieu and Ontario organization has been extended and by the plans of reorganization the following companies will be included in the new concern: Richelieu and Ontario Navigation Company, Inland Lines, Limited, Northern Navigation Company, Limited, Niagara Navigation Company, Limited, St. Lawrence River Steamboat Company, Limited, Richelieu and Ontario Navigation Company, Limited, of United States of America, Quebec Steamship Company, Limited, Canada Interlake Line, Limited, Ontario and Quebec Navigation Company, Limited, Merchants' Montreal Line, SS. Haddington, and Thousand Island Steamboat Company, Limited.

These companies, combined, own over one hundred boats and the amalgamation will control the baggage, freight and passenger business of the St. Lawrence and Upper Lakes, in addition to which there is talk to the effect that a service to the West Indies may be controlled.

No decision seems yet to have been reached concerning the name of the new company, but so far as can be learned the name will be, "Canada Lakes, River and Ocean Corporation, Limited." A committee has been appointed to take up this question, as well as the question of the terms upon which the different companies will be included. This committee consists of the following:—Messrs. J. Carruthers, J. R. Binning, E. Bristol, C. A, Barnard, W. Grant Morden, J. Playfair and Sir Montagu Allan.

Shareholders and Capitalization.

It is proposed to offer the shareholders of the Richelieu and Navigation Company $120 par value of 7 per cent. preference stock and $40 of common stock for each $100 share of Richelieu. This would mean a preference yield of 8.40 per cent. on the exchange of shares, in addition to which would be the chances for a dividend on the common stock.

The new company to be formed will have a capitalization of $25,000,000, half of which will be 7 per cent. cumulative preference stock and the remainder common stock. The company will also issue $7,500,000 of 5 per cent. thirty year first mortgage debenture stock. The assets and liabilities of the companies entering the consolidation as shown by the Canadian Appraisal Company, are as follows:—

Assets.

Vessels	$16,875,034.00
Real Estate, Buildings & Dock Properties	5,450,267.99
Lease and Contracts, Goodwill, etc.	8,791,935.67
Bond Investments	139,232.37
Stores and Supplies on Hand	161,623.62
Cash in Banks and on Hand	130,873.28
Notes and Accounts Receivable	845,545.74
Unexpired Insurance	98,802.66
Deferred Charges to Operations	31,294.59
Cash Paid on Account of New Steamer	60,078.95
	$32,584,688.87

Liabilities.

5% 30 Year Debentures	$ 7,500,000.00
125,000 7% Preference Shares of $100 each	12,500,000.00
120,000 Ordinary Shares of $100 each	12,000,000.00
Current Accounts Payable	584,688.87
	$32,584,688.87

Issue to be Made in London.

Messrs. Brown, Shipley and Company and their associates have undertaken to issue all of the preference shares in London at par, so all the shareholders who prefer to dispose of their holdings at 120 will have the option of putting their shares in this issue; or, of keeping their preference shares with the bonus of $40 in ordinary shares. Arrangements have been made for at least $2,500,000 of the preference shares to be purchased at par in London, which will ensure a large English holding in any case, and all the securities of the company will be listed on the London Stock Exchange as well as the Canadian Exchanges.

As the securities of the new company will have the backing in London of Messrs. Vickers, Limited, Furness, Withy and Company, Brown Shipley and Company, Linton, Clarke and Company, and J. and A. Sorimgeour, and others of the highest financial influence in England, a strong market for the securities would seem to be assured.

The number of directors of the Sterling Trust Company, Limited, Montreal, has been increased from seven to eight.

BRITISH COLUMBIA

Resources of Comox District — Canada's Trade with Australasia—Shipping and Docks

(Staff correspondence.)

Vancouver, June 9th.

It is only after one has had the opportunity of personally inspecting a district that the resources of it are understood. British Columbians are prone to boast of the great resources of their province, but when these are seen at first hand it is little wonder enthusiasm becomes greater. After a personal visit to the Comox district, one realizes that this section of the province, though at present remote comparatively, possesses all those resources for which British Columbia is noted, namely, mining, lumbering, farming, hunting and fishing. Comox is seventy-five miles north of Nanaimo, and is reached now by steamer or by wagon road. Soon, however, railway transportation will be provided, for the Canadian Pacific Railway line to the north of Vancouver Island has been graded beyond Courtenay, and the Canadian Northern Railway rails are laid to Comox Lake. As a farming district, Comox has few superiors. The mountains are back from the sea a considerable distance, and the bench land and the valleys are very fertile.

Work in Progress.

Some of the finest agricultural scenes in the province are to be seen in the close vicinity of Courtenay and Comox. Eight sawmills operate in the district, and immense logging operations are carried on there by the Canadian Western Lumber Company. They employ 700 men, operate fifty miles of standard gauge railway and have a large output every month. Cumberland, also in this district, is the centre of the extensive coal mining operations of the Canadian Collieries. The miners there went out on strike last September, and though the dispute is still on it has ceased to have effect on the company. Normal output of 2,000 tons per month has again been reached. The hunting and fishing in Comox district is all that can be desired, both large and small game being found in abundance. Denman and Hornby Islands, which lie close to the entrance of Comox Bay, are also well adapted for agriculture, and many settlers are at present resident thereon

Australia-Canada Trade.

Since the Dominion government has offered to subsidize a drydock, one or two parties have been considering the construction of one on Burrard Inlet, but as yet nothing definite has developed. The fact has to be taken into consideration that only the business of this coast could be secured. Steamers that ply to the Orient would, whenever possible, have repairs made in Hongkong, where the work can be done much cheaper owing to Chinese labor being employed. It is thought that a commercial drydock here would be a profitable undertaking, but it should not have a less lifting capacity than 15,000 tons.

Mr. John Cooke, head of Messrs. J. Cooke and Company, the largest exporters of frozen meat from Australasia, who is on the coast this week, anticipates expansion in the frozen meat trade between Australia and this country. Dealing with the matter of the meat supplies of Great Britain, he said it was to be deplored that the situation was controlled by a foreign country. He stated that 64 per cent. of Britain's meat was last year imported from the Argentine, with 14 per cent. from Australia and 18 per cent. from New Zealand. Foreign operators, principally Americans, had already obtained a large part of the Argentine trade to England, and agents were similarly engaged in Australia, their object being to obtain complete control of the market.

Although several "Princess" boats are on the runs in local waters, the principal route being that to Seattle and Victoria, two more are to be constructed. These will be 5,000-ton boats, capable of carrying double the number of passengers that the boats now here carry. They are expected to be ready by 1915, in time to care for the Panama Pacific Exposition tourist traffic.

◆

TORONTO LIFE UNDERWRITERS MEET

A well-attended meeting of the Life Underwriters' Association of Toronto was held yesterday. Dr. Lowry, of the Imperial Life Insurance Company spoke on "A big writer of life insurance," and Mr. W. A. Pease, city manager of the same company, on "The peace that passeth underwriting." Mr. J. M. Langstaff, who is contributing a series of interesting articles to *The Monetary Times*, also addressed the meeting.

DOMINION STEEL REPORT

Conservative Policy Was Followed — Large Capital Expenditures Made

The conservative policy followed by the Dominion Steel Corporation last year was chiefly responsible for the fact that after the payment of dividends there was left the comparatively small surplus balance of $98,067. The earnings of the company for the twelve months ended March 13th, 1913, were equal to 4.31 per cent. on the common stock. The company put back into the property during the year as much money as it paid to the holders of common stock in dividends.

The combined earnings of the two chief constituent companies, exclusive of the dividend on 50,000 shares of stock of the corporation held by the Steel Company, after providing for depreciation, sinking funds, etc., and all interest, except on income bonds, amounted to $2,418,356.98. The interest on the income bonds held by the corporation, namely, $420,000, is the first charge on this amount, and forms the primary source from which the yearly dividend of that amount on the preference shares is derived. The increase in reserve funds and surplus during the year amounted to $1,272,199.96, and the dividends paid out on common stock were $1,277,101.00.

Prices Were Low.

In view of the conditions that prevailed during the past year, the directors regard the result as encouraging. The prices received for steel products were low; the costs and output were affected adversely by the pressure to complete the new plant, and, as before, a considerable part of the product had to be marketed in forms of finished steel, which, owing to the condition of the tariff, were unprofitable. In addition, while the expenditure of new capital on the company's properties has increased fixed charges, it has not yet produced the increased earning power which is expected.

The tariff remains unchanged, but otherwise these disadvantageous conditions have passed or are passing away. The acute depression in iron and steel prices, resulting from the conditions which prevailed in the United States, was severely felt by the company during the year notwithstanding the heavy demand for these products, but conditions in this respect have greatly improved and better prices are now being obtained. In the financial year upon which we have now entered your business will have the advantage of larger outputs, of ability to produce more profitable forms of finished steel by means of the new mills, of enhanced prices, and, it is hoped, of lower costs.

Production Was Increased.

The production figures again show a fair increase over the previous year:—

	Year ending 31 Mar., '13. Tons.	Year ending 31 Mar., '12. Tons.
Coal Company—		
Cape Breton collieries	4,640,940	4,063,395
Cumberland collieries	412,220	342,868
Total coal mined	5,053,160	4,406,263
Steel Company—		
Ore mined, Wabana	757,003	602,168
Pig iron	321,020	200,588
Steel ingots	343,251	335,553
Blooms and billets not further finished	49,132	43,950
Rails	174,802	153,498
Rods	53,323	70,633
Bars, wire, nails, etc.	10,778	......

Large Capital Expenditures.

During the year the capital expenditure of the companies exclusive of the final payment of $350,000 in respect of the Steel Company's purchase of Coal Company stock, amounted to $4,939,866.25, of which $2,456,026.27 was expended on the new collieries and other property and improvements connected with the coal business, and $2,483,839.98 on the Steel Company's plant, mines and quarries. Of these expenditures the earnings of the combined companies supplied over $1,000,000.

On the Coal Company's property, the re-opening of Victoria Mine (now No. 17) has been commenced, also of the mine on the Emery seam, known as No. 11, underlying No. 3 colliery, the latter being now nearly exhausted. These collieries will give an early addition to the output, and in the case of No. 11, will utilize in part the equipment of No. 3.

Nothing new has been undertaken in the steel department during the year, except in the way of additions to subsidiary plant and equipment, found necessary for the enlarged business. The two new blast furnaces, the large mixers, the bar and rod mill and the wire and nail mills are all at this date in successful operation.

Eight thousand shares of the common stock of the corporation were issued during the year in exchange for an equal number of shares of the common stock of the Dominion Iron and Steel Company, Limited, and were subsequently disposed of by the latter.

The additions to the steel plant have been more extensive and more costly than the early estimates, and with the enlargement of all branches of the business, much larger amounts are found to be absorbed in working capital. The directors have sold, at a satisfactory price, £200,000 of the 5 per cent. consolidated mortgage bonds of the Steel Company, and have under consideration the issue of a further moderate amount of securities to provide for these matters.

It is impossible with such properties to fix any limit to the growth of the plants, but, subject to unforeseen developments, it is proposed that for some time to come the energies of the staff shall be devoted to the development of the steel plant as now completed, and that no further extensions shall be undertaken until the existing plant has been brought to the highest efficiency. The equipment of the Coal Company must be not only maintained, but steadily increased to meet the growing requirements of its customers. A large part of this the directors expect to provide for out of reserves and surplus earnings.

◆

CALGARY'S PUBLIC UTILITIES

(Special Correspondence).

Calgary, June 10th.

Preparatory to striking the rate, based on the estimated expenditure for 1913, Calgary's city commissioners prepared a report on all the public utilities under their control. It showed:—

"During 1912 there were 47 miles of water mains laid, 324 hydrants set, and 3,116 new connections made to the mains. The expenditure on the aforesaid works charged to capital account was the sum of $558,846.52. The estimated revenue was $258,550.10, and the actual income amounted to $244,423.37.

"All bills chargeable to the waterworks system, up to December 31st, 1912, have been settled.

"The asphalt paving plant has been operated by the city since the month of July, 1912. Paving was constructed at an average cost of $2.10 per square yard; price quoted includes an allowance for debenture interests, sinking fund and plant depreciation.

"The capacity of this plant in 1912 was, approximately, 1,000 square yards per day, and the new unit now nearing completion will much more than double the capacity of the plant.

"The revenue derived from this utility was $87,558.02; the expenditure $103,247.38, $24,954.71 of the latter amount representing stock on hand, leaving a surplus of $9,265.53.

"The street railway has expanded beyond expectations. Starting operations in 1909 with two cars, half a mile of track and 16 employees, in December, 1912, the system had increased to 54 cars in operation, 60 miles of track, 246 regular men employed.

"During the past year it carried 14,627,370 passengers, earning a gross revenue of $603,975.38, with a total expenditure of $502,254.81.

"Its capitalization account stands at $1,615,000, of which has been expended $1,537,490, leaving a balance of $77,509.08 which is available for construction purposes.

"The electric light and power plant department, in the seventh year of municipal operation, continues to show gratifying financial results and satisfactory service.

"The normal peak load, namely, 7,000 horse-power, 5,000 horse-power of which is purchased from the Calgary Power Company, generating this energy by means of water-power obtained at Kananaskis Falls; the remaining 2,000 horse-power is produced by means of a battery of 16 boilers, six of which use as fuel, natural gas, and 10 coal, representing a total of 5,000 horse-power. There are 11 generators, whose prime movers consist of steam and electrical energy. The remainder of the city's power plant, representing 3,500 horse-power, is under stand-by to take over full capacity at short notice.

"The gross revenue received from the sale of electric light and power was $489,264.72, and the expenditure was $471,473.81, showing a net surplus of $17,790.91. The gross capital account amounts to $1,507,000, of which $1,454,017.40 has been expended, leaving a balance of $52,982.60. This makes a total gross plant account of $1,454,017.40."

The mill rate has not yet been officially announced, but it is expected that even though it has to provide for the unpaid bills of last year on sundry accounts, it will not exceed 16 mills.

◆

LONDON, ONTARIO, HANDS OVER BONDS

The block of $764,500 bonds of London, Ontario, which were advertised for sale, have been placed in the hands of Messrs. Wood, Gundy and Company for disposal.

UNITED STATES STEEL CANADIAN SUBSIDIARY

Dominion Charter Obtained — Ontario Steel Products Company Will Have Twenty Millions Capital

With the incorporation of the Ontario Steel Products Company, Limited, with a Dominion charter, the Canadian branch of the United States Steel Corporation begins to take shape. The capital of the subsidiary company will be $20,000,000, divided into 200,000 shares of $100 each. The company's headquarters in the Dominion will be at Ottawa, Ontario. The corporation has about 1,500 acres of land with one and a half miles of waterfront opposite Detroit, Michigan. It will probably erect a number of blast furnaces in addition to wire, rail, structural and bar mills, tin plate and tube works.

The charter of the Ontario Steel Products Company, Limited, is dated June 5th, 1913, and several Montreal lawyers are named as the provisional directors. The charter grants very wide powers. As this is one of the most important events in Canadian industrial history, *The Monetary Times* prints in full the twenty-six clauses contained in the company's charter:—

Will Manufacture Iron and Steel Products.

(a) To manufacture iron, steel, manganese and all other metals, and all or any articles consisting or partly consisting of iron, steel or other metals and all or any products thereof, and also coke and cement.

(b) To trade in steel products, and all other kinds of goods, wares and merchandise, and to buy, sell, and in every manner deal in and with such commodities, and other property of every class and description.

(c) To acquire, own, lease, occupy, use, develop, deal with and dispose of mines, mining lands, mining rights, coal lands and coal, ores, minerals, quarries, oil lands and wells, and easements and privileges; and to mine, quarry, extract or remove the minerals therefrom, and to smelt, concentrate, dress, in any and every manner, and by any and every process, to sell and dispose of, and generally to deal with all the products thereof; and to engage in mining and quarrying in all its branches.

(d) To acquire, own, lease, occupy, use, develop, deal with and dispose of, timber, timber limits and timber licenses; to cut and mill timber and to manufacture wood products.

(e) To erect and maintain all suitable furnaces, forges, mills, factories, engines, houses, structures and buildings.

(f) To construct, improve, operate, maintain, develop, manage, carry out, lease and control bridges, buildings, public and private works and improvements of every kind, machinery, ships, boats, engines, cars and other equipment, harbours, docks, slips, elevators, water works, gas works and electric works, viaducts, roads, ways, railway sidings, reservoirs, water powers, water courses, aqueducts, canals, and other water ways, and any means of transportation except railways, and to contribute to, subsidize, or otherwise assist or take part in the construction, improvement, maintenance, working, management, carrying out or control therof.

May Operate Tramway Systems.

(g) To own and operate, either by steam, electricity or other power, telepherage systems, tramways and railway sidings, and railway connections, on or over the lands of the company, and lands adjacent to the lands of the company, with the consent of the owner or holder thereof, for the purpose of receiving, handling and delivering material, merchandise and products of the company.

(h) To construct, operate, maintain or lease, telephone and telegraph lines for the use of the company only; to manufacture gas and electricity for the use of the company, and to sell any surplus thereof, subject to such local or municipal laws and regulations as may exist.

(i) To apply for, obtain, register, purchase, lease or otherwise acquire, to hold, use, own, operate and introduce, and to sell, assign or otherwise dispose of any trade marks, trade names, patents, inventions, improvements and processes used in connection with, or secured under letters patent of the Dominion of Canada, or elsewhere, or otherwise; and to use, exercise, develop, grant licenses in respect of, or otherwise to turn to account any such trade marks, patents, licenses, processes and the like, or any such property or rights.

(j) To engage in any other manufacturing, trading, mining, construction and transportation business, of any kind or character whatsoever, except that of railways, which may be calculated directly or indirectly to advance the company's interests.

(k) To acquire by purchase, subscription or otherwise, and to hold, use, deal with, sell, or otherwise dispose of, stocks, bonds, or any other obligations of any corporation having objects similar or in part similar to the objects of this corporation, or formed for, or engaged in, or pursuing any one or more of the kinds of business, purposes, objects or operations above indicated, or carrying on any business capable of being conducted so as to directly or indirectly benefit this company, or owning or holding any property of any kind herein mentioned or owning or holding the stocks, bonds or obligations of any such corporation, notwithstanding the provisions of section 44 of the said Act, and, while owner of any such stocks, bonds or obligations, to exercise all the rights, powers and privileges of ownership thereof, and to exercise any and all voting power thereon.

(l) To aid in any manner any corporation whose stock, bonds or other obligations are wholly or in any manner guaranteed by the company, and to do any other acts or things for the preservation, protection, improvement or enhancing of the value of any such stocks, bonds or other obligations, and to do any acts or things designed for such purposes.

Clause for Partnerships.

(m) To acquire and take over, as going concerns, the undertaking and good-will, assets and liabilities, of any person or company carrying on any business in whole or in part similar to that which the company is authorized to carry on, or possessed of property suitable for the purposes of this company, and with a view thereto to acquire all or any of the shares or liabilities of such companies.

(n) To sell, lease or otherwise dispose of the whole or any branch or part of the business, undertakings, property, liabilities, and franchises of the company to any other person or company, for such consideration as the company may think fit, and by such officers and upon such authority as the by-laws of the company may provide, and in particular for shares, debentures or securities of any company which this company is authorized to acquire.

(o) To enter into partnership or any arrangements for sharing profits, union of interests, co-operation, joint adventures, reciprocal concessions, or otherwise, with any person or company carrying on or engaged in or about to carry on or engage in any business or transaction which this company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as directly or indirectly to benefit this company; and to lend money to, guarantee the contracts, bonds, debentures and other obligations of, or otherwise assist any such person or company, and to take or otherwise acquire shares and securities of any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same.

Several General Clauses.

(p) To invest and deal with the moneys of the company not immediately required in such manner as from time to time may be determined.

(q) To distribute in specie, or otherwise, as may be resolved, any assets of the company among its members and particularly the shares, bonds, debentures, or other securities of any other company formed to take over the whole or any part of the assets or liabilities of this company.

(r) To sell, improve, manage, develop, exchange, lease, dispose of, turn to account, or otherwise deal with all or any part of the property and rights of the company.

(s) To enter into any arrangements with any governments, or authorities supreme, municipal, local or otherwise, that may seem conducive to the company's objects, or any of them, and to obtain, from any such government or authority, any rights, privileges and concessions, which the company may think it desirable to obtain, and to carry out, exercise and comply with any such arrangements, rights, privileges and concessions.

(t) To do all or any of the matters hereby authorized either alone or in conjunction with, or as factors, trustees or agents, for any other companies or persons, or by or through any factors, trustees or agents.

(u) To issue shares of the company in payment for property acquired by, or services rendered to the company, including, with the approval of the shareholders, services rendered by the promoters in connection with the incorporation and organization of the company.

May Register Company Abroad.

(v) To procure the company to be registered and recognized in any foreign country, and to designate persons therein according to the laws of such foreign country to represent the company, and to accept service for and on behalf of the company of any process or suit.

(w) To establish or aid in the establishment of institutions, funds and conveniences for the benefit of employees or ex-employees of the company or their dependants, and to grant pensions and allowances, to make payments towards insurance, and to subscribe money or incur obligation for

(Continued on Page 58).

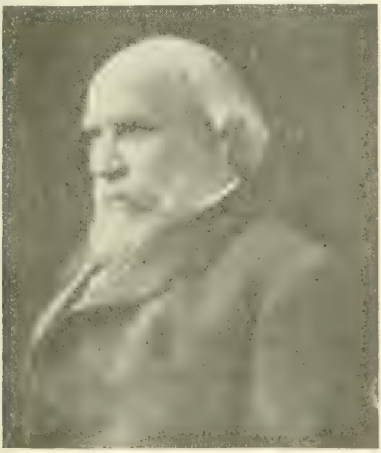
OVER-EXPANSION BY BORROWING

James J. Hill at Ottawa Sounds a Note of Warning—Government Extravagance

Extravagance in the conduct of government and the over-expansion of both public and private credit by borrowing, were cited by Mr. James J. Hill before the New York State Bankers' Convention at Ottawa, as the two great dangers of every country in this era. This applied especially, he said, to those countries whose settlement was more recent and whose needs were large. "It is to a great extent within the power of those who direct the financial interests of a nation to hold these tendencies in check," continued Mr. Hill. "I know that it is necessary in the United States. You know better than I what need, if any, there may be in Canada. But when one compares the appropriations of any legislative body, and the total debt of any public corporation to-day with the corresponding figures for thirty, twenty, or even ten years ago, he cannot fail to be impressed with the prudence of shortening sail. Just as the banks, by their control of credit and the directions in which it can be enlarged or curtailed, are powerful to help the farmer, so may they, when they deem it wise and necessary, slacken the speed of these modern high-power forces that cannot be allowed to speed up indefinitely without serious consequences.

Capital, a Cosmopolitan Force.

Mr. Hill reminded the bankers of Canada and the United States who heard him that one hundred years ago what was probably the last war ever to occur between English-speaking peoples, was drawing to a close. It was fitting, he said, that this century of peace should be celebrated in Ottawa, and under the auspices of the representatives of capital in both countries. "Capital is the most cosmopolitan force in the world. From the beginnings of human intercourse it has broken down more barriers, cemented more bonds, than all the armies and navies of the world. Capital to-day furnishes the sinews of war; for none can long be carried on anywhere, as a rule none would ever be begun, if the great bankers of the world should agree in refusing to finance it. Arbiters of peace and agents of material development everywhere, it is most appropriate that they should be heard here and to-day.



JAMES J. HILL

Who at Ottawa this week Cautioned Bankers of the United States and Canada Against Over Expansion of Credit By Borrowing

"When I decided, as a boy, to leave home," said Mr. Hill, "there was no Canadian North-West to go to. There was, in fact, no Canada, as the word is understood to-day. The provinces that existed were only just coming together in any real relation of interest and understanding; only just preparing themselves for the Confederation that was to pave the way to present strength and greatness. A century has written in the United States a record never before equalled. It has meant very much to our neighbors of the north. If Canada is now, in regard to population, about where the United States was in 1913, in all other respects she stands about where the United States did sixty years ago. The apparatus for her development is substantially complete, and the process is going forward at a startling pace.

"Most countries have been accustomed to value their relations with one another by the total money volume of the commerce between them; and, rightly or wrongly, they have laid special stress upon that difference between imports and exports which is known as 'the balance of trade.' Without asserting any theory as to its value as an indicator of prosperity, or the contrary, both of which views have ardent champions, both sides will agree upon the fact that it is an important measure of commercial intercourse. In spite of all obstructions, the commercial relations between Canada and the United States have grown to proportions that astonish even those familiar with the official figures. According to the report of the United States consul in this city, the foreign trade of Canada reached a total of over a billion dollars for the calendar year 1912. The increase over 1911 was 23.5 per cent. Of the total, 56 per cent. was business done with the United States. For that same calendar year the balance of trade for the whole United States was $581,000,000; and of this $255,000,000 was due to our commerce with Canada. It supplied 44 per cent. of the balance rolled up by our commerce with the whole world.

"It is usual to speak and think of Europe as the best customer of the United States; and, in so far as this refers to the United Kingdom, it is true. But the Dominion of Canada is far and away the second-best customer we have. The statistics have been brought down to cover the first ten months for the current fiscal year, which began on the first day of last July. During that time our exports to the United Kingdom were $524,000,000; to Germany, $291,000,000; to France, $131,000,000; to Canada, $338,000,000; and to all Europe combined, $1,294,000,000. No other country except Great Britain and Germany even approaches Canada as a buyer in the markets of the United States. Her purchases were a seventh greater than those of Germany. They were 26 per cent. of those made up by the whole of Europe combined. Nor is this trade a one-sided affair. It looks impressive when considered as a whole. Of the total exports from Canada in 1912, the United States bought over 38 per cent. Almost all the mineral exports of Canada go to the latter country, most of its forest products and manufactures, and a third of the yield of its fisheries. This commerce in both directions is destined to grow even more rapidly in the next few years, owing to impending changes in the tariff regulations of the United States, than it has at any time during the last forty to fifty years. This business has been done not by reason of any sentiment whatever about it on the part of either country, or of any artificial favoring conditions, but simply because it is more profitable for both to deal with each other than for either to deal anywhere else in a large percentage of its commercial transactions. And nothing can reverse or annul that condition, which nature herself has established.

Immense and Valuable Connection.

"For years the people of the United States have entertained the notion that the South American trade was one of their most valuable assets. It has been played up to and fostered in many ways. One of the chief arguments in favor of spending several hundred million dollars on a canal across the Isthmus of Panama was its assumed value as a promoter of our commerce with the republics to the south of us. Well, for these same ten months of the last fiscal year, bringing us down to within six weeks of the present time the sales of the United States to Canada were, as stated, $338,000,000. The sales to the whole of South America amounted to $122,000,000, or a little more than one-third as much. Throw in Cuba and Mexico, and the total is $227,600,000, which is just about two-thirds of Canada's total. Swing the net still wider, and taken in both American continents, from the Arctic circle on the north to Cape Horn on the south, add Cuba and all the West Indies by whomsoever controlled, that nothing between the two oceans may escape. We did, in these ten months, a total export business of $630,000,000 with this western hemisphere; and of the whole, Canada furnished 54 per cent. It seems to me that a connection so immense and so valuable to both parties is the central and controlling fact of every occasion like the present when business men from both sides of the line get together to take stock of their present and their future.

Banking and Agriculture.

"On two main lines the bankers of the two countries may well take counsel and learn from each other. The next task of the United States is to provide a safe and adequate currency for the country. For Canada that problem has been solved in what appears to be a practical way. By your system banking facilities can be furnished, through branch offices, as they have been to all the communities of commercial importance. The latest message which the bankers of the United States, by common consent and a resolution for common action, have to bring in their firmly realized conception of the importance of agriculture and its wise promotion to all interests in the community.

"The bankers' associations of several of our states began to realize some time ago the importance to them of a sound and profitable agriculture. The Association of American

MILLION DOLLAR ENGLISH PLANT FOR MONTREAL

Armstrong Whitworth Company Has Purchased Site on South Shore of St. Lawrence

The big industrial corporations of Great Britain and the
Jnited States are realizing the significance of the rapidly-
growing markets of Canada. The United States Steel Corpor-
ation is establishing a large branch plant in Ontario and the
Sir W. G. Armstrong Whitworth Co., Ltd., of England, will
ake a similar step, although their establishment will be in
Quebec province. The company have acquired a site on the
outh shore of the St. Lawrence River, within Montreal har-
oor, and a plant will be erected there at an estimated cost
f $1,000,000. This will be extended as often as needs jus-
ify. The Canadian branch of this famous company will be
sed solely for commercial or civil or mechanical engineer-
ng, and not for naval or military work. At no time will the
ompany make guns, boats, or anything of that nature here.
This is, at any rate, in keeping with the spirit of the cele-
ration of one hundred years of peace in North America.

They will manufacture twist drills, punches, milling cut-
ers, cranes, drop forgings, tool steel, etc.

Event in Industrial History.

The decision of this large English corporation to
rect a branch plant in Canada is a great event in Cana-
a's industrial history. It indicates the confidence of keen
nd observant business men and capitalists in Canada's fu-
ure and that confidence is welcome and gratifying to Cana-
ans.

M. J. BUTLER,

argely through Mr. Butler's efforts and those of Sir Percy Girouard, the Armstrong Whitworth Company, of England, will establish a million dollar plant at Montreal.

British capital will finance the entire enterprise and no
sue will be made in Canada. The share and debenture
pital of the company is as follows:

	Authorized.	Issued.
rdinary Shares of £1 each	£4,012,500	£4,012,500
our per cent. cumulative preference shares of £5 each	1,000,000	1,000,000
ive per cent. non-cumulative second preference shares of £1 each	2,000,000	—
our per cent. mortgage debenture stock	2,500,000	2,500,000

sue in London Market.

Applications have just been invited in the London mar-
et at par for £1,000,000 five per cent. non-cumulative second
eference shares of £1 each of the company. The issue is
ade "to provide further capital for the expansion of the
mpany's business." The certified profits for the past three
ars, after providing for depreciation, interest on the de-
enture stock and the dividend on the four per cent. prefer-
e shares, have been as follows For the year ended De-
mber 31st, 1910, £487,864 18s.: for the year ended Decem-
er 31st, 1911, £467,826 3s. 7d.; for the year ended December
t, 1912, £635,526 11s. 6d. Dividends have been paid on
e ordinary shares for the past five years as follows: 1908 to 1910, 10 per cent.; 1911 and 1912, 12½ per cent. In the year 1912, after providing for the interest on the debenture stock, the dividend on the four per cent. preference shares and the above-mentioned dividend for 1912 of 12½ per cent., there was carried forward to the credit of profit and loss account the sum of £335,849 10s. The company's works at Newcastle, Manchester and elsewhere are fully occupied, and orders are in hand which the directors consider sufficient to justify them in estimating that the rate of profit above indicated will be maintained.

How the Plant was Obtained.

Largely through the efforts of Mr. M. J. Butler, of Montreal, was the company induced to locate a plant in the Dominion. He was successful in interesting their board of directors, however, only through the kindly co-operation of Sir Percy Girouard, a Canadian, and a director of the Sir W. G. Armstrong Whitworth and Company, Limited. To these two gentlemen, therefore, is chiefly due the establishment in Canada of such an important industry. Mr. Butler is well known as the former general manager of the Dominion Steel Corporation. Prior to that, he was chairman of the board of management of the Canadian Government railways, and previously deputy minister and chief engineer of the department of railways and canals. He is a member of several engineering societies, and has been engaged in some notable engineering projects in various parts of the Dominion. A contemporary recently described him as a man possessing "keen business instincts, systematic methods of work and all the firmness of the disciplinarian,"

Sir Percy Girouard was born in Montreal and gained his railway experience while on the engineering staff of the Canadian Pacific Railway. He acted as director of the Soudan Railways from 1896 to 1898. He was also president of the Egyptian Railway Board and later director of the railways of South Africa. As a military man he has served with honor in many engagements. Lord Kitchener described him as an officer of brilliant ability, and Lord Desborough has stated that he is a great civil servant who has succeeded in every position he has undertaken.

Directors of the Company.

The following are the directors of the company: Sir Andrew Noble, Bart., K.C.B., F.R.S., chairman; the Right Hon. Lord Rendel, vice-chairman; Herbert Hanbury Smith Carington; John Meade Falkner; Col. Sir Edouard Percy Cranwill Girouard, K.C.M.G.; Henry Neville Gladstone; the Right Hon. Sir George Herbert Murray, G.C.B.; John Henry Brunel Noble; Saxton William Armstrong Noble; Rear-Adm. Sir Charles Langdale Ottley, K.C.M.G.; and Henry Whitehead, M.V.O.

REGINA IS WATCHING POWER EXPERIMENTS

(Special Correspondence).

Regina, June 10th.

Regina's civic officials are desirous of solving the cheap power problem, and are following closely the experiments being made by Professor Darling for the provincial government. The board of trade recently had Professor Darling deliver an address when he very ably outlined his views. As the lignite coal fields from which it is proposed to develop power are about 150 miles from Regina, he proposes that the coal be carbonized, then shipped to Regina, and used as fuel for the generating of power. To generate the power at the mines and transmit it to the city would be an expensive proposition, he claims, unless numerous towns along the line, required power which is not the case at the present time. The cost of transmission such a distance would be very considerable. Mr. Darling has erected an experimental station at the coal fields, and the Regina board of trade intends to keep closely in touch with the results obtained, as the city is ever anxious to secure lower power rates for manufacturers, etc.

Mr. A. S. Porter, a well-known Regina citizen, who owns considerable coal lands, is organizing a $1,000,000 company for the purpose of developing power from the coal deposits on his land. He has set aside 15,500 acres of land to be mined for this purpose. A line of the Canadian Pacific Railway runs right through the property owned by Mr. Porter, and this he considers would make it an easy matter of getting the by-products such as briquettes, etc., to the cities and towns where they could be marketed.

The Dominion government sheep commissioner, F. R. Arkell, has been in Regina for several days past. While here he stated: "The removal of the tariff on wool into the United States which will probably take place this summer will mean that the Canadian farmer will find a market there as well as in Great Britain and Canada." Since last year he claims there has been an increase of 100,000 in the number of sheep raised in Western Canada.

INDIVIDUAL EFFICIENCY AND NEW CAPITAL

Two Essentials to a Progressive People—Address of Washington's Director of Mint

"There are two essentials to a progressive people. There must be constant gains in the individual efficiency of the population and there must be a constant accumulation of new capital to finance the new ideas and supply the new equipment that progress requires. It used to be said out west that a farmer wanted to buy more land to grow more corn to feed more hogs to buy more land, and so on ad infinitum. And so gains in efficiency and gains upon capital will act and react upon each other indefinitely and for the common good, and if the bankers have a better comprehension of these common interests than any other class, it is for them to lead in the work of education."

This was the keynote of an unusually interesting address by Mr. George E. Roberts, director of the Mint, Washington, to the New York State bankers at Ottawa, this week.

All Interests are Interwoven.

"The bankers," he continued, "know, because the facts are daily under their eyes, that the interests of all classes are so interwoven that there is, and can be, no such thing as a 'class struggle' in the sense in which that term is used. There are conflicting interests, but they are within classes as much as between classes. In the nature of things, capital competes with capital rather than with labor. New capital is always waging a war of extermination upon old capital, and outside of land values nearly all of the capital that existed in the United States fifty years ago has been thrown on the scrap heap since.

GEORGE E. ROBERTS,
Director of the Mint, Washington.

"Take a look over the so-called struggle between capital and labor for a moment. In all progressive countries the supply of capital increases faster than the population. The population of the United States in 1880 was 50,000,000; in 1910 it was 90,000,000, or doubling in about 35 years. The wealth of the United States doubled between 1880 and 1900, twenty years.

"Now what does it signify that capital increases faster than population? Simply this; there is no way by which capital can be put into use except by employing labor. Every dollar of new capital accumulated creates a new demand for labor, and if the two are increasing at the rate of 35 to 20 how will the equation work out?

Capital and Labor.

"Capital and labor must be used together, and with the supply of capital increasing faster than the supply of labor it is inevitable that labor shall steadily gain a stronger position. Every little while we have the suggestion, and from wise men too, that before things are settled labor will have to be 'liquidated.' I remember of reading it after the panic of 1907, and every year since. I read it in January last, and then in another column of the same paper I read that the largest employer of labor in the world would on February 1st give the largest advance to unskilled labor ever granted by a single employer at one time. And I do not doubt that the United States Steel Corporation granted that advance for the very practical reason that its works were full of orders and it wanted men.

"Labor will never be 'liquidated' as long as capital grows faster than population. But if capital accumulations fall off; if our earnings fall off or our savings fall off; if we become inefficient in production or wasteful in expenditure—then there will be danger that everybody will be 'liquidated.'

"There is still another phase of this subject. It is said that capital substitutes machinery for labor. So it does, but what becomes of the products of machinery? Does it come home to you that practically all of the vast expenditures we see going on about us for construction and equipment, are for the purpose of serving in some manner the masses of the people—of supplying something they want and can afford to buy? It wouldn't take many railways or factories to supply the wants of the rich? It is the wants of the millions that keep the wheels of business moving. And with capital increasing faster than population, and with this enormous increase in equipment, together with the improvements in methods and machinery, we have a constantly increasing supply of commodities per head of population, and the only way these commodities can possibly be distributed is by such a continual readjustment of wages and prices as will enable the masses of the people to buy them. There would be congestion in every line of production, and enterprise and industry would choke down if the purchasing power of the masses did not constantly increase."

Finance and War.

Speaking of the relations of finance and war, Mr. Roberts recalled the occasion when two years ago, a German warship steamed into a port of Morocco, with a remotely implied threat of war with France, with the result that so much French money was withdrawn from Germany that the Imperial Bank was obliged to expand its loans by $200,000,000 within 30 days, and meantime the Berlin Stock Exchange was in panic and German industries and securities lost hundreds of millions more. "No nation liveth to itself alone in the twentieth century," said Mr. Roberts. "The wealth of the world is now a common fund. There is a reservoir in London, another in New York, another in Montreal, and others elsewhere, but they are all connected. You cannot draw down the supply of capital in one without affecting the supply in all. You cannot burn up, confiscate, or destroy capital anywhere that the whole civilized world does not suffer loss. There is not a remote district in Canada to-day where money is not tight and enterprise in check because of the war in the Balkan States."

◆

INSURANCE COMPANIES IN THE WEST

The Mount Royal Assurance Company, of Montreal, has been registered in Alberta.

The Canada Hail Insurance Company, of Winnipeg, has been authorized to carry on the business of hail insurance in the Province of Alberta.

The Canada Hail Insurance Company and the Excess Insurance Company, Limited, have been registered in Saskatchewan.

◆

CROWN RESERVE FINANCING

Monetary Times Office,
Montreal, June 11th.

At a meeting of the Crown Reserve Mining Company, held in Montreal this week, it was announced that the shares of the Porcupine Crown Mines, Limited—which is the name of the company owning the new McEnaney property—will be offered to shareholders of Crown Reserve Mining Company at 80 per cent. of par (80 cents a share) in the ratio of one share of Porcupine Crown Mines to each four shares of Crown Reserve. The number of shares available for Crown Reserve shareholders is 440,000 of $1 shares. In addition to this, employees will have the right to subscribe to 26,664 shares, also at 80 cents per share. The balance of the $2,000,000 capital of the new company remains with the Crown Reserve Company itself and with the vendor of the McEnaney, the Crown Reserve Company having 1,200,000 shares and the vendor 333,333.

No estimate is placed on the value of the rights. If one were to assume that the new stock is worth par, it is easy to see that this would mean five cents per share of Crown Reserve stock.

In addition to the shares given to the vendor of the McEnaney property, the sum of $[illegible]00,000 has been granted him. Out of this he will, however, refund one sixth of the initial capital expenditures, which refund amounts to $66,000.

TRUST AND LOAN COMPANY OF CANADA

Increased Net Profits — Dominion's Strength Being Shown in Tight Money Period

The balance sheet of the Trust and Loan Company of Canada, as presented at the company's recent annual meeting in London, indicated that investments in Canada stood at £3,534,000, showing an increase of £373,000 over those of a year ago. They were now feeling the benefit of the creation of new debenture stock, of which £667,000 had been issued in the course of the year, stated Hon. Sidney Peel, the company's president. Their debenture issue—as distinct from their debenture stock—stood at £2,217,000, against £2,400,000 a year ago. The decrease was owing to the replacement of short-term by longer-term obligations. Their share capital remained the same. Their net profits for the half-year were £61,869, against £50,735 for the corresponding half-year. These figures constituted a record; they were the best in the history of the company. Working expenses had decreased from £14,086 to £13,747 for the half-year. He did not believe that any mortgage company working in Canada could show results surpassing theirs in excellence, but he did not rely only on the figures of their balance sheet for taking an optimistic view of the company's position.

Last autumn he paid a visit to Canada, and spent some time in visiting all the centres in which their loans were made, in going through the books of the company in their various offices, and in forming an opinion by personal inspection as to how their business was being carried on in Canada. He found everything in a most excellent condition, and they had able and energetic men working with devotion in the interests of the company.

None in Doubt as to Distant Future.

Whatever might happen in the future—and, of course, those who managed mortgage companies could not always be right in their judgment—he saw at present no reason to doubt the security of any of their investments. Canada, as he had said, was passing through a period of very tight money, but, as far as he could see, the country seemed to be coming through the ordeal with remarkable strength. It was the fashion in some places in London to talk apprehensively about the immediate future of Canada, though few, he thought, were in doubt as to the more distant future.

With the results of their own company before them he found it impossible to share those apprehensions. He returned from his visit to the country convinced that, as far as Canada herself was concerned, it was impossible to foresee the limits of her future. Great as her progress had been, he was convinced that it was only just beginning. In the end the level of prosperity in a country must be decided by the productivity of her soil.

Values based on sentiment or temporary conditions were bound to have great fluctuations from time to time, and, no doubt, there would be fluctuations in the values of town properties in Canada; but when they had those vast areas of fertile soil, producing annually immense crops of the necessities of life, it was impossible to doubt the stability of the country.

Would Pay Expenditure Over and Over.

Some people were alarmed at the amount of Canadian borrowing that was going on, but when one considered the number of people who were pouring into the country, for all of whom accommodation had to be found and the organization of government provided, he did not think that the Canadian authorities could be accused of extravagance. All this expenditure would be repaid many times over by the expansion and development of the resources of the country. Of course, Canada depended for its continued expansion on the supply of credit and the supply of men, and it was easy to see that causes entirely outside the country might affect the supplies of both; but whatever might be the causes external to Canada which might occasion a halt or even a setback in her progress, he was convinced that her internal resources were so great that no investor need fear for the result—always provided, of course, that he acted with ordinary caution.

The officers of the company in Canada are: Commissioners, Capt. R. D. Macdonnel, Winnipeg, who is resident director; Col. J. Edye, Montreal; Mr. J. Campbell, Regina; assistant commissioners, Messrs. E. R. Whitehead, Winnipeg, and R. C. Young, Montreal. All Canadian transfers of the company pass through the head office at Montreal.

◆

The capital stock of the Toronto Insurance and Vessel Agency, Limited has been reduced from $500,000 to $50,000, such reduction being effected by the cancellation of 3,000 shares of authorized and unissued capital stock of $100 each and [illegible] shares of the authorized and issued capital stock of $100 each, recorded in the name of the Winnipeg Insurance and Vessel Agency, Limited.

FIRE INSURANCE CONDITIONS

World-wide Survey—European, American and Asiatic Losses—Notes on Legislation

World conditions relative to fire insurance, as reviewed in the Post Magazine Almanac, show that in Great Britain, there were indications that the year would prove more favorable than 1911. As regards trade there has been unexampled prosperity in almost every direction, in spite of much unrest in the labor world. To this must be added a very general rise in prices and values so that the amount of insurance premiums should show a large increase. This would certainly be the case if it were not for the steadily progressive fall in rates.

In Great Britain there were no losses of conflagration magnitude, though the number of fires was heavy. Perhaps the largest was that which occurred in a big grain warehouse at Ranks' Corn Mill, Barry Dock, where damage to the extent of £95,000 was sustained. Corn mills and granaries were anything but fortunate. Maltings were also conspicuously bad. Among the textile classes, cotton mills stood to the fore on account of the number and extent of fires.

Losses on woolen mills were above the average. Several serious fires also took place in joiners and builders risks. There were losses in textile goods warehouses at Manchester and Leeds, as also in mercantile warehouses at Tilbury Docks, and cotton warehouses in Bootle and Liverpool. Of risks of the industrial type, bleachers and printers, dyers and finishers fared very badly. Some improvement showed itself in regard to country mansions, although the loss ratio still remained excessively high.

Of new schemes of municipal insurance, the only one of any importance which came into force during 1912 was that adopted by the Glasgow corporation.

Canada and the United States.

While business in the United States was not, perhaps, quite so much unsettled as generally happens during a presidental election campaign, it was inevitable that there should be some disturbance of the commercial activity. There was a downward tendency in rates and an upward tendency in commissions, and there were two serious rate wars.

Among notable fires there was the destruction of the New York building of the Equitable Life Assurance Society of the United States, which entailed no loss on the insurance companies. There were also two conflagrations at Houston, Texas.

Prospects of a good insurance year in Canada were most promising, the wheat crop being said to be the largest ever raised. Losses were fairly numerous and several large fires have to be recorded. The worst was that at Vancouver, B. C., in wholesale warehouses, etc., the damage approaching $1,750,000. About 200 buildings, involving a loss estimated at $1,200,000, went down in a conflagration at Chicoutimi, Que.

Far Distant Countries.

In Japan, owing to competition among the foreign and native companies for textile and other industrial business, the tariff had to be suspended for these classes of risk. There was a conflagration at Osaka, where about 5,000 houses were destroyed.

In India the extensive outbreak at the Colaba Cotton Green, Bombay, involved a loss little short of £100,000.

Russia was conspicuous for large fires.

A joint committee of insurance companies and representatives of the public sat in France with the object of revising the policy conditions.

The struggle between the insurance companies and the various legislatures of the United States became more and more acute, but legislative repression was not quite so aggressive in other countries.

◆

Arrangements have been arrived at between the city and the Bank of Montreal for financing Saskatoon's current expenditure to the extent of one million dollars.

A movement is afoot among the business men of Saskatoon to establish a citizens' demonstration farm. The plan is to secure a parcel of land, place it under competent management, and demonstrate by actual example the value of mixed farming, whereby an all-the-year-round revenue is obtainable. As $8,000,000 worth of pork, $6,000,000 worth of hams, bacon, etc., $10,000,000 worth of lard—totalling $24,000,000 as the product of the hog industry—are imported annually from the United States, the farmers of the district surrounding the city of North Battleford are turning their attention to hog raising and are realizing that there is actually more money in raising hogs than in wheat growing. The country surrounding North Battleford, to the north especially, is suitable for stock raising, being well watered, and has good shelter for the cattle, which winter out.

WHERE CANADA BUYS COTTON GOODS

Total Imports—Relative Positions of United Kingdom and United States—Canadian Manufacturers

The United States bureau of foreign and domestic commerce, department of commerce, in a report on the cotton goods trade and industry of Canada just completed, shows that the United States is second only to Great Britain in supplying cotton goods to Canada. The import of manufactures of cotton comes almost entirely from England and the United States; the former usually supplying about two-thirds and the latter about one-fourth of the total. Switzerland ships embroidery and lace; Germany, hosiery and embroidered lace, and France some lace, embroidery, velveteens, and women's clothing, but ouside of these specialties the market for foreign cottons is dominated entirely by England and the United States.

Quadrupled in Fifteen Years.

The following table of the imports of cotton into Canada in 1900, 1905, 1910 and 1912 gives a good idea of the amounts supplied by the various nations:—

Countries.	1900.	1905.	1910.	1912.
United Kingdom	$4,649,690	$6,004,492	$13,114,594	$14,373,664
United States ..	1,694,379	2,062,062	3,462,335	5,974,016
Switzerland ...	227,899	341,889	982,468	1,097,991
Germany	184,074	224,810	577,975	717,843
France	80,572	100,712	270,769	432,116
All other	38,668	58,888	183,158	162,003
Total	$6,875,282	$8,792,853	$18,591,299	$22,757,633

Canadian imports of cotton goods have more than trebled in the last twelve years, and they have about quadrupled in the last fifteen years. During the period from 1900 to 1912 the total imports of cottons increased 231 per cent., while English cottons increased by 209.13 per cent., American by 252.58 per cent., and those from other countries by 353.67 per cent.

The latter figure, however, is larger than it should actually be, as embroidery and lace were formerly stated separately from the cotton schedule, but now white and cream colored cotton embroideries are included under that schedule.

Of the total imports of cottons in 1900, England is listed as supplying 67.49 per cent., the United States 23.18 per cent., and all other countries 9.33 per cent. Of the total imports of cotton in 1912, England supplied 63.16 per cent., the United States 26.26 per cent., and all other countries 10.58 per cent. Allowing for the usual fluctuations from year to year, England and the United States seem to be maintaining their relative positions in the increasing trade.

Canadian Mills Not Keeping Pace.

In the manufacturing of cotton goods, the Canadian mills are not keeping pace with the demands of their home market, but they are enlarging, and if a line is imported in considerable quantities they soon get out an imitation. However, on some lines of American goods, such as ducklings fleece, printed scrims, Stiefels, and blue drills, in spite of many attempts, they have not been able to make an article that will meet the demands of the consumers. The preference duty tends to keep out American piece goods to a large extent, but the importers say that in some cases they could still afford to buy American goods if they were made to suit the market.

CANADIAN MATTERS IN LONDON

British Trade with Canada — Manufacturers Should Visit the Dominion

The first annual general meeting of the Canadian Chamber of Commerce was held in London recently at the Royal Colonial Institute. The Hon. J. H. Turner, agent-general for British Columbia, presided.

The annual report stated that a resolution had been passed, in view of the enormous importance of the Panama Canal to Anglo-Canadian trade and commerce, urging His Majesty's Government to insist on the fulfilment of the Hay-Pauncefote Treaty.

Trade With Canada.

It was further stated that the principal Canadian cities were giving early notification of expenditure on public works, etc., so as to enable British manufacturers to compete. In the principal cities of this country proposals were being considered for the establishment in Canada of a permanent exhibition of British manufacturers. Practically every important town in Canada had sent the Chamber particulars of its industrial opportunities, and they had further stated the inducements which they were prepared to offer to British manufacturers likely to be interested.

The chairman, in presenting the report, reminded those present that the last Canadian Budget showed a surplus for the year ended March 31st, 1913, of $55,000,000. The revenue was $165,528,137, and the expenditure $124,383,469. In ten years the revenue of Canada had doubled.

Opportunities for British Merchants.

The trade figures for the year under review showed startling increases. The total exports amounted to $393,000,000, and the imports to $691,000,000. In the last six years the trade with the United Kingdom had steadily increased until the imports from Great Britain now amounted to $140,000,000, and the exports to Great Britain to $177,000,000. The United Kingdom was again the Dominion's best customer. There were splendid opportunities for British manufacturers and merchants to very largely extend their business in the Dominion. Dealing with the first year's work of the Chamber, Mr. Turner stated that all members selling Canadian real estate in this country had pledged themselves to conform to reasonable regulations as to the issue of maps or plans. Thus a standard had been set for the conduct of Canadian real estate business in this country, which was being followed largely by other persons engaged in this business.

As to the United States Tariff.

The Chamber was in various ways arousing the interest of the British manufacturer in the great and increasing import trade of Canada. A letter had been sent to the Chambers of Commerce, manufacturers' associations, and leading manufacturers in the United Kingdom urging upon them the desirability of British capitalists and manufacturers investigating for themselves industrial and commercial conditions obtaining in the Dominion, more especially with a view to the establishment there of branch factories by English firms. The Chamber was closely watching the question of the Panama Canal, and also the proposed new tariff in the United States, and any action which it was found necessary to take in the interests of Anglo-Canadian trade would be taken by the council. The report was unanimously adopted.

◆

NEW RECORD FOR GREAT LAKES

A contract has been awarded by Montreal interests to the Western Drydock and Shipbuilding Company at Port Arthur for constructing the largest freight-carrying vessel ever built on the Great Lakes. It will have a capacity of 450,000 bushels of grain. Its length will be 625 feet; width, 59 feet; depth, 32 feet, with bulk-freight pattern, engines of latest type and of sufficient power to lead in speed, and Isherwood construction system, with five bulkheads, thus dividing the ship into six compartments. Work will commence this month and the vessel is to be ready for the 1914 season, operating between Port Arthur, Fort William and Collingwood, Ontario.

◆

First steps have been taken in the instigation of a project which has for its object the dredging of the Cowichan River sufficiently to allow the movement of deep-sea vessels from tidewater to the city of Duncan. This would add another important shipping point to those surrounding Victoria within a radius of thirty miles.

TORONTO'S MAY FIRE LOSS

Toronto's fire loss figures for the first five months of the year are:—Damage—January, $42,828; February, $81,806; March, $8,810; April, $25,407; May, $25,855. Alarms—January, 154; February, 217; March, 126; April, 96; May, 225. False alarms—January, 26; February, 18; March, 9; April, 8; May, 21.

Of the 225 calls during May, 113 were for fires where there was no damage at all. The largest loss was where a number of buildings were damaged to the extent of over $5,000. The smallest fire was for $2, caused by fireworks lighting on the roof of a house on May 24th. There was also another bad fire where 15 horses were burned in a stable, and a boathouse burned where the damage was over $3,000.

The estimated damage was $25,853; number of alarms, 225; false alarms, 21. The list of causes were:—Unknown causes, 45; boys and matches, 21; rubbish, 21; chimneys, 17; fireworks, 6; grass, 5; incendiary, 4.

The third annual meeting of the International Association of Casualty and Surety Underwriters will be held from July 8 to 11 at the Chateau Frontenac, Quebec.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Cochrane, Ont.—June 1—Mr. Percy Foley's residence. Loss and cause unknown.

Brussels, Ont.—June 6—Mr. A. Baekar's poultry houses. Loss and cause unknown.

Mulgrave, N.S.—June 5—Messrs. A. and R. Loggie's ish plant. Loss and cause unknown.

Almonte, Ont.—June 2—Mr. A. Camelon's barns and outbuildings. Loss and cause unknown.

Burnaby, B.C.—June 3—Mr. W. Besley's residence, 14th Avenue. Loss $2,000. Cause unknown.

Ottawa, Ont.—June 3—Mr. J. Fitzgerald's residence, Ottawa West. Loss $800. Cause, sparks.

Belleville, Ont.—June 8—Mr. W. Kellar's residence, Wharf Street. Loss and cause unknown. Insured.

North Transcona, Man.—June 5—Dominion Tar and Chemical Company's premises. Loss $160,000.

Saskatoon, Sask.—June 5—Mr. R. T. Dennison's automobile. Loss $1,800. Cause, engine backfiring.

Cambray, Ont.—June 11—Frame residence of Mrs. Mcntyre and adjoining residence of Mr. W. G. Webster.

Point Grey, B.C.—June 4—Mrs. Fraser's residence, West Boulevard, Kerrisdale. Loss $1,700. Cause unknown.

Welland, Ont.—June 11—County buildings. Loss, $50,000. Insurance on building and contents, $40,000. Cause, efective wiring.

Prince Albert, Sask.—June 11—Big River Lumber Mill, ogether with 30 million feet of lumber, 10 miles north of own, destroyed. Loss, $500,000.

Regina, Sask.—June 11—New grand stand, old stands, main building and district building at exhibition grounds. Loss, $100,000. Cause, gasoline explosion beneath grand tand.

Montreal, Que.—June 5—44 and 46 St. Antoine Street. Loss and cause unknown; Messrs. McArthur, Irwin and Company, 159-161 Commissioner Street. Loss, $10,000. Cause nknown.

Sydney, N.S.—June 11—Twenty buildings, including Roman Catholic Church of the Holy Redeemer, Holy Reeemer Convent and Glebe House, destroyed. Loss to church roperty, $80,000. Total loss, $125,000. Fire started in roof f church. Supposed cause, defective wiring.

Winnipeg, Man.—June 2—259 Dorothy Street. Loss $600. nsured with London and Ontario companies for $2,500. ause, probably coal oil became ignited.

June 4—Henderson Block, Garry Street. Losses, Henderon Company, $7,000; Noble Company, $25,000. Cause, unnown. Railroad ties left with Dominion Tar and Chemical ompany, Transcona. Loss, $100,000. Plant of Dominion ar and Chemical Company slightly damaged. Cause, spark om locomotive.

New Westminster, B.C.—May 28—Mr. Andrews residence, 506 5th Avenue. No damage. Cause, defective chimey.

May 29—Mr. J. G. McKoe's garage, 13 5th Avenue. Loss 500, fully insured. Cause unknown.

Vancouver, B.C.—June 1—Mr. I. Vince's residence. Loss 500. Cause, probably defective flue.

June 4—253 and 259 Hastings Street East, owned by aritime Trust Company, and Mr. J. Kinneg. Loss $11,000. he approximate loss of each of the establishments is as fol ws: Empress Hat Factory, $200; Vancouver Cafe (James aloulis), $1,000; Mrs. Ringdal, $800; entire building, $3,- o; English Secondhand Store, building and contents, $5,- o; Mrs. Gravell, $700. The roof of the cabin in the rear the Empress factory was destroyed. Cause unknown.

Toronto, Ont.—June 5—Slaughter house at 152 Christie reet, owned by Mr. J. H. Kenyon. Loss to building, $100; ntents, $20.

June 6—Stable, 14 Paisley Street. Loss, $300. Cause unnown. One death. 104-6-8 Teraulay Street. Loss $2,000. o insurance. Contents owned by A. Robstein. Loss $2,000. surance $800. Ross and Wright adjusters for assured, Torto. Contents owned by S. Goddard. Loss $300. Insurce, $300, York. 35 Lombard Street, Mr. J. Coulter, owner. oss $200. Insured. Canadian Linotype Company. Loss 3,000. Insured. Ross and Wright, adjusters for the asred, Toronto.

June 7—John O'Connor, 194 Leslie Street, loss, buildg, $300; household furniture, $200. Insured in Anglo-Amican for $250 building; $150 household furniture. Ross and right, adjusters for the insured, Toronto.

June 8—Mrs. Sarah King, 74 Eastmount Avenue. Loss building, $1,200; household furniture, $500. Ross and right, adjusters for the insured, Toronto. 159 Fern Avenue. oss on household furniture, $20. 65 St. Clemens Avenue. ss on household furniture, $75. 63 Rose Avenue, R. H. t" Loss $200 on building. 65 Rose Avenue, Mr. John- Loss on building, $500; household furniture, $500 Gold Medal Furniture Company, fire in shaving room. 39 Uxbridge Avenue, F. Glanfield. Loss on household furniture $100. loss on building, owned by J. Dubroski, $200. 65 St. Patrick Street, stable; damage $250; no insurance. 1008 Dundas Street, Max Goldman. Loss to stock and fixtures $1,000. 1008 Dundas Street. Loss to building, owned by J. Minto, $250.

June 9—227 Davenport Road. Loss to building $50. 229 Davenport Road. Loss to building $100. 178 Spadina Avenue, Wettlaufer Brothers, $20. Dundas and Runnymede Road, J. C. Graham, hardware stock damage, $75; building owned by Mr. Jewell; damage $400. 19 Bismarck Street, Frank Giles. Damage to building $250, insured in London Assurance. Ross and Wright, adjusters for the insured, Toronto.

June 10—Rear 41 Wolseley Street, Frank Kaplan. Shed damage, $75; no insurance. Rear 43 Wolseley Street, Mr. Dretz. Damage to shed $25.

June 11—Marine Construction Company, foot of York Street. Seven gasoline launches destroyed, and building gutted. Loss $7,000. Cause unknown.

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Toronto, Ont.—June 2—Building at 624 Parliament Street, owned by Mr. Richard Sherwin. Loss to building, $541; to contents, $150. Building insured in London, Liverpool and Globe for $2,000; contents in Western for $600. Messrs. Ross and Wright, Toronto, adjusters for the insured.

THREE RIVERS FIRE LOSSES

The following fire losses were reported to *The Monetary Times* by the fire chief.

April 17—Mr. J. Portren's barber shop. Cause, explosion of oil stove.

April 25—Canadian Iron Corporation's factory. Cause, overheat.

May 5—Canadian Iron Corporation's factory. Loss $700. Cause, sparks from locomotive.

May 6—Mr. F. R. Grant's residence, chimney fire.

May 13—Mr. Honore Gauthier. Loss, contents, $600; stock, $200. Cause unknown.

May 29—Mr. W. Gravel's residence. Chimney fire.

May 31—Mr. C. Bourgier's stable. Loss $50. Cause, hot ashes.

SASKATOON'S FIRE LOSSES

Fire Chief Heath, of Saskatoon, informs *The Monetary Times* that during April the alarms in Saskatoon were mostly for prairie fires and false alarms, with the exception of one fire with a loss of only $10.

During May the losses were:—

May 6th—Mr. J. Searle's residence, 717 11th Street. Loss, $100. Insured with Adanac Insurance Company. Cause, defective chimney.

May 8th—Prairie fire.

May 9th—Mr. Parrott's steam laundry, 439 Avenue B South. Loss slight. Cause, electric light. Mr. W. A. Gal's restaurant, owned by Mr. R. S. Preston. Cause, gasoline light. No damage.

May 10th—Prairie fire. Eloso Paving Company, covering for lanterns, 1st Avenue and 24th Street. Cause, supposed carelessness.

May 12th—John East Foundry Company, premises 117-121 Avenue C North. Loss, 10. Cause, spark from casting.

May 13th—Saskatoon Hardware Company. Loss, building, $750; contents, $467. Insured with Canadian, New York, Acadia, Springfield, Western, Norwich Union, North British, Phœnix, London and Liverpool Companies and Protector Underwriters. Cause unknown.

May 19th—Mr. D. E. Fisher's barn. Loss, $100. Insurance, $1,100, Queen's. Cause, matches.

May 22nd—Mr. B. B. Gilbert's stores, 335 20th Street West. Cause, rubbish burning. No damage.

May 23rd—Mr. G. R. Canie's store, 223 20th Street West. Loss and cause unknown.

May 26th—Mr. H. H. Robertson's barn, 514 10th Street. Loss, $75. No insurance. Cause, children playing with matches. Mah Wah Bros.' laundry, 423 Avenue S. Cause, rubbish in rear. No. Loss.

May 27th—Mr. F. F. McClelland's rooming-house, 337-339 Avenue B South. Loss, building, $1,500; contents, $1,200. Insurance, building, Phœnix, $1,300; contents, Yorkshire, $1,500. Cause, unknown.

THE SITUATION AND THE OUTLOOK

I.

STOCK EXCHANGE AND INVESTMENT BUSINESS

Unusual Speculation Last Year is Affecting Conditions —Canadian Interest in New York Stocks Has Declined

In one week recently thirty-four stocks on the Montreal Exchange made new low records for the year. This is but one indication of the condition of stock exchange business. Investment is at a low ebb, and brokers and financial houses have plenty of time to study the causes of the present lax period in investment spheres.

In response to enquiries, a large number of stockbrokers have given their opinions of the situation to *The Monetary Times*, Several blame real estate speculation as one of the chief causes for the diversion of funds from the usual investment channels. Most of them agree that the financial stringency will continue throughout the greater part of the year, and that relief will not come until the autumn at the earliest.

It has been stated that Canadians have of late years taken less interest in the New York market. *The Monetary Times* has asked leading brokers as to the truth of this assertion. They are all of the opinion that the tendency for Canadian investors to place their funds in New York stocks is declining. Messrs. Colin M. McCuaig and Company, of Montreal, think that the decline has been marked in the last year, and that the volume of trading with New York by them is very small. The attitude of the investor to Canadian stocks appears to be "standoffish," and they are evidently waiting for a clearing of the political situation and financial stringency.

Exhaustion of Liquid Capital.

Messrs. F. B. McCurdy & Company record the fact that for months past the tendency of speculation, first in real estate, and second in weak ventures promising high rates of interest, has diverted large sums of money from the ordinary channels of investment.

These speculative orgies, which always immediately precede a period of readjustment, such as exists at present, and which promises to continue for some time, gained increasing headway until the exhaustion of the liquid capital of the country prevented further unwarranted inflation and compelled liquidation.

The bond market, which has been practically non-existent for some time, does not yet seem to show any sign whatever of improvement.

Money is Locked Up.

There is no doubt, say Messrs. McCuaig Bros. & Company, Montreal, that the percentage of population investing in securities is increasing, but not at a very rapid rate, owing to the recent real estate booms that took away a lot of interest from the security markets. At the moment, things are more or less at a standstill, as there is a great deal of money locked up in various forms of investment, and even the people who have money are inclined to adopt a waiting attitude. The tendency for Canadian investors to invest in New York stocks is diminishing, and the same applies to speculative commitments.

"We take," conclude this firm, "what is practically the general view, that market conditions will be stagnant until money loosens to some extent. As to the latter tendency, we hardly look for any immediate relief before the end of the year, although we believe that the curtailment of business generally will result in releasing a certain amount of money gradually during the autumn, but this will probably be largely offset by the amounts required to bring forward the crop."

Tight Money Will Continue.

Private investors are still accumulating stocks in the Canadian market, and there seems to be very little disposition on their part to liquidate at the present time. That is the opinion of Messrs. J. C. Mackintosh & Company, Montreal. Canadian investors' interests in the New York market have decreased. With reference to money conditions, funds are available in small amounts from time to time. The situation does not seem any more improved than it has been during the past six months. The consensus of opinion in banking circles seems to be that there will be no material relief until after the turn of the year, and if money conditions remain the same throughout the next two or three months lower prices for Canadian securities are likely to be seen.

In the opinion of Messrs. Oswald Bros., Montreal, the better class of Canadian stocks are being absorbed by investors. There are some unsold securities, particularly those of recent mergers, which are hanging over the market, but the amount of these is not very large. The experience of this firm would indicate that there is less interest taken in United States securities in Canada than formerly. This is no doubt due to the attitude of the United States government to corporations.

Money is still tight in Canada, and no doubt the crop moving period will add to the strain, but provision for this will be made by the banks and no great trouble should be caused.

Dependent on Money Markets.

The country's financial, industrial and commercial affairs are at present quite dependent on the condition of the world's money markets, say Messrs. Greenshields & Company, Montreal. There is at present a larger world-demand for money than can be supplied. We see no immediate hope of any relief in the local money market, either this summer or next fall. It seems to us that in general there is little outlook for an adequate supply of money for a year or two at least. Progress must, therefore, proceed at a much restricted pace.

That firm finds that the private investor in both Canadian stocks and bonds is multiplying in number. This is particularly true of the so-called small investor.

Interest of Canadian stock investors in the New York market has steadily decreased. The only inducement which the New York market can give lies in the fact that the market is broader. The average New York stock is, therefore, more liquid in large amounts. This only affects the investor in large amounts and the speculator. With the eventual growth and breadth of the Montreal market the business done in New York will, they think, be very small, indeed.

The money conditions outlined must affect the stock market as they should affect general progress. One can only look for activity and a rise in individual stocks where affected by specific conditions. The general average level of the market will not likely show any great appreciation in the next twelve months.

Next week: II. "Life Insurance Business Prospects."

◆

BRITISH COLUMBIA'S PRODUCTS

The estimated wealth production of British Columbia for 1912, as given in the annual Budget of the Provincial Treasurer, is :—

Mines, $32,600,000.
Agriculture, $22,000,000.
Lumbering, $19,000,000
Fisheries, $13,678,000.

◆

CANADA'S TRADE GROWING

During the month of April the total trade of Canada increased by over 18 per cent., from $59,284,480 in April, 1912, to $70,505,160 in April, 1913, while the exports of domestic merchandise increased by no less than 60 per cent., from $15,676,989 in April, 1912, to $22,016,880 in April, 1913.

The imports increased from $45,607,491 in April, 1912, to $48,488,280 in April, 1913, or by 6 per cent. The duty collected increased from $7,860,759 to $8,463,576.

The most noticeable increase in exports is in agricultural products, which have nearly doubled, from $5,936,313 to $11,365,018. Manufacturers also went up from $2,601,537 to $[illegible],478,508.

◆

COBALT ORE SHIPMENTS

The following are the shipments of Cobalt ore in pounds, for the week ended June 6th:—Cobalt Townsite, 87,405; City of Cobalt, 75,400; Buffalo, 66,360; Trethewey, 47,914; Hudson Bay, 82,591; O'Brien, 64,112; McKinley-Darragh, 61,229; Nipissing, 77,520; Cobalt Lake, 64,410; [illegible] B[illegible] [illegible] pounds or [illegible] tons. The total shipments since January [illegible] pounds or [illegible] tons.

In 190[illegible] the camp produced 158 tons, valued at $[illegible]; in 1905, [illegible], valued at $[illegible] [illegible] tons; in [illegible] tons; in [illegible] tons; in [illegible] tons; in 1910, [illegible] tons; in 1911, [illegible] tons; in [illegible] tons.

UNICIPALITIES NOT THE ONLY BORROWERS

emand for Capital is Large — Civic Administrators and Expert Advice

BY C. H. BURGESS.

A combination of circumstances has brought about exist- conditions in the Canadian bond market, three of which as follows:—World-wide demand for money. Some shak- of confidence. Lack of caution in borrowing.

Many municipal officials seem to have the idea that the eatest demand for money is confined to our own country, nada, that it is the only country that is making great pro- ess, and, therefore, generally speaking, they do not look yond local conditions.

As an instance of this during last year one particular nicipality was trying to sell its bonds at 5 per cent. Dur- the year they had an offer of 99 but they wanted full par. his was a town with something, a little under or a little er, two thousand population. They finally sold their bonds yield about 6 per cent., and were fortunate at that.

While negotiations were proceeding the city of Moscow Russia brought out an issue of 5 per cent. bonds in Lon- n at 95. This was an opportunity to point out to them the ices that big cities were paying, but they said "That is ssia," and they did not think any security in Russia could particularly good. Moscow, we understand, is one of the est cities in the world having over one million population, d a little town in Ontario thought it was badly used when had to pay as much as the city of Moscow for its money.

any Countries After Money.

This feeling seems to permeate a great many Canadians. ere are other countries developing and developing very fast, d they have to have money, and they are going to the oney centres to borrow it. While sentiment in London has en a real factor in the price at which Canadian municipals ve been able to borrow their funds, we think, investors ere have realized that they have rather cheated themselves loaning money at so low a rate to our Canadian municipali- s, and have determined to get a bigger return.

The result is that Canadian securities have not been ught after in the manner as heretofore. The condition of e London market, it is needless to say, has affected our nadian market and has even had its effect indirectly upon ose securities that cannot be sold in London because where e best and larger and what are termed high-grade bonds e affected, it grades down to the other securities which have narrower market and each feels its effect in turn.

rowth Brings Many Civic Problems.

On the top of the lowering in prices the usual condition evails, people stop buying securities, the municipalities con- ue to put them out and consequently the prices lower, and en prices are going down folks first begin to wonder why ey are offered so cheap and then feel that they had better ld their money because they might buy cheaper. Then they onder what has happened and decide they had better keep eir money for fear something serious will occur.

This feeling coming at a time when there is such an in- ease in population in this country and when under even good oney conditions, municipalities have tremendous problems solve, creates a condition which is not enviable, and the unicipalities wish to borrow or indeed have to borrow the wer the price goes, the fewer buyers there are.

It can be easily appreciated that with an increase in popu- tion such as Toronto has had, say of from 35,000 or 40,000 er annum, that the problems presenting themselves to the vic council and officials are large, and we cannot honestly y that the best business men to be had are managing the fairs.

Interest of Public Health.

With the increase in this city it has been necessary to lay t almost as much in one year as for example the city of rantford has had to lay out in its lifetime.

Calgary in 1904 had a population of about 6,500, they now aim a population of 75,000. In less than ten years they have ad a growth of as much as we will say the city of Hamilton as had in fifty years or more. This increase in population eans that the people have, of necessity, to be given water nd sewer connections in the interest of public health, and in ldition to that there are electric light connection, sidewalks, rading and all the other things that go to make up the city.

Nearly all municipalities, especially in the west, are grow- g in much the same proportion and they all have to borrow oney, and to borrow money quickly, with the consequence [illegible] ny people think that the municipalities are borrowing ar too much with the result that their confidence begins to e affected, and debentures which they thought were excellent efore, they now have some feeling of uncertainty regarding them, although when they analyze conditions they cannot say why.

On the other hand, as with the case of municipalities, many mistakes are made and although their population is growing very fast they could save a great deal of money and could choose more opportune times of placing their securities on the market. Past experiences seem to be forgotten and although dealers have in nearly every case warned municipalities to arrange for their money before letting their contracts they have been so self-satisfied with the importance of their particular municipality and the prospect of their becoming larger and more important that the advice has been so often disregarded.

Many municipalities are, therefore, speculating on their creditor's money, and instead of "cleaning up" when they could sell their bonds to reasonable advantage they hang on expecting as soon as the Balkan war, or a railway strike, or something else is settled that prices will be good again. There are very few instances where a municipality has saved money by holding their bonds for better prices rather than taking what they are first offered.

Banks and Municipalities.

Then come the banks who have advanced money to municipalities, and wish to have the loans cleared up. The banks put pressure and nearly all the municipalities come to the dealers to sell their bonds with the result that the dealers not being able to borrow money from banks and having so many bonds offered to them are very loath to load up and then there is quite a lot of talk about the borrowings of municipalities and how hard it is for them to sell their bonds with the result that people think they will hold off from investing and create a very dull market.

Notwithstanding conditions mentioned above the municipalities have marketed this year as many bonds as they have in other years only that they have had to pay more for their money and have not been able to get it so readily.

We cannot say that we think the market will be entirely clear for some little time to make room for better conditions, but prices of high-grade bonds are now lower than they have been for twenty or twenty-five years, and it is almost sure to be realized sooner or later and a demand set in for them.

Mortgages Versus Debentures.

Mortgages have been the greatest competitor for municipal bonds, and as long as there is so much building going on there will be this demand for mortgages. Any slackening in trade will mean in due course accumulation of funds and the natural opening for investments will be for high-grade bonds. The municipal bond market has been through periods like this before, only less emphatic, and usually of shorter duration, but it will ultimately return to normal conditions and absolute confidence again.

With regard to the private investor, he has never been a real factor in Canadian municipal business. In a young and growing country most of the private investors prefer to take a chance and their money has been going more along the lines of industrial and commercial investments.

There is, however, from year to year a continual increase in private investor's buying of Canadian bonds and when rates are so high as they are, naturally there is more temptation for him to consider this line of investment further, and we do not think he will find a much more profitable field for investment of his money than good municipal debentures, because his chances of loss through non-payment by municipalities is the slightest of any other form of investment and a chance of appreciation in the price of his security is very considerable.

◆

LAKE ERIE AND NORTHERN RAILWAY BONDS

Messrs. G. W. Farrell and Company, Montreal, were able to sell $1,100,000 first mortgage 5 per cent. bonds of the Lake Erie and Northern Railway Company before the prospectus was issued. The chief object of the road is to provide a direct route between Brantford and other municipalities in that district to connect with the Canadian Pacific Railway at Galt, in addition to providing an outlet on Lake Erie to enable the manufacturers of the district to ship their goods by water during the open season to the markets of Western Canada. The Dominion Government has granted a subsidy of $6,400 a mile. Tenders have been let for the building of the road, which it is expected will be in operation by the latter part of this year. The capitalization of the company is as follows:—

Common stock, $1,500,000.
First mortgage bonds 5 per cent., $1,100,000.
Second mortgage bonds 5 per cent., $500,000.

All these securities have been issued. The directors of the road include a number of well-known manufacturers in Brantford and Paris. Application will be made to list the securities of the company on the Montreal and Toronto Stock Exchanges.

VALUE OF LIFE INSURANCE

XVI.

Policies that are Cheapest and Best

By C. A. Hastings.

In a previous article I have illustrated a contingent survivorship policy, which policy is, of course, not only unattractive to the married man of limited means, but it is also a cost, for if the beneficiary predeceases the assured, the policy becomes null and void, so that the money saved ceases to be a saving and becomes an actual expense.

When a man takes unto himself the responsibilities attaching to marriage, his first step should be to secure protection for his wife in the event of her becoming a widow. The cheapest and best form of policy is, without any doubt, a whole of life policy participating in profits. So much has been written in favor of non-participating policies that I must here endeavor to point out the difference.

For a moment put life insurance on one side, and call it a railway debenture or corporation stock, or anything you like, as long as you know the history of it. Now then, I am assuming that on the corporation stock that you have chosen to buy, you know that a high rate of dividend has been declared and paid—for say half a century, without missing a year: you also know that it is strong and well-managed; that the investments are only in the strongest and best securities, that the bulk of the funds are not all in one basket, and that their principles of business are conservative.

Applies to First Class Offices.

Very well, would you not therefore consider it safe to assume that future bonuses or dividends will not fall lower than at the last declaration? In other words, is not this an absolute proof to you that they (the stock company you have chosen) have sought to avoid declaring a bonus which they cannot maintain? Certainly. The same applies to all first class life offices.

Take, for example, a healthy man aged thirty, who pays, say, $240 a year for a $10,000, whole of life policy, participating in profits, and, as I cannot know for certain, I will assume that at age 65, when he will have paid in $8,400, his policy would then be worth $17,000 odd—should he then die, against the other man who took a non-participating policy at the same age and who has paid in, during the same period, $7,000, and his estate would only receive $10,000 should he then die.

Distinct Advantage With Profit Policy.

Another distinct advantage to the with profit policy is (I will continue with the example I have taken) that at the end of any period—say thirty-five years in this case—the assured may apply his bonuses towards totally extinguishing all future premiums. I will assume he does that, he will then have a fully paid-up policy for, at least, $10,000, which continues to participate in dividends as long as he lives, and he has not another cent to pay.

Compare this to the unfortunate individual who has already paid $7,000 in thirty-five years for a $10,000 policy. He may go on living to a great age, his premiums never cease—unless he chooses to take a paid-up policy for less than the face value of what it calls for.

There are so many persons who will persist in thinking that the cheapest goods are always the best, and do not realize that it is not the rate that a company charges but the bonus a company pays that constitutes the value of life assurance as an investment. Dividends determine cost all the world over.

INVESTMENT OF LIFE INSURANCE COMPANIES' FUNDS

IX.

Points to be Considered in Investments—Stocks

By M. P. LANGSTAFF, A.I.A., F.A.S.

In examining the stocks of a corporation the same points should be considered as would be taken into account if you were buying its bonds. But you must also go deeper. By buying stock, you become a part owner in the concern; as a bondholder you were a creditor; as a stockholder you are speculating on its business success, and your income may vary, even though you be a preferred stockholder; as a bondholder all you demand is security, the income being fixed. In short, the essence of your position is, as a stockholder, contingency depending upon success; as a bondholder, security for both interest and principal. For those stocks authorized for life companies' investments, the following points may be added or emphasized:—

1. Capitalization.—Does the whole of the capital stock represent actual money that has been paid in to the concern, or is some of the "watered" variety?

2. Directors.—What is their record as to business ability and honorable dealing? Are they liberal in the payment of dividends to stockholders without being too liberal? Does the sustained success of the company depend largely and specifically upon the continuance in office of the present management?

Question of Earnings.

3. Earnings.—Ascertain the margin between earnings and dividends over a period of some years. Stability of earnings is important, but the nature of the business has to be taken into account.

4. There should be a constant demand for the product or the services of the corporation whose stock is under consideration. An industrial company depending for its prosperity upon the continued demand for a special description of manufacture might derive much harm from a change in popular fashion.

5. Be cautious when investing in securities where the capital stock is not all paid up, or where additional liability is attached, e.g., bank stocks.

6. Does the market value of the shares fluctuate to any extent? Study market conditions, and if buying a stock listed on the exchange, "get in" at the right time.

7. What is the bonded indebtedness and the fixed charges that have to be met before dividends can be paid on the stock?

8. Common or Preferred.—Unless the earnings are exceptionally stable, avoid common stocks. Preferred stocks take precedence in respect to dividends, and also sometimes have the important advantage of being cumulative or convertible. Conversely, the value of the common stock with a "cumulative" preferred stock preceding it is correspondingly lowered in value.

9. Avoid stock subject to wide fluctuations in value; in other words, speculative stocks.

10. It should be remembered where the business of any corporation proves a pronounced success, it is the common stock that shows the greatest appreciation in value.

Common Stock of Railways.

In addition to the above, these essentials regarding common stock of railways should be noted:—

1. The earnings of railways are greatly diminished in times of business depressions, and hence the dividends and values of the common stock are subject to wide fluctuations.

2. Fresh capital is sometimes raised by means of an issue which takes precedence, in respect to security and dividends, over the common stock.

3. In many cases a great part of the common stock is only "water."

4. Margin of Safety.—If the relation of fixed charges to net and gross earnings is satisfactory, ascertain next: First, the per cent. of gross remaining for maintenance and dividends after the payment of necessary operating expenses and fixed charges; and secondly, the amount remaining for dividends on the preferred and common stocks after the payment of all operating expenses, including maintenance, together with fixed charges. In ascertaining the amount earned on the stock of any road, a series of years should be studied.

Note that the "margin of safety" of two roads, each earning ten per cent. on capital stock, is by no means the same. One road may be much higher capitalized, and in times of depression have a balance left for dividends due to its larger gross earnings, while the dividends of the other road might be entirely wiped out.

◆

Sherwin-Williams Company have declared the regular quarterly dividend of 1¾ per cent. on the preferred stock, payable July 1st to shareholders of record June 15th.

TUCKETT TOBACCO COMPANY'S REPORT

First Year of Reorganization—Average Earnings Show Increase—Assets and Liabilities

Net profits of $303,384 for the twelve months ended March 31st, and carrying forward to credit of profit and loss a sum of $141,842, or equal to approximately 5¾ per cent. on its $2,500,000 of common stock, is the result of the operations of the Tuckett Tobacco Co., in the first year of its reorganization.

At the time of the acquisition of the three companies comprising the present organization by Messrs. C. Meredith & Co., Ltd., combined profits were stated to have been $307,552 in 1911 and $293,024 in 1912. Profits for the year just closed have therefore shown a slight increase over profits in the year preceding and over the average profits for the two years preceding the reorganization.

There is no bond issue and the profits go directly to the stock, which is divided into $2,000,000 preferred and $2,500,000 common. The preferred dividends in a full year for the company in its present form would take a sum of $140,000. Actual dividends paid last year, however, amounted to $152,615, owing to the fact that the organization of the new company was completed only in July 2nd last, and for the first quarter dividends amounting to $47,615 were paid to the shareholders of the old companies.

Quarterly Dividend Distribution.

This quarterly distribution compared with three distributions of $35,000 each subsequently. In a normal year, therefore, the surplus on the basis of the year's results shown in the present statement would be $154,457, or equal to slightly more than 6 per cent. on the stock. Other than the $152,615 for dividends, the only deduction from net profits was $8,926 written off organization expenses.

"In October, 1912, we began the erection of a large addition to our Hamilton cigar factory," states the directors' report. "This building has been completed, and we have now one of the finest cigar factories in Canada. To meet the demand for increased space for manufacturing it has been decided to erect a new cigar factory in Montreal, and a satisfactory site for the purpose has been acquired."

Position shown by Balance Sheet.

Current assets of $2,143,057, against current liabilities of $378,553, are shown in the company's balance sheet. Inventories of raw leaf, stock manufactured and in process of manufacture, etc., show an increase of approximately $350,000 since the date of the reorganization of the company. The statement of assets and liabilities in brief is as follows:

Assets.	
Plant, etc.	$2,877,338
Raw leaf, etc.	1,758,110
Accounts receivable	366,724
Investments	8,487
Unexpired insurance	3,675
Cash	6,059
Total	$5,020,395
Liabilities.	
Preferred stock	$2,000,000
Common stock	2,500,000
Accounts payable	343,553
Dividend due April	35,000
Surplus	141,842
Total	$5,020,395

LINES CONVERGE AT NELSON

The transportation routes of East and West Kootenay converge at Nelson making Nelson beyond question the commercial capital of this great area. A commercial traveller living at Nelson will reach from the city as the most central point the Crow's Nest Pass country and the open prairie, the Lardeau country, the West Arm and Central Kootenay Lake District, the Slocan route by rail and steamer, the Upper and Lower Arrow Lakes connecting with Columbia Valley; the boundary line, including Kettle Valley, Rossland country and the Nelson and Fort Sheppard branch, giving connection with Spokane and an alternate route to the boundary and Similkameen country through the United States. These routes connect with other branches of the Canadian Pacific Railway, the Great Northern and the Northern Pacific roads, making Nelson the centre of a large area in which her influence must be dominant.

Calgary and Lethbridge, the nearest distributing centres on the plains, are distant [illegible] and [illegible] respectively. Vancouver is [illegible] miles from Nelson.

Mr. W. N. Scott, the publicity commissioner of Nelson, has just issued an unusually interesting booklet regarding the attractions of that city.

TO RAISE MONEY FOR UNION LIFE

Shareholders Agreed to Consider Scheme to Find £75,000 for Business Under British Management

Steps are to be taken to find £75,000 to keep the Union Life Assurance Co. going, and under British management. Such was the decision of the company's shareholders at a recent meeting in London. Mr. de Beck moved: "That a committee be at once elected for the purpose of submitting a scheme whereby £75,000 should be found for the business under British management, subject to the payment of £25,000 by the National Agency, Limited." This was duly seconded.

A shareholder, however, moved as an amendment that the company be wound up, and this was also seconded. On being put to the meeting the amendment was lost, and it was eventually decided that the previous committee be appointed and two shareholders co-opted.

Serious Position of Company.

Mr. William Schooling, chairman of the advisory board, announced that he had to place before the shareholders the very serious position of the company. According to a report of the meeting in the Financial News, Mr. Schooling said that the investments of the company had involved a loss of £120,000, and the excessive expenditure was responsible for a further loss of £120,000. The law of Canada insisted on the provision of reserves to meet liabilities in connection with life assurance business, and, as a consequence, was unnecessarily severe. The Government department charged to investigate the securities in which these investments were placed assigned the values attaching to such securities and had power to reject, on behalf of policy-holders, those it regarded as doubtful.

Refused to License Company.

If at any time the amount fell short of that fixed by the department, the department could suspend the company's license until the deficiency was made good. Although there had been an increase in the premium income of £55,000, it could not be denied that the expenditure had been injudicious and extravagant. The whole share capital of the company was insufficient to meet the liabilities of £80,000, and, as a result, the Dominion Government had refused the company's license. It had, however, granted it permission to continue business until the end of the present month. Three investments were objected to, one of these being for £40,000 in a building society, which was admitted by the Insurance Department of the Dominion as worth £40,000 at the end of the years 1909-10-11. Now, however, the department absolutely refused to admit this item as part of the reserves. The second and most important item was a loan of £68,000 on the security of £97,000 worth of stock in an investment company, which class of security was authorized by Canadian law. This item was admitted by the department as worth £68,000 at the end of 1911, but was now objected to altogether. Considering the great responsibility placed upon the insurance department by the Dominion law and the extensive powers given to it, it was difficult to justify such action. Ever since the Canadian Insurance Act of 1910 was passed, legislation and consequent investigations had generally been regarded as invaluable safeguards in supplying evidence and accurate returns of the work of approved investments. Unfortunately, its opinion had been proved to be wrong by the action of the department in connection with the union. One investment objected to was made in 1912—viz., a mortgage of £13,000—but he understood that there was every probability of this amount being recovered in full.

Loss from Excessive Expenditure.

During the three years 1910-11-12 the loss from excessive expenditure had amounted to £120,000. He pointed out that the advisory board in this country had no control over the expenditure in Canada, but it had made serious representations concerning it to the board in Canada, which promised that matters in this respect would be modified. The Union Life had been in existence for eleven years, and its annual premium income was now £140,000. The present deplorable state of things was, he argued, entirely due to inadvisable investment and reckless extravagance; otherwise the business was good. If the situation was to be saved the British shareholders would have to provide £75,000 additional capital. If they were not inclined to do this the whole of the share capital would be lost.

Mr. de Beck, chairman of the investigation committee, suggested that Mr. Schooling should be requested to go out to Canada to see what could be done, and two Canadians of repute be selected to act under the authority of the British shareholders. He emphasized the importance of shareholders taking immediate action to safeguard their interest.

Mr. Scott, an official of the company, admitted that the president had spent too much money upon agency work. There was, however, in his opinion, every prospect of making the Union a great success.

BRITISH INTERESTS FORM NEW COMPANIES

One Hundred and Seven Incorporations—Alberta Contributes Half that Number

New Canadian companies this week number one hundred and seven and include several large aggregations of capital, that of the United States Steel Corporation's Canadian subsidiary being prominent. British interests are also represented, as it will be seen the capitalization of Mann Mines is £200,000, and also that a company bearing the well-known gold and silversmiths firm's name, Mappin & Webb, has been incorporated. Another noticeable feature in the new incorporations is the number of realty and investment firms that are weekly added to the list. The largest companies are:

Company.	Capital
Ontario Steel Products Company	$20,000,000
National Tobacco Company, Montreal	4,000,000
McKittrick Properties, Hamilton	1,000,000
Guarantee Securities, Winnipeg	1,000,000
Federal Oil and Gas Corporation, Calgary	1,000,000
Mann Mines, Toronto	£ 200,000

The total number of companies was one hundred and seven, with a capitalization of $28,710,985.

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capitalization.
New Brunswick	4	$ 478,000
Quebec	14	5,044,750
Ontario	16	24,471,000
Manitoba	1	1,000,000
Saskatchewan	14	751,935
Alberta	53	6,030,300
British Columbia	5	935,000
Totals	107	$28,710,985

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

McLean, Sask.—Kidds, $10,000.

Cranbrook, B.C.—Kootenay Farms, $50,000.

Canmore, Alta.—Granger Collieries, $50,000.

Oyen, Alta.—Acadia Grain Company, $25,000.

Olds, Alta.—Alberta Threshing Syndicate, $3,300.

Hanna, Alta.—Hanna Hardware Company, $25,000.

Simpson, Sask.—Simpson Telephone Company, $1,250.

Bienfait, Sask.—Bienfait Commercial Company, $100,000.

Bow Island, Alta.—Empire Elevator Company, $100,000.

Govan, Sask.—Wessels Rural Telephone Company, $290.

Moosomin, Sask.—Ivanhoe Rural Telephone Company, $220.

Saskatoon, Sask.—Polar Aerated Water Company, $25,000.

Victoria, B.C.—Westbourne Investment Company, $25,000.

Craigmyle, Alta.—Craigmyle Farmers Elevator Company, $10,000.

Dunmore, Alta.—Canadian Manufacturing Company, $100,000.

Davidson, Sask.—Davidson Clay Products Company, $100,000.

Weyburn, Sask.—Western Realty and Investment Company, $100,000.

Langman, Sask.—West Langman Rural Telephone Company, $175.

Prince Albert, Sask.—Churchill Basin Fish and Traction Company, $75,000.

Strome, Alta.—Sterling Land and Development Company of Strome, $200,000.

Winnipeg, Man.—Guaranteed Securities, $1,000,000. R. A. Scott, H. Hill, J. J. Scott.

Ottawa, Ont.—Wapoose Mines, $100,000. A. W. MacMinn, P. J. Wood, S. J. Robson.

VANCOUVER UNDERWRITERS vs. AGENT

lgment is of Interest to Insurance Men—Section of New Insurance Act

Canadian insurance circles have followed with interest "misrepresentation" case which has occupied the Van- ver courts. The judgment given, which is appended be- , is important.

"In his address Mr. Woodworth was driven to this posi- that he had to specially impute criminality to two indi- uals and wrong-doing indirectly to Mr. Johnson," said court.

"I am going to deal first with the case of Mr. Hunting- . The allegation is that he procured from McEwen an davit that was not true. The only basis for such an alle- ion is the fact that there is no cheque before the court ed March 26; nor is there any dated April 26, 1912. And far as the evidence goes there were no such cheques.

bstantiation Needed.

"I think there should be something to substantiate such rave charge as that of criminality," continued his lordship, er referring to Mr. Huntington's actions. "Mr. Hunting- impressed me as a man of integrity and honor, and I nk, moreover, that what he did in this case was his duty h to his associates and to the public."

Mr. Justice Murphy stated that the alleged libel stated t Stirton tried to sell a "fifteen" payment life policy with tain benefits.

"If it only went this far I could come to the conclusion, I have tried to here, that there was no bad faith on the t of anyone, but only misunderstanding," proceeds the gment, "but the libel does not stop there, but goes on to that Johnson would draw in ten years $3,435, plus 4½ cent., plus compound interest and profits. This state- it could not have been made in good faith."

Then came the question of Johnson's or Stirton's creda- ty. "Johnson," said the court, "impressed me as a man was trying to tell the truth. He could not have been ng so if he said Stirton made that statement, and the er did not make it. I think that Johnson was telling the th and that the representation he states was made, was de to him.

e Second Affidavit.

"The only suggestion that Mr. Johnson tried to mislead court was that he was engaged in a conspiracy to trap Stirton. Mr. Johnson is evidently a man of high stand- in New Westminster and a man who has occupied a eted public position there. I believe that Mr. Stirton re- sented to him that the policy would be paid up within een years, and I find this proved.

"When I came to McEwen I was in a more difficult posi- n. McEwen has been represented to me as a man of the pest guile. The impression he made upon me was that would be as clay in the hands of the potter, in Mr. Stir- 's hands. Nevertheless the fact of the two affidavits made necessary to scrutinize carefully his evidence. I much re- t that there was no other explanation given to me other n by McEwen himself in regard to the second affidavit.

planation is Reasonable.

"McEwen swears it was obtained from him by false pre- ces. I then ask myself: 'How did this affidavit get into court?' The second affidavit has been traced to the cus- y of Mr. Stanley Henderson, the agent of the Great-West e in Vancouver. He was the man who handed that affi- vit to Mr. Stirton, and I would have been only too glad to ve granted a delay if it had been asked for in order that history of that affidavit might have been exposed here in en court. Mr. Henderson could have told me where he got and an attempt could have been made to trace up the pro- ring of it to the persons who actually procured it. Inas- ich as that has not been done, and as McEwen made state- nts that called for controversy, I am going to accept his ry that the second affidavit was procured by false etences.

"The explanation that McEwen gives of it is a reason- le one," proceeded his lordship, "and no attempt has been ade to controvert it. I find McEwen has made his state- ent on oath, and again at North Vancouver and again here. e alleged libel, as far as McEwen was concerned, divided elf into two parts. First, as to the statement that the licy, if paid for three years, would carry itself for fifteen ars, and second, that if paid for fifteen years, it would be id up."

His lordship found in this connection that McEwen's idence was again to be accepted and that that portion of e libel was justified.

In stating his reasons for disbelieving Stirton, Mr. stice Murphy said:

"I find him admittedly making representations as to things he knew nothing about."

Stirton was, his lordship said, evidently attempting to avoid the section of the new Insurance Act prohibiting assumptions based on futurity by making assumptions on the past. This, Mr. Justice Murphy said, was not conduct which he thought would be commendable in an insurance agent. Another reason for disbelieving Stirton advanced by the court was found in the actuarial table prepared by Mr. Huntington.

"I must accept those figures as correct," decided his lordship.

In regard to the cheques Mr. Justice Murphy said: "McEwen said that they were given as promissory notes to be held until they matured. I believe McEwen, and that portion of the libel also fails.

"In regard to the malicious prosecution, it must fall to the ground if the libel action fails. I wish to add this, that on the question of reasonable and probable cause the onus resting on the plaintiff was not satisfied. The first object, to my mind, of the Underwriters' Association was to put a stop to the practices Mr. Stirton indulged in.

"The action is dismissed with costs."

◆

SOUTHERN ALBERTA'S WOOL PRODUCTION

The wool clip of Southern Alberta this year will probably exceed 825,000 pounds. A canvass of the sheep men shows upwards of 82,000 sheep yet to be sheared, and some 12,000 to 15,000 that have been sheared in small lots, and the estimated clip, based on even as low an average as eight pounds to a fleece, is conservative. The clips at the Dominion Government experimental farm, near Lethbridge, averaged 11½ pounds, with one running as heavy as 15½ pounds. The experimental farm flock was a small one, however, as a carload of the sheep were sold early in the spring for slaughtering, bringing what at that time was the record price for mutton on the hoof, 6½ cents a pound. Since then some lambs have been sold in carload lots at 6¾ cents, and several carloads have brought 6¾ cents after shearing, which is about the equivalent of the 6¾ cent price, shrinkage considered.

Most of the shearing will be done this month, and the wool growers have combined and erected a shearing plant on the new Lethbridge-Weyburn line near Chin Coulee, where 50,000 or more sheep will be sheared. The Canadian Pacific Railway has agreed to aid them in the shipping, and is reported to be arranging for the operation of the Weyburn-Lethbridge line as far as the shearing corrals, having completed that much of the road, or some 25 miles to date.

This will permit of the handling of the clip through Lethbridge, and it will very likely be marketed through Montreal and London, in order to take advantage of the offer of the Dominion Government to stand 25 per cent. of the freight charges to London in order to encourage the industry. The freight on the clip of the wool combine, which will exceed 500,000 pounds, between the corrals and Montreal, via Lethbridge, based on the rate of $2.23 per hundred pounds, will be in the neighborhood of $11,500, which is no inconsiderable item to begin the operation of a new railway line with, and should be an evidence of the requirement of such railway facilities. The government has not provided the men promised to supervise the sorting and baling, and the wool will probably go out loose in sacks, the rate for which is much higher than when baled, and this would mean an additional revenue of nearly one third more for the railway. The means of shipping from the shearing place, however, means a big saving in expense to the wool men, and with the establishment of the shearing corrals at Chin Coulee it assures that place of being the future shearing point for this section of the country.

◆

PROPOSE TEMPORARY FINANCING

The tightness of the money market is being felt by the city of Verdun, Que. It was reported that the council sitting in committee authorized a temporary loan for permanent works in the city to the extent of $400,000 for which it was proposed that the mayor and the secretary-treasurer of the city should give a promissory note and that the bonds of the town should be held as collateral security for a period of twelve months. It was also stated that arrangements were being made for a conditional loan of $25,000 from one of the local banks in order that the city might carry on the work already in progress, and a discussion followed as to how this money should be allocated when secured.

CANADA IN GERMANY

Native Reply to German Criticisms—Mortgages in Canada and Europe

Several unkind criticisms of Canadian matters have appeared in German newspapers. We notice that Dr. Hammann, the secretary of the German Canadian Economic Society, has issued a statement to the press in Germany, and this is quoted and commented upon in a recent issue of the Hamburger Nachrichten:—

"The phenomenal rise of Canada and the solid foundations upon which her progress rests has greatly impressed and interested German economists and business men," says this article, which continues: "That interest found practical expression in the formation two years ago of a German Canadian Economic Society in Berlin, and the educational work which the society has been carrying on in Germany since has been of a character by which Canada cannot fail to profit.

What the Critics Say.

"During the last two weeks a good deal of adverse criticism of Canada has been appearing in the German press, much of it evidently inspired by stock exchange influences and by the chauvinist tendencies of a certain class of papers. Criticisms have been to the effect that Canada is a much over-rated country, that over-speculation and money stringency has brought the country into a critical position, and there also have been insinuations that the Canadian Government itself, and the prominent railway and other interests of the country, have been lending themselves to a propaganda of exaggeration.

"Accordingly the German-Canadian Economic Society has felt itself called upon to deal with these damaging rumours, and has issued in the press through the secretary, Dr. Hammann, a reasoned statement setting forth the true facts of the situation in Canada, which has been very widely reproduced. Dr. Hammann brushes aside as altogether puerile and self-destructive the insinuations levelled against the Canadian Government and the great interests of the country, of conspiring to mislead the public abroad. The mistake made has been to confuse activity in publicity of the progress made in Canada with exaggeration, and in refusing to recognize that the facts concerning the development of Canada quite legitimately call for publicity on an extended scale.

Not a Financial Crisis.

"Dr. Hammann adds that to say that Canada is in the throes of a financial crisis is absolutely contrary to the facts. Money stringency may well exist there as in other countries, but the Canadian banks have acted in the most praiseworthy manner by curtailing credit to the most legitimate demands, and have thus been able to finance out of their own resources without any outside assistance the moving and the disposal of the very largest crops that Canada has ever had. That the demand for money in Canada should be great at present was not due to over-speculatoin, but to the very natural cause that the inflow of capital which a developing country requires had been suddenly brought to a full stop, owing to the unexpected political crisis which had arisen in Europe.

"As to the charge of over-speculation in land, Dr. Hammann gives it as his opinion that this is not at all true, so far as agricultural land is concerned; that the prices of farms and of land suitable for farming in Canada are not only well sustained, but are steadily rising: and in support of this view he refers to the measures that are being taken by the Governments of various States of the American Union to stop the emigration of prosperous farmers to Canada, but adding that these measures have been entirely unsuccessful, so great has been the determination of these experienced men to go over to Canada, where cheap and good land is to be obtained. He believes that it is only in connection with town lots in new centres that are arising in the West that the charge of over-speculation can be to some degree sustained, but that this undesirable practice the Canadian Government and public opinion generally have done their best to expose.

Mortgages In Canada and Europe.

"At the same time, it is a fact that the most conservative financial institutions in Canada lend money on mortgages on city properties up to one-half their valuation at rates of interest varying from five to six per cent. in the East and seven to eight per cent. in the West. Millions of British capital are being invested in this way through old-established real estate firms. The difference between mortgages in Canada and in Europe is that the value of the property in the former country has a tendency to increase, so that in view of foreclosure a good profit is generally shown, whereas in Europe, under similar conditions, foreclosure of house property is generally attended with difficulties, if not with loss.

"Emigration to Canada over a series of years shows a large and continued increase, and the emigration from England to Australia, which has grown so much of late, is not going on at the expense of emigration to Canada, but is rather a direct result of Australia imitating the wise and effective advertising methods which Canada has adopted. The weakness of the argument which has been put forward that Canada depends largely upon the capital brought in by emigrants, which is alleged to be as high as $5,000 per family, is easily exposed when one recalls that thousands and tens of thousands of persons belonging to the working classes, entirely without means, have entered, and are annually entering, the country, who, by industry and thrift, have already reached and are in course of reaching a competency, if not independence.

Canada Has a Wonderful Future.

"Dr. Hammann concludes as follows: 'I have no intention whatever in my reply to advertise or write up Canada. Like every other country, it has its advantages and disadvantages, but, while I gladly endorse every well-founded warning that is being given against misleading and swindling exaggerations whenever they are made, it should not be lost sight of that Canada is a country with a great, and even marvellous, future, and German trade and industry will be committing a great mistake if they do not use every exertion to obtain a footing in this great coming country, which offers the very best possibilities for German capital and the import and export trade. Let us, therefore, keep these essential points well before our eyes, as the Illustrire Zeitung, of Leipzig, urges us to do, and not be led astray by captious criticism, which only serves to obscure the great underlying facts of Canada's progress.' "

CAPE BRETON'S FISHERIES.

The favorable situation of Arichat, Cape Breton, was recognized and taken advantage of by enterprising and energetic fish merchants from Jersey, away across the Atlantic, as long ago as 1765. The trading at the fishing depot or station, was conducted by a manager or agent, selected by the proprietors from their own men who were promoted for ability and service. His staff of clerks were recruited in Jersey, under the apprentice system. The strictest discipline enforced, loyalty to the company's interests encouraged, and, in consequence, a splendid body of capable, trained men were always available, whose home ties were at headquarters and who were kept keyed up thereby to accord with the instructions and orders of the board of directors.

In their dealings with the people, the rule was "goods in exchange for fish and labor." At the beginning of each season, a price for the fish to be caught was agreed upon among the traders, and the fishermen then notified. This price was unalterable, and was paid in goods from the company stores at the company price. If the fishermen made an extra good year's catch, no money was given. He was simply credited on the books with the difference between the supplies he and his family obtained and the worth of his fish.

This is compared with modern conditions in an interesting article by Mr. J. F. Blazdon, manager of the Royal Bank at Arichat, in the Richmond County record.

The twentieth century brought with it, the freedom of our men from the shackles in the old. The invention of "cold storage" gave to the struggling men a boon of incalculable value; for to its introduction into the fish trade of Nova Scotia, by the able and far-seeing merchants of Canso and Halifax is due our brighter future. Last year there were 404 fishing boats with 440 fishermen. Our men are rapidly adopting the "motor dory," at date there are 23, nearly all bought during the past eighteen months. We are great admirers of Lunenburg and buy our vessels there, and our motor boats from Shelburne. A motor dory complete with engine and sails costs $210.

The indomitable Canso merchants were early in the new field and are to-day among our largest buyers. They shipped via Mulgrave, last year 8,472,000 pounds of fish, valued at $317,850. They are fighting hard for rail connection in which it is to our interest to join. A railway at Canso brings it about seven miles from Arichat by water.

The fish caught and landed on Isle Madame last year, according to the report of Captain Boudrot, fishery officer, amounted to 4,405,000 pounds. The amount sold afloat and delivered on board buyer's steamers from the boats, which is not recorded here, but wherever landed, by the official of that district, is estimated as 3,500,000 pounds, making the total catch 7,005,000 pounds valued at $185,000. The year of 1912 was a lean one. Dogfish were more than usually destructive and the fall fishing was shortened by severe storms. In 1900, the catch is given at 9,000,000 pounds, as compiled by Mr. D. H. Campbell, municipal clerk, and Mr. D. R. Boyle, retired fishery officer.

PERSONAL NOTES

Sir Max Aitken, M.P., arrived in Montreal on Monday England.

Sir Edmund Walker is in England and will return to onto about the end of July.

Mr. John A. Tory addressed the Quebec Life Under-ers' Association last week.

Mr. L. S. Fullerton, of the Dominion Securities Cortion, has returned to Toronto from a trip to Europe.

Mr. Widmer Hawke, vice-president of the O'Keefe very Company, Limited, Toronto, died at his home on day last.

Mr. J. W. Langmuir, general manager of the Toronto eral Trusts Corporation, has been to Atlantic City, reting his health.

Mr. J. V. Barry, a head office official of the Metropolitan Insurance Company, will address the insurance convenat Ottawa in August.

Mr. Alex. Maclean, manager of the London and Lancae Guarantee and Accident Company, with his headrters in New York, was in Toronto this week.

Mr. Arthur C. Heap, of Messrs. Heap and Digby, of don, England, inspecting and consulting engineers, was sitor to *The Monetary Times* office this week.

Mr. J. T. Lithgow, formerly acting trade commissioner the Government of Canada at Amsterdam and Berlin, is the Dominion's trade representative at Rotterdam.

Mr. C. W. Chesterton, until recently acting manager of Bank of Montreal, Port Arthur, has been appointed inctor of Ontario branches, with headquarters at Montreal.

Mr. Russell Cowans has returned to Montreal from a trip he Pacific Coast, taken in connection with the opening of branches of the firm of McDougall & Cowans, at Wineg and Vancouver.

Mr. Robert Welch has been appointed assistant manager he Canadian Railway Accident Insurance Company. As John Emo, general manager, states that Mr. Welch is a of twenty years' practical experience in the casualty ness, he should prove a valuable addition to the executive f of the company.

Alderman James Johnstone has been elected president of Nelson Street Railway Company, Limited. Mr. William uche was named vice-president and Mr. A. S. Horswill, retary-treasurer, to hold office subject to the new arrangent with the city, under which, when it becomes effective, official of the city clerk's office will be secretary-treasurer.

Mr. Charles B. McNaught has been appointed president he Sterling Coal Company, Limited, and president of the ger Lehigh Coal Company, Limited, taking the place of W. F. Tye in the first instance, and of Mr. R. E. Gibson he other. Mr. Tye remains a director of the Sterling npany, and Mr. Gibson becomes vice-president of the ger Lehigh Company. Mr. McNaught is a member of insurance firm of Reed, Shaw and McNaught.

◆

AMES-HOLDEN-McCREADY REPORT

Monetary Times Office,
Montreal, June 11th.

Although the annual meeting of the Ames-Holden-Mcady Company does not take place until the week after t, the approximate earnings of the concern are available. er all the charges and appropriations of the year, inding dividends on preferred stock, had been made, the npany carried forward a surplus to profit and loss account better than $70,000. This is equal to about 2 per cent. the common stock of the company. In round figures the ults are as follows:—

Profits, approximately		$370,000
Bond interest, approximately		60,000
		$310,000
Preferred stock dividends		175,000
		$135,000
Sinking fund, about	$20,000	
Depreciation, about	25,000	
Organization, about	15,000	
	$60,000	60,000
		$ 75,000

When this is added to the surplus of $165,568, shown at beginning of the year, a total surplus of about $240,000 When these figures are compared with those of a year ago, the company is seen to have made considerable progress. The earnings for the year ending April 30th, 1912, were $281,348, after providing for administration, selling and other expenses. From this is to be deducted bond interest and preferred dividends amounting to $240,000. The balance of $41,348 was carried to the credit of profit and loss. This means that the surplus over and above all charges this year is 75 per cent. greater than a year ago. A year ago, however, the sum of $122,963 was written off to expenses of organization and to depreciation. It is not certain that this figure compares with the $60,000 written off this year, but that seems to be the situation, and, if so, only half as much was written off this year as a year ago.

It is interesting to hear that the sales for the year were upwards of $5,000,000, this being an increase of fully $1,000,000 as compared with those of the previous year. The company had to refuse orders, and it is understood has been exercising considerable discretion for a long time past in the selection of customers. This policy will be pursued during the coming year and should ensure to the company a paying class of customers. It is stated that the outlook for the present year is promising, and that there is no reason why the company should not do a greater trade than a year ago.

◆

MONEY MARKETS

Messrs. Glazebrook and Cronyn, Toronto, exchange and bond brokers, report exchange rates as follows. June 12:—

	Between Banks.		
	Buyers.	Sellers.	Counter.
N.Y. funds	Par	1-64 pm	⅛ to ¼
Montreal funds	Par	Par	⅛ to ¼
Sterling—60 days' sight.	8 17-32	8 9-16	8 13-16 to 8 15-16
do. demand	9 7-16	9 15-32	9¾ to 9⅞
Cable transfers	9 17-32	9 19-32	9⅞ to 10

	Actual.	Posted.
Sterling—60 days' sight	4.82.40	4.83½
do. demand	4.86.50	4.87½

Call money in Toronto, 5½ per cent.

Bank of England rate, 4½ per cent.

Open market discount rate in London for short bills, 4⅜ per cent.

◆

BANK CLEARING HOUSE RETURNS

The following are the figures for the Canadian Bank Clearing Houses for the weeks of June 13th, 1912; June 5th and June 12th, 1913, with percentage change:—

	June 13, '12.	June 5, '13.	June 12, 13.	Ch'g %
Montreal	$58,163,330	$56,992,179	$63,592,224	+ 9.3

Victoriaville, Que.	Quebec Bank.

FIRE INSURANCE COMPANIES AND LEGISLATION

ll-Canada Federation's Activities During the Past Year

Legislation, taxation, fire protection were among the rious subjects discussed at the All-Canada Fire Insurance ederation's annual meeting at Ottawa. Mr. T. L. Morri- y, is the president of the association and Mr. C. D. Gau- t, K.C., acting secretary. The report of the executive is rewith appended:

"The supreme court has heard and is about to pronounce on the constitutional principles underlying the right to gislate in insurance matters. The right of parliament to gislate in matters of insurance and particularly as to licen- ng of companies will be determined. At the hearing all e provinces were represented by counsel and your federa- n and the Canadian Manufacturers' Association were also rmitted to state their cases. A decision is expected at the esent sitting of the supreme court of Canada and should thing unforeseen occur a final hearing before the privy uncil may be had in July of this year.

"In this connection it will no doubt be of interest for the embers to know that a few days ago Mr. Justice White, the supreme court of New Brunswick, held in a case of the cific Coast Fire Insurance Company vs. Hicks, that insur- ce contracts entered into with unlicensed companies pro- ded they do not fall within the exception stated in section 9 of the act are illegal and absolutely void, that the effect the Insurance Act is to render policies assessed by foreign licensed companies illegal and, therefore, unenforceable d void and the learned judge adds: 'I am quite clear in en an express stipulation of the company to raise the ques- n of illegality as a defense would not avail in law to make e contract enforceable, for no court will lend its aid to force an illegal contract.'

blic Should Know.

"In view of this, it is felt that if the insuring public ew of the danger which they run in insuring in unlicensed mpanies as outlined in this decision, not only would no rther risks be placed with them, but it is reasonable to ex- ct that much of this insurance would be cancelled. Neither the counsels representing the opposing parties contended at the Insurance Act was beyond the powers of parliament d Mr. Justice White, in coming to the conclusion which he s, naturally could not do so without assuming that the Act intra vires.

"Your committee has endeavoured for some years to tain the removal of a sub-section of section 298 of the ominion Railway Act which has for effect to transfer the bility for loss by fire caused by locomotives of railway com- nies to insurance companies, whether railway companies e negligent or not. The minister of justice, while not inclin- to take so serious a view of this section, has stated it as s opinion that if the section can be given this interpretation, e insurance companies have an undoubted grievance and at any ambiguity should be removed. We have lately been vised that the amendment, proposed by the committee, had en embodied in the draft bill which will be printed shortly d introduced in Parliament. The Lumber Insurance eneral Agency has taken an interest in this work and hopes vorably to interest the Canadian Lumbermen's Association d possibly the Canadian Manufacturers' Association. We ould feel grateful for the assistance of any of the members obtaining the repeal of this objectionable clause.

eavy Taxes in Quebec.

"As a result of the courtesy extended by the minister of ance, the Federation is now in possession of the returns ade by persons, firms or companies insuring in unlicensed mpanies and who have reported to the government. These turns have been tabulated and it is intended to have them inted shortly and forwarded to the members of the fed- ation so as to facilitate their discovering those who vio- e the law by not making returns and having them pena- ed as provided by the statute.

"The somewhat startling returns obtained from the mem- rs of the Federation establishing that the companies pay the province of Quebec taxes averaging double what they y in all the other provinces united, have urged your com- ttee to make a determined effort to obtain legislation from e Quebec legislature re-adjusting and reducing this excess imports. With this object in view, the following bills re drafted and submitted through the proper channels, to e different ministers:

"Bill to force unlicensed companies to share in the tax 1 per cent. in the City of Montreal. Bill to amend the Commissioners Act, with a view of obliging unlicensed anies to share in its maintenance. Bill obliging com- nies to pay the registration fee of $150.00 once and for all instead of an annual tax of this amount as at present. Bill forcing unlicensed companies to pay the minimum tax of $250.00 to the province. Bill abolishing or reducing municipal taxation.

"The City of Montreal has met our suggestions as to the first two bills in a fair spirit with the result that the legislation committee of its council recommended our amendments.

"Owing to the illness early in the session of the assistant attorney general, Mr. Lanctot, this and other measures had to be put aside but will be re-introduced next session with every chance of their being made law.

Fire Protection Bill.

"The several delegations which went to Quebec realized that the whole of the considerable programme undertaken could not be carried out and, therefore, concentrated their efforts on the abolition of municipal taxation, or at least a substantial reduction thereof. A bill with this object in view was accordingly introduced in the Quebec House, but owing to the lateness of the session and the serious opposition of the country members on the ground of their inopportunity of communicating with their constituents as to its bearing, it had to be withdrawn. The leading ministers who had pledged themselves to its support and vouched for its inclusion in the statutes, expressed their disappointment. The provincial treasurer wrote your committee expressing his disappointment and that of his colleagues and promising the reintroduction of this measure at the next session.

"The Honorable Mr. Taschereau, minister of public works, introduced a further measure, which had for object to provide for efficient fire equipment and education in the small towns and villages where serious losses have occurred. This fire protection bill was drawn on lines similar to the acts of Manitoba and other provinces and of many states of the Union. This measure has obtained the sanction of the lieut-governor and has become law, but nothing so far has been done to bring about its execution.

"Realizing, as no doubt we all do, that success in legislation is only obtained through infinite patience, the work above outlined will again be taken up early next session with a view of obtaining from the ministers, whose good faith we have no reason to doubt, the very legitimate concessions which we have demanded.

Unregistered Companies' Minimum Tax.

"In the province of Quebec, a tax of 1 per cent. and a minimum of $250 is imposed, under the Commercial Corporations Tax Act, on all registered insurance companies doing business therein, the minimum being payable in advance. The attorney-general of the province has expressed it as his opinion that unregistered competitors are only liable to the tax of 1 per cent., thus being exempt from the minimum. The injustice of this law is apparent more particularly as it was formed with the stated object that it would effect an even distribution of rights and obligations between registered and unregistered companies. A company, a member of this Federation, on which a demand for the minimum tax in advance has been made, under this law, is willing to be a defendant in a test case and stated its intention to your committee which submits the matter for your consideration.

Enactments in Three Provinces.

"The province of Alberta at its last session passed a new insurance act embodying a resident agents' law and providing for a payment into the treasury of the province of 50 per cent. of all premiums paid to companies not registering under the act. The province of New Brunswick adopted statuary conditions based largely on the Nova Scotia conditions, but departing therefrom in several important particulars and in the opinion of our committee an effort should be made to have these conditions amended at the next session of the legislature. An Insurance Act was introduced into the Nova Scotia legislature last session. Its provisions were very fair and should have been acceptable to the companies registering under the laws of that province. But when it reached the Upper House an amendment which has been found so objectionable in other provinces, providing for the placing of business with companies not complying with the laws was introduced, whereupon the bill was withdrawn but may come up again next session.

"Legislation was carefully watched, bills scanned and submitted to your committee when found of importance.

"In view of the importance of the work now before us, particularly of the reference to the supreme court of Canada and its ultimate hearing before the privy council, a further small assessment is recommended.

"Feeling, as your committee does, that this Federation could accomplish so much while safe-guarding the public, for the joint interests of the companies by mutual co-operation, a recommendation is hereby made that the incoming committee make a special effort to get in closer touch with all its members, more particularly those who on account of distance are not in immediate touch with the executive, in order to meet their requirements, and to devise by practical measures the mose effective way to obtain and maintain just and equitable laws."

DIVIDENDS AND NOTICES

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

INTERNATIONAL NICKEL COMPANY

operties at Sudbury and Copper Cliff—Annual Report Shows Improved Conditions

Owing to its valuable Canadian properties the annual re- rt of the International Nickel Company attracts much atten- n in the Dominion. The net profits for the past fiscal year er deducting expenses, depreciation, exhaustion of minerals, nd sinking fund and all other charges were $5,020,304.92. e companies owned by the International Nickel Company e Orford Copper Company, Bayonne, New Jersey; the So- té Minière Calédonnie, New Caledonia; the Canadian Cop- r Company; the Anglo-American Iron Company, the Ver- lion Mining Company, as well as a controlling interest in e Nickel Corporation of Great Britain.

During the past year $1,323,276.31 was expended for new nstruction, equipment and additional property.

And in the same period there was provided out of earn- gs the sum of $1,141,379.21 for the following funds: regular owance for depreciation of plants, $553,449.37; exhaustion minerals, $498,471.50; and bond sinking fund, $89,458.34.

In this time the entire outstanding bonded indebted- ss of the company has been retired. The company offered the bondholders to pay these bonds at the redemption ce, one hundred and ten and interest, and all bonds that re not tendered in response to this offer were called for pay- nt on April 1st, 1913. All of the bonds have been actually rned in and cancelled except bonds aggregating $812,858 of ncipal for which the redemption price and interest is on de- sit with the trustee of the mortgage, and the mortgage has en cancelled.

bstantial Growth in Company's Business.

The business of the company during the fiscal year has own a substantial and satisfactory growth. The improved nditions in the steel industry resulted in a greatly increased mand for nickel from the steel makers, and in all other in- stries where the company's products are used the demand s been the best in the history of the company, states Presi- nt A. Monell. All indications point to a very satisfactory siness for the coming year.

Throughout the year the business in "Monel Metal" in its rious forms continued the development and expansion noted t year, and this metal may now be said to have established elf in certain lines in an assured position.

The policy of keeping the plant up-to-date in every re- ect, of increasing its efficiency wherever possible, and of en- ging its capacity has been continued; within the last year ere was completed one blast furnace and four mechanical asting furnaces at the plant at Copper Cliff. The construc- n of a new general office building at Copper Cliff was be- n, and the fireproof reconstruction and enlargement of the spital which was destroyed by fire last year. The housing commodations of the employees has been increased, and a mber of desirable civic improvements have been made.

nerican Companies' Statement.

The consolidated general profit and loss statement of nerican companies for year ending March 31st, 1913, com- res with the previous statement as follows:—

		1913.	1912.
arnings of all properties		$6,802,886	$5,019,703
her income		126,220	69,263
otal income		$6,929,106	$5,088,966
xpenses, taxes, etc.		542,307	222,553
et income		$6,386,799	$4,866,413
terest, sinking fund, depreciation.		1,366,494	1,284,453

Profit and loss	994,501.33
Deduct for amount to cover accounts of foreign companies not included	11,185.59
	$54,140,706.73

◆

Messrs, Ronald, Griggs and Company is the name under which Edwards, Ronald and Company, chartered accountants of Winnipeg, will be continued.

At the recent quarterly meeting held May 22nd, the directors of Securities Corporation, Limited, declared a quarterly dividend of 6¼ per cent.; this being the same rate as the previous quarter.

An important branch railway from North Battleford to Prince Albert, which has been under construction for some years, Sir William Mackenzie, president of the Canadian Northern Railway, now states will be completed by August. This opens up additional valuable territory for the distributing warehouses, and it will be the means whereby a large amount of grain which has been held up in the district can be moved.

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including Friday, the 15th day of August next, for the right to cut pulpwood on a certain area tributary to the Lake of the Woods, in the District of Kenora.

Tenderers shall state the amount they are prepared to pay as bonus in addition to dues of 40c. per cord for spruce, and 20c. per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill on or near the area referred to.

Such tenderer shall be required to erect a mill or mills on or near the territory, or in such place as shall be approved by the Lieutenant-Governor-in-Council, and to manufacture the wood into paper in the Dominion of Canada.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honorable the Treasurer of the Province of Ontario for ten per cent. of the amount of their tender; to be forfeited in the event of their not entering into an agreement to carry out conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.

Toronto, Ontario, May 20th, 1913.

ALBERTA'S FINANCING IS CRITICIZED

ictoria is Selling Big Block of Bonds—New Westminster and Interest Rate

"Canada has been overborrowing," said Sir Max Aitken, .P., upon his arrival in Montreal from England. And his bsequent remarks are reported thus:—

"Do you refer to Quebec or Ontario with regard to overrrowing?" he was asked.

"No, I am not referring to old Canada, neither can anying be said against the financial methods of the lower prounces. The west, however, has been going too fast in a eat many ways."

"Have you Alberta in mind?" he was asked.

"Yes," he replied, "that is where the shoe pinches. lberta's financing has been anything but wise. The western unicipalities generally have been going it at a rapid pace, ıt, of course, the wonderful development and rapidly ineasing population will help them out in the end."

The Monetary Times agrees with Sir Max Aitken that me western municipalities have been moving quickly, but seems scarcely fair to make Alberta shoulder most of the ame. There is room for municipal economy, not only in at province but in Manitoba, Saskatchewan and in astern Canada, too. As Sir Max Aitken truly indicates, anada is a little out of breath with the strenuous race of evelopment, but the body national is sound. The money arket situation is giving a much-needed breathing spell.

ictoria's Bond Issue.

The issue in London of Victoria bonds of $2,350,000 was ıly part of the city's debentures for sale. The British olumbia capital has still about $2,000,000 worth of debenres, including those for school and local improvement purοses, to be sold. City Comptroller Raymur says that the 2,350,000 just sold was all that the London market was sked to absorb. The remaining $2,000,000 and over are eing disposed of in New York and Toronto through the ty's fiscal agents, the Dominion Securities Corporation, nd from time to time small amounts are sold, and the proeeds remitted to Victoria. The prices so far are about the ame as that for the recent issue in London, namely, round 92.

askatoon's School Bonds.

Saskatoon school board are considering the disposal of ıe remaining $125,000 worth of bonds of an issue of 175,000. These will have to be sold within a month, or the ork on the new Buena Vista school will have to be postoned. Following the announcement of Messrs. Wood, undy and Company, Toronto, that it would be impossible dispose of the Saskatoon school bond issue at 93½, as at rst planned, the board decided to dispose of $25,000 at 90 possible. Word was later received that a sale of $50,000 orth of the bonds could be arranged, and Secretary Bate rocured the permission of the board members to forward intructions for their disposal at that price.

The city solicitor has advised the New Westminster city ouncil that the city cannot legally raise the interest on last ear's unsold local improvement debenture bonds from 4½ 5 per cent. This opinion does not apply to the other city onds, and the by-law to raise the interest rate so far as ıey are affected will be submitted.

Three bids were received for the $5,000 6 per cent. 20ear road debentures of Touchwood Rural Municipality No. 48, Sask. As previously noted, the offer of Messrs. Brent, Toxon and Company, Toronto, was accepted.

◆

The Parkes Construction Company, of North Tonawanda, .Y., will build a branch plant in Hamilton.

CANADA WILL FIND DIFFICULTY

In Floating Loans in London in View of Present Market Conditions

The Canadian Associated Press learns that attempts made to float a new Alberta loan in London have, so far, been fruitless. There appears to be a deadlock regarding new flotations which applies all round, particularly to Canadian propositions.

There is no feeling of actual alarm among well-informed city circles, but at the same time there are restless and uneasy symptoms prevailing.

The Dominion Glass Company is about to make an offer in London of $1,500,000 seven per cent. cumulative preference shares of $100 each.

New Listings on Exchange.

Applications have been made to list on the London Stock Exchange the following issues: Terminal Cities, $3,300,- Tramways, $2,890,000, 5s.; City of Moose Jaw, £257,700, fives, and City of Toronto, £114,300, fours.

The following issues have been listed on the London Stock Exchange: City of Quebec, £400,600 four and a halves, and the City of Maissonneuve, £187,600 fives.

It is stated in London that an important confidential meeting of international bankers was recently held, at which it was decided that dissensions that had been current during the previous week must cease at once.

It is reported that terms were arranged whereby future maturities will be met by powerful firms, but that no issues that are not absolutely imperative are to be made.

There may be some further liquidation later, but the opinion prevails in authoritative circles that the acute danger point is passed.

Changes in Prices.

During the past week the following changes occurred in Canadian securities in London:

Province of Alberta sterling, 1938, 4 per cent., 93-95.
Alberta, 10-year-old debentures, 1922, 93-95.
Dominion of Canada, 1909-34, 3½ per cent., 93-95.
Dominion of Canada, registered, 1930-50, 92-94.
Dominion of Canada, registered, 1938, 3 per cent., 83-85.
Newfoundland inscribed, 98-100.
Province of Nova Scotia, 1949, 3 per cent., 74-76.
Province of Nova Scotia, 1954, 3½ per cent., 83-85.
Province of Ontario, registered, 1946, 3½ per cent., 86-88.
Edmonton, 1915-48, 5 per cent., 92-94.
Montreal, 1942, 3½ per cent., 83-85.

◆

DEBENTURES AWARDED

Melfort, Sask.—$45,000.

London, Ont.—$764,500 debentures to Wood, Gundy and Company, Toronto.

Touchwood R.M., Sask.—$5,000 6 per cent., to Brent, Noxon and Company, Toronto.

Saskatoon, Sask.—$50,000 school debentures, to Messrs. Wood, Gundy and Company, Toronto.

Calgary, Alta.—$250,000 5 per cent. school debentures, to Messrs. W. A. Mackenzie and Company, Toronto.

LIFE INSURANCE LEGISLATION

An idea of how life insurance in the United States is "legislated," can be gathered from a report just issued by the Association of Life Insurance Presidents, with headquarters in New York, but which has Canadians on its membership roll. In connection with its legislative work this year, the association has examined 2,109 measures, presented in 42 legislatures, as compared with 1,250 in 1909 and 1,650 in 1911. General Counsel Robert Lynn Cox, in making his seventh annual legislative report to the association, states that this leap of nearly 70 per cent. in four years is accounted for partly by the natural expansion in purely life insurance bills and partly by the widening field of the association's work. The total number of laws enacted thus far this year directly affecting the business of legal reserve life insurance is 97, as compared with 94 at this time in 1911.

After digesting that record, Canadian companies should feel grateful that we have only one federal and nine provincial governments. Undoubtedly a craze for life insurance legislation is in full swing in North America, and those interested in life insurance, official, shareholder and policyholder, may well speculate as to where it will end.

Mr. R. W. Barton, A.I.A., writing in *The Monetary Times* recently on this subject, said: "Life assurance contracts from their very nature extend over a long term of years. The contingencies of twenty, or even fifty and more years hence, have to be provided for by a premium unalterably fixed to-day. Yet legislation of all kinds is continually being introduced without regard to this fact. Not only legislation which compels the companies to do this for their policyholders or restrains them from doing that and the other, but also in the form of taxation. Dominion and Provincial taxation we know; but what shall we say when even municipalities controlling villages of a few hundred people exact a $50 tax before the company can write business therein."

The state insurance experiments are another form of legislation affecting underwriting by corporations. All the time, however, governments conduct their life insurance business on unbusinesslike lines, little real competition may be feared. State life insurance is spreading in the neighboring republic. Twenty-five bills, nearly all of them following almost word for word the Wisconsin Act of 1911, were introduced in 14 states. Up to the time of the report of the Association of Life Presidents, 13 legislatures in which 23 of these bills had been introduced had adjourned without any of them being enacted into law. The two bills still pending are in the Illinois legislature. In no instance did the association offer or present any opposition to such legislation, nor did any life insurance men do so. It would seem, therefore, from the result noted, that there is at present no demand on the part of the people generally for state life insurance. Doubtless this fact is largely due to the low rates offered by the privately managed companies in the United States and Canada. The mutual character of this business, with its keen competition and its thorough state supervision, guarantees a continued low-priced service to the people. In Illionois, in addition to a bill along the line of the Wisconsin Act, there is pending a measure establishing a state life insurance bureau and providing for compulsory assessment insurance by all residents of the state twenty-one years old and upwards. In the meantime, the Dominion Government is puzzling its legislative head as to how to sell a respectable lot of annuities.

MUNICIPAL FINANCING

Time is well spent in discussing municipal financing in this country. Our civic authorities have not always given their best thought to the important subject. Economy has not invariably been the watchword. Methods have not been any too well considered. Debenture issues have covered too long a period. Municipal accounting has been lax. Proper sinking fund provision has not been made. Towns and cities, both in the east and west, may well examine their position. Alderman Wickett, of Toronto, recognizes the position, and this week, in well-reasoned argument, he replied to the question, "Why are Toronto's finances not altogether satisfactory?" In contrast with the United States practice, he said, there seems to be in Ontario municipal egislation no recognized standards as to what may be charged to capital and what must be met by annual revenue. "Anything may be charged one way or the other, according as the provincial Act directs. But, acking as we do (compared with England, after which our system is modelled), adequate machinery for supervising municipal bills, our financial acts are often very oosely drawn and loose practices result as regards items charged up to capital and to revenue. The further fact hat, compared once more with the United States practice, we have a wide margin for municipal debenture ssues, makes the situation worth careful consideration. For example, a by-law of 1906, covering a forty-year ond issue of $700,000 for fire purposes, included $208,oo for such short-lived things as fire engines, heaters, re alarm system, renewing and changing the old system, ngines and pumps—none of which have a lifetime of ver, say, twenty years."

A glaring defect in Ontario's local improvement act ompels the city of Toronto to postpone a local improvement debenture issue until the actual final costs are fixed. Decision on this point may not take place for several ears, and in the meantime work goes on and the city as to finance it by temporary loans from local banks t between 5 and 6 per cent interest. To-day Toronto is orrowing about $3,000,000 on this basis. Clearly, says Mr. Wickett, the city which guarantees all issues, hether general or local, should have the power to fund l locals, allocating the various parts as the final costs re fixed, a power which railways, for example, find bsolutely essential. The allocating of the money would e merely a matter of civic bookkeeping. Under such rcumstances the city would be relieved of making such erious and expensive calls as it is now compelled to do n local banks from time to time.

Mr. Wickett shows that in Toronto's endeavor to eep down the tax rate regardless of the debt, a number unfortunate practices have crept in. The city has:—

(a) Absorbed the Street Railway revenue and issued ebentures to cover street railway pavements.

(b) Absorbed the revenue from the Exhibition and sued debentures to pay for roadways and other temrary structures there.

(c) Met an important part of our roadway repairs by benture issues; also such accidents as break in water take, etc.

(d) Made use of extraordinary revenue for ordinary rposes. Thus this year the amount transferred from e proceeds of land tax sales, which must be looked upon a very special source of income, was no less than 45,019.

(e) So pared appropriations as to force overdrafts. is year, within a fortnight after the estimates have en completed, a substantial deficit is already in sight.

(f) In order to keep down the annual charge for nking funds, made use as usual of forty-year bonds for actically all general items from the proceeds of fortyar bonds, instead of adjusting the term of the bond to e approximate life of the work.

Obviously, there is need of some decision covering practices. All other cities in Ontario are limited to thirty-year bond issues—Toronto alone has the power to issue up to forty years, but it surely was never intended that Toronto should resort to this maximum period for all classes of its general work.

Many other points are dealt with by Mr. Wickett in his pamphlet, which those interested in municipal finance, other than in Toronto, too, may peruse with advantage. Municipal financing has become so important in this country that it needs the devotion of much time, thought and reform. In the eight years since 1905, Canada has sold municipal bonds aggregating $236,611,197, as follows:—

1905	$ 9,031,160
1906	9,087,008
1907	14,430,540
1908	46,461,021
1909	36,278,528
1910	35,748,690
1911	47,159,288
1912	48,414,962
	$236,611,197

With the handling of millions of debentures every year, the duty to the ratepayer and to the investor in municipal bonds, is plain. We must bring municipal financing in Canada to the point where criticism does not hurt.

MONTREAL'S TRAMWAY SERVICE

The agitation for a better street railway service in Montreal has been revived. Montreal no longer knows what to think of the situation. To some extent the agitation has resolved itself into a conflict between two newspapers. One of them continues to call upon the city council to do something, and in this there would seem to be considerable justification. The paper which heretofore has done most to bring the matter to a head still accuses the railway of negligence in doing what it could, but it also takes the city government to task for its share in the unsatisfactory condition of affairs.

What the city of Montreal knows is that it is getting a poor service from the street railway company. It knows, too, that the president of the Tramways Company a considerable time ago approached the city government with its proposals for a better system, and, among other things, asked for a number of new streets upon which to lay rails. The controllers referred the matter to the city engineer and an expert engineer to have a report prepared on the best means to improve the service. The civic board of control has had the matter in hand for some time, and apparently is responsible for the present delay, and may even have been responsible for other delays in past years. There are certain unsatisfactory features in connection with the manner in which the entire matter has been dealt with at the city hall. It may be that the blame should rest mainly upon the Tramways Company, but if so, the city hall has certainly never made this clear to the citizens—all of which is not said for the purpose of removing responsibility and blame from the Tramways Company, but rather for the purpose of drawing attention to certain phases of the problem.

ST. LAWRENCE MARINE INSURANCE RATES

In view of the recent controversy regarding the insurance rates on cargoes between Canada and the United Kingdom the following figures, compiled from official statistics prepared by the Government, are submitted, from which it will be noted that the rates in 1900 were over double what they were in 1912. There has been a gradual drop in the rates since 1900, and, comparing these in periods of six years, the results are as follows: The average insurance rate via Montreal to United Kingdom by first-class steamers was in 1900, 56c. per $100; in 1906, 32½c., and in 1912, 25½c. The reduction in 1912 on the 1900 rate is 31½c. per $100, or over 56 per cent.

The average insurance rate by tramp steamers via Montreal in 1900 was 1.15 per $100; in 1906 this had been reduced to 95c., and in 1912 the rate by tramp steamers via Montreal averaged 61c., showing a reduction on the 1900 rates of 54c. per $100, or equal to 47 per cent.

The rate by first-class steamers via New York in 1900 was 20c. In 1906 this had dropped to 17½c., while in 1912 the New York rate was 15c., a reduction on 1900 rates of 5c., or equal to 25 per cent., from which it will be seen that a reduction in rate via Montreal covering the period between 1900 and 1912 was proportionately greater by 50 per cent. than the reduction via New York during the same period.

PORK AND PROSPERITY

When the bankers of New York State were enjoying pork and beans at the "shanty" lunch at Ottawa last week, they did not know of the pork treats Canada is being promised. Listen to the solemn words of Mr. W. J. Egan, Canadian trade commissioner at Manchester, England: "It has been common report for some time in Manchester," he says, "that Chinese pork is being converted into bacon and ham, and placed on the market under various names. For some time, the authorities prohibited its entry, and later established regulations, the most important of which was that the pork would not be admitted with the glands extracted. These regulations are being met by the importers. Chinese pork arrives in England chilled, and is then cured and sold under different names. First it was called 'Manchurian,' afterwards 'Siberian' and 'Russian' bacon. It is now being cured and made up in American cuts for different local trades and shipped to customers packed in American cases.

"When inquiry was made by Commissioner Egan, the term used by the wholesalers who handled it was Continental bacon. So far no cases have been reported of imitating Canadian cuts, but even if such were done, the meat would be easily detected by its coarseness and extremely thick rind, which is as tough as leather.

Now, while Chinese pork is being loaded in this way, Mr. H. H. Blanchet, of the Vancouver Board of Trade, is predicting that the day will come when the Peace River country will supply all the pork and bacon to Japan and China as soon as mixed farming is adopted in Western Canada—"as soon as the Orientals adopt western ideas and tastes and become more prosperous."

Having thoroughly digested the feast of oratory at Ottawa last week, and incidentally the "shanty" lunch, the bankers may be able to consider and confirm what looks like a new economic theory, viz., the inverse ratio of pork and prosperity. When North America is swelling with prosperous pride, the Chinese are selling us pork "in American cases." When China becomes inoculated with prosperity, Mr. Blanchet threatens to send them Canadian pork, no doubt "in Chinese cases." These commercial intricacies need careful watching lest a "shanty" lunch may develop into a fearsome banquet.

RAILWAYS AND FREIGHT RATES

North Battleford is trying to decide which it prefers, freight rate reductions or more railways. A circular was received conveying a resolution prepared by the Winnipeg Board of Trade calling on the boards of trade of Western Canada for endorsation. This resolution was conceived at the time that the Canadian Northern Railway was conferring with the government regarding additional financial subsidies and assistance. The Winnipeg resolution called on the government to force the Canadian Northern Railway to reduce their freight rates west of Port Arthur and place Western rates on an equality with the East.

Not only did the North Battleford board of trade oppose this resolution, but they also forwarded a resolution to the government drawing attention to the urgent necessity of additional railway development throughout Western Canada, and encouraging railways to double-track their existing trunk lines, of improving the roadbeds and of building many thousands of miles of branch lines. It is reported that, owing to the lack of railway facilities, there is a large quantity of grain from last year's crop still lying in the West, many farmers still being such a distance from a railway line as to cause the cost of wagon haul to be as high—if not more than—the existing freight rates from the point of loading to the head of the lakes. The North Battleford board of trade take the stand, therefore, that it is not opportune to instigate an agitation for lower freight rates and "everlastingly worry and hamper the railways," but that Western Canada, above all things, requires much railway development to enable it to reach the maximum efficiency in being the granary of the British Empire.

The Monetary Times thinks, too, that it is unwise to worry and hamper the railways. But supposing North Battleford gets all the railroad facilities it wants—and high freight rates, too?

SMALL CHANGE

Tight money always gives way to the fishing trip.

MONTREAL POWER ON TEN PER CENT. BASIS

Dividend and Price Reduction Record of the Company Has Been a Good One

Monetary Times Office,
Montreal, June 18th.

The long-expected declaration of the ten per cent. dividend on Montreal Light, Heat and Power Company has been made. The directors met in Montreal on Monday and declared a quarterly dividend at the rate of 2½ per cent., payable August 15th, to shareholders of record of July 15th. The price of the stock has already discounted the increase and when the declaration was announced, the quotation showed practically no change as a consequence.

It is only a few weeks since the annual meeting of the Power Company took place, when the shareholders authorized an increase in the company's capital stock of $5,000,000. It was decided to issue $1,700,000 of this amount to shareholders, at par, in addition to $100,000 to employees, at the same terms as to shareholders.

Rights to Shareholders.

In this, alone, it was considered that shareholders were being given rights equivalent to $10 per share of stock held by them, inasmuch as the current selling price of the stock is about $210, and the new stock is being issued in the ratio of one new to each ten old shares held. If the value of the rights be deducted from the present selling price of the stock, it will be found that the cost of the stock per share is about $200. As the dividend is now on a 10 per cent. basis, purchasers of Montreal Power stock at present prices will be receiving a return of 5 per cent. per annum on their money. This s a good return, when it is remembered that Montreal Power s a public utility company in control of the distribution of he great bulk of the electric current which comes to Montreal.

The company has for some years treated its customers nore generously. Several voluntary reductions in the price of gas and electricity have been granted and the latest occurred just before the announcement of the new stock issue nd the present dividend increase.

The record of dividend increases of the company is as ollows:—Paid 4 per cent. from 1902 to 1906; paid 5 per cent. n 1906; increased to 6 per cent., beginning August 15th, 1907; ncreased to 7 per cent., beginning August 16th, 1909; increased to 8 per cent., beginning February 15th, 1911; increased to 9 per cent., beginning May 15th, 1912; increased to o per cent., beginning August 15th, 1913.

Price Record of the Stock.

In the recent market weakness, the stock fell as low as 205¾. Subsequently it recovered to 212. The high point vas in 1912, when the stock sold at 242½. The low point of 912 was 187. During this year, the price has been as high as 40. The general feeling is that at present prices the stock vill return to purchasers a good profit, inasmuch as the company has the distribution of all the Shawinigan power which omes onto the Island of Montreal, in addition to which it has part ownership of the new Cedar Rapids Power, and has a lose alliance with the Shawinigan Company.

◆

MANITOBA INSURANCE RETURNS

The seventh annual report of Manitoba's energetic inspecor of insurance, Mr. A. E. Ham, shows that at December 31st, 912, there were 142 registered insurance companies and 68 icensed companies doing business under the Manitoba Insurnce Act.

The registered companies were as follows:—Fire insurnce companies, 66; fire and life insurance companies, 5; life nsurance companies, 35; Guarantee, accident and plate glass nsurance companies, 25; registered mail insurance companies, 2; fraternal societies, 4; steam boiler insurance companies, 1; weather insurance companies, 1; live stock insurnce companies, 1; inland marine insurance companies, 2.

The results obtained by those companies registered in Manitoba and holding Dominion licenses were as follows:

	Premiums.	Losses.
ire and Marine	$2,260,572	$933,579
Hail	2,278	2,043
ife	2,935,359	648,634
uarantee and Accident	530,300	302,607
ive stock	6,005	3,473
utomobile	52,650	25,015
	$5,788,114	$1,913,341
he licensed companies results in Manitoba were	706,144	357,013
	$6,494,258	$2,270,354

GOOD NEWS FROM PRESIDENT PLUMMER

He Predicts Increase of Eight Hundred Thousand Dollars in Net Earnings This Year

Monetary Times Office,
Montreal, June 18th.

The annual meeting of shareholders of the Dominion Steel Corporation was held here to-day. Mr. Plummer announced that, in his opinion, the company would show an increase of $800,000 in net earnings during the current year, as compared with the past year.

Although the above prediction was probably the most pleasing feature of the meeting, it was equally interesting to learn how President Plummer reached his conclusion. He said that for years the company had made extensions, the early provisions of the company being altogether inadequate to the demands which had arises for its products. These extensions had been more costly than had been anticipated, owing to the advancing cost of construction. Construction had now been completed. All the departments were operating and no new building would be undertaken.

Suggests Tariff Change.

He contended that the Government should do something more for the industry, referring to the anomoly in connection with the manufacture of wire rods, which the company was compelled to turn into wire nails as it was unable to sell them in competition with foreign rods. There was enough nail machinery in the country to supply all demands and if some adjustment was not made in the tariff, it would force the company into competition with those to whom they would sooner sell the wire rods. He thought it would be better to encourage manufacturing in the country than to import the goods and thus swell the foreign indebtedness. Speaking of the manner in which the iron and steel imports had grown during the past few years, he said that in 1909, the total imports amounted to $7,234,116, while last year they amounted to $28,331,349. This included only the less finished goods.

The company has 29 steamers in operation and recently finished a new dock at Sydney Harbor. Hereafter, Mr. Plummer expected the company to make a better showing, the extensions and new construction of the past having been a disturbing factor. This is removed by the completion of the company's plant. The directors were re-elected.

Many New Cars Bought.

Mr. Plummer further said:—"A good deal of money has been expended on our railways for additional trackage and equipment—we have bought many cars for the coal service during the past three years—and the shipping and handling facilities have been improved. The increase in the total output is a distinct achievement. It is not merely a question of mining the coal, it must be taken away from the pit's mouth when mined, it must be taken promptly from the cars which move it, and water shipments must keep pace with production. If our supply of vessels outruns production beyond a reasonable margin of safety, our shipping costs go up; if it falls short some of the mines may be shut down. Any shortage of hauling power, of cars, or steamers, or any interruption in the moving of the coal, leads at once to reduced production and increased costs.

"As regards steel: we have now our six blast furnaces, of which we aim to keep five steadily at work from year's end to year's end, and we have coke ovens of sufficient capacity to supply the five fully. The steel plant, blooming mill and billet mill are commensurate with the amount of pig iron to be converted, and in the rail mill, rod mill, bar mill, wire mill, and nail mill we have power to finish in these forms all the steel which our present plant will produce. We have, in fact, reached the well-balanced position for which we have been working for the last three years."

◆

CANADA LIFE'S NEW TREASURER

Mr. E. M. Saunders has been appointed treasurer of the Canada Life Company. This office which was rendered vacant by the death of Mr. H. L. Watt, will be assumed by a banker of experience, who in addition to his long training in financial matters, has had very exceptional opportunities for studying conditions in the Canadian West.

Mr. Saunders received his education at Dalhousie College. In 1886 he joined the staff of the Canadian Bank of Commerce. He spent fifteen years in eastern Canada in the service of the bank, and eleven years ago went to the west where he has represented the bank as branch manager at Moosomin and Moose Jaw, and, until the present time, at Calgary.

Under the direction of Mr. Saunders the company should have continued success in its investment matters.

THE SITUATION AND THE OUTLOOK

II.

LIFE INSURANCE PROSPECTS ARE GOOD

Money Market Condition Has Afforded Opportunity for Investment of Funds at High Interest Rates—Policy Loans

BY ARCH. R. HOWELL.

It is not in the nature of things that the value of capital shall long remain unaltered. It ebbs and flows. Its position is continually shifting under the impulse of far-extending influences.

ARCH. R. HOWELL,

Well-Known Montreal Underwriter Who Predicts That This Year's Life Insurance Business Will Constitute a New Record.

The low rates of interest and high value of capital which prevailed some years ago, have been exchanged for high rates and low values. This movement seems to have resulted mainly from destructive political disturbances on the one hand, restraining the freedom of supply, and to intense activity in commercial development on the other hand, which has increased the demand.

So sturdy is the vitality of a life insurance company that it can withstand without quivering, the shocks and strains which may damage or destroy other financial institutions. Though the skies may be unpropitious or the gales may be violent, a well-ordered life insurance company will still flourish. Life insurance is independent; its existence does not depend upon the continual inflow of new business. It will maintain its strength and vigor to the end, even though it may not enter another new policy on its books.

The present state of money, which has been trying to many individuals and so embarrassing to the promotion of new enterprises, has presented an opportunity for the favorable investment of funds at high rates of interest. This benefit will be of great future value to life insurance companies and their policyholders.

The organization of a well-established life office is too deeply rooted to be dissolved by conditions that might be far less favorable than the present ones, and in all likelihood, it will be found that this year's new business of life insurance has been greater than ever in Canada, financial conditions notwithstanding.

BY CANADIAN UNDERWRITERS.

The officers of life insurance companies are agreed that the current year will be a good one for the business. The financial stringency apparently has not affected the volume of new business being written, or the premium income to any appreciable extent. Unless conditions become much less favorable, life insurance managers do not apprehend any great deviation from normal growth.

The condition of the money market has afforded an opportunity to the insurance companies for the excellent investment of funds at high rates of interest. That is one of the few favorable features created by the stringency.

Among the adverse factors is the increased demand upon the life insurance companies for loans on policies. The following figures show the loans and premium obligations upon policies of the Canadian life companies since 1901 and the proportion such loans and obligations bear to the companies' funds:

Year—	Amount.	Proportion.
1901	$ 6,437,682	9.7
1902	7,044,111	9.6
1903	7,942,580	9.7
1904	8,812,029	9.7
1905	9,679,244	9.4
1906	11,001,446	9.7
1907	14,057,512	11.2
1908	16,750,846	12.1
1909	18,409,651	12.0
1910	20,400,223	12.3
1911	32,060,040	12.0

Prospects Are Good.

When the official statistics are available, it will likely be seen that the figures of previous years have been considerably exceeded. Altogether, however, the prospects of the life insurance in Canada are unusually good.

Unquestionably, sound life insurance is growing in the estimation of the public, and the advantages thereof are being more generally availed of by all classes than was the case some years ago, writes Mr. J. S. Richter, manager of the London Life Insurance Company. As regards legislation affecting insurance interests, it is impossible to say what may be introduced hereafter, but in recent years and at present, legislators seem disposed to take a reasonable view of the question, and encourage rather than hinder the growth of the business.

The Mutual Life Assurance Company of Canada, of Waterloo, is one of the companies which up to the present have never experienced a more favorable year. The new business written is considerably in excess of any previous year, and the prospects are that the present rate of progress will be continued for the remainder of the twelve months. While the money stringency has expressed itself to some extent in an increased call for policy loans the effect has not been at all marked nor has there been a noticeable difficulty in making collections.

Will Be Unique Year.

On the other hand, the tight money condition has made it possible to invest all available funds to yield very attractive returns. In this respect the current year will probably be unique. Not for years has it been possible to keep funds so closely invested in the highest class of securities yielding such high rates of interest.

There appears to be nothing on the legislative horizon to cause life companies any anxiety and the year promises to be one of the best in the history of the business, concludes Mr. Ruby, the company's secretary.

Mr. T. H. Christmas, the well-known insurance man of Montreal, thinks that although the life insurance companies have secured a satisfactory volume of new business thus far for 1913, the immediate future is not rosy owing to stringency of money, which will cause many intending insurers to defer making application—unless there is a change for the better in this respect.

Notwithstanding the large sums already entrusted to the life insurance interests for the protection of old age and dependants, the business is bound to attain still larger proportions as men learn to think, for very many are not adequately insured for no other reasons than that they have not, as yet, been influenced to place a reasonable monetary value on their future earnings, which the State, their own estate, or deendants will lose in the event of death; or, the possible bligation of taking care of old men (themselves) should they urvive.

Crop Conditions Favorable.

Dealing with the Western insurance field, Mr. J. W. W. Stewart, managing director of the Monarch Life Insurance Company, Winnipeg, says that the first question of importnce there is the condition of the crops. Reliable reports rom various sources are favorable. The public will buy life ssurance more intelligently this year because of financial onditions. Mr. Stewart has no doubt that the total will be onsiderably increased. The result, however, will be the outome of more expert, hard work on the part of the represenatives of the various companies.

The business of the Monarch Life Assurance Company hows a considerable increase over last year thus far, and leath losses at present can be numbered on one finger.

◆

EFFECT OF MONEY TIGHTNESS ON LIFE INSURANCE

ncreased Business Likely—Legislators are Hard on the Life Underwriting Business

BY WILLIAM WALLACE.

It may appear paradoxical, but it will be found, I fancy, hat the present "settling-down" conditions in Canada will e both good and bad for the business of life insurance. Good—because it will bring the average business man to immediate realization that, after all is said and done on the subject of speculation in stocks and real estate, a good life insurance policy is the surest, safest, and soundest investment for himself and family. Bad—because the present money stringency will prevent many a man from paying for additional insurance investments, which he ought to have, not only for protection of those dependent upon him, but to provide for himself when his earning power is gone.

WILLIAM WALLACE,

General Manager, Crown Life Insurance Company, who says our legislators are discriminating against life insurance in the matter of taxation.

Balancing the good against the bad, life insurance companies can count, I think, upon increased business this year, although perhaps the increase may not be as large as was expected after such a good year in 1912. After all, like everything else, quality and not quantity is what counts in the life insurance business.

Better Appreciation of Value.

The tendency will be toward a better appreciation of the value of life insurance on the part of the public, and perhaps the business secured this year will have sufficient of the "quality of persistency" to stay on the books and reduce the great economic loss, which has been going on from year to year in the wasteful lapse of life insurance that should be kept in force.

Our legislators continue to discriminate against life insurance in the matter of taxation. They are taxing the savings of the people in life insurance in a way that they would not dare to tax the savings of the people in cash in the banks, or in any other form of savings.

Investments of Life Companies.

Yet the money entrusted to life insurance companies, perhaps more generally than any other class of investment funds, goes directly into Canadian municipal debentures and into first mortgages on real estate, rural and urban, and in this way life insurance funds accomplish quite as much in the building up of the country as any other part of the people's savings, available for this purpose. Unfortunately, almost every act of legislation, provincial and federal, passed recently, affecting life insurance, has either by direct (and sometimes double) taxation or by new regulations involving extra labor, increased the cost of conducting the business so that the thrift of the people in life insurance savings is being most unfairly penalized.

◆

WINNIPEG STOCK EXCHANGE.

The annual general meeting of the Winnipeg Stock Exchange was held in the board room of the exchange recently. The chairman, Mr. W. Sanford Evans, presided.

The election of officers for the ensuing term resulted in the retiring board being re-elected as follows:—Messrs. W. Sanford Evans, chairman; W. T. Kirby, vice-chairman; T. R. Billett, secretary-treasurer; H. T. Champion, A. M. Nanton and A. P. Cameron, managers. Geo. S. Laing, of Messrs. Turner and Laing, was re-elected auditor for the ensuing term of office.

The secretary's report indicates that the number and value of transactions in securities on the official list constitute a high record—10,859½ shares being traded in during the period, having a market value of $869,789.25, compared with 6,358 shares with a value of $619,107 for the preceding twelve months, or an increase of over 4,500 shares, and in cash value of $250,682 The average high is 139, and the average low 129.

In the unlisted section, sales of 292 shares were made, the value of which totals $19,503. These figures are about $16,000 less than the previous year's, which is to be expected in view of the fact that each year finds a few of the issues previously included among the unlisted stocks, added to the official list.

Transactions in mining shares were 92,650, with a cash value of $12,399.25.

South African warrants were not extensively dealt in, only 49 sales amounting to $45,395 being effected on the board.

The issues of the following companies were officially listed during the year:—Northern Canadian Mortgage, Union Bank of Canada, Occidental Fire and Northern Crown Bank (additional issue of approximately $800,000). The auditor's report shows a net profit for the year of $1,437. The funds of the corporation, amounting to $8,000, are invested in first mortgages, and $1,000 in agreements for sale. The cash in the current account with the Bank of Montreal, and on deposit with the Home Investment and Savings Association, together with accrued interest, amounts to $3,304.

TWO INDUSTRIAL HUSTLERS

Here are the industrial census figures of Canada and the United States. Canada has taken the lead in percentage increases:—

Canada

	1900.	1910.	Inc. %
Industrial establishments . . .	14,650	19,218	31
Capital	$ 446,916,487	$ 1,247,583,609	179

Wages	2,608,000,000	3,427,000,000	31
Materials	6,575,000,000	12,141,000,000	84
Products	11,406,000,000	20,672,000,000	80

FARMER AS TRAINED BUSINESS MAN

Is Aim of Assistance Given by Saskatchewan Government—Bookkeeping and Accounting

Some interesting tables are being compiled by the Saskatoon government from the returns received from farmers on the cost of farm implements. Some of the implement firms claim that there was an advance in prices in 1908, but that this advance fell back in 1912 to the prices ruling previous to 1908. However, the figures gathered should elucidate this point. The full conclusions will be published at a later date. The prices and figures generally have been obtained from representative farmers who were in a position to obtain the best quotations from the different firms, and there is no doubt that it will be found that both prices and interest obtained by homesteaders, settlers and others were by no means so favorable. The figures, however, will do all that was expected of them, that is to form a basis for the personal investigation of the commission on agricultural credit on its return from England.

In the same way figures have been obtained during the last few years regarding the cost of production of wheat, oats and flax. Hitherto averages only have been published, but the material now available after further investigation should prove of real value. In this connection we will mention the fact that a commissioner is personally investigating this question, and while of course guided to a great extent by the information in the hands of the department all of his data will be gathered by word of mouth from the farmers themselves.

New Departure for the Dominion.

Another effort to get to the exact state of affairs in regard to the financial side of farming is being made. A system of bookkeeping has been drawn up, and in order to stimulate interest prizes are offered to those who keep the best records during the next year. This system has been reduced to the simplest form, so that the veriest amateur can readily understand it. The educational value of this alone, apart from the valuable information which may be obtained, will certainly warrant the efforts of the department in this direction. While this is a new departure in Canada, and as far as is known in the States of the Union, it is not new in Europe, as in many countries, and notably in Switzerland and Sweden, a system of bookkeeping on the part of farmers is compulsory, and in some cases is utilized for purposes of assessment. At present of course the government does not require the information for taxation purposes, and the work will be undertaken wholly in the interest of the farmers themselves. It is hoped that from a small beginning the work will develop.

Economic Value of Importance.

Once such a system is established, it would no doubt become most popular, as there is not a farmer in the country who would not be glad to know exactly how he stands at the end of the year. Careful account keeping is one of the best methods of dealing with the farmers' problems. It is by this means only that the farmer will be able to learn exactly what branches of his business are profitable or otherwise, and having gained this knowledge, he can re-arrange his methods accordingly. The economic value of this is of extreme importance, and there is little doubt that the time is coming, if it has not already come, when farmers must be business men in every sense of the word, and must adopt the most up-to-date business methods.

Make Business Men.

In fact owing to the great variety of the work that may be undertaken a close system of bookkeeping is even more necessary to the farmer than to many other businesses. There is little doubt that eventually this subject will form an important part of the young farmer's education in all agricultural colleges. It is indeed just as important as many other technical parts of his training that have already been undertaken, because it is the one means that is going to take him out of the old haphazard methods, and induce him, by the logic of figures to adopt measures which will be more likely to lead him to success. It will also cause him to study his marketing and other conditions and make him in every sense of the word a trained business man.

CANADIAN VENEZUELAN ORE COMPANY'S BONDS.

At the meeting of the shareholders of the Canadian Venezuelan Ore Company, an additional issue of $500,000 bonds was sanctioned, making the total amount outstanding $1,500,000. The present mortgage makes provision for this additional issue. The proceeds will be used for the purchase of a tug, building barges, extending the tramway and purchasing additional machinery, to enable the company to operate economically the new deposits of ore.

CANADIAN PACIFIC RAILWAY'S WORK

Company is Busy with a Lengthy Programme in Western Canada

Despite the tight money conditions, the Canadian Pacific Railway continues to forge ahead with its development plans. The company are placing settlers on ready-made farms in the western provinces—something, by the way, Northern Ontario will have to do. They are providing the settlers with buildings and machinery and educating them to the advantages of mixed farming. On the Pacific Coast, the company are erecting a handsome new depot for Vancouver. At that port also, a large amount is being expended on harbor improvements. The work of double tracking through the Rockies has also begun and the new high-level bridge at Edmonton has just been completed.

Big Bridge at Edmonton.

This bridge is the third of its kind built by the Canadian Pacific Railway, the other two being the viaduct at Lethbridge, Alta., one mile long, and the recently completed viaduct at Outlook, Sask., over three thousand feet in length, the latter opened for traffic in 1912. The length of this bridge at Edmonton between abutments of north and south approaches is 3,560 feet. The extreme height above mean water level is 153 feet, while the piers are 10 feet high. The bridge consists of an upper and lower deck, the width of the upper being 32 feet and that of the lower 43 feet. The upper deck will carry a railway track and double street car tracks. The lower will be used for vehicular and pedestrian traffic, the sidewalks having a clearance of 8 feet and the roadway 23 feet.

GEORGE BURY

Energetic vice-president of the Canadian Pacific Railway, in charge of the lines in Western Canada.

Long List of Improvements.

Mr. George Bury, the vice-president in charge of the Canadian Pacific Railway's western lines, tells *The Monetary Times* that a lengthy programme of improvements has been projected for the western provinces this year. The following is a summary of the more important:—

Fort William: Six stall addition to roundhouse; increase storage capacity of elevator D to four million bushels; increase size of freight car repair and workshops. Kenora: Six stall addition to engine house. Sutherland, Sicamous: Additional trackage facilities. Vancouver: Complete new terminal station and wharf; additional trackage facilities False Creek yards. Dunmore: Additional trackage. Calgary: Automatic block signals between Ogden and Sunalta; passenger coach house with ice house, coal shed, etc. Alyth: Six stall addition to roundhouse. Strathcona: Increased trackage facilities: overhead bridge at Anthony Street. Edmonton: Increased trackage facilities. Wetaskiwin: Increased trackage facilities; extension to express room. Lacombe: Two stall addition to roundhouse; fifty feet additional to freight shed.

INVESTMENTS AND THE MARKET

lews and Notes of Active Companies—Their Financing, Operations, Developments, Extensions, Dividends and Future Plans

Dominion Power and Transmission Company.—This ompany is considering the erection of a million-dollar uxiliary steam plant.

Guarantee Company of North America.—The usual uarterly dividend of 2½ per cent., payable July 15th, was deared by the directors of the Guarantee Company of North merica, at their meeting.

Dominion Steel Corporation.—The Dominion Steel Corporation's May returns were as follows: Coke, 57,405; pig on, 33,745; steel ingots, 31,020; blooms, 27,510; steel rails, ,145; rods, 3,925. Total shipments, 24,835 tons.

Nova Scotia Steel and Coal Company.—The Nova Scotia teel and Coal Company made a record for May with the roduction of 73,450 tons of coal, 79,540 tons of pig iron, 855 tons of steel ingots and 37,804 tons of ore, product of nishing mills, 6,665 tons.

Northern Ohio Traction and Light Company.—For April orthern Ohio Traction and Light Company shows net earnngs of $83,925, a decrease of $9,690 over a year ago. For e first four months of 1913 net earnings total $347,321, or decrease of $6,412 over 1912.

Cape Breton Electric Railway Company.—The total railay earnings of Cape Breton Electric Company, Limited, for e seven days ending June 7th, 1913, and for the correspondg days of preceding year, were:—1913, $5,354.40; 1912, $5,-8.52; increase, $185.88.

Spanish River Pulp and Paper Company.—Speaking of e decline in Spanish River to 44, Vice-President Watson aid that the drop in the stock in no way reflected the ompany's condition, since the plants were operating fully nd profitably, and the annual statement, based on the year nding June 30, would be very satisfactory.

A. Macdonald Company.—The sales of the A. Macdonald ompany for May, 1913, show an increase of 16 per cent. over ay, 1912. This is in spite of the fact that May is the dullest onth of the year in the wholesale grocery business. The onthly increases in sales since the reorganization of the comany indicate that the estimate of total sales for the year nding with March, 1914, of $8,000,000 was conservative.

Kaministiquia Power Company.—According to the stateent of Kaministiquia Power Company for the half-year to pril 30, the company is earning at the rate of about 8 per ent., or 3 per cent. better than dividend requirements. Gross arnings are $146,249, compared with $120,928 in 1912. Net arnings show: 1913, $125,619; 1912, $102,862. Surplus, 913, $84,164; 1912, $60,788.

Mexico Tramways Company.—The Mexico Tramways ompany statement of earnings and expenses from traffic nly, as advised by cable, for the month of May, 1913, shows Mexican currency the following results:—

	1912.	1913.	Increase.
Total gross earnings ..	$559,832	$595,795	$35,963
Operating expenses ..	268,725	276,330	7,605
Net earnings	$291,107	$319,465	$28,358

Riordon Pulp and Paper Company.—The Riordon Pulp nd Paper Company have decided to build a new and up-toate sulphite plant in Northern Ontario, with a capacity of 0,000 tons per annum. The plans are now being prepared nd the ground will be broken in April next, and the comany will be manufacturing early in 1915. This company ave at the present time a capacity of some 50,000 tons of ulphite pulp in their Hawkesbury and Merritton mills and vhen their new Northern Ontario mill is completed they will e the largest capital fibre company in the world.

Nipissing Mines, Limited.—During May the Nipissing Mining Company mined ore of an estimated net value of 284,625, and shipped ore of an estimated net value of 280,244. Prospecting by hydraulic continues to be done in he area between the high and low grade mills. Two veins vere encountered during the month. One of these may be he extension of vein 43, and although assaying low in silver about 68 ounces the vein is strong, and shows as high as inches of cobalt The other vein also shows cobalt, but not o strong. Both of these will be tested in several places. The hydraulic is now being operated twenty-four hours daily. The high-grade mill treated 129 tons of ore and shipped 460,353 fine ounces of bullion, having a net value of $276,748. Of this amount 162,381 ounces were produced from low-grade mill precipitates. The low-grade mill treated during the month 6,544 tons.

La Rose Consolidated Mines.—La Rose Consolidated Mine statement for May shows profits of $84,407, compared with $75,044 in April. The total for the five months of the year is thus brought up to $388,628.

The surplus is shown to be $1,752,150, of which $1,-439,447 is cash and $239,682 in outstanding shipments. Ore on hand at mine ready for shipment is worth $73,021.

The production for the month was $209,758 ounces of silver, of a value of $115,855, giving, with a sundry income of $11,709, an income for the month of $137,564. With a deduction of $53,157 for marketing expenses, concentration, etc., the net profit was $84,407.

The directors declared the usual quarterly dividend of 2½ per cent., payable July 20, of record June 30.

Duluth-Superior.—Messrs. A. E. Ames & Company have issued the following explanation of the dividend cut of one per cent. on Duluth-Superior stock. Mr. Ames is vice-president of the company.

"The reduction was felt to be wise in view of the company's cash position having suffered because of the strike last year, which continued for about two months. The directors considered that it was in the interests of the shareholders to maintain the company's financial strength.

"The reserve funds and undivided surplus at the end of last year totalled $767,000, of which $273,000 was invested in outside securities; this fund, however, being available only for new construction. General conditions in the cities of Duluth and Superior are good, and the United States Steel Corporation have a force of 1,000 men employed in constructing their immense plant, which force is likely to be increased to 1,500 during the present year, after which the different manufactories of the plant should soon come into operation one by one."

Canadian Fairbanks-Morse Company.—Net profits of $390,303 is shown in the annual report of the Canadian Fairbanks-Morse, to which is added that brought forward from 1911, $307,615, which gives a total of $697,919. From this was paid dividends of $177,114, leaving $520,805.

On December 31st, 1911, the company had outstanding $323,400 of 7 per cent. preferred stock and $1,571,700 common. During the year the 7 per cent. preferred stock was converted into 6 per cent stock, and an additional amount sold, bringing the outstanding issue up to $1,000,000 and a further small amount of common stock was also disposed of, the amount authorized and outstanding now being $1,600,000. The above figures showing earnings of over four times the amount required to meet the sum of $90,000 required for a full year's dividend on the preferred stock, was satisfactory, as the additional money obtained from the above-mentioned issues of further stock was available for only part of the year, and has not yet in fact become fully productive.

The general balance sheet shows the company to be in a good financial position. Surplus and reserve funds now amount to $677,487 and total assets, after deducting current liabilities, amount to $3,767,487, of which $2,918,583 was represented by liquid assets.

Montreal Water and Power Company.—Montreal Water and Power Company's annual report shows an increase of $165,180 in gross revenue for the year ending April 30th. Gross earnings are nearly five times what the company showed ten years ago, being $671,684.

In spite of a rise in operating expenditures, $70,546, part of which is due to the new filtration plant, gross profit for the year is $372,237, and with the net balance of $4,311 carried over from the previous year, gave the directors a total of $376,549, leaving a balance of $135,710 surplus profits.

The sum of $28,828 was set to reserve, in connection with various provisions of the company's bond debt: $8,000 for bad and doubtful debts, and $1,000 to reserve account for tolls, etc., leaving a balance of $96,881.

Deeds of trust securing the bonds of the company, declare that before the company can pay a dividend on either the common or preferred stock, the company shall provide a sinking fund of 1 per cent. on its outstanding bonds. The present balance, $96,881, is sufficient to pay sinking fund, and a dividend of 6 per cent. on outstanding preferred stock.

British Columbia Electric Railway Company, Limited.—The earnings and expenses of the British Columbia Electric Railway Company for April, 1913, as compared with those of the previous year, are as follows:—

	1913.	1912.
Gross earnings	$565,294	$470,058
Total expenses	367,044	302,135
	$198,250	$173,923
Less renewals maintenance	51,620	37,935
	$146,630	$135,988
Additional income from loans and investments	35,000	25,000
	$181,630	$160,988
Gross earnings from July 1st	$5,702,995	$4,759,517
Net earnings from July 1st after deducting depreciation and amortization	1,933,173	1,671,408

Mexican Light and Power Company.—The Mexican Light and Power Company, Limited's statement of combined earnings and expenses of the electric light and power services owned or controlled by the company, as advised by cable, for the month of May, 1913, is in Mexican currency as follows:—

Gross earnings:	1912.	1913.	Increase.
The Mexican Light and Power Company, Limited	$594,963	$646,317	$51,354
Pachuca Light and Power Company	114,081	138,915	24,834
Total gross earnings	$709,044	$785,232	$76,188
Net earnings:			
The Mexican Light and Power Company, Limited	$442,132	$502,468	$60,336
Pachuca Light and Power Company	59,124	79,898	20,774
Total net earnings	$501,256	$582,366	$81,110

The Porto Rico Railways Company, Limited.—The comparative statement of earnings of the Porto Rico Railways Company for May, 1913, shows the following results:—

For May:	1912.	1913.	Increase or decrease.	Per cent.
Gross	$75,720.82	$73,022.88	— $2,697.94	— 3.56
Net	25,138.61	32,346.66	+ 7,208.05	+28.67
For Five Months:				
Gross	$360,476.21	$363,120.81	— $6,355.40	— 1.72
Net	152,261.49	159,799.06	+ 7,537.57	+ 4.95

◆

TORONTO STREET RAILWAY DEAL

For a little more than $29,000,000, the city of Toronto may buy the Toronto Street Railway and the Toronto Electric Light Company. The offer was made in a written statement of Sir William Mackenzie to Mayor Hocken this week. Sir William Mackenzie says that he will sell to the city the street railway line within the limits of the municipality for approximately $21,500,000, including the franchises and all other assets of the Toronto Street Railway and the radials in the city limits.

He further states that he will agree to the terms demanded by Mayor Hocken and Controllers McCarthy and O'Neill with regard to the termination of the power contracts, and if the deal is effected the agreement by which the Toronto Power Company supplies the Toronto Street Railway with power may be cancelled by the city when the franchise expires in 1921, if the city so desires.

The purchase price has been slightly increased by reason of the fact that $2,000,000 has been spent on extensions and improvements to the plant of the Toronto Electric Light Company, which is $1,000,000 more than was anticipated.

The city council has voted $10,000 to be exepended in securing expert advice as to the value of the utilities involved in the proposed deal.

◆

The Riordon Pulp and Paper Company will establish a sulphite wood pulp manufactory in Northern Ontario, having a capacity of about 30,000 tons per annum. Building operations will start in April, 1914. The mill will be one of the most modern type. The Riordon Company has a mill at Hawkesbury, having a capacity of 45,000 tons, and the new mill will really be an extension of the business at Hawkesbury. The company's mill at Merritton, which manufactures about 25 tons per day of sulphite wood pulp, was damaged by fire in March, and the work of reconstruction is progressing rapidly, and will be completed on July 1st

PERSONAL NOTES

Mr. Charles A. Heninger, formerly with the National Union, has been appointed inspector of the Canada National for Ontario.

Mr. T. W. Greer, general manager of the Pacific Coast Fire Insurance Company, was a visitor to *The Monetary Times* office this week.

Mr. Gordon Phillips, assistant industrial commissioner at Winnipeg, received the appointment to the position of industrial commissioner of London.

Mr. T. J. Parkes, the well-known life insurance man, of Sherbrooke, Que., has been appointed an honorary corresponding secretary of the Royal Colonial Institute.

Dr. C. S. Wright, of the Scott Antarctic expedition, and son of Mr. Alfred Wright, chief agent in Canada of the London and Lancashire Fire, has reached Toronto.

Mr. Robert S. White, Montreal, collector of customs, has been appointed shipping master for Montreal port in place of Mr. William Cunningham, who has resigned.

Mr. H. C. Cox, president, entertained the head office staff, executive officers and directors of the Imperial Life Assurance Company, at his Oakville residence this week.

Mr. W. K. George, M.P.P., has been elected a director of Abitibi Pulp and Paper Company, Limited, who are constructing a ground-wood pulp mill at Iroquois Falls, Ontario.

Hon. A. L. Sifton, premier of Alberta, has secured on a five years' lease rooms in Trafalgar Building, Charing Cross, for the purposes of Alberta Government London offices.

Mr. Sidney Spitzer, of Messrs. S. Spitzer & Company, Toledo, Ohio, has made an extensive tour of Western Canada for investment purposes, making several purchases of municipal bonds.

Mr. V. A. Halford, the commercial manager of "Canada," has left England for an extended tour of the Dominion, in the course of which he will visit all the principal cities and towns, from the Atlantic to the Pacific.

Hon. Peter McBride, the new agent general for Victoria at London, England, officially took over this post recently from the Hon. W. L. Baillieu, who had been acting as head of the office since the departure of Sir John Taverner about two months ago.

Mr. W. Robins, who has been inspector for the Hartford Fire Insurance Company in the Province of Ontario, goes with the German-American Insurance Company as superintendent of agencies for Eastern Canada, succeeding Mr. Thomas C. Moore.

Mr. J. Fitzsimmons has been appointed general manager of the Quebec, Montreal and Southern and Napierville Junction Railways, both Delaware and Hudson Company lines; also general Canadian freight and passenger agent of the Delaware and Hudson Company at Montreal.

Mr. E. Tiffin, general traffic manager of the Intercolonial Railway, has been appointed general agent of Government railways at Toronto, the appointment becoming effective on July 1st, when Mr. C. A. Hayes takes over the office of general traffic manager of the Intercolonial Railway.

Hon. Martin Burrell, Minister of Agriculture, intends to visit the International Exhibition at Ghent, and will sail on July 3rd. While there he will confer with the exhibition commissioner, Mr. William Hutchison, concerning Canada's exhibits at the Panama Exposition in San Francisco in 1915.

Mr. Robert H. Treman, president of Tompkins County National Bank, of Ithaca, N.Y., was elected president of the New York State Bankers' Association; the new vice-president is Mr. James H. Perkins, president National Commercial Bank of Albany, N.Y., and the treasurer is Mr. L. W. Burdick, cashier of the First National Bank, Gouverneur, N.Y.

Messrs. Thomas H. Andrew, Harry A. Bell (Victoria), Melbourne F. Christie (Winnipeg), Maurice O. Crowell (Halifax), Richard S. Lake (Ottawa), George Ridout (Toronto), have been elected to the fellowship of the Royal Colonial Institute. The following have been elected associates: Mrs. Mulholland (Hamilton), Miss Mulholland (Hamilton).

Mr. A. G. Donaldson, who until recently occupied the position of manager of the Brandon branch of the Bank of British North America, has left for Canora, Sask., where he will assume the management of the branch office of the Union Bank of Canada. Prior to leaving for the west he was presented with a purse of gold. The presentation was made, on behalf of his business associates, by Mr. J. H. Hines, general manager of the Dominion Hardware and Lumber Company.

*Short tons throughout. (a) The metals copper, lead, nickel, and silver are for statistical and comparative purposes valued at the final average value of the refined metal. Pig iron, zinc ore, and cobalt oxides are valued at the furnace or spot, and non-metallic products at the mine or point of shipment. (b) Copper contents of smelter products and estimated recoveries from ores exported at 12·376 cents per pound, in 1911, and 12·738 cents per pound in 1910. (c) The total production of pig iron in Canada in 1911 was 917,535 tons valued at $12,307,125, of which it is estimated 875,349 tons valued at $11,693,721 should be credited to imported ores; in 1910, the total production was 800,797 tons valued at $11,245,622, of which 695,891 tons valued at $9,594,773 are credited to imported ores. (d) Refined lead and lead contained in base bullion exported at 3·480 cents per pound, in 1911; and 3·687 cents in 1910, the average prices in Montreal and Toronto respectively. (e) Nickel content of matte produced valued at 30 cents in 1910 and 1911. (Increasing quantities of nickel-copper matte are now being used in making monel metal which is sold at a price much below that of refined nickel.) The value of nickel contained in matte, as returned by the operators, was about 10 cents per pound for both years. (f) Estimated recoverable silver at 53·304 cents per ounce in 1911, and at 53·486 cents in 1910. (g) Gross returns for sale of gas. (h) Quantity on which bounty was paid and valued at $1.22½ per barrel in 1911 and at $1.23 in 1910. (i) Value received in 1910 by shippers of silver cobalt ores for cobalt content. Cobalt not paid for in 1911. (j) In 1910 includes 547 tons arsenical ore valued at $5,716. (k) In 1911, figures as reported by the producers, which differs slightly from those of the Trade and Navigation reports.

CANADA'S MINERAL PRODUCTION

Most Important Production in Point of Value Was Coal—Silver Came Second

The total value of the mineral production in Canada in 1911, according to the revised statistics of the Department of Mines, Ottawa, was $103,220,994, which although less than the production of 1910 by $3,602,629 was nevertheless much greater than the output of any other previous year. The total value of production in 1910 was $106,823,623, the decrease in 1911 being equivalent to a little over 3 per cent. The largest production per capita was made in 1910 when the output averaged $14.93 per head of population; the year 1911 was next with an average output per capita of $14.42.

The year 1886 was the first year for which complete statistics of mineral production for the whole of Canada were collected by the Department of Mines, and the production that year was reported as $10,221,255, or about $2.23 per capita. In ten years the production had increased over 100 per cent., to $22,474,256, or $4.38 per capita, in 1896. At this time, the Yukon began to contribute largely to the gold production, and, during the next five years, an increase of nearly 200 per cent. is shown, the total reaching a value of $65,797,911, or $12.16 per capita in 1901. The next three years witnessed a slight decline; but from 1904 the production again rapidly increased to its present high record due to the general development of a wide variety of mineral products.

Production of Metalliferous Products.

The production of metalliferous products in 1911 was valued at $46,105,423, being 44.67 per cent. of the total mineral output and a decrease in value from the previous year of $3,333,450, or about 6¾ per cent. The value of the production of non-metalliferous products (excluding structural material and clays) in 1911 was $34,405,960, being 33.33 per cent. of the total mineral output and a decrease of $3,351,198, or 8.8 per cent. from the value of the production in 1910. The value of the production of clay, lime and stone, and other structural materials in 1911 was $22,079,611, or 22 per cent. of the total production; and an increase of $3,082,019, or 13.5 per cent., over the 1910 output.

The most important product in point of value was coal which contributed over 25½ per cent. of the total production; silver, next in importance, contributed over 16¾ per cent., nickel nearly 10 per cent.; gold almost 9½ per cent.; clay products 8 per cent.; cement 7 2/5 per cent.; copper 6 2/3 per cent.

Strike Had Effect.

The decrease in production in 1911, while apparently quite general among the metals, is to be ascribed in large part to the long continued strike of coal mines in Alberta and the Crow's Nest district of British Columbia. The scarcity of coal and coke in these provinces seriously interfered with the smelting industry of British Columbia and undoubtedly resulted in a smaller production of copper, silver, and gold than would otherwise have been made. In the case of iron, while a decrease is shown in the quantity of pig-iron attributable to Canadian ore, the total production of pig-iron from domestic and imported ores showed a large increase over the 1910 output.

The prices of metals upon which the value of the production directly depends did not vary greatly during the year, in fact the averages have been fairly stationary during the past three years. The prices of copper, lead, and silver on the New York market were fractionally lower in 1911. Spelter was fractionally higher and nickel showed no change. On the London market and in Montreal which follows London, lead showed an increased average price.

	1909. Cents.	1910. Cents.	1911. Cents.
Copper, New York	12.982	12.738	12.376
Lead, " "	4.273	4.446	4.420
" London	2.839	2.807	3.035
" Montreal*	3.268	3.246	3.480
Nickel, New York	40.000	40.000	40.000
Silver, " "	51.503	53.486	53.304
Spelter, " "	5.503	5.520	5.758
Tin, " "	29.725	34.123	42.281

*Quotations furnished by Messrs. Thomas Robertson and Company, Montreal, Que.

Amongst the non-metallic products the most serious falling off was in coal, due as already intimated to labor difficulties; smaller decreases are shown in corundum, mica, and petroleum, while on the other hand substantial increases were made in the sales of asbestos, gypsum, natural gas, pyrites, and salt. The structural materials and clay products nearly all show an increased production.

◆

HOW CANADA'S FIRE LOSS COMPARES

The Monetary Times monthly record of Canada's fire waste shows that since the beginning of the year, the Dominion's fire losses have aggregated $11,256,017. Last month's loss was $2,123,868.

The appended table compiled by the committee on statistics of the National Board of Fire Underwriters of the United States shows clearly the great differences existing between the fire loss per capita on this side of the Atlantic and the other.

Canada makes a particularly bad showing.

	Number of Cities Reporting Loss.			Population.			Per Capita Loss.

Statistics show that the influx of Chinese into Canada is falling off appreciably. A recent steamer which brought 800 citizens of the celestial kingdom is an example. Of the total number 200 went by way of the United States, in bond, to Cuba, Mexico and Central America; 200 were Victoria Chinese returning from China, and 125 were Vancouver Chinese also home bound; 20 went to United States points and the balance were admitted to Canada on payment of the head tax. Actual figures show that already this year the number of admissions is less by 253 than that for the corresponding period last year.

Winnipeg has been chosen as the convention city for the eleventh annual gathering of the Dominion Association of Chartered Accountants. It will be held September 2, 3 and 4. At 1 o'clock on the first day of the convention a complimentary luncheon will be tendered to the visitors by the Institute of Chartered Accountants of Manitoba. Among those who will speak at the convention are Judge Robson, public utilities commissioner of Manitoba; Mr. Vere Brown, western superintendent of the Canadian Bank of Commerce; Mr. O. J. Godfrey, of the Saskatchewan Institute of Accountants, and Mr. W. E. Hodges, of the British Columbia Institute.

CANADIAN PACIFIC STOCK DECLINE

It Has Been a Topic of Wide Discussion—Germany Was the Source of the Trouble

An English visitor to Canada who called at *The Monetary Times* office last week, was told of Sir Rodolphe Forget's prediction that Canadian Pacific Railway stock would shortly be down to 200. "Then I will buy some more," he exclaimed. That is typical of the attitude of the holder of Canadian Pacific stock, who knows the company and knows Canada. It is interesting to read the various explanations of the recent decline in this security.

Mr. James Ross, one of the largest holders of this stock, on his return to Montreal from Europe, said that one of the first reasons for the slump was unquestionably the straightened conditions in Germany, where the banks which had been holding large quantities of the stock were obliged to send out calls very extensively. As a good many of the former buyers were unable to meet the demand for more money, their stock was sold.

Austria Sold Also.

Those well posted in London also learned that Austrian holders of Canadian Pacific Railway had to unload as well, so this constituted quite an extensive selling movement from the continent. Mr. Ross said he was not in a position to say just how much of the stock was held in Austria and Germany, but the amount was considerable, but it was likewise a well known fact that these two countries did not unload because they had lost confidence in the stock. They recognized as much as ever the splendid earning power and prospects of the Canadian Pacific Railway system, and they would no doubt proceed to buy back as soon as the money stringency had become less acute.

"Did the selling of Canadian Pacific Railway extend to the Dutch holders?" Mr. Ross was asked.

"I do not think that the Dutch holdings are now anything to speak of. The Dutch investor gets in at a low figure in his investments, which enables him to get out with a good profit early in the race, or else to hold on when there is stringency in the money market."

Due to Money Stringency.

"This fall is entirely due to the monetary stringency in Germany, Austria, Canada and the United States," says the Canada Gazette, which continues: "In all these countries over-commitments to home enterprises has led to dear money, and a general adoption of a cautious policy on the part of the banks. Fresh money is not easily obtainable, and old loans are being reduced on the double ground of leaders desiring to increase their reserves and from the reduction in prices requiring margins to be made good or advances to be reduced. Especially in Germany and Canada are these unpleasant conditions being experienced. The only recourse is the realizing of international securities in less affected markets. Of these, the chief is Canadian Pacific common stock. In this case there is the further necessity of selling, as $35 per share is due on June 16th on the recently issued $60,000,000 of new capital. Similar instalments are due August 18th and October 20th. Each of these payments amounts to £4,200,000, ignoring prepayments.

"It seems reasonable to assume that the selling from Germany and Canada has been mainly in the form of closing of accounts for the rise, but the last settlement showed actual delivery of securities in names which could only mean real sales of long-held stock. That more has been done in this way during the current account is certain. The holding of Canadian Pacific Railway shares by Germany is said to be about 10 per cent. of the whole, and Canada and the United States are each thought to have about the same extent of interest in this great property. Nearly all the rest is owned in Great Britain, and the strength of the position is that the shares are distributed over an area probably not equalled for size by any other similar property. In spite of the large holdings by associations on behalf of others, the average holding is not 75 shares per person, and there is an ever-increasing number of shareholders who hold less than ten shares each and yet do not average five each."

Canadian Stock Holder.

Mr. James Ross considers the Canadian holder of Canadian Pacific Railway an important factor.

"Canadian holdings of Canadian Pacific Railway are quite as large as the financial position of Canadian investors will justify," he says, "for no one can deny the absolute faith of the people of this country in the present position and the outlook of the road. The property is of greater value to-day than ever before, for the reason that the company has been training up a vast army of expert officials."

A recent issue of the London Standard said:—

"The fall in the price of Canadian Pacifics is due largely, if not almost entirely, to financial influences. Possibly the shares stood too high when they were nearly 300, but since then the price has had so steep a decline that the over-optimism has been, to a substantial extent, discounted. Plenty of people are buying small lots, just as they did when the quotation slumped in the early part of the year, and these steady purchases of a few shares at a time are bound to exert a marked effect upon the price when the market takes a turn for the better."

HOW CANADIAN PACIFIC STOCK IS HELD TO-DAY.

Much speculation has been indulged in as to where the stock of the Canadian Pacific Railway is at present held. Sir Thomas Shaughnessy this week informed *The Monetary Times* that the total number of Canadian Pacific common stock shareholders at the present time is about 27,000, the number of Canadian holders being 3,400. Of the common stock, holders in Great Britain have approximately 60 per cent. About 15 per cent. is held in Germany and France; 23 per cent. is divided about equally between Canada and the United States; the remaining 2 per cent. being scattered in the colonies and other countries. Nearly all the 4 per cent. consolidated debenture stock and the 4 per cent. preference stock is still held in Great Britain.

SIR THOMAS SHAUGHNESSY,

President, Canadian Pacific Railway, Who Gives The Monetary Times Some Interesting Details as to the Present Stock Holdings of the Road.

The Monetary Times prints the following interesting table comparing these figures with the position in January, 1911:—

	Jan., 1911	June, 1913
Total number common stock shareholders	24,000	27,000
Number of common stock shareholders in Canada	2,500	3,400
Percentage of common stockholders in Great Britain	65	60
Percentage of common stockholders in Germany & France	15	15
Percentage of common stockholders in Canada and United States	20	23
Percentage of common stockholders in Colonies & other countries	—	2

The number of shareholders has increased by 3,000 in the two years and a half. A notable gain of 900 Canadian holders is recorded. On June 30, 1911, $180,000,000 common stock of the company was outstanding. On June 2nd, 1912, $16,000,000 additional stock was allotted at 150 and on January 2nd, 1913, $60,000,000 at 175.

TWO BIG STEEL COMPANIES

Armstrong, Whitworth Company and United States Steel Corporation are Completing Canadian Plans

The Canadian plans of two large steel corporations are attracting considerable attention. These are the Armstrong-Whitworth and Company, Limited, of England, and the United States Steel Corporation. Details have previously appeared in *The Monetary Times*. The Armstrong people have purchased 250 acres of land on the south shore of the St. Lawrence River, opposite Montreal, and have 2,000 feet of water frontage. Tenders have been received and contracts will be awarded for the erection of the first series of buildings which will cover 70 acres. The estimated cost is $1,000,000, and the plant will be in running order in a year's time, giving employment to 500 men. This number will be increased to 5,000 two years hence.

Mr. Butler as Manager.

Exemption from taxes for twenty years was granted by the town council of Longueuil, Quebec, and as part of the 250 acres in question is situated outside the town, this territory will be taken in at an early date. Mr. M. J. Butler will be the manager of the Canadian plant of the Armstrong-Whitworth Company.

Of the big American steel company, Financial America says:—"Now that the United States Steel Corporation has obtained a charter for its proposed new $20,000,000 plant at Ojibway, Canada, it may be expected that some announcement will be made soon as to plans for financing the erection of the plant. It is probable that the first step will be an appropriation by the finance committee, but whether this will be followed by a bond issue or not is still uncertain. When interviewed on the subject Tuesday, Chairman Elbert H. Gary, of the corporation, said that engineers were still at work preparing plans of the necessary buildings and it would probably take a little time before everything was ready for the actual starting of building operations.

Competition for Canadian Business.

"With a large plant in Canada, which will, of course, take a long time in building, the steel corporation will be in a much better position in regard to competition for Canadian business. At present Canadian steel mills are unable to supply more than a small percentage of the country's requirements and our manufacturers have been sending rails and other lines of steel to Canada, practically since steel was manufactured here. There is, however, a differential tariff on steel imported from Britain with which we have to compete, and the corporation's plant within Canadian borders will be free of tariff altogether, thus putting it in a decidedly improved position in competition for Canadian trade."

◆

PRICES ADVANCE SOMEWHAT

The department of labor's index number of wholesale prices stood at 137.0 for May as compared with 136.3 in April, and 136.3 in May, 1912. The numbers are percentages of the price level during the decade 1890-1899. The chief advances of the past month occurred in animals and meats, fish, fruits and vegetables, with considerable decreases in dairy products and fuel. Western grain was upward, but paints and oils were lower. In retail prices, dairy products, fish, sugar, potatoes and coal were lower while meats and rentals tended upward.

CROPS IN ALBERTA

(Special Correspondence).

Calgary, June 18th.

Any change in crop conditions in the Calgary district during the week has been for improvement. Showers and warm weather alternated with brilliant sunshine, and there is little to be desired, unless where some sections could stand still more rain. Every day records showers or rain at several points. The prospect is good for the grain grower, and the general farmer's stock is pasturing on a luxuriant growth of grass. Fodder crops look excellent. Vegetables and small fruits where grown, are well advanced, and the lateness of spring growth has now caught up to past years and is at about the average stage for this date. Forty-five Alberta points reported as summarized in the foregoing notes.

ACTIVITIES OF THE PACIFIC COAST

German Capital Will be Available—Industrial Plants—Victoria's Water Pressure and Supply

(Staff correspondence.)

Vancouver, June 16th.

Mr. D. von Cramer, of the Vancouver Trust Company, who has returned from a trip to Europe, reports that German capitalists are greatly interested in Vancouver and Victoria, and that much German capital will be available here after the Balkan loans have been adjusted. This shows the confidence outsiders possess in Western Canada, and statements like these should attract the attention of moneyed men in Eastern Canada to the opportunities for investment that exist in their own country.

The Associated Cement Company of Canada has established a new Portland cement works at Bamberton, Saanich Inlet, not far from Victoria. The capital city of the province is gradually becoming the centre of industrial works, this being the second Portland cement factory to be established in its vicinity. The plant involved an expenditure of a million and a half dollars, the capacity being 2,000 barrels per day. The Victoria branch of the Canadian Society of Civil Engineers, accompanied by members of the Vancouver branch, recently inspected the works.

Flour Mill to be Erected.

Plans for the new grain and flour mill to be erected at the junction of the Pitt and Fraser Rivers have been filed at Ottawa by Messrs. Smith and Davidson, Fort William. It is announced that as soon as the plans have been sanctioned by the government, a formality required in connection with the application for the necessary foreshore grant, the construction of the plant would be commenced.

Mr. L. A. Walker, representing Messrs. W. R. Grace & Company, was here this week making arrangements in connection with the new British steamer "Colusa," which is to inaugurate a resumption in the freight and passenger service between Mexico and Canadian ports. Messrs. Grace & Company are well established operators of steamboats, which are known as the Green Funnel line.

Improvement in Water Pressure.

Tests conducted by the fire chief, accompanied by an official of the underwriters, show that there is a decided improvement in the water pressure in Victoria, consequent upon the higher supply of water available in the Smith Hill reservoir. This will mean not only better service to householders and other users of water, but also better means of fire protection.

◆

COMPANIES INCREASE CAPITAL STOCK

The capital stock of the Traders Company has been increased from $40,000 to $50,000, and the new capital stock of $10,000 is divided into 400 shares of $25 each.

The capital stock of the Canadian Credit Men's Association, Limited, has been increased from $5,000 to $100,000, such increase consisting of 950 shares of $100 each. The company's powers have also been extended.

The capital stock of the Dearborn Chemical Company of Canada, Limited, has been increased from $50,000 to $100,000 by the issue of 500 shares of new stock of $100 each.

The capital stock of the Canada Wood Speciality Company, Limited, has been increased from $50,000 to $200,000, by the issue of 1,500 shares of new stock of $100 each.

◆

SASKATCHEWAN'S GROWING TOWNS AND VILLAGES.

The hamlet of Sceptre, Saskatchewan, has been created a village. It is a flourishing community on the Swift Current to Bassano line. As it is surrounded by an excellent agricultural district, it promises to be an important wheat centre.

Stranraer, a hamlet situated in township 32, range 18, west of the third meridian, which secured organization as a village on the 3rd ultimo, promises to be a busy centre and will draw business from the "Glengarry Plains" which lie a little to the north of it.

Radville, having secured a population of five hundred, made application in the usual manner for town incorporation. The request expressed by its people has been granted, with the result that this junction point will have the responsibilities shared by seventy other towns in Saskatchewan.

BILLION DOLLARS OF LIFE INSURANCE

In Force in Canada—Canadian Companies are Getting the Largest Share of Business

The amount of life insurance in force in Canada, according to the government returns recently published, increased last year by over $120,000,000. The total for 1912 was $1,070,265,556, and for the previous year $950,220,771. There was an increase of 162,196 policies in force. The number of new policies taken up last year was 39,352 greater than in 1911. The premiums during 1912 exceeded by $4,091,998 those of the previous year. Claims paid during 1912 totalled $12,750,310, a gain of $1,698,631 over the figures of 1911. These included matured endowments.

From the figures appearing on another page, it will be gathered that the Canadian companies obtained the greater share of premiums for the year. Of the total, $35,711,624, they got $23,542,189. The United States companies' share was $10,401,389 and the British companies', $1,768,046. In the matter of new and taken-up policies, the United States companies led in 1912, their number being 243,583. Canadian companies were responsible for 205,316, and British companies for 2,522. Examining the amount of policies, new and taken up, it is seen that the Canadian companies are again first with $141,267,596 compared with $70,617,555 for the United States companies and $7,319,952 for the British companies.

The United States companies at the end of last year had 808,605 policies in force, as against 663,870 of the Canadian companies and 24,912 of the British companies. Of the net amount in force, our own companies have $706,661,117, the British companies $54,489,612, and the United States companies $309,114,827.

The following companies appear in the list, but have ceased doing new business in Canada: Edinburgh Life, Life Association of Scotland, Liverpool and London and Globe, London Assurance, Norwich Union Life, Scottish Amicable, Scottish Provident, Star, Connecticut Mutual, National Life of United States, Northwestern Mutual and Phœnix Mutual. In the same order they have the following amounts of life insurance in force in Canada: $56,227, $487,006, $109,633, $21,038, $97,360, $82,755, $76,328, $271,832, $997,250, $39,408, $153,326, and $388,936.

Eight Canadian and four American companies took total premiums exceeding $1,000,000 during 1912. The highest figure of a British company under this heading was $818,494.

A large amount was represented in industrial business. The following are the figures:—

Company.	Amount of new and taken-up policies.
Union Life	$21,590,944
Metropolitan	17,742,020
Prudential	13,030,122

The net amount of industrial insurance in force with these three companies is over $100,000,000.

The premiums for the year of the Travellers Life of Canada, one of the latest to the Canadian ranks, totalled $39,511. The number of policies, new and taken up, was 471, representing $1,840,920. The number of policies in force at the end of last year was 997, representing $1,777,820.

The total assets of twenty-six Canadian life companies last year amounted to $212,485,939 as compared with $190,717,031 in 1911. They are classified as follows for the two years:—

Nature of assets.	Amount of Assets. 1911.	1912.
Bonds and debentures	$68,475,565	$70,132,366
Loans on real estate	63,565,830	75,322,298
Cash loans and premium obligations on policies in force	22,960,040	25,879,862
Stocks	14,328,471	16,307,053
Real estate	7,945,156	8,983,194
Outstanding and deferred premiums	4,807,238	5,325,670
Interest and rents due and accrued	3,402,292	4,040,529
Cash on hand and in banks	2,492,960	2,962,320
Loans on collaterals	2,389,178	3,229,832
Other assets	350,296	302,810

Bonds and debentures last year took second place to mortgages. Among the assets of some of the companies are included bonus stocks, acquired in connection with bond purchases. In some instances, the value has been assigned by the companies to these stocks (such value being then included in the above figures); in the other instances, the stocks are not yet deemed to be of appreciable or certain value.

UNITED STATES FIRE LOSSES

The losses by fire in the United States and Canada during the month of May, as compiled from the records of the New York Journal of Commerce, aggregated $17,225,850, as compared with $21,013,950 for the same month last year. The following table gives a comparison of the losses by fire during the first five months of 1913 with the same months in 1912 and 1911:—

	1911.	1912.	1913.
January	$21,922,450	$35,653,150	$20,193,250
February	16,415,000	28,601,650	22,084,600
March	31,569,800	16,650,850	17,511,000
April	17,670,550	16,349,400	16,738,250
May	21,422,000	21,013,950	17,225,850
Total 5 months	$108,999,800	$118,260,000	$93,752,950

The fire record of *The Monetary Times* shows the losses in the Dominion during May amounted to $2,123,868 and for the first five months of 1913 to $11,256,017.

◆

The following issues have been listed in London: City of Montreal, £1,430,600 four and a half; City of Edmonton, £1,068,000 fives, and City of Moose Jaw, £257,500 fives.

"By January 1, 1915, anything that floats can pass through the Panama Canal between the Atlantic and Pacific Oceans," says Colonel George W. Goethals, chief engineer of the canal zone.

AUTOS IN SASKATCHEWAN.

Few kinds of business have taken such strides as the automobile industry, and it is due in no small degree to the large importations of automobiles that the customs receipts have swelled as fast as they have done during the last few years. The province of Saskatchewan has benefited both directly by the license fees collected, and indirectly by various ways, amongst which might be mentioned the demand for better roads which the use of these vehicles tends to create, and also the ever-increasing number of those employed in the trade. For the years ended February 28, the amounts collected for motor licenses were:—

1906-07	$220
1907-08	540
1908-09	900
1909-10	1,490
1910-11	5,320
1911-12	13,[illegible]40
1912-13	34,645

◆

Sir William Mackenzie, president of the Canadian Northern Railway, says: "For the past three or four years there has been a boom in shipbuilding. All the shipyards are choked with orders at present, and workmen are kept toiling night and day." Sir William declares that the boom must break, and states that he is waiting for it to do so before he lays down any more keels to his trans-Atlantic fleet.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Huntsville, Ont.—June 13—Bush fire on Pancake Island.

Nanaimo, B.C.—June 10—Nanaimo, B.C. Loss $10,000. Cause unknown.

Kingston, Ont.—June 18—Kingston Yacht Club's boathouses. Loss $8,000.

Edmonton, Alta.—June 11—Mr. S. Morris' store. Loss $1,000. Cause, friction.

Blenheim, Ont.—June 14—Mr. W. R. Fellow's stable. Loss and cause unknown.

Whitby, Ont.—June 10—Construction camp. Loss $2,000. Cause, dropped cigarette.

Sutton, Que.—June 7—Veneer Mill Company's plant. Loss $75,000. Cause unknown.

Brandon, Man.—June 6—Mr. J. D. McGregor's barn. Loss and cause unknown.

Beachville, Ont.—June 11—Mr. W. Smith's residence. Loss $600. Cause unknown.

Swift Current, Sask.—June 2—Boston Merchandise Store. Loss $4,000. Cause unknown.

Portage la Prairie, Man.—June 16—Gasoline launch. Loss $1,000. Cause unknown.

Sydney, N.S.—June 18—Brookland's hospital. Loss $12,000, insured. Cause unknown.

Elk Lake and Gowganda, Ont.—June 14—Several shacks, etc., destroyed. Cause, bush fires.

Chatham, Ont.—June 14—Mr. M. Crow's barn, Prairie Siding. Loss and cause unknown.

Seaforth, Ont.—June 12—Mr. J. McDonald's mill and stave factory. Loss and cause unknown.

Port Rouge, Que.—June 12—Messrs. J. Birds and Company's factory. Loss and cause unknown.

Three Rivers, Que.—June 15—Mr. P. A. Gouin's hardware store. Loss $10,000. Cause unknown.

Meductic, N.B.—June 9—Mr. Dickinson's store and other premises. Loss $8,000. Cause unknown.

Lake Annis, N.S.—June 8—Mr. D. R. Saunder's store. Loss $10,000, partially insured. Cause unknown.

Ayr, Ont.—June 13—Messrs. J. Watson Manufacturing Company's gas plant. Loss and cause unknown.

Biscoe, Ont.—June 13—Town nearly destroyed. Loss estimated $400,000. Cause, supposed ashes from pipe.

Markdale, Ont.—June 9—Mr. C. E. Watson's shingle mill. Loss $3,500. No insurance. Cause unknown.

Pinder, N.B.—June 11—Mr. W. Fox's barns. Mr. J. K. Pinder, M.L.A., mill, bridges. Loss and cause unknown.

Ingersoll, Ont.—June 17—Mr. W. Butler's barn, etc., Dereham Centre. Loss unknown. Cause, gasoline exploded.

Sudbury, Ont.—June 15—Joudouin's ice house, motor boats, etc. Loss unknown. Cause, motor in boat backfired.

Ottawa, Ont.—June 12—Basement of Miller Apartments, Rosebery Avenue and Bank Street. Loss $2,100. Cause unknown.

Winnipeg, Man.—June 9—Canadian Pacific Railway shed, Dufferin Avenue and McKenzie Street. Loss $1,000. Cause, gasoline.

Leamington, Ont.—June 17—Mr. W. H. Trott's shoe shop and Mr. McHardy's residence, Merun. Loss $5,000. Cause unknown.

Buckingham, Ont.—June 11—Steamer "Agnes," owned by Du Lievre River Navigation Company. Loss $7,000. Cause unknown.

St. John, N.B.—June 10—Mr. E. J. Lawlor's barn, Lombard Street, occupied by Mr. Murray Northup. Loss $500. Cause, supposed incendiary.

Navy Island, St. John, N.B.—June 9—Messrs. J. M. Christopher, W. A. Spence and G. W. Wilson's sheds and contents. Loss $3,400. Cause unknown.

Fort William, Ont.—June 8—Mr. M. Levack's frame dwelling, 509, McDonald Street. Loss building $900. Contents $300. Insurance building $1,300. Cause, defective chimney.

Point Aux Trembles, Que.—June 14—Messrs. Delorme, Demers and Labaise's residence, corner Saint Jean Baptiste and Notre Dame Streets. Loss $25,000, partially insured. Cause unknown.

Berlin, Ont.—June 12—Mr. A. Snider's barn near Florodale. Loss $3,000. Cause engine spark.

June 16—Messrs. Schell Bros' barn. Loss $1,000. Cause supposed incendiary.

Montreal, Que.—June 12—Rear 1,662, St. Lawrence Street. Loss $1,000. . Cause unknown.

June 18—Residence, St. Paul Street; 2 deaths. Loss $5,000. Cause, matches.

Guelph, Ont.—June 6—Rowen Ogg factory. Loss building $1,569. Cause unknown.

June 16—Mr. J. Laird's barn, York Road, Guelph Township. Loss and cause unknown.

Hamilton, Ont.—June 10—Mr. S. Saunder's automobile, 340, James Street, North. Loss and cause unknown.

June 11—Mr. W. L. Lundy's residence, 111, Herkimer Street. Loss $4,500. Fully insured. Cause unknown.

Moose Jaw, Sask.—June 5—Mr. G. Stirk's building, Larch and Saskatchewan Avenue. Loss $4,000. Cause probably plumber's furnace.

June 7—Mr. B. K. Youngloves' barn. Loss $11,000. No insurance. Cause lightning.

New Westminster, B.C.—June 1—Bush fire.

June 6—Mr. H. T. Kirk's brick block, fully insured. Loss slight. Cause supposed carelessness.

June 7—Grain Growers' Association building. No loss. Fully insured. Cause slaking lime.

St. Thomas, Ont.—June 15—Mr. H. J. McManus's residence, Rosebery Place. Loss $1,500. Cause unknown. Mr. A. Miller's barn, Edgeware Road. Loss $2,000. Cause, lightning.

June 16—Mr. N. J. Gufford's residence, near Middlemurch. Loss unknown. Cause, gasoline stove exploded.

Toronto, Ont.—June 13—York Lumber Company's premises, 1000 Gerrard Street East. Loss $25. Cause unknown. Sons of England Hall, 58 Richmond Street. Loss $500. Cause unknown.

June 14—104 Front Street East. Loss $250. Cause unknown. Three houses on Blake Street. Loss and cause unknown.

June 16—D. McCall Company's warehouse, 94-8 Wellington Street. Loss $2,000. Cause unknown. Messrs. Wickett and Craig's tannery, Don Esplanade. Loss $100,000. Cause unknown.

Cobalt, Ont.—June 11—Public school annex, Brewer's butcher store, R. P. Graham's grocery store and two dwelling houses above the stores. The damage done is made up as follows:—School annex, $900, covered by insurance; Brewer's store, total loss, $700, uninsured; Brewer's stock, $1,400, uninsured; R. P. Graham's grocery store, damage to building practically nil; damage to stock by water, probably $1,000, covered by insurance. Cause unknown.

June 13—Townships of Tudhope, Robillard and Dack. Messrs. Jackson and West's mill destroyed and that of the Northern Ontario Lumber Company, whose loss is $15,000. Cause, bush fires.

◆

ADDITIONAL INFORMATION CONCERNING FIRES ALREADY REPORTED

Sydney, N.S.—June 11—Total loss, $12,500. The details are as follows:—

North side James Street—Parish of Holy Redeemer (small insurance), $80,000; Mrs. Mary Sparling, boarding house, (partly insured), $5,000; John Carlin, house, (partly insured), $4,000; Robert Roberts, house, (partly insured), $3,000.

South side James Street—James MacDonald, house, (partly insured), $3,000; John Griffin, house, (partly insured), $2,500; John Smith, house, (partly insured), $3,500; C. N. Boyle, house, (partly insured), $2,000; W. T. Condon, house, (partly insured), $3,000; Mrs. Livingstone, house, partially destroyed, loss not known.

East side Victoria Road—A. M. Croston, office loss, $200; Joe. MacEachern, house, (partly insured), $1,500; Arthur Ledrew, house (partly insured), $2,500; A. J. MacNeil, house, (no insurance), $2,500; J. P. Webber, house, (no insurance) $2,500; J. D. Campbell, house, heavy loss.

West side Victoria Road—Fire station, large building owned by Hart Brothers, occupied by F. J. Richards, tailor; ice cream parlor, and family named Thompson. Loss, (partially insured), $5,000; house owned by Bauld Brothers, Halifax, occupied by John Doran and Mike Walsh, loss $2,500; dwelling owned by J. J. Campbell, Boisdale, (partially insured), $2,000; house north James Street east Victoria Road, occupied by John Flynn, (partially insured), $2,500. Cause, probably defective wiring.

DANGERS OF THE RURAL MOVEMENT

Effort of Those Who Would Go Farming to Show Farmer How, is Grotesque Says Professor

Some of the dangers of the present rural movement were discussed by Dean L. H. Bailey, at the New York State Bankers' Convention at Ottawa last week. Mr. Bailey is the director of the College of Agriculture of that State at Cornell University. He said in part:—

Every one seems to be conscious of a new attitude toward rural problems and we are talking of a country-life movement. Persons naturally endeavor to visualize this movement and to work it out in programmes. We are constantly asked for a definition of the country-life movement and for advice as to how a person may set himself to work in it.

Need Special Treatment.

Any new interest attaches to itself persons and organizations that have ulterior or personal ambitions, and the rising interest in country life is no exception. There are also many organizations or groups that desire a field in which they may operate, and tiring of one field or not finding results to accrue rapidly, they are ready to expound themselves in the country-life movement or in any other direction of public interest that promises something of novelty and is likely to give immediate results.

It is to be deplored that there has been some application to the new country-life interest of ideas that are employed in rescue work or in the slum work in the cities. While there undoubtedly are certain rural communities in which there is decadence, these are clearly exceptions and they always need special treatment. The work is not an "uplift," and the application of this and similar terms of country-life discussions not only prejudices the situation but also indicates a lack of keen appreciation of the problems at issue.

Danger of Over-Organization.

Special future dangers that lie in the situation are the likelihood of over-organization; the application of the method of the untempered social worker who is burning with zeal; the grotesque effort of those who would go into farming for the purpose of showing the farmer how; the moving out from the cities to the farms of persons who ought never to think of being farmers; the selling of rural properties of little value to unsuspecting and confident purchasers; the inflating of the opportunities in farming by many kinds of shows and attractive advertising; the utilizing of the rural movement to achieve personal notoriety and advancement, and particularly to gain office and political ends; the foisting of many kinds of fantastic and cranky schemes on the public; the diverting of the attention from the homely essentials by overhead schemes; the aggrandizement of institutions that play to the situation for the purpose of securing appropriations and advertisement; the display of beautiful pictures and superficial writings that misrepresent the farming condition, even while they tell the truth; and the starting of many enterprises that are essentially fictitious or at least unnecessary, and that will bring confusion, if not serious results in the end, and which may entail more expense of maintenance than the situation warrants, and which may not follow either sound educational ideas or good business administration.

Agitation Versus Solution.

It undoubtedly will be found that those who know the rural conditions best will tend to be more and more conservative, and it will seem to an impatient class of very zealous citizens that these men are attempting to hold back the development. It will be known, however, that the sure results will be those that come slowly, and as the result of patient study, rather than from any rapid, showy, or exploiting work. We shall prabably find many persons making headway with attractive schemes that have no substantial foundation. There is danger that the situation may get into the hands of those who will agitate it rather than solve it.

◆

BRITISH CAPITAL IN THIS.

A block of $1,000,000 seven per cent. preferred stock of Canadian Explosives, Limited, has been acquired recently by the British South African Explosives Company, Limited. The Canadian company secured a premium of 5 per cent. on the sale.

◆

The Canadian Northern Railway has placed a large order for rails with the Dominion Steel Corporation.

GENERAL SITUATION IS SOUND

New York Makes Some Inquiries of a High Canadian Authority

They are beginning to realize in New York that the adverse features of the Canadian situation have been somewhat exaggerated. With a view to ascertaining the facts without prejudice, the New York News Bureau has made inquiries of competent leaders in the financial and commercial circles of the Dominion. These authorities agreed in the view that any official statement would tend to imply the existence of a situation which in no wise warranted explanation of a reassuring character. Financial America has secured an unofficial statement from a source which would be recognized, were the name made public, as an authority of the highest standing and one unquestionably in a position to have unusual facilities for obtaining comprehensive and exact knowledge of the state of affairs, while at the same time possessed of a conservatism which guarantees a candid review of all features. This authority says:—

Money is Tight.

"There is no question that money is tight in Canada, but then this is a world-wide condition of affairs and not applicable more in Canada than elsewhere. Payments in the Northwest are undoubtedly slow, but I do not hear similar complaints from other sections. The real estate boom there, as generally throughout Canada, has ended, but I cannot learn of any marked depreciation in the value of the properties in the larger centres. No doubt many of the outside subdivisions will, however, be slow, if not difficult of sale.

"Caution is being exercised by the banks generally, but there is nothing that I can see approaching a commercial panic, or even uneasiness in business circles. General trade is active and labor well employed, and the continued large expenditures on railways will go on. With the increased population of some 400,000 persons per year a large amount of money will be kept in circulation. Of course, for the continuance of prosperity in Canada, much depends, as must always be the case in a country employed in agriculture, on the forthcoming crop."

Large New Population.

The estimate of an increase in the population of the Dominion of 400,000 this year is considered well within the limits, according to the rate of recent immigration, ignoring the natural growth by excess of births over deaths in the inhabitants [illegible]y established.

◆

RAPID INCREASE IN VALUE THROUGH TIMBER SCARCITY

With the increasing inaccessibility of the forests and the consequent high price of wood, the small wooded areas common on the fa[illegible] of eastern Canada are also increasing in economic val[illegible]hey frequently occupy soils unfitted for agriculture an[illegible] a little care can be made to furnish the farmer with a continuous revenue in fuel, fence-posts, rails, poles and structural timber.

Unfortunately these wood-lots are frequently allowed to deteriorate through carelessness or lack of knowledge on the part of the farmer. He takes great care to farm his agricultural lands to the best advantage, but often fails to realize that by farming his wood-lot with the same care, he could get the same increase in productiveness. Cattle and weeds are not permitted in a wheat-field, yet in the woodlot the cattle range at will, and instead of removing the weed-trees the farmer allows these to increase in number, removing only the trees best suited to his purpose.

To save the farmer from himself, the Dominion Government has appointed a technical forester with headquarters at the Forestry Branch, Ottawa, whose principal duty is to answer all inquiries, and give free advice on these matters. If necessary, arrangements can be made for a personal inspection of woodland properties by this expert. No conditions are imposed on the owner of the woodland, it being assumed that he who is anxious for advice will accept it when given. The expert looks over the stand, determines what species of trees are best suited to the soil and to the local market, shows how to improve the character of the crop and its rate of growth by proper thinnings, and, if desired, gives advice regarding tree-planting, hardwood-coppicing, felling methods and the most profitable sizes to be grown.

Further information on this subject can be obtained by writing to the Forestry Branch, Ottawa.

INVESTMENT OF LIFE INSURANCE COMPANIES' FUNDS

X.

Points to be Considered in Investments—Industrial Stocks

The investor should see into these seven points when industrial stocks are drawn to his attention:—

1. Has the principle upon which modern industrial debt financiering is based been complied with? This principle is that as large a part of the required capital must be borrowed at as low a rate of interest as will enable the partners in the enterprise to use these borrowings in their business with safety and at a profit to themselves.

2. Methods of analyzing industrial stocks should differ from those employed in the study of industrial bonds, chiefly because with the former the question of assets is less important, while the question of operating results is far more important.

3. An inspection of the finances of leading industrial companies discloses the fact that those whose stocks are in high repute have resorted to new capital issues only to a very small extent. Such issues for the purpose of providing working capital are especially objectionable. Moreover, the existence of a bonded debt usually detracts more or less from the investment qualities of the stock. Hence, see that the bonded debt is small, as compared with the total assets, or that the earnings available for dividends on the stocks are exceptionally large.

Increase of Working Capital.

4. Ascertain whether the working capital, that is, the excess of current assets over current liabilities, is increasing, and whether such increase is reflected in the market value of the stock.

5. Earnings available for preferred dividends, in order to render the issue high-grade, should be about double the dividend rate. In the case of a company having a bonded debt, these earnings should be more than double—increasing somewhat in proportion to the relative size of the debt.

6. The earnings of industrial concerns, as a class, are greatly affected by periods of business depression. And it is of the utmost importance to ascertain to what extent the industrial under investigation would be affected during an extended period of dullness.

7. One of the most important points is to learn whether or not depreciation charges are sufficient to maintain the plants in good condition.

Stocks of Financial Institutions.

Considerations relative to the stocks of financial institutions are:—

1. Consider the size and location, the character of its business, and the reputation of its directors and officials.

2. Consider the market value of the stock and determine whether this is in excess of its true value. Is the market price fairly stable?

3. Ascertain the earning power and its ratio to dividends paid over a period of years.

4. In reference to the "double liability" feature, enquire into the amount of capital and rest, which acts as a "buffer" in case of disaster.

5. In the case of banking institutions:—

(a) Study the growth of deposits, for the earning power is based principally upon the amount of deposits which they have available for loaning. (b) The comparative earning power of banks is more of a personal matter than that of railroads. The bank whose officials have the largest personal acquaintance, the energetic methods and the trade connections to obtain large deposits, is the one which will make the large earnings. (c) The proportion of bankers' deposits to individual deposits should be noted, for the former are the less profitable. Moreover, a bank holding a high percentage of bankers' deposits will maintain a correspondingly high percentage of cash reserves—and hence smaller ratio of profits.

As to loans on collateral, the financial standing of the borrower is of the first importance, then see that all necessary legal requirements are complied with.

These Must Always be Borne in Mind.

The salient and essential points, therefore, that must always be borne in mind in the investment of a life company's funds are:—

1. Most important—the safety of the capital invested.

2. The obtaining of a good yield on the investment.

3. The major portion of a company's funds do not mature for many years, and consequently the larger proportion of the funds should be invested in securities which are not readily realizable. A superior rate of interest is thus obtained. For the same reasons, and also to save trouble of frequent re-investment, they should be invested in securities where the repayments are deferred for a considerable time.

4. "Do not put all your eggs in one basket." The number of classes of investment should not be too few, and the company should consider carefully the proportion of funds invested in each class. Investments should not be too centralized.

Some Points to be Noted.

5. Constant and intelligent watchfulness is imperative in order that changing conditions may be noted, and any necessary re-adjustment of holdings made.

6. Young states: "The investments should, as far as practicable, be helpful to the increase of the life business, so that a possible two-fold profit may be realized—a profit in the rate of interest and a benefit in the reduction of administrative charges." In the case of a mortgage loan, however, care should be taken that the premium required is not so large as to seriously embarrass the mortgagor.

7. Securities should be chosen where there is a possibility of appreciation without wide fluctuations in the market price.

8. Sufficient funds to meet any sudden demands upon the company should be kept in readily convertible securities.

9. It is a mistake for young or small companies to invest in an expensive head office building.

10. The funds of a life company cannot be used to help out otherwise unsuccessful enterprises.

◆

ANNUAL FINANCIAL REVIEW.

The Annual Financial Review, dated May, 1913, has just come to hand. It is a carefully revised volume of facts regarding Canadian securities compiled by Mr. W. R. Houston, and published by Houstons Standard Publications, Toronto. There is only one book of reference of this type published in Canada, and it is therefore found on the desk of every broker, banker, financier and business man interested in Canadian securities and companies. In addition to the latest annual statement of several hundred corporations, there are tables of bank clearings, stock exchange transactions, lists of representative brokers, and a useful table showing the approximate yield of stocks and bonds. Houston's Annual has become a hardy annual and one of constant and valuable reference.

◆

PUBLICITY, PEACE, AND POSSIBILITIES.

An exponent of practical civic publicity, Mr. H. W. Baker, has made known to the world, the opportunities and beauties of Ottawa, the capital of the Dominion. The convention of the New York State Bankers' Association there last week is a notable result. Peace and its victories was the basis of the speeches and though publicity was scarcely mentioned as a factor, the holding of the convention by the New York Bankers in a foreign capital, was sufficient proof of it strength. The co-operation of the Dominion government, civil authorities, bankers, public men and the Industrial Commissioner, resulted in approximately 600 financiers paying a visit to Ottawa.

This convention showed the unity of the Anglo-Saxon race, messages being received from the reigning monarch of the British Empire and from the head of the world's largest republic. Mr. J. J. Hill, in words fitting to this centenary celebration, remarked:—"The people of Canada and the United States, close kin by blood, inheritors of a common tradition and charged with a like mission in the world, should not misunderstand each other. There is no proper place for jealousy or hostility between them. A consciousness of the work that both have to do in the world may well lead them to take counsel with each other without cost to patriotism or pride on either side. New issues will come, new emergencies will arise. None of us is wise enough to foresee the world problems yet below the horizon or the part in their solution that Canada and the United States may be called upon to play. But we do know that toward this unknown future they should march shoulder to shoulder, without suspicion and with mutual esteem and respect. Though we live each under his own name and his own flag, it is fitting that, in the unending procession of human events, the two countries that now dominate the industry and progress of this continent should be the leaders of the new world in everything that stands for the prosperity and peace of mankind."

The bankers have returned to their homes and what the future results will be, time alone will show, but President Pugsley, of the New York State Bankers' Association, said: "The visions which the New York State Bankers had of the opportunities and the possibilities of the future development of Canada should lead United States capital to seek investment within Canadian borders. The members were delighted with the hospitality accorded them by the citizens in general, the bankers of the city and the Dominion government."

DOMINION STEEL CORPORATION, LIMITED

Proceedings at the Annual General Meeting at Montreal, June 18th, 1913

The Annual General Meeting of the Shareholders was held pursuant to notice, at 185 St. James Street, Montreal, on Wednesday, 18th June, 1913. Among those present were:—

Sir H. Montagu Allan, Mr. Geo. Caverhill, Hon. R. Dandurand, Mr. Wm. McMaster, Col. the Hon. James Mason, Mr. Frederic Nicholls, Mr. W. G. Ross, Sir Wm. C. Van Horne, Mr. F. L. Wanklyn, Mr. T. Bienvenue, Mr. T. J. S. Tryer, Hon. David MacKeen, Dr. Chas. Ault, Mr. J. J. M. Pangman, Col. Sir H. M. Pellatt, C.V.O., Mr. J. H. Plummer, Mr. C. S. Garland, Mr. C. M. Holt, K.C., Mr. J. K. L. Ross, Mr. G. M. Bosworth, Mr. A. W. Lamb, Mr. A. P. Frigon, Mr. A. W. Stevenson, Mr. Mark Workman, Hon. Robt. Mackay, Dr. E. G. Dagenais, Mr. H. J. I. O'Heir, Mr. L. J. Beaubien, Mr. Gordon Strathy, Mr. James Rogers and others.

At 12 o'clock noon, the hour appointed for the meeting, the President of the Corporation, Mr. J. H. Plummer, took the chair.

Mr. C. S. Cameron was appointed Secretary of the meeting and Messrs. J. J. M. Pangman and M. E. Williams were appointed Scrutineers.

The Secretary laid upon the table a copy of the notice calling the meeting.

The minutes of the annual general meeting held on 12th June, 1912, were read and confirmed.

ANNUAL REPORT

The Secretary read the Report of the Board of Directors with the accompanying Balance Sheet and Profit and Loss Account and, a comparative statement of Profit and Loss Account for the year's ending 31st March, 1912, and 31st March, 1913, respectively.

PRESIDENT'S ADDRESS

In moving the adoption of the Report, Mr. Plummer said:

We have had a comparative statement of the earnings of the last two years prepared by the auditors, which is now before you. From this you will see that the profits of the year showed a substantial increase and although this was offset by an increase of the charges as well, we have now complete, for the first time, the new plant which occasioned the increase in the charges.

As briefly indicated in the Report, we have this spring reached an end, in great measure, of the disadvantages under which we have laboured for the last two or three years, and a fresh starting point in our enterprise.

EXTENSIONS OF THE PLANT

The plans laid down three years ago for the enlargement and rounding out of the steel plant, which were subsequently much added to, have just been completed. I might remind you that three years ago we were making only two steel products which we wished to sell—namely, rails and wire rods. Our sales of pig iron were small because our blast furnace capacity was below the requirements of our steel plant, and while we sold some billets, that is a very raw and usually very unprofitable form of product. When, then, by a most unlooked-for attitude on the part of the Government we were left with neither bounty nor duty on wire rods, our position as steel-makers was most unsatisfactory, and one of our chief objects in entering on the extension of the steel plant was to extricate ourselves as fast as possible from this state of affairs.

If market conditions had continued good we should not, of course, have felt these disadvantages so much, but during the last two financial years we were affected by conditions in the United States which in some respects were the worst experienced for a generation. Among its other effects was this, that with the depression in the United States, and with wire rods entering Canada free of duty, this important part of our output was made doubly unprofitable, while, until the new mills should be completed, a good deal of our steel had of necessity to be marketed as wire rods.

The conditions under which the construction work had to be carried on interfered a good deal with current operations. Our staff had to give too much of their time to it, our shops had to be diverted too much from the current repairs of the plant, to the detriment of the operating departments. We let contracts, in Canada as far as possible, for as much of the work as we could, but the pressure on Canadian engineering concerns was very great, and too much work had to be done in our own shops. There were difficulties in securing a proper and sufficient supply of labor, materials and supplies cost more, and the general effect was great delay and increased cost. In the result the earlier estimates proved insufficient; changes in the conditions of our business which could not have been foreseen forced us into additional expenditures which the results are already justifying and what with the added equipment, the increased cost, and the greater amount of current assets we now find ourselves carrying, due both to larger business and changing conditions, the further financing which is mentioned in the Report has become necessary.

THE CHANGED CONDITIONS

All this, however, is past history. We have just brought into operation the second of the two new blast furnaces; the first was blown in last September. The two new mixers or large Open Hearth furnaces are at work, also the new bar and rod mill, which promises to be as satisfactory as the wire-rod mill built for us some years ago by the same makers. The wire and nail mills are now fully equipped and working steadily; they are turning out pretty well all kinds of plain and galvanized wire and wire nails. In these new mills we can finish for sale, in reasonably profitable forms, a good deal of steel which heretofore we had to make with little or no profit into wire rods.

You can see, then, why I speak of our having reached a fresh starting point in our enterprise. Our construction work is practically completed, our plant has reached the well-balanced position for which we have been working for the last three years, trade conditions are satisfactory, and from now on we shall get the full benefit of the new plant, not only in increased tonnage, but, what is more important, in the ability to finish our steel in more profitable articles. Our new departure only dates in its full effect from about the first of this month, and I look forward to substantially increased earnings from that date. The increase in the total earnings of the Corporation should reach at least $800,000 for this year; if there should be a falling-off in business as the result of the financial depression that might affect our figures, although I am hopeful that as the consumption of iron and steel is far in excess of their production in Canada, we should not feel any slacking up in general business very seriously.

COAL AND STEEL PROPERTIES

As to our coal properties, we have since 1st January, 1910, expended on new collieries and equipment $4,895,908.20. The development of these properties and the extension of our operations have brought us to a point where, under ordinary conditions, we can count on an output of over 5,000,000 tons yearly. In 1910, when the Coal and Steel Companies came under one administration, the output in Cape Breton was 3,526,754 tons. In the year 1913, we expect to mine 4,800,000 tons there, with 380,000 tons in addition from the Springhill collieries; a total of 5,180,000 tons.

The increased tonnage I have mentioned is being won on a sound basis, with suitable development work ahead. Of the new collieries, Nos. 12 and 14 have become fully producing, Nos. 15 and 16 in the Lingan district and 21 and 22 in the Morien district are rapidly approaching that point, and we are re-opening No. 17 and No. 11. No. 17, formerly known as Victoria Mine, was famous in its day as a producer of good coal; it was worked to a moderate extent only. This colliery should give us some coal this autumn. It is so situated that it can be conveniently worked in connection with the other Lingan collieries, for which we have a central power plant at Waterford Lake.

No. 11 is a mine on the Emery seam, where it underlies No. 3 colliery, which was worked very little when first opened, as the market for coal was not large. This colliery will be economical on the point of capital expenditure as it will use a good deal of the plant and equipment of No. 3, which would otherwise have soon ceased to be of much value, the coal tributory to that colliery being nearly exhausted. We have already begun to mine a little coal from No. 11.

On the other hand, a fire, affecting a small portion of one of the Springhill collieries, has temporarily reduced our working capacity there to 380,000 tons yearly, as against 412,000 tons mined last year.

A good deal of money has been expended on our railways for additional trackage and equipment, and the shipping and handling facilities have been improved. One important and rather costly addition is a new shipping pier on Sydney Harbour which has been constructed to meet the needs of the present-day large steamers.

The increase in the total output is a distinct achievement. It is not merely a question of mining the coal, it must be taken away from the pit's mouth when mined, it must be taken promptly from the cars which move it, and water shipments must keep pace with production. Any shortage of hauling power, of cars or steamers, or any interruption in the moving of the coal, leads at once to reduced production and increased costs, while any excess, especially of vessels, is costly. We are now running 29 steamers in the coal, ore, limestone and other branches of our business, of capacity ranging from 1,000 to 11,000 tons, and the maintenance of an adequate supply of vessels and their proper handling is not the least among the problems which have to be dealt with.

As regards Steel; we have now our six blast furnaces, of which we aim to keep five steadily at work from year's end to year's end, and we have coke ovens of sufficient capacity to supply the five fully. It is not intended that all the pig iron from the five shall be made into steel, some of it will be sold as pig iron; we have re-entered that trade and hope to remain in it permanently. The steel plant, blooming mill and billet mill are commensurate with the amount of pig iron to be converted, and in the rail mill, rod mill, bar mill, wire mill, and nail mill we have power to finish in these forms all the steel which our present plant will produce. We have, as I have said, reached the well-balanced position for which we have been working for the last three years.

COAL AND ORE DEPOSITS

I would add that all the developments in the basic properties of the Corporation have been uniformly favorable. The farther we get into our iron ore property on Bell Island the better it looks, and the same is true of the new sections of our coal fields which we are exploiting. Nothing that has been said of our great possessions of coal and iron ore, as the basis of a permanent and prosperous business for the Corporation, needs to be unsaid or even qualified.

As to limestone, while the quarries at Marble Mountain continue to yield a large amount of stone, our requirements have increased very much and we have thought it well to open up a large and well-equipped quarry at Port-a-port, Newfoundland, to ensure a regular and ample supply. It can be brought from there to Sydney in our largest steamers so that transportation charges will be low. We have already used a good deal of Port-a-port stone and found it to be of excellent quality.

TARIFF

Although the Government has not hesitated to admit that the representations made to them respecting the absence of duty on wire rods, in particular, and the anomalies and inconsistencies in the iron and steel tariff in general, are well founded, any effort to cure these defects and to place the industry on the same level as others, has been postponed, as we understand, for another year. One of the questions on which this bears is our wire and nail business. It has always been our desire that we should make wire rods for the wire and nail manufacturers in Canada, but, as I have said more than once, if they are left on the free list we cannot take this business, and to utilize our rod mill must use the wire rods ourselves as raw material for our own wire and nail mills. These have been so constructed that their capacity can be more than doubled, at a very moderate expenditure, and I need scarcely say that with our advantages we are in a good position to compete for this business. There is, however, sufficient wire and nail machinery now in the country, and we would be well satisfied if the promised revision of the tariff removes the unfortunate and anomalous conditions which now affect the wire-rod industry. If not removed they must ultimately force us into competition with those whom we would rather have as customers.

On the question of the tariff generally it must be a matter of great regret to everyone interested in the welfare of the country that we are importing such an enormous amount of stuff which could be made in Canada. The growth of our foreign indebtedness is cause for great anxiety, and these imports are contributing largely to this growth.

Taking iron and steel products alone, and counting only such as in our present state of development, are or should be made in Canada, I learn that our imports for the twelve months ending 31st March last amounted to 1,168,467 tons, valued at $28,331,349, as against 273.650 tons in 1909, valued at $7,234,116. This, of course, takes in only the less-finished articles, as the low average price shows. Taking the whole line of iron and steel and manufactures therefrom, excluding only automobiles, the increase is very striking: the total in 1909 was $40,717,761 and in the year ending March 31st, 1913, $138,648,364. These figures are very significant; they have at least this satisfaction for us, they show that there is a practically unlimited market for everything we can make.

It is, I think, a lamentable feature that the strong tendency of the iron and steel tariff is to build up secondary industries in Canada, depending on foreign manufacturers for their raw material. I am quite well aware that the Canadian plants cannot as yet cope with the great demand for iron and steel, but it is to be regretted that people in the business are deterred by tariff conditions from increasing the primary and basic lines of manufacture; that large secondary industries are growing up whose existence may depend on the maintenance of supplies of raw material entering at low duties, or even duty free; that these conditions will make it increasingly difficult to get the primary industries established in Canada. The outcome may be a condition of industrial dependence on foreign makers of pig iron and of steel in its earlier stages of manufacture, except in the case of a few concerns which start with the coal and ore and sell the product in wire, nails and other finished articles.

The truth of what I have said may be verified by consideration of what has been done with the enormous amount of capital expended in recent years in the enlargement of our Canadian iron and steel plants. We have all spent large amounts, but with trifling exceptions the money has gone either to extend or construct finishing mills, or to increase the amount of steel to be passed through such mills. We have built one furnace for the express purpose of making foundry pig iron, and there have been moderate extensions elsewhere looking to the same object. Apart from these, I know of no instances of extensions for the supply of basic materials.

That all this has a very serious bearing on the future of the steel industry of Canada is plain. One might go farther and say that it has a serious bearing on the financial position of the Dominion.

This completes what I have to say to you to-day, and I now move the adoption of the Report.

Sir William C. Van Horne, Vice-President of the Corporation, seconded the resolution, which was duly carried.

BY-LAWS, ETC.

A reprint of the Articles of Association having all the amendments thereto which have been from time to time adopted by the Shareholders embodied and consolidated therein, was submitted, and, on resolution, the same were adopted in their complete form as the Articles of Association of the Corporation.

ELECTION OF DIRECTORS

On the motion to elect a Board of Directors, the President was requested to cast one ballot for the re-election of the retiring Board, which, having been done, the Scrutineers reported that they had been duly re-elected.

The Directors of the Corporation and the constituent companies are:—

Sir H. Montagu Allan.
Mr. Geo. Caverhill.
Hon. Geo. A. Cox.
Hon. R. Dandurand.
Hon. Robert Mackay.
Hon. David MacKeen.
Sir Wm. Mackenzie.
Mr. Wm. McMaster, Vice-President, Steel Company.
Col. the Hon. James Mason.
Mr. W. D. Matthews.
Mr. Frederic Nicholls.
Col. Sir H. M. Pellatt, C.V.O.
Mr. J. H. Plummer, President of the Corporation and Steel and Coal Companies.
Mr. W. G. Ross.
Right Hon. Lord Strathcona and Mount Royal.
Sir Wm. C. Van Horne, Vice-President of the Corporation.
Mr. F. L. Wanklyn.
Mr. J. R. Wilson, Vice-President, Coal Company.
Mr. E. R. Wood.
Mr. Mark Workman.

A vote of thanks to the Canadian Bank of Commerce for the use of the Board Room was unanimously adopted.

The meeting then adjourned.

At a subsequent meeting of the newly elected Board of Directors the following officers were elected:—

President	MR. J. H. PLUMMER
Vice-President	SIR WM. C. VAN HORNE
Secretary and Treasurer	MR. C. S. CAMERON
Assistant Secretary and Treasurer	MR. W. A. DOIG

EXECUTIVE COMMITTEE.— The President, the Vice-President, Mr. J. R. Wilson, Mr. Frederic Nicholls, Colonel Sir Henry M. Pellatt, C.V.O.

C. S. CAMERON,
Secretary.

DOMINION STEEL CORPORATION, LIMITED

REPORT OF THE DIRECTORS TO THE SHAREHOLDERS

Your Directors submit herewith the Consolidated Balance Sheet as at 31st March, 1913, together with the Profit and Loss Account for the year ending on that date.

EARNINGS FOR THE YEAR.— The net earnings of the Corporation and its constituent companies, for the year amounted to $4,714,057.77, out of which $1,009,650.61 was set aside for depreciation, sinking funds, etc. Besides providing for all charges and dividends, including $1,277,101.00 on the Common Stock of the Corporation, the reserve funds and surplus were increased during the year by $1,272,199.96.

In view of the conditions that prevailed during the past year, your Directors regard the result as encouraging. The prices received for steel products in the earlier part of the year were low; the costs and output were affected adversely by the pressure to complete the new plant, and, as before, a considerable part of the product had to be marketed in forms of finished steel which, owing to the condition of the tariff, were unprofitable. In addition, while part of the expenditure of new capital on your properties has increased fixed charges, it has not yet produced the increased earning power which you are entitled to expect.

The tariff remains unchanged, but the other disadvantageous conditions have passed or are passing away. The acute depression in iron and steel prices, resulting from the conditions which prevailed in the United States, was severely felt by the Company during the first half of the year notwithstanding the heavy demand for these products, but conditions in this respect have greatly improved and better prices are now being obtained. In the financial year upon which we have now entered your business will have the advantage of larger outputs, of ability to produce more profitable forms of finished steel by means of the new mills, and, it is hoped, of lower costs.

PRODUCTION.—Our figures again show a fair increase over the previous year.

	Year ending Mar. 31st, 1913.	Year ending Mar. 31st, 1912.
COAL COMPANY		
Cape Breton Collieries	4,640,940 tons	4,063,395 tons
Cumberland Collieries	412,220 "	342,868 "
Total coal mined ...	5,053,160 "	4,406,263 "
STEEL COMPANY		
Ore mined, Wabana	757,003 tons	602,168 tons
Pig Iron	321,020 "	290,588 "
Steel Ingots	343,251 "	325,553 "
Blooms and Billets not further finished	49,132 "	43,050 "
Rails	174,802 "	153,408 "
Rods	53,323 "	70,633 "
Bars, Wire, Nails, etc.	10,778 "	......

EXTENSIONS—CAPITAL EXPENDITURE

During the year the Capital Expenditure of the Companies, exclusive of the final payment of $350,000 in respect of the Steel Company's purchase of Coal Company stock, amounted to $4,939,866.25, of which $2,456,026.27 was expended on the new collieries and other property and improvements connected with your Coal business, and $2,483,839.98 on the Steel Company's plant, mines and quarries. Of these expenditures the earnings of the combined Companies supplied over $1,000,000.

On the Coal Company's property, the re-opening of Victoria Mine (now No. 17) has been commenced, also of the mine on the Emery seam, known as No. 11, underlying No. 3 colliery, the latter being now nearly exhausted. These collieries will give an early addition to the output, and in the case of No. 11, will utilize in part the equipment of No. 3.

In the Steel Department there have been some additions to subsidiary plant and equipment, found necessary for the enlarged business. The two new blast furnaces, the large mixers, the bar and rod mill and the wire and nail mills are all, at this date, in successful operation.

FINANCES

Eight thousand shares of the Common stock of the Corporation were issued during the year in exchange for an equal number of shares of the Common stock of the Dominion Iron and Steel Company, Limited, and were subsequently disposed of by the latter.

The additions to the Steel Plant have been more extensive and more costly than the early estimates, and much larger amounts are found to be absorbed in working capital, owing to the enlargement of all branches of your business. Your Directors have sold, at a satisfactory price, £200,000 of the 5 per cent. Consolidated Mortgage Bonds of the Steel Company, and have under consideration the issue of a further moderate amount of securities to provide for these matters.

It is impossible with such properties as yours to fix any limit to the growth of the plants, but, subject to unforeseen developments, it is proposed that for some time to come the energies of the Staff shall be devoted to the development of the Steel Plant as now completed, and that no further extensions shall be undertaken until the existing plant has been brought to the highest efficiency. The equipment of the Coal Company must be not only maintained, but steadily increased to meet the growing requirements of your customers. A large part of this your Directors expect to provide for out of reserves and surplus earnings.

RELIEF AND BENEFIT SOCIETIES

These important organizations have had another prosperous year to the advantage of the subsidiary companies and of their employees alike.

During the year they disbursed benefits amounting to $153,730.05, and their combined reserve funds at 31st March, 1913, amounted to $233,678.84.

STAFF

Your Directors have pleasure in recording their appreciation of the zealous service rendered by the various officers to whom your affairs are entrusted.

All of which is respectfully submitted

On behalf of the Board of Directors,

J. H. PLUMMER,

President

Chartered Accountants.

TRADE DISPUTES DURING MAY

The record of trade disputes maintained by the department of labor shows that, as is usual at this season, the majority of the disputes occurred pending the adjustment of new wage schedules. These were nearly all of short duration. The mining industry on Vancouver Island was seriously interfered with, more than 3,000 men being out during the whole month through the continuance of the dispute at Ladysmith and Cumberland mines, and the closing down of the mines in the Nanaimo district. A great number of the disputes of the month occurred among workers in the metal trades. The disputes of May affected upwards of 11,500 employees and accounted for the loss of more than 150,000 working days. Disputes affecting various classes of municipal employees in Vancouver, and affecting also the boot and shoe workers in a number of factories in Quebec were satisfactorily adjusted during the month through the instrumentality of boards under the Industrial Disputes Investigation Act. The department of labor also assisted in the adjustment of disputes affecting the employees of the hydro-electric commission in Toronto, and affecting also the longshoremen in Montreal and St. John, N.B. In the latter case a board has been established under the Industrial Disputes Investigation Act.

Higher Education for Children

BY C. A. HASTINGS.

People of all classes are, in these days of competition, beginning to see the benefits of higher education. In the old days boys were leaving school altogether for their separate walks in life, at an age when nowadays the real education commences, and it is then that the cost becomes serious. When a boy has reached the age of sixteen or seventeen, there will be others approaching that age, and rapidly too, so that before the eldest son has gone through his course, the younger sons will have entered that stage and the expenditure becomes considerable. It does not signify what profession, business or occupation the boy will eventually follow, higher education is indispensable, and a father whose income fluctuates cannot possibly say what it will be fifteen or sixteen years hence when this educational expenditure will begin to tell. It is, therefore, obvious, that he should provide for the future welfare of his children—boys or girls.

This can be done by means of an educational endowment policy, which will not only meet the demands of every parent, but is also profitable. Furthermore, he can set aside the money for this purpose during a period when education is cheap.

No Risk to This Contract.

For example, a man aged thirty, who puts aside $150 per annum for fifteen years, he can be sure then of an income of $500 per annum for six years commencing when the child reaches the age of sixteen. No risk whatever is attached to this contract.

The following contingencies must be considered:—(1) Child may not reach age sixteen. (2) Child may die between ages sixteen and twenty-two. (3) Parent may die before age benefit is reached. Now, assume child does not reach age sixteen, all premiums paid will be returned to parent, and if either of the other two contingencies occur, policy is not affected in any way.

The annuities still continue, and can be paid for any purpose that the parent wishes, and, in the event of the parent's death, all future premiums are cancelled and at attained age (sixteen in this case) the annuities will still be paid by the company.

These Are Main Points.

Briefly, these are the main points: (1) If both parent and child live all premiums are returned with an addition. (2) If the child dies, parent suffers no monetary loss. (3) If parent dies child does not suffer.

This policy is commended to all those who do consider higher education of some importance.

GRAND TRUNK PACIFIC DEBENTURES.

A special meeting of the Grand Trunk Pacific Railway has been called for July 16, at Montreal, for the purpose of pasing a by-law authorizing the issue of debentures for $15,000,000 under the provisions of the act passed by Parliament two weeks ago, by which the Government is to loan that amount to the company. The debentures, when issued, will be delivered to the Dominion Government, and they will be guaranteed as to principal and interest by the Grand Trunk Railway.

INVESTS IN FIRST MORTGAGES.

Mr. Henry Brown, general manager of the Century Insurance Company, Limited, Edinburgh, has just spent three months in investigating Canadian conditions and was a visitor to *The Monetary Times'* office this week. His company has a large sum of money invested in the Dominion, principally in first mortgages. All these are guaranteed by a company which makes a speciality of such guarantees. Mr. Brown says his company would be willing to hold, at the mortgage price, any of the properties on which they have first mortgages, should that ever be necessary. The Century Insurance Company, Limited, has invested funds in Canada for five years and the corporation guaranteeing its mortgages has never recorded a single loss. Mr. Brown thinks that critics of Canadian borrowing in Great Britain do not always realize the vast resources and potentialities for which the funds are asked.

◆

NEW BOILER REGULATIONS FOR ONTARIO

Following an act passed by the Ontario Legislature two sessions ago, regulations affecting the construction of boilers are to be brought into force on July 1st. Mr. D. M. Medcalf, who is public inspector of boilers for the province, has drafted regulations under the act which will henceforth compel manufacturers of boilers to submit plans and specifications to this branch of the Department of Public Works to insure a standard in both material and method of construction.

The regulations provide that all new boilers to be constructed in the province shall conform to a proper standard; second-hand boilers to which extensive repairs have been made will also be inspected. Until the present time practically any class of construction would go in the province, and boilers have been sold indiscriminately that have raised the danger risk to such an extent that human life has been impaired.

◆

BUSINESS AT RED DEER.

The following is a summary of the business transacted at the various government institutions in Red Deed during 1912, also the figures in connection with the building permits issued by the town and the assessment returns for the same year. As compared with the figures for the year 1911, it will be seen that a substantial increase has taken place. Red Deer hopes that ere another year passes the banks will have organized a clearing house so that statistics may become available to show the volume of business transacted at these institutions.

Assessment.

1909	$1,441,430

A tannery and a leather-finding factory would be successful at Red Deer. Everything to make them so is to be found in abundance in the district. Situated as the town is in the centre of one of the best mixed farming districts, the farmers go extensively into the business of raising cattle. Statistics show that the Red Deer district ships large quantities of hides annually, as well as a large amount of live stock. Red Deer is an alert and progressive town.

VANCOUVER'S MAY FIRE LOSS.

The May report of Vancouver fire department shows the fire damage during the month was $5,531; the insurance paid on losses was $4,286, leaving the property loss above insurance $1,245. The total value of property involved was $590,100. The department responded to 30 alarms during the month as follows:—Smoke scare, 1; chimney fire, 1; false alarms, 2; fires where damage occurred, 13; tar pots, bush fires, rubbish piles and small fires where no damage resulted, 13. A complete list of fires where damage occurred follows:—

May 1st.—Telephone alarm at 1.24 a.m. Fire at the Young Women's Christian Association at the N.E. corner of Burrard and Dunsmuir Streets. The blaze started on the roof and was caused by sparks from a burning chimney, considerable damage resulting to both building and contents. Several of the inmates had narrow escapes, having to leave the building in their night attire. Building owned and occupied by the Y. W. C. A. Damage about $1,895.50, partly covered by insurance. Telephone alarm at 1.20 p.m. Fire in a gasoline cleaning drum at the Perth Dye Works, 1,762, Second Avenue West, caused by friction. Building owned by Colonel Worshop and used as a clothes' cleaning establishment. Damage $20, covered by insurance. Alarm from Box 15, at 11.32 p.m. Fire on the eighth floor of the Dominion Trust Building, S.W. corner of Pender and Homer Streets. The blaze started in some rubbish from some unknown cause and did slight damage to the building. The eighth floor was unoccupied. Building owned by the B. C. Securities Company. Damage, $100.00, covered by insurance.

May 3rd.—Telephone alarm at 8.55 a.m. Small fire in between walls in rear of furnace at Sorenson Bros.' bake oven, 1,337, Pender Street East, caused by an over-heated furnace. Building owned and occupied by Sorenson Bros. Damage, $10.

May 6th.—Telephone alarm at 2.05 p.m. Fire in residence at Twenty-first Avenue and Nanaimo Street caused by sparks from chimney. The fire started in the roof of the upper portion of the building being badly damaged. Building owned and occupied by R. N. Wall. Damage, $2,150, covered by insurance.

May 7th.—Alarm from Box 2,258, at 6.40 p.m. Fire in frame and canvas dwelling at 817, Windermere Street, caused by an overheated stove pipe which ran through the wall. Building owned and occupied by Mr. Clarkson. Damage, $175.

May 16th.—Alarm from Box 31, at 3.10 a.m. Small fire under stairway leading to basement at the Pacific Rooms, 17, Hastings Street, W., cause unknown. Building owned by H. A. Jones and occupied by Mrs. E. M. Lamont and used as a rooming house. Damage, $10.

May 18th.—Telephone alarm at 10.29 p.m. to the Boulder Cafe, 11, Cordova Street, W. Grease around the vent pipe above the range caught fire causing slight damage to the building. Building owned by Doering and Williams and occupied by Simpson and Armstrong and used as a restaurant. Damage, $50, covered by insurance.

May 21st.—Alarm from Box 62, at 7.05 a.m. Small fire in upstair bedroom at 1,007, Burrard Street, caused by a match in ash tray setting fire to window curtains. Building owned and occupied by Thos. Harvie. Damage, $130, covered by insurance.

May 23rd.—Telephone alarm at 10.49 a.m., to 538, Cambie Street. Fire on roof caused by spark from chimney. Building owned by Dr. A. McK. Jordon and occupied by Miss Beddard and used as a rooming house. Damage, $40, covered by insurance.

May 24th.—Telephone alarm at 3.10 p.m. Small fire in dairy in rear of 1,648, Alberni Street, caused by clothes being left on boiler to dry. Building owned and occupied by Phillips and Brodie and used as a dairy. Damage, $150.

May 25.—Alarm from Box 318 at 9.58 a.m. Fire in Hoy and Son's Bakery, 750, Denman Street. The blaze started in a wooden partition on top of the bake oven and spread to the roof before being extinguished. Building owned and occupied by Hoy and Sons and used as a bakery. Damage, $200, covered by insurance.

May 31st.—Alarm from Box 2,258 at 4.30 p.m. Fire in a one-story frame dwelling and a tent house at Rupert and Napier Street, caused by a defective flue. The dwelling and contents were a total loss and the tent had the roof burnt off. Building owned and occupied by H. Vince, and tent occupied by T. Vince. Damage, $600.

The total number of alarms was 30, chimney fires 1, false alarms 2, value of property involved $590,100, loss $5,531, insurance paid $4,286, loss above insurance $1,245, hose laid at fires 10,050 feet, chemical used 875 gallons.

COPY OF THE MONETARY TIMES WANTED.

A copy of *The Monetary Times* for July 3rd, 1885, is required to complete that year's volume. Will any person who has this number to spare, please communicate with the Circulation Manager, *The Monetary Times*, Toronto.

◆

TRADE BETWEEN HAMBURG AND CANADA.

The history of trade between Hamburg and Canada, as told by the following figures, is one of continued steady progress, apparently gaining in bulk each succeeding year. This is no doubt in part due to the reciprocal advantages in tariff rates granted by Canada and Germany in 1910 and also to the wonderful development that is taking place in the Dominion:—

	Imports from Canada.	Exports to Canada.
1906	£212,169	£ 459,942
1907	282,078	606,597
1908	254,062	613,022
1909	304,817	764,036
1910	532,221	925,684
1911	962,052	1,125,300

The principal articles of import from Canada were wheat, flour, asbestos, silver ore and machinery. The principal articles exported to Canada were raw sugar, machinery, toys, skins and furs, glass and porcelain.

◆

DOMINION STEEL REPORTS COMPARED.

President J. H. Plummer, of the Dominion Steel Corporation, has issued a circular showing the standing of the corporation on March 31, 1913, and March 31, 1912, respectively. It is summarized as follows:—

	March 31, 1913	March 31, 1912
Manufacturing earnings	$4,714,057	$3,936,181
Deduct sinking funds, depreciation, etc.	1,009,650	881,642
Interest	1,246,951	1,132,981
Bond discount	84,788	86,387
Net earnings	$2,372,667	$1,836,169
Balance April 1	784,945	734,980
Less dividend on preferred	437,500	....
Less dividend on preferred of constituent companies	560,000	560,000
Less dividend on common	1,277,101	1,225,204
Balance March 31	$ 883,012	$ 784,645

After paying dividends on preferred of $437,500, not paid in the 1912 year and paying $51,897 now in common stock dividends had a balance out of last year's profits of $98,067 to add to its previous surplus, as compared with a corresponding balance of only $49,965 in 1911-12. In deductions of this kind allowance is also to be made for the larger sums added to reserves in 1912-13.

◆

CITY ESTATES OF CANADA, LIMITED.

The first annual report of the City Estates of Canada, Limited, shows sales of land have aggregated $913,364 gross, resulting, subject to realization of instalments due by purchasers, in a net profit of $148,950, after payment of mortgage interest, and other necessary provisions. The capital of the company is $775,000 each of preferred and common shares. The preference shareholders are entitled to receive an amount equal to their capital in dividends, that is, 100 per cent. in addition to the 6 per cent. interest, before the common shares participate in either assets and profits. From the net profits dividends of $45,565 were paid in dividends, leaving a balance of $103,384. The properties of the company are in and around Toronto. The company took over the benefit of contracts made previous to its organization, which brings the total land sales before and since incorporation to $1,039,810. On these sales, there is due in instalments unpaid, etc., $647,741. This amount bears interest at 6 per cent., and amounts to over two-thirds of the statutory 6 per cent dividend on preferred shares. The cost price of land unsold is placed at $1,014,285, against which there are mortgages of $103,655. The value of this property based on the average price now being obtained is $1,747,342. The net profit of $148,950 is 14 per cent. of the total sales.

Sir Henry M. Pellatt is president of the company; Sir William Wiseman, Bart, first vice-president; and Sir J. M. Gibson, second vice-president.

NINE LARGE COMPANIES

New A. E. Rea Company—Several Manufacturing Concerns are Incorporated

New incorporations are less in number than for several weeks past. Fifty-six receiving charters with a total capitalization of $14,610,850. The largest being:—

Company	Capital
A. E. Rea Co., Ottawa	$2,000,000
Union Carbide Co. of Canada, Toronto	2,000,000
Porcupine Crown Mines, Toronto	2,000,000
Ontario Steel Products Co., Montreal	1,500,000
Citizens Investment Corporation, Winnipeg	1,000,000
A. E. Rea Realty Co., Ottawa	1,000,000
Sherrill Porcupine Gold Mines, Toronto	1,000,000
Boving & Co., of Canada, Toronto	1,000,000
Avern Pardoe & Co., Toronto	1,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capitalization.
Quebec	15	$2,770,850
Ontario	23	9,300,000
Manitoba	8	1,590,000
Alberta	1	150,000
British Columbia	9	800,000
Total	56	14,610,850

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the begining of each paragraph. The persons named are provisional directors:—

Emo, Ont.—Barwick Mines Company, $20,000. J. Bennett, B. Rogers, F. Schleiter.

Dacotah, Man.—Dacotah Store Company, $20,000. W. Shanks, E. F. Piper, C. H. Jarvis.

Calgary, Alta.—Belley Bros., $150,000, (flour mills). L. DeG. Belley, Mrs. L. Guay, A. Belley.

Crystal Beach, Ont.—Midway Amusement Company, $40,000. H. Oges, Mrs. B. Oges, C. F. Fowler.

Guelph, Ont.—Stevenson and Malcolm, Limited, $30,000, (plumbers). A. Malcolm, C. L. Dunbar, R. S. Clark.

Woodstock, Ont.—Woodstock Brewing and Malting Company, $40,000. R. C. LeVesconte, V. J. Callen, H. Dreany.

L'Epiphanie, Que.—Le Progres de L'Epiphanie, $49,000, (wood). J. E. A. Decelles, C. J. E. Charbonneau, A. Blanchard.

Kenora, Ont.—The Nestor Falls Timber Slide and Improvement Company, $30,000. J. W. Short, C. J. Short, Mrs. M. Short.

Preston, Ont.—Preston Chair Company, $100.000. H. J. Schneider, G. Gildner, both of Rochester, New York, E. B. Foster, of Preston.

Sturgeon Falls, Ont.—Miville Manufacturing Company, $40,000, (machinery). A. A. Aubin, J. E. Serre, G. Levesque, all of Sturgeon Falls.

Gilmour, Ont.—Wandsworth Lake Mining Company $60,000. C. C. Snedeker, J. A. Anderson, J. A. Pendergast, all of Syracuse, New York.

Fraserville, Que.—New York Steam Laundry Company, $49,000. J. A. Bourbeau, Quebec, F. Lapointe, C. H. Moineau, both of Three Rivers.

Hull, Que.—La Compagnie de Placement Ottawa et Hull, $100,000, (loan contractors). W. C. Naubert, J. B. Meloch, both of Ottawa, P. H. Charron.

Quebec, Que.—The Eastern Canada Loan and Investment Company, $19,900. J. A. E. Lemieux, J. A. Pare, J. N. Turgeon. Terra Cotta, $200,000, G. Michaud, J. Cote, both of Quebec, C. A. Paquet, Montcalm.

Ottawa, Ont.—The A. E. Rea Company, $2,000,000, (departmental store). A. E. Rea, Toronto, J. R. Rea, G. A. Wanless. The A. E. Rea Realty Company, $1,000,000, (real estate). A. E. Rea, Toronto, J. R. Rea, G. A. Wanless.

Vancouver, B.C.—Canadian Provincial Theatres, Limited, $100,000. De Moulin Laboratories, $10,000. F. G. Walsh Company, $10,000, (general merchants). Independent Brewing and Malting Company, $500,000. International Fisheries, $20,000. J. H. Vickers and Company, $50,000, (general contracting). The J. H. Watson Insurance Agencies, $10,000. The Little Bros. Fur Sales Agency, $25,000. Terminal City Motor Company, $75,000.

Winnipeg, Man.—Trans-Provincial Securities Corporation, $250,000, (stock brokers). J. J. Creelman, G. S. Stairs, P. F. Casgrain, all of Montreal. Citizens Investment Corporation, $1,000,000. A. M. White, Regina, Sask., E. L. Taylor, D. H. Ross. The Reinforced Brickwork Company, Limited, $100,000. M. F. Sproule, H. F. Kidder, S. Lund. The Reliance Mercantile Agency, $50,000. J. E. McLaughlin, G. W. Smith, A. Hill. The Adjustable Bed Spring Manufacturing Company of Western Canada, $50,000. L. F. Harriman, A. Schmidt, M. J. Williamson. The Nelson Grain Saver Company of Canada, $100,000. J. D. Bacon, F. L. Goodman, A. J. Hunter, all of the City of Grand Forks, North Dakota. Brille Cafeteria, $20,000. H. R. Baudry, N. H. Brill, A. J. Valentine.

Montreal, Que.—International Valve Co., $50,000, (mechanical engineers). E. Languedoc, E. R. Parkins, W. Taylor. Darling and Brady, $100,000, (soap manufacturers). D. J. M. Darling, M. Darling, G. H. Baker. Leclair and Chalifoux, $50,000, (boots and shoes). L. Leclair, J. Brosseau, N. Chayer. The Maritime Fish Corporation, $400,000. H. N. Chauvin, G. H. Baker, H. E. Walker. Ontario Steel Products Company, $1,500,000. L. Macfarlane, C. A. Pope, G. Barclay. La Compagnie d'Operette de Montreal, $125,000. H. Delcellier, A. F. Revol, C. Godfroy de Tonnancour. Farnham Wood Manufacturing Company, $200,000. W. R. L. Shanks, F. G. Bush, G. R. Drennan. La Compagnie de Pools et de Billards du Canada, $49,950. J. Breton, J. L. J. Villeneuve, L. A. Picard. The Terrebonne Gardens Land Company, $20,000, (real estate). R. F. Stockwell, H. Mackay, E. G. Place. La Compagnie d'Immeubles Lafontaine, $49,000. A. Allard, J. P. Grace, J. A. Paquin. Ville Pointaux-Trembles Annexe, $9,000. J. U. Dumont, A. Vale, J. D. Langlier.

Toronto, Ont.—Athelma Apartments, $400,000. D. McArthur, E. V. McMillan, A. Fasken, Avern Pardoe and Company, $1,000,000, (stockbrokers). J. F. H. McCarthy, J. B. Taylor, G. C. Loveys. The George Everall Company, $40,000, (printers-. Alberta Everall, Mrs. M. Everall, Miss E. M. Everall. Porcupine Crown Mines, $2,000,000. Z. Gallagher, Miss E. M. Wilson, G. T. Harrington. Ontario Brokers, $40,000. T. H. Barton, J. H. Cooke, A. R. Cochrane Silverthorn Land Company, $40,000. F. McLaughlin, E. V. Oaf, W. L. Reed. Channell Chemical Company, $40,000. A. T. Channell, G. H. Gray, J. J. Gray. Sherrill Porcupine Gold Mines, $1,000,000 G. H. Sedgewick, A. G. Ross, J. Aitchison. Dominion Wool Stock Mills, $40,000. C. R. Peterkin, jun., O. E. C. Woods, C. Mason. Boving and Company of Canada, $1,000,000, (mining engineers). R H. Parmenter W. S. Morlock, N. B. Wormwick. Union Carbide Company of Canada, $2,000,000. W. A. J. Case, J. B. Taylor, G. C. Loveys. Canadian I. P. Morris Company, $40,000, (electric apparatus). J. S. Lovell, R. Gowans, W. Bain. Delany and Petit, $300,000, (builders' supplies). C. Delany, H. S. Delany, both of Philadelphia, C. S. Pettit.

CALGARY'S TAXES

In explanation of the increase in the mill rate on the assessment of $133,007,000 of taxable property in Calgary, the commissioners' report is as follows:—

"Your commissioners beg leave to submit the estimates for the year 1913, and recommend that a rate of 18¾ mills on the dollar be struck on the assessment of $133,007,000 being 100 per cent. assessment on land values and 25 per cent. on improvements.

The detail of the levy is:—

Purpose.	Per cent.	Mill rate.	Amount estimated.
General	55.2449	10.3584	$1,389,209
Schools	16.0262	3.0049	403,000
Hospitals	2.9802	.5588	74,940
Parks	2.8662	.5374	72,075
Library	.7053	.1401	20,000
Debentures	22.0872	4.1414	555,413
	100.0000	18.7500	$2,514,637

* * *

Twenty-four hundred miles of telephone wire will be strung by the employees of the Alberta department of telephones on rural lines this year, in addition to a large amount of long-distance line in construction and new exchange work in the growing towns and cities of the province. Over two million dollars will be expended by the government in extending the telephone system of Alberta during the year. At the beginning of the year there were in wire miles 9,671 miles of rural lines and 6,689 miles of long-distance telephone lines in Alberta.

NEW CASUALTY POLICY

Standing Committee of International Association of Casualty and Surety Underwriters are Agreed on Form

The features of the new uniform accident insurance policy which were agreed to by the standing committee of the accident section of the International Association of Casualty and Surety Underwriters, are set in the following brief review:—

1. That no policy be issued without signed application.

2. That children's insurance be eliminated.

3. That beneficiary insurance be eliminated.

4. That no specific mention be made in any contract of the payment of loss by reason of sunstroke, freezing, gas or poison.

5. Death, dismemberment and loss of sight—single indemnity. That the payments for death, dismemberment and loss of sight be limited as follows:—Life, principal sum; both hands, or both feet, or sight of both eyes, principal sum; one hand and one foot, principal sum; either hand or foot and sight of one eye, principal sum; either hand or foot or sight of one eye, one-third principal sum. Loss shall mean, with regard to hands and feet, dismemberment by severance at or above wrist or ankle joints; with regard to eyes, entire and irrecoverable loss of sight.

Partial, Single and Double Indemnity.

6. Partial Indemnity—Single Indemnity.—Or, if such injuries, independently and exclusively of all other causes, shall continuously partially disable the insured from the date of accident, or continuously partially disable him from the termination of a period of total loss of time, the company will pay, for not exceeding twenty-six consecutive weeks, as follows:—

(1). A weekly indemnity of one-half the rate for total loss of time during that portion of the period throughout which the insured suffers such total disability of at least fifty per cent. of his business time;

(2). A weekly indemnity of one-quarter the rate for total loss of time during that portion of the period for which the insured is not entitled to a benefit under the preceding clause, but throughout which he is disabled from performing one or more important daily duties pertaining to his occupation.

7. Double Indemnity.—If such injuries are sustained (1) while a passenger in or on any railway passenger car or vessel licensed for the transportation of passengers, provided in either case by a common carrier and propelled by mechanical power (excluding injuries sustained while getting on or off or being upon the step or steps of any railway or street railway car) (2), while a passenger in a passenger elevator (excluding elevators in mines), or are caused (3) by the burning of a building while the insured is therein, provided the insured was in the building at the commencement of the fire; the company will pay double the amount otherwise payable under part—of this policy.

Adoption of Words and Clauses.

8. The use of the words "external and violent" in connection with the phrase "accidental means" in the insuring clauses of the policy.

9. The adoption of a clause excluding bodily injuries which shall result directly or indirectly from the bites or stings of insects, or from ptomaines, or from disease in any form; or any bodily injury, fatal or non-fatal, sustained by the insured while participating or in consequence of having participated in aeronautics.

10. The adoption of a clause providing special indemnity for certain automobile, motorcycle and motorboat accidents as follows:—If such injuries are sustained by the insured while driving or cranking an automobile, motorcycle or gasoline motorboat the company will pay only one-half of the amount otherwise payable under part— of the policy.

11. The adoption of an accumulation benefit clause as follows:—Commencing with the second year of this insurance, 5 per cent. shall be added annually to the principal sum of the first year until such additions shall amount to 50 per cent., and thenceforth so long as this policy shall be maintained in force, the insurance will be for the original principal sum plus the accumulations.

No Substitute Offered.

And hereafter no substitute shall be offered for above accumulations either by rider, indorsement or the issuance of a policy giving the accumulations in full, with or without additional premium.

12. It is also unanimously agreed that no policy of accident insurance should be issued during the year 1914 giving greater benefits or introducing into accident policies features providing benefits not contained in policies that are now proposed to be issued even for an additional premium.

13. That companies shall be privileged to give full coverage for automobile accidents for an additional premium of not less than $2 for each $1,000 principal sum and $5 weekly indemnity and that a premium of not less than $1.20 per $1,000. Death and dismemberment policies shall be charged.

TORONTO STOCK EXCHANGE

The annual meeting of the Toronto Stock Exchange was held this week, when all the officers were re-elected. They are: President, F. G. Osler; vice-president, E. B. Freeland; secretary, S. Temple Blackwood; treasurer, H. R. Tudhope; executive committee, W. H. Brouse, J. O. Buchanan and G. Tower Fergusson; auditors, J. K. Niven and G. W. Blaikie; assistant secretary, Lyndhurst Ogden.

A year ago there were 37 firms connected with the Exchange, having a membership of 79. To-day there are 41 firms, with a total membership of 93.

BIDS FOR MUNICIPAL BONDS

Four bids were made for the Glen Bain Rural Municipality. No. 105, Sask., $10,000 6 per cent. 20-year highway improvement debentures. The offer of the Flood Land Company, Regina, was accepted.

For the $5,000 15-year highway improvement debentures of Lost River Rural Municipality, No. 313, Sask., two offers were received. Messrs. Brent, Noxon and Company, Toronto, were awarded this issue.

Seven offers were received for the $10,000 6 per cent. 20-year road debentures of Last Mountain Valley Rural Municipality, No. 250, Sask. The issue was awarded to the Flood Land Company, of Regina.

Three offers were received for the $1,000 6½ per cent. 10-year school bonds of Dry Wood S.D., No. 1685, Alta. The Alberta School Supply Company, of Edmonton, was the successful bidder.

INTERNATIONAL HARVESTER COMPANY.

The volume of sales of the International Harvester Company for the year ended December, 1912, increased 16 per cent. over the preceding year. Favorable crop conditions, resulting in exceptional large crops, not only in the United States, but also generally throughout the world, created an increased demand for the company's lines of harvesting machinery and tillage implements. The sales of these products show a gain of 12 per cent. in the United States and 23 per cent. in foreign countries over the year 1911. The sales of new lines increased uniformly at home and abroad.

The expansion of the foreign trade continues. This has been the most important feature in the development of the industry since the formation of the company in 1902. The foreign trade has increased five-fold in the ten years of the company's operation, increasing from $10,400,000 in the year 1902 to $50,900,000 in the past year. It now constitutes 40 per cent. of the entire business of the company. On the other hand, the sales of harvesting machinery, tillage implements, and twine in the United States now constitute only one-third of the company's total sales.

The International Harvester Company of Canada, Limited, is the company's Canadian branch and the following is its organization:—

	Acres	Employees	Annual Capacity
Chatham Works, Chatham Canada	15.80	300	18,000 Waggons
Hamilton Works, Hamilton Canada	129.62	2,500	175,000 Harvesting Machines, Seeding Machines, and Tillage Im-Implements
Paris Works, Paris Canada	7.60	250	20,000 Tillage Implements and Manure Spreaders

The principal capital expenditures of the company in the United States and Canada during the past year were incurred in enlarging the warehouse and storage facilities at works and agencies, and in the construction of additional units for the manufacture of gasoline and kerosene engines and tractors.

WESTERN FUEL COMPANY'S OPERATIONS

General Manager Anticipates Output of One Million Tons Next Year—Nanaimo Will Benefit

(Special Correspondence).

Nanaimo, B.C., June 16th.

An output of one million tons of coal for the year 1914 is what Mr. Thomas Stockett, general manager of the local mines of the Western Fuel Company, and other officials of the company expect as the result of the extensive development work now under way and projected in connection with the exploitation of the vast coal areas in Nanaimo and vicinity.

In an interview relative to the progress being made in connection with the work at the new Reserve mine located on the delta of the Nanaimo River, Mr. Stockett stated he expected the main shaft to be bottomed by the end of March, and shipping 500 tons of coal a day before the end of the year and reaching a daily output of 1,500 tons before the end of 1914. Up-to-date half a million dollars has been expended in and about the Reserve mine, and the work when completed and in a condition to ship coal will represent an expenditure of $800,000.

The main shaft is down 872 feet, and will be sunk to 1,000 feet, at which depth it is expected the coal strate will be struck the latter part of March.

The air shaft is down to a depth of 601 feet.

Two Shafts are Large.

The two shafts are in the centre of a virgin field of 2,500 acres, calculated to contain coal enough to allow of a production of 1,500 tons a day for a period of 50 years. The two shafts are the largest in area of any in the entire western part of the continent. The main shaft is 10 x 26 divided into three compartments, the air shaft being a duplicate of the main shaft, also divided into three compartments.

Manager Stockett expects to have the pit head and other top works completed by June. These will be equipped with modern coal handling devices, both permanent hoisting engines being already in position. These engines are of the Barclay type, manufactured in Kilmarnock, Scotland, and are equipped with all modern devices for safety so that even should accident occur to the engineer which would render him helpless, the engines would stop at the proper place, there being devices to prevent over-winding and also to prevent the engine attaining a speed beyond the safety stage.

The pit head and top works are in general lines similar to those at No. 1, only more modern than those built in connection with the Esplanade colliery. A Sirocco fan has just arrived, which is an exact duplicate of the one lately installed at No. 1, and will be placed in position at the Reserve mine.

By the end of October, Mr. Stockett expects the Reserve mine will be in a position to ship 500 tons a day, and before the end of 1914 will attain a daily output of 1,500 tons. The main shaft which has a capacity of 1,500 tons for 9 hours' hoisting, will be used exclusively for the hoisting of coal, the air shaft being utilized for the hoisting and lowering of the men, timber, rock, waste material, supplies, etc. When the new mine is fully developed and capable of producing its maximum output the air shaft can be utilized, and in addition to its regular work of handling the men, etc., will be able to hoist 600 tons a day if necessary, bringing the total capacity of the Reserve mine up to 2,000 tons a day.

Transportation From Local Docks.

The output of the mine will be shipped from the local wharves of the company, which will be worked double shift if found necessary to handle the demand. The mine will be connected with the wharves by four miles of railroad which crosses Nanaimo River on a 300-foot bridge. This bridge has just been completed, and the rails are laid direct to the pithead on a splendid roadbed, and the side tracks will be laid as soon as the yards are made from the material taken from the two shafts.

In expending $800,000 at the Reserve mine the company is certainly demonstrating its faith in the future of Nanaimo, and it intends and has commenced with improvements to No. 1, including the opening of a new haulage way in the south side of the mine, which, with other contemplated improvements, will involve an expenditure of many thousands of dollars. The output of No. 1 for the future, said Mr. Stockett, is governed entirely by the capacity of the shaft to hoist coal to the surface. The mine is in the best possible condition, and there is as much coal in the pillars of the top seam alone as has come out of the whole mine since it was opened 30 years ago.

In addition to the opening of the Reserve mine and the further development of No. 1 and Northfield mines, as soon as the Reserve mine is in operation the company intends to resume operations at the Chase River slope, where work was abandoned a short time ago in order to rush work at the Reserve mine to an early completion. The Chase River slope is expected to give an output of at least several hundred tons daily which will amount to a respectable total at the end of a year and assist materially in swelling the company's output.

Nanaimo to-day is small compared to the larger Nanaimo when the plans of the company are consummated, and instead of an output of 600,000 tons in 1912, the year 1914 will witness an output of 1,000,000 tons with a corresponding increase in the number of employees from 1,500 to nearly 3,000 and a monthly payroll increased from a sum in the neighborhood of $150,000 to one near half a million dollars.

◆

NEW YORK BANKERS AT OTTAWA.

The recent convention of the New York State Bankers' Association, at Ottawa, marks a precedent in the history of the organization, the membership of which represents total banking resources of about $6,477,068,696. There were present in the neighbourhood of six hundred financiers from all parts of New York State.

Among those present were many millionaires. Considered as bank executives the members are the controlling power of deposits reaching a total of $4,670,348,210, more capital than all of the banks of Canada.

◆

CANADA NORTHWEST LOAN AND MORTGAGE COMPANY

The Canada Northwest Loan and Mortgage Company has been incorporated, is capitalized at $5,000,000, with headquarters at Edmonton, Alta., and has powers to carry on the business of loaning money on the security of, or investing in the debentures, bonds, fully paid-up stock and other securities of any government, or of any municipal corporation, or school corporation, or of any chartered bank in Canada, or any incorporated company—if incorporated by the Dominion of Canada or any province of Canada. The company may also lend money on mortgages on freehold real estate, etc.

The officers of the company are: Chairman, Mr. J. Cameron; vice-chairman, Mr. J. L. Cote, M.L.A.; secretary, Mr. H. T. Goodland; treasurer, Mr. A. E. Lindsay; bankers, the Royal Bank of Canada; solicitors, Messrs. McCaul & Valens; auditors, Messrs. Kinniard & Henderson.

◆

ANGLO-CANADIAN HOTELS COMPANY'S REPORT.

The Anglo-Canadian Hotels, Limited, has invested £80,000 capital in an hotel at Saskatoon, Saskatchewan, this capital being issued £50,000 in shares and £30,000 in debenture stock, the latter carrying interest at 8 per cent. The hotel was nominally opened for business in January last year, but it was not fully equipped for another three months, and it was not till June that it was in full working. It was then found that it was not big enough for the business which was available.

Trading to the end of 1912 brought in a gross profit of £10,855, which was reduced to £8,246 net by depreciation and London charges. Debenture interest requires £2,071; £899 is deducted towards the liquidation of preliminary expenses, a dividend of 6 per cent. is paid on the shares, and a balance of £2,275 is carried forward. This surplus is sufficient to discharge the balance of the issue expenses and to leave £1,552 in hand.

◆

INDUSTRIAL STOCK OFFERING.

A block of 7 per cent. preferred stock with [illegible] per cent. bonus of common stock of the Maritime Nail Company, Limited, is being offered at par by Messrs. J. C. Mackintosh and Company. The company has its head office and plant at St. John, N.B., and the capitalization is as follows:

1st mortgage ten year bonds	$131,600
Preferred stock	286,700
Common stock	311,700

The Maritime Nail Company was established in 1895 and made moderate progress for the first ten years of its existence. With the appointment of Mr. S. E. Elkin as general manager in 1907, a progressive policy was inaugurated which has made the company a prominent nail manufacturer. Since 1907, the tonnage output has shown an average yearly increase of nearly 50 per cent. and to-day the company has the second largest output in Canada, with the largest for any single mill. Its products include wire and galvanized nails, fence wire, hay wire, etc. Forty-five tons of wire rods go through the mill daily and from 180 to 200 men are employed.

BOND TENDERS INVITED

Monetary Times' Weekly Register of Information for Bond Dealers and Municipal Officials

Wabamun, Alta.—Until July 1st for $5,000 6 per cent. 10-year debentures. E. B. Shields, secretary-treasurer.

Red Deer, Alta.—By-laws to the extent of $45,000 for park purposes, waterworks, etc., were carried by the electors.

Maple Creek S.D., No. 80, Sask.—Until June 1st for $25,000 30-year 7 per cent. debentures. C. A. King, secretary-treasurer, Maple Creek, Sask.

Moncton, N.B.—Until June 25th for $201,000 and $173,000 5 per cent. debentures, and $28,000 4½ per cent. debentures. J. S. Magee, city treasurer.

Lloydminster, Sask.—Until July 14th for $5,000 6 per cent. debentures. H. C. Lisle, secretary-treasurer. (Official advertisement appears on another page.)

Broadview, Sask.—Until July 12th for $25,000 6 per cent. 20-year town hall debentures. A. Sinclair, secretary-treasurer. (Official advertisement appears on another page).

Yorkton, Sask.—Until July 1st for $15,000 5 per cent. 20-year school debentures. C. J. Macfarline, secretary-treasurer. (Official advertisement appears on another page).

Gordon S.D., No. 213, Man.—On June 25th, the ratepayers will vote on a by-law to issue $2,500 debentures. M. Chisholm, secretary-treasurer, Municipality of Longford.

Hanley, Sask.—Until July 9th for $15,000 6 per cent. 20-year municipal building debentures. A. Holm, secretary-treasurer. (Official advertisement appears on another page.)

Merritt, B.C.—Until June 30th for $45,000 6 per cent. 30-year waterworks; $25,000 6 per cent. 30-year electric light, and $10,000 6 per cent. 10-year sidewalks debentures. Harry Priest, treasurer.

Nokomis, Sask.—The town will have $18,000 6 per cent. 20-year local improvement debentures for sale after July 1st. W. A. Armour, secretary-treasurer. (Official advertisement appears on another page.)

Welland County, Ont.—Until July 15th for $100,000 4½ per cent. 30-year highway improvement debentures. R. Cooper, county clerk, Welland, Ont. (Official advertisement appears on another page).

Snipe Lake Rural Municipality No. 259, Sask.—Until July 14th for $5,000 6 per cent. 20-year road construction debentures. Maitland Barkwell, secretary-treasurer, Richlea P.O. (Official advertisement appears on another page).

Gull Lake, Sask.—Until June 28th for the following 6 per cent. debentures: $500 5-year nuisance ground, $10,000 20-year municipal hall, $1,000 10-year cemetery, and $3,500 10-year exhibition ground. E. E. Spackman, secretary-treasurer. (Official advertisement appears on another page).

AUCTION SALE
OF THE
CAPITAL STOCK
OF THE
CONSUMERS' GAS COMPANY
OF TORONTO

THE CONSUMERS' GAS COMPANY OF TORONTO hereby gives notice that it will offer for sale by public auction, at the Company's General Offices, Nos. 17-19 Toronto Street, Toronto (Messrs. C. J. Townsend & Company, Auctioneers), **AT 12 O'CLOCK NOON ON THURSDAY, THE TWENTY-SIXTH DAY OF JUNE, A.D. 1913, TEN THOUSAND THREE HUNDRED AND TEN (10,310) SHARES OF THE CAPITAL STOCK** of the said Company (each share having a par value of $50.00), subject to certain conditions, which will be made known at the time of sale, and of which any person desiring to purchase may in the meantime obtain a copy on application to the General Manager of the Company at the General Offices of the Company, Nos. 17 and 19 Toronto Street, Toronto.

The conditions of sale provide, amongst other things that the stock will be offered in lots of 10 shares each, subject to a reserved bid; that 20 per cent. of the purchase money shall be paid down at the time of sale, and the balance in four equal consecutive monthly installments, the first of which shall be paid one calendar month from the date of sale; that the purchaser may pay the whole of the purchase money at the time of sale, and may pay all, or any of the deferred installments, before the same fall due; that every share sold shall, in proportion to the amount from time to time paid thereon, and from the date or respective dates such payment or payments shall have been made, participate in all dividends declared after the date of sale; and that the purchaser shall at the time of sale sign an agreement for the completion of the purchase.

DATED AT TORONTO this 2nd day of June, 1913.
By order of the Board of Directors,

ARTHUR HEWITT,
General Manager.

SWEDISH COMMERCE

A commercial annual of interest and value is that issued by the Swedish Chamber of Commerce, London, Eng., which has 500 members. The report for 1912 contains special trade reports, a series of articles on the more important ports on the east coast of England, and questions dealing with Swedish traffic, wood, paper and pulp trades. The Swedish consular officials in Canada consist of Mr. Carl G. G. Anderberg, Montreal, acting-consul, and 16 vice-consuls located throughout the Dominion.

CANADIAN FAIRBANKS-MORSE COMPANY

Two pleasing facts are prominent in connection with the preparation of the report of the Canadian Fairbanks-Morse Company, to which reference is made elsewhere in this issue. These are that the good-will, patents, and drawings are represented only as having a value of $1, and that the company maintains its practice of placing its depreciation on buildings, plant and equipment at 10 per cent. of the original cost. The company's assets are in reality of much greater value than might be supposed from a comparison with many other companies in somewhat similar lines of business, inasmuch as many concerns take their "good-will," etc., in at many hundreds of thousands of dollars and allow but the smallest percentage when it comes to the matter of depreciation.

MAY BANK STATEMENT

The May bank statement shows a decrease of seven millions in call loans outside Canada. Call and current loans in Canada are about the same as in April. Circulation increased four millions. The figures, compared with April follow:—

	May.	April.
Circulation	$ 102,997,036	$ 98,100,111
Demand deposit	364,139,642	365,340,002
Notice deposits	630,755,603	631,160,280
Deposit outside	97,935,216	103,925,361
Call loans, Canada	69,982,540	69,757,912
Call loans, outside	96,151,209	103,212,185
Current loans in Canada	898,950,650	898,964,181
Current loans outside	37,691,786	36,310,033
Assets	1,521,841,373	1,527,088,246

The statement in full will appear in *The Monetary Times* next week.

VICTORIA, B.C., IS GETTING ITS MONEY.

A despatch from Victoria, appeared in the daily press this week, stating that the Dominion Securities Corporation, the city's financial agents, were unable to procure the money for $2,350,000 of Victoria's bonds underwritten several weeks ago.

"It was a foregone conclusion," added the dispatch, "that the city would be a long time getting the money, because less than 20 per cent. of the issue was disposed of in London. Part of this was forwarded to the city treasurer, and further sums representing the proceeds of the sale, also came along, but the bulk of the money the agents found themselves unable to raise."

This dispatch contains the maximum amount of fiction. Here are the facts. The city of Victoria's issue of £482,876 4½ per cent. consolidated stock was made in London last month at 95. Five per cent. was payable by subscribers on application, 40 per cent. on June 2nd and 50 per cent. on July 7. Although 82 per cent. of the issue was left with the underwriters, it should be remembered that the entire amount was underwritten and that the city of Victoria will, therefore, get the entire amount, no matter how much the underwriters took. Forty-five per cent. of the money due to the city was sent to the city on June 3rd, and the remaining 50 per cent. will be forwarded on July 8th, according to the terms of the issue. To those who know the methods of underwriting and the excellent standing and reputation of the Dominion Securities Corporation, the above explanation will be superfluous.

Bankers attending the New York State Bankers' Convention at Ottawa received an interesting illustrated souvenir of their visit, issued by Messrs. Murray, Mather and Company, Toronto, Montreal, etc.

Another rumor to the effect that the Michigan Central Railway has been absorbed by the Canadian Pacific Railway brings forth another denial from Sir Thomas Shaughnessy, president of the latter road.

NEW EDITION

MANUAL OF
CANADIAN BANKING

¶ The third edition of the "Manual of Canadian Banking" has been exhausted. We had intended to get out a new edition right away, but owing to the fact that the revision of the Bank Act will necessitate certain changes in the text, and so as to bring the book up-to-date, it has been decided to defer publication until the text of the new act is known.

¶ We are quite sure that all those who have recently sent in orders for Mr. Eckardt's work will appreciate the desirability of deferring the getting out of the new edition until it can be brought thoroughly up-to-date.

¶ We appreciate the many orders we are getting for the work, and hope those who have copies under order will bear with us for a few weeks.

MONETARY TIMES
OF CANADA

MONTREAL TORONTO WINNIPEG

LEGAL NOTICES

THE HERBERT MORRIS CRANE & HOIST COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 27th day of May, 1913, incorporating James Steller Lovell, accountant; William Bain, bookkeeper; Robert Gowans, Joseph Ellis and John Joseph Dashwood, solicitors' clerks, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on business as iron founders, mechanical engineers, makers of and dealers in lifting machinery, agricultural implements and other machinery and motors and motor cars, tool makers, brass founders, metal workers, boilermakers, millwrights, machinists, iron and steel converters, smiths, wood workers, gun makers, builders, painters, plumbers, metallurgists, electrical, sanitary and water supply engineers, gas fitters, farmers, printers, carriers and merchants, and to buy, sell, manufacture, repair, convert, alter, let on hire and deal in machinery, implements, rolling stock and hardware of all kinds; (b) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the above or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To carry on any business relating to the winning and working of minerals, the production and working of metals, and the production, manufacture and preparation of any other materials which may be usefully or conveniently combined with the engineering or manufacturing business of the company, or any contracts undertaken by the company, and either for the purpose only of such contracts or as an independent business; (d) To undertake and execute any contracts for works involving the supply or use of any articles manufactured or sold by the company and to carry out any ancillary or other work comprised in such contracts; (e) To apply for, purchase or otherwise acquire any patents, brevets d'invention, licenses, concessions and the like, conferring an exclusive or non-exclusive or limited right to use or any secret or other information as to any invention which may seem to the company capable of being used for any purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop, grant licenses in respect of, or otherwise turn to account the property, rights and information so acquired; (f) To purchase or otherwise acquire and undertake all or any part of the business, property and liabilities of any person or company carrying on any business which this company is authorized to carry on, or possessed of property suitable for the purposes of the company; (g) To construct, carry out, maintain, improve, manage, work, control and superintend any buildings, foundries, factories, workshops, wharves, warehouses, shops, electric works, and other works and conveniences which may seem directly or indirectly conducive to any of the company's objects; (h) To enter into partnership or into any arrangement for sharing profits, union of interests, joint adventure, reciprocal concession or co-operation with any person or company carrying on or engaged in, or about to carry on or engage in, any business or transaction which this company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as to directly or indirectly benefit this company, and to take or otherwise acquire and hold shares or stock in or securities of any such company, and to lend money to, guarantee the contracts of, or otherwise assist any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (i) Generally to apply for, purchase, take on lease, or in exchange, hire, or otherwise acquire any real or personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business, or with reference to any of these objects, or capable of being profitably dealt with in connection with any of the company's property or rights for the time being, and in particular any land, buildings, easements, licenses, designs, patents, machinery, plant and stock-in-trade; (j) To distribute any of the property of the company in specie among the members; (k) To aid in the establishment and support of associations or institutions calculated to benefit persons employed by the company, or having dealings with the company, and to subscribe money for philanthropic, charitable or benevolent purposes; (l) To sell the undertaking of the company or any part thereof or the property and assets of the company as a going concern, for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company, having objects altogether or in part similar to those of this company; (m) To promote any company or companies for the purpose of acquiring all or any of the property, rights and liabilities of the company, or for any other purpose which may seem directly or indirectly calculated to benefit this company, and to amalgamate with any other company having objects altogether or in part similar to those of this company; (n) To raise and assist in raising money for, to lend money to and to aid by way of bonus, endorsement, guarantee or otherwise any customer or other person having dealings with the company, any corporation in the capital stock of which the company holds shares or with which it may have business relations, and to act as employee, agent or manager of any such corporation and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; and to guarantee payment of the principal of or dividends and interest on shares, bonds, debentures or other securities of any company or corporation having objects altogether or in part similar to those of the company; (o) To obtain any provisional order or Act of Parliament, for enabling the company to carry any of its objects into effect, or for effecting any modification of the company's constitution, and to oppose and resist any measures, proceedings, or applications which may seem calculated directly or indirectly to prejudice the company's interests; (p) To pay out of the funds of the company all costs, charges and expenses preliminary and incidental to the formation, incorporation and organization of the company; (q) To pay, with the approval of the shareholders, out of the funds of the company, commission to any person or company for subscribing or agreeing to subscribe for any shares of the company or for procuring or guaranteeing or agreeing to procure or guarantee the subscription of any shares in the company's capital or any debentures, debenture stock, shares, stock or securities whether issued by the company or not; (r) To purchase, take up or otherwise acquire and hold shares, stock or securities in any other company or corporation and to apply the funds of the company for the purpose. Also to invest and deal with any moneys of the company not immediately required for carrying on its business upon such securities and in such manner as may from time to time be determined by the directors; (s) To draw, make, accept, endorse, execute and issue bills of exchange, promissory notes, debentures, bills of lading and other negotiable or transferable instruments or securities; (t) To sell, improve, manage, develop, lease, exchange, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (u) To do all or any of the above things either as principals, agents, trustees, contractors or otherwise, and either alone or in conjunction with others, and either by or through agents, sub-contractors, trustees or otherwise; (v) To do all such things as, in the view of the company, are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Herbert Morris Crane & Hoist Company, Limited," with a capital stock of one hundred thousand dollars, divided into 1,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 29th day of May, 1913.

THOMAS MULVEY,
Under-Secretary of State.

LEGAL NOTICE

LEEDS MANOR ORCHARDS, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 15th day of May, 1913, incorporating Malcolm Hugh Robinson and Percy Septimus Cowell, chartered accountants; James Victor Macfarlane and Philip Thomlinson, clerks, and Charles Joseph Roberts, gentleman, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on the business of planting, cultivating, growing, producing, buying, selling, marketing, storing, importing, exporting and generally dealing and trading in and with, as principal or on commission or otherwise, apples and other fruits of all kinds, nuts, berries, cereals, vegetables, lumber and timber, as well as other agricultural, garden and forest products of all kinds; to breed, buy, sell, export, import and deal in cattle, hogs, sheep, poultry and all kinds of live stock; and in connection with all such business and purposes, to purchase, hold, rent, lease, sell, convey or otherwise deal in lands as fruit lands, farm lands or timber lands; to engage in the cultivation, development and improvement of such lands for the purposes aforesaid; to set out, plant, manage, cultivate and control groves and orchards of fruit and nut trees of all varieties, as well as gardens, farms, forests, ranches and plantations; to gather harvest and ship to market fruits and edible nuts grown upon the company's lands, or purchased by the company for the purpose of sale; to erect, purchase, lease, manage and operate cold-storage plants and warehouses, to engage in the general merchandizing and dealing in fruits and edible nuts, to establish and maintain receiving stations, depots, warehouses or agencies necessary or desirable for the general purposes of the business; (b) To acquire, hold, use, sell, assign, lease, grant licenses in respect of, or otherwise dispose of letters patent of invention, as well as all and any patents, patent rights, licenses and privileges of manufacture, inventions, improved processes of manufacture, trade marks and trade names, relating to or useful in connection with any business of the corporation; (c) To manufacture, produce or otherwise acquire, hold, own, sell, assign and transfer, invest, trade, deal in and deal with barrels, boxes, crates and packages, useful in connection with any business of the corporation; (d) To purchase or otherwise acquire the goodwill, franchises, rights, property and assets of all kinds, and in connection with such purchase or acquirement to undertake the whole or any part of the liability of any person, firm, association or corporation, and to pay for the same in cash, stock, bonds, debentures or other securities of this corporation, and to hold, or in any lawful manner dispose of the whole or any part of the property so acquired. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "Leeds Manor Orchards, Limited," with a capital stock of one million dollars, divided into 10,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the City of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 16th day of May, 1913.

THOMAS MULVEY,
Under-Secretary of State.

NEW SYSTEM PROPOSED FOR MARKETING DEBENTURES.

A despatch from Vancouver says that a firm of English bankers has a representative conferring with the British Columbia Government, proposing a new system for marketing debentures in the English market.

The proposal is that the Government appoint a board or commission to pass upon the issue of all debentures by the smaller municipalities throughout the province.

Expert advice in apportioning expenditures would be obtained, it is planned, and a uniform arrangement for the handling jointly or in groups of these issues in the money market.

The issues would therefore be put on with a sort of Government approval amounting almost to a guarantee.

The brokerage firm undertakes with this form of Government approval to provide a continuous supply of money for the different municipalities under which present unorganized conditions of getting money are often forced to suspend improvement work awaiting sales of bonds.

It is stated that a similar proposal has been or will be made to the Saskatchewan Government.

DIVIDENDS AND NOTICES

The above dividends are payable on the 2nd of July next.

Transfer Books will be closed from the 16th to the 30th of June, both days inclusive.

By order of the Board.

R. L. INNES,
Secretary.

The Grain Growers' Grain Company purchased the Davidson and Smith elevator and sacking warehouse on Hardisty Street, Fort William, Ont. The price paid has been announced as $130,000. The new owners obtained possession on June 16th, and will be run under the same management as elevator "B" of the Canadian Pacific Railway Company, which has been leased for some time past by the Grain Growers' Grain Company. Messrs. Davidson and Smith are contemplating the construction of a big cleaning elevator and flour mills at the head of the lakes and, it is understood, have disposed of their present holdings to enable them to devote their entire attention to the larger industries.

DEBENTURES FOR SALE

FOR SALE

THIRTY-YEAR MUNICIPAL COUNTY DEBENTURES.

CONDENSED ADVERTISEMENTS

Advertisements on this page will be accepted hereafter at the following rates:—"Positions Wanted" advts. one cent per word each insertion; "Positions Vacant," "Agents or Agencies Wanted" advts. two cents per word each insertion; all other advertisements, three cents per word each insertion. A minimum charge of 50 cents per insertion will be made in each case.

WANTED IMMEDIATELY, three real wide-awake stock salesmen, to sell stock that the public will buy up rapidly; lists of men actually interested will be furnished in any quantity; this is a great proposition, and is worthy the attention of the very best man. Apply immediately, Mr. McIntosh, 818 Somerset Block, Winnipeg, Man.

REAL ESTATE AND CANADIAN MUNICIPAL BONDS

Some of the more important Canadian municipalities have temporary loans from the banks ranging from $500,000 to $2,500,000. In the aggregate these loans, it is estimated, total $30,000,000, and it is understood that the banking institutions have been putting pressure upon the various cities and towns to induce them to offer higher rates of interest on debentures, with the object of making them more attractive to the investment public on both sides of the Atlantic. The difficulties which municipalities encountered in financing their requirements during the second half of 1912 have caused them to be more moderate in planning improvements in 1913.

Discussing the Canadian municipal position, in the London Bankers' Magazine, Mr. H. M. P. Eckardt says:—"It appears that the real estate element is altogether too prominent in some of the western Canadian municipal councils. These real estate agents have in many cases committed the municipality to expenditures for sewerage, waterworks, etc., which, while unnecessary, promised to enhance the value of building lots or sub-divided property in which they were interested. This, unless checked, will have a bad effect on the standing of Canadian municipal bonds."

Mrs. F. M. Willard, assistant cashier of the Citizens' National Bank of Fulton, N.Y., was the only lady delegate at the New York State Bankers' Association, Ottawa. She has been employed in the bank for fifteen years, and ever since the New York Bankers' Association was organized has attended the annual convention.

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including Friday, the 15th day of August next, for the right to cut pulpwood on a certain area tributary to the Lake of the Woods, in the District of Kenora.

Tenderers shall state the amount they are prepared to pay as bonus in addition to dues of 40c. per cord for spruce, and 20c. per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill on or near the area referred to.

Such tenderer shall be required to erect a mill or mills on or near the territory, or in such place as shall be approved by the Lieutenant-Governor-in-Council, and to manufacture the wood into paper in the Dominion of Canada.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honorable the Treasurer of the Province of Ontario for ten per cent. of the amount of their tender; to be forfeited in the event of their not entering into an agreement to carry out conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.

Toronto, Ontario, May 20th, 1913.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

NINE MILLION ACRES UNDER WHEAT

Preliminary Crop Reports from Ottawa Give Some Interesting Figures

A bulletin of the census and statistics office, Ottawa, issued gives preliminary estimates of the areas sown to the principal grain crops and reports on their condition at the end of May, according to the returns received from crop-reporting correspondents throughout Canada. The reports show that the month of May proved cold and dry with frequent night frosts and that these conditions, whilst favorable to seeding, retarded the growth of the crops sown and caused them to be unseasonably backward.

Acreage Under Wheat.

The total area under wheat in Canada is provisionally estimated at 9,816,300 acres, or 57,900 acres more than in 1912, the area in spring wheat being 8,990,500 acres, or 13,100 acres more. Oats occupy 9,608,500 acres compared with 9,216,900 acres in 1912, an increase of 391,600 acres. Barley occupies 1,425,200 acres, an increase of 10,000 acres, and rye 126,500 acres, a decrease of 9,610 acres. For wheat, barley and oats taken together the increase represents 459,500 acres. The estimated acreage under hay and clover is 7,475,600 acres compared with 7,633,600 acres last year.

For the three Northwest provinces of Manitoba, Saskatchewan and Alberta the total wheat area is estimated at 9,013,800 acres, as compared with 8,961,800 acres; that of oats at 5,207,700 acres compared with 4,913,900 acres and that of barley at 852,600 acres compared with 809,800 acres; these differences representing increases of 52,000 acres for wheat, 293,800 acres for oats and 42,800 acres for barley, or 388,600 acres for the three crops.

Crop Conditions Favorable.

On May 31 the condition of the crops was reported as generally favorable throughout Canada. Expressed in percentage of the usual standard of 100, taken as representing the promise of a full crop, the condition on May 31 for the Dominion was as follows: Fall wheat 80.62; spring wheat, 91.55; oats, 91.72; barley, 91.19; rye, 87.70; peas, 88.24; mixed grains, 90.15; hay and clover, 81.12; pastures, 85.08, and alfalfa 77. At the corresponding date last year the condition of fall wheat was only 71.46. All the other crops were then above 90, excepting rye, 87.21; peas, 83.85, and mixed grains, 87.72. The poor condition this year of alfalfa is due to the effects of the winter and cold spring.

◆

WAR, THE CAUSE OF STRINGENCY.

"My opinion is that the great cause of money stringency, of high rate of interest and the high cost of living is war," said Hon. W. T. White at Ottawa. He traced the history of wars, including the South African and Balkan wars. All the money then spent was as lost from an economic point of view as if it had been poured into the sea and it all helped to prove that war and armamental expense were the big factors in high living costs. He referred to the homogeneity of the people of the United States and Canada. When the two were so much alike how could there be anything but one hundred years of peace.

◆

INVESTMENTS OF FARMERS.

A bond salesman tells *The Monetary Times* that it is difficult to sell securities to the Ontario farmer; that the farmer is extremely suspicious; that he has only a vague idea of what a bond is; that he needs investment education; that he keeps his money in the bank. This is true to some extent. The farmer has the reputation of being canvassed by salesmen of stocks that no one else will touch. His experiences have made him wary. That is why one farmer, encountered by the bond salesman, was keeping $40,000 in the bank and the bond salesman could get only $1,000 after persistent argument regarding the income from and the safety of bonds. Another farmer had been led away by the soft words and glowing promises of stock salesmen to the extent of $30,000 losses in a few years. His final loss was in the Farmers' Bank. We cannot blame the farmer for putting his cash in the toe of his sock and tucking it under the mattress until the legitimate stock and bond houses divert his savings from fraudulent bait to real investments. The banks are the best places for the farmer's funds while financial sharks are abroad selling worthless stocks.

CANADA MANUFACTURING MORE PULPWOOD

Exports are Decreasing, But There is Still Room for Improvement

In 1911 Canada exported 847,339 cords of pulpwood; in 1912 980,868 cords were sent out of the country, nearly all of which went to the United States. In spite of this total increase the proportion of pulpwood exported is decreasing. In 1911, a little over 44 per cent. of the pulpwood cut in Canada was manufactured in this country; in 1912, this percentage had increased to almost 47 per cent. These are the figures collected by the Dominion Forestry Branch, Ottawa.

The loss to Canada through thus sending pulpwood out of the country in an unmanufactured state is still a tremendous one. The value of the pulpwood exported was about $6,700,000. If manufactured into pulp this would have brought $13,200,000—almost double the former amount. The difference in price represents payment for labor and profit for the pulp manufacturer, all of which would have been retained in Canada had the pulpwood been manufactured here.

Greater Use of Woods.

The pulp industry affords a good example of a tendency that has steadily advanced of late years, viz., the use of woods formerly scarcely, if at all, manufactured. Balsam fir, or balsam, was for long despised by the pulp-makers. This wood, however, is coming more and more into use, and almost one-fifth (probably more if proper account were taken) of the total amount of wood used is of this species. Up to 40 per cent. of the balsam can be used in combination with spruce in making news-print paper, the paper used for the ordinary newspaper. For the first time the sulphate process was used in manufacturing pulp, three mills in Quebec province employing this process. Spruce, with a small proportion of balsam fir, was the wood used and the mills using it seem well satisfied with the result. The paper made was the strong "Kraft Wrapping Paper."

Are Enlarging Mills.

The tendency seems to be to enlarge mills, or, at any rate, to increase the production per mill. The average quantity of pulpwood used per mill in Canada in 1912 was 18,042 cords, whereas, in 1911 it was only 12,450 cords and in 1910 but 11,735 cords. The average for Quebec was largest, being 24,119 cords per mill, and the other provinces rank as follows in this regard: British Columbia, 17,533 cords; Ontario, 15,809; New Brunswick, 13,010; Nova Scotia, 3,739.

FIREMAN'S FUND INSURANCE COMPANY ENTERS CANADA.

The Fireman's Fund Insurance Company has entered the Canadian field. Mr. A. K. Simpson, eastern manager of the company, recently visited Montreal, where he appointed Messrs. Robert Hampson and Son, Limited, as agents, and Toronto, where Messrs. Geo. McMurrich and Sons, received a similar appointment.

◆

JOTTINGS FROM THE BANKERS' CONVENTION AT OTTAWA.

If Mr. J. J. Hill, lived in Canada, he would be Sir J. J. Hill, said Hon. W. T. White.

Tight money was not in evidence during the New York Bankers' convention, at Ottawa, but, nevertheless, they raided the Canadian Mint.

"Bankers must eat," said one of them at the Experimental Farm, and he practised his preaching.

There was only one lady banker delegate. Many of the fair sex, however, appeared to be financiers of no mean ability.

"The buildings are so high here and the streets so narrow that two bankers cannot pass on the same street without forming a combination."—Hon. A. C. Eberhart, Governor of Minnesota.

◆

The Blue Funnel liner "Protesilaus," which is now on her way across the Pacific, cleared from Victoria, B.C., recently with a 15,000-ton cargo, including the largest consignment of American mail ever shipped from this coast in one steamer; it comprised ten carloads. The steamer also carried among her general cargo 8,000 measurement tons of lumber of London and Glasgow and 2,000 deadweight tons of salmon for ports in the United Kingdom and the Far East. She also had a consignment of cars for the Peking railroad, and a heavy shipment of automobiles for Manila.

MUNICIPAL BONDS AND FINANCING

How Various Towns and Cities are Meeting Market Difficulties—Fiscal Agents Busy

The financial situation is causing a change in the plans of municipalities in British Columbia. In Burnaby employees have been laid off, since money is not available for improvements, and in Vancouver it is proposed to postpone a million dollars worth of paving that was to have been put down this year. Municipal payrolls are being kept down to necessary officials. In Victoria, it has been proposed to issue bonds of $100 denomination, so that they might be disposed of to residents of that city who might purchase the smaller amounts. An agreement with the fiscal agents, the Dominion Securities Corporation, may interfere with this, however, and the matter will stand over until the company has been communicated with.

Lethbridge, Alta., has received a communication from Messrs. Stimson & Company, Toronto, asking for an option on $363,000 debentures. These debentures will have to be re-advertised owing to some small legal technicality.

The Edmonton school board have disposed of $1,250,000 debentures to Messrs. Sidney Spitzer and Company, investment bankers, Toledo, Ohio, who were acting in conjunction with the Alberta School Supply Company, Edmonton. The price is understood to be fairly advantageous in view of the existing financial conditions.

Negotiations are proceeding for the disposal of the bonds of the Protestant board of school commissioners of Montreal.

Left to Fiscal Agents.

It is unlikely that Saskatoon will call for competitive tenders for the sale of its coming issue of debentures. The city has a fiscal agent looking after its interests in London, England, and in all likelihood these securities will be placed on the London market through this medium.

Swift Current, Sask., has turned over $20,000 6 per cent. debentures to Messrs. Wood, Gundy & Company, Toronto, for disposal.

South Vancouver's reeve and town clerk have been visiting Toronto to raise money for the town by the sale of debentures.

The city of Toronto has on deposit in local banks $11,000,000 of sinking funds on which it is receiving the current rate of interest—three per cent. per annum. At the same time the city has borrowed many millions of dollars from the same banks for which it is paying six per cent. interest. This is explained by the fact that it is illegal for the city to use sinking funds for purposes other than those for which they were obtained. It is not improbable that efforts will be made with a view to securing better terms from the banks.

May Sell Over Counter.

Baltimore's proposed plan of selling its securities to citizens of the city interested Mayor Hocken while he was in that city last week. Mr. Hocken approves of the plan of selling debentures in $100 blocks to those citizens who have a small sum laid away, and are drawing but three per cent. on their savings. The debentures will return four and a half per cent. This will be laid before the Toronto board of control.

◆

SELLING BONDS LOCALLY.

The city of Chatham, Ont., is selling its debentures locally.

◆

Mr. W. Aeneas Mackay, general manager London and Lancashire Life and General Assurance Association, Limited, London, England, recently arrived in Montreal, accompanied by Mr. Alex. Bissett, manager for Canada. Mr. Mackay and Mr. Bissett have left for the West on a tour of inspection.

Sir Max Aitken, M.P., has been re-elected president of the Porto Rico Railways Company, and Mr. D. F. Thomson, K.C., vice-president.

RAILROAD BONDS SOLD OVERSEAS

Pacific Great Eastern Railway Issue Made—Provincial Loans

Three million dollars' worth of bonds of the Pacific Great Eastern Railway, now building from North Vancouver to Fort George, guaranteed by the British Columbia provincial government and bearing interest at 4½ per cent. and redeemable in thirty years, have been sold by Messrs. Brown, Shipley & Company, London, to a syndicate of British investors at 100⅛.

The only issue of the bonds of the Pacific Great Eastern Railway was made in January, 1912, when the public was invited for subscriptions to the extent of $5,000,000 at 99. Owing to the European situation, the investing public did not respond, and a large portion of the issue was left on the hands of the underwriters. The recent sale was one of additional bonds, making the total sold thus far $7,000,000.

Alberta and New Brunswick.

Regarding the new Alberta provincial loan Mr. Sifton, premier, says that he did not go to London to raise money, but confessed that he might have thought about it if the market had been more favorable.

New Brunswick is advertising for tenders for an issue of $100,000 4 per cent. 20-year provincial debentures.

Every new loan that comes out fails more hopelessly than the last, and the only real success is the Chinese issue which is unaccountably popular and still stands at a reduced premium, says a London cable to the New York Times Annalist. Insurance companies and other big underwriters are loaded up with stock that they do not want and cannot throw off, and at the end of last week they actually called a gathering of underwriters and bankers to consider means for damming the flood of prospectuses.

Changes in Prices.

During the past week the following changes were noted in Canadian securities in London.

Alberta ten year debentures, 1922, 94 to 95.
Dominion of Canada loan, 1938, 3 per cent., 84 to 86.
Newfoundland sterling bonds, 1947, 3 per cent., 75 to 77.
Province of Nova Scotia debentures, 3½ per cent., 85 to 87.
Province of British Columbia, 1941, 3 per cent., 78 to 80.
Dominion of Canada, registered, 1938, 3 per cent., 82 to 84.
Dominion of Canada, inscribed, 1947, 2½ per cent., 72 to 74.
Newfoundland, inscribed, 1925, 4 per cent., 98 to 100.
Province of Nova Scotia, 1954, 3½ per cent., 82 to 84.
Province of Saskatchewan, registered, 1951, 92 to 94.
Montreal permanent, 3 per cent., 68 to 71.
Quebec consolidated stock, 84 to 86.
Vancouver, 1931, 4 per cent., 90 to 92.

◆

DEBENTURES AWARDED.

Westaskiwin, Alta.—$23,000 to the Imperial Bank of Canada.

Westaskiwin, Alta.—$820 Messrs. Stimson and Company, Toronto.

Kamloops, B.C.—$480,000 to Dominion Securities Corporation, Toronto.

Edmonton, Alta.—$1,250,000 to Messrs. Sidney Spitzer and Company, Toledo, Ohio.

Swift Current, Sask.—$20,000 6 per cent. to Messrs. Wood, Gundy and Company, Toronto.

Last Mountain Valley R.M., Sask.—$10,000 6 per cent. 20 years to Flood Land Company, Regina.

Glen Bain R.M., Sask.—$10,000 6 per cent. 20 annual instalments to the Flood Land Company, Regina.

Quill Lake, Sask.—$2,000 6 per cent. 10 annual instalments to Messrs. Burgess and Company, Toronto.

Lost River R.M., Sask.—$3,000 7 per cent. 15 instalments to Messrs. Brent, Noxon and Company, Toronto.

Drywood S.D., Alta.—$1,000 6 per cent. 10 annual instalments to the Alberta School Supply Company, Edmonton.

Midland, Ont.—$23,000 County of Simcoe guaranteed 5 per cent. 20 instalments to Messrs. Wood, Gundy and Company, Toronto

CANADIAN MUNICIPALITIES' BONDS

It was not what he said, but the nasty way he said it, seems to sum up the injured feelings of Canadian municipalities regarding Mr. Horne Payne's criticisms of civic financing. Mr. Payne spoke in London of the "badly regulated borrowing of Canadian cities," and of their "risky and costly expedient of securing accommodation for a few months at a time," and of "callous destruction of municipal credit," and so on, jab after jab. There is some truth in Mr. Payne's strictures, and *The Monetary Times* believes that most of our municipalities recognize that they have made errors in financing, and that the time has come for a spell of strict economy. No one likes to take medicine before a big crowd, to the accompaniment of a brass band. Canada's civic rulers do not like Mr. Payne's peppery pills administered with such ceremony. Besides, that gentleman said much the same last year. It, therefore, looks as though it were becoming a painful habit.

Admitting that Canadian cities and towns have been heavy borrowers and that they have made minor mistakes, these facts remain—the volume of immigration brings every year thousands of new citizens to the urban centres. Their welfare has to be financed. Only two Canadian municipalities have defaulted on their bond interest. That was many years ago, caused through temporary circumstances, and the default in both cases was soon made good. Canadian municipal securities still hold a high place in the esteem of the British, Canadian and United States investor. The chief reason for the temporary lull in their sale overseas is exactly the same as that which is causing railroads, industries and other borrowers to stay away—because money is tight, there is a glut of undigested securities, and few new loans a to be financed before the autumn. The municipalities a therefore, not such great sinners after all. Letters ceived by *The Monetary Times* from the treasurer nearly every important municipality in Canada show th they fully realize the necessity of economy and sa finance.

Mr. Horne-Payne has issued another statement London, as director representing the Canadian Northe Railway there. Therein he details the the story of recent Canadian Northern subsidy, and concludes follows: "The facts are simply that the directors of Canadian Northern system pointed out to the Canadi Government that the Canadian Pacific and the Gra Trunk Pacific had each received far greater assistan from the Parliament of Canada than the Canadi Northern, and contended that, considering the natio character of their undertaking, they were entitled further subsidies as a matter of fair treatment from Canadian people. The Government of Canada, and su sequently the Canadian Parliament, have admitted justice of this claim, and as a consequence have grant the subsidies above announced, a result which will eminently satisfactory to holders of Canadian Northe securities, and finally disposes of the stories which ha been circulated during the past few weeks, and whi have been the cause of the heavy fall in the prices Canadian Northern debenture stocks."

Now Mr. Payne is on the wrong tack entirely giving these morsels to the London market, which is a child in matters financial. He should forswear su criticisms, denials and statements, joyfully watch Can dian Northern debenture stocks rise, and encourage sale of Canadian municipal bonds. There is enou money in Great Britain for all legitimate borrowers, a it is a pity to start an unnecessary quarrel in the fami

PANAMA AND SUEZ CANAL TRAFFIC

Many authorities have used the traffic figures of he Suez Canal on which to base estimates of the likely onnage of the Panama Canal. The Suez Canal Company has just published its report for 1912. Although that year succeeded a particularly prosperous year, and was also marked by the inauguration of a further reduction n the tariff, it has proved the most prosperous so far experienced. The good results are due not only to excellent crops in British India, but to the general trade activity between East and West.

The total receipts in 1912 amounted to 139,922,639 rancs, showing an increase as compared with 1911 of ,884,414 francs. Expenses amounted to 47,725,624 rancs, including a sum of 3,000,000 francs allocated o sinking fund, and one of the same amount to insurance and contingencies. Apart from the addition of 2,000,000 francs to these funds, expenses show an increase of 673,862 francs, due mainly to additional expenditure on dredging. The balance of receipts over expenditure was 92,197,015 francs, and of this 3 per cent., or 2,765,910 francs, is set aside for statutory reserve, eaving a balance of 89,431,105 francs. To this amount must be added the carry-forward from 1911 of 339,581 rancs, making a total of 89,770,686 francs. It is proposed to distribute 87,292,958 francs, to place 2,000,000 rancs to special reserve, and to carry forward 477,729 rancs. The payment per share will be 154,945 francs, which, with the interest of 25 francs, makes a gross distribution of 179,945 francs, or 165 francs net.

During the year 1912 the vessels passing through he Suez Canal were 5,373 in number, with a net tonnage of 20,275,120 tons. This is an increase as compared with 1911 of 404 vessels and of 1,950,326 tons. The average tonnage per vessel—a matter of great importance to the revenue of the company—was particularly marked last year, having risen from 3,688 to 3,774 tons.

Traffic increases, which for many years have been going on almost uninterruptedly, made unequalled progress in 1912. As compared with 1911, there was an mprovement of 10½ per cent., and as compared with 1910 of 22 per cent. Thus the reduction in the dues has been much more than compensated for. Receipts have largely benefited, as in the three previous years, from general prosperity throughout the world. All classes of navigation have contributed to the increase, but the year was particularly characterized by the eastern movement, which furnished 43 per cent. of the improvement. This remarkable activity was largely due to the enormous export of Indian products through the Canal, and by the consequent high freights on Asiatic markets. In consequence of the unusual demand for ships running between India and Europe, traffics have been heavy in most classes of goods, particularly manufactured products, including cottons and metals, railway materials and cement. Shipments of coal, however, slightly decreased, owing to the coal strike in Great Britain. Japan, which is developing rapidly commercially, and China, whose economic prospects are of the brightest, have largely extended their business with Europe. The Dutch East Indies, in spite than in 1911, largely owing to the continued development of a considerable decline in sugar exports, did more trade of benzine shipments. Traffic from Eastern Africa considerably increased, and there was steady improvement in the Australian trade.

In his report on the industrial and commercial value of the Panama Canal, Professor Emory R. Johnson estimated that, should the rate of increase in the tonnage of the Panama Canal during the first ten years be half that of the Suez during the second decade of its use, the rate would be 62½ per cent. In view of the much larger rate shown by the Suez Canal, and in view of the conditions that will favor commercial progress at the time of, and subsequent to, the opening of the United States canal, 62½ per cent. is believed to be a conservative estimate.

A decennial increase of 62½ per cent. in the estimated traffic available for the canal in 1914, as determined by the figures obtained by using the tables prepared by the new Panama Canal Company, would give a tonnage of 11,372,941 net vessel tons in 1924. A 62½ per cent. increase in the estimated vessel-tonnage total of 1914, reached by an authoritative study of entrances and clearances—6,843,805—would amount to 11,121,183. These two estimates for 1924 average about 11,250,000 tons.

The entire amount of the available canal tonnage can hardly be expected to use the new route during the first year or two of the operation of the waterway, the period required for the readjustment of commercial arrangements. This adjustment will, however, not be delayed by a scarcity of steamers, and should be quickly made. After two years, the full amount of the available canal tonnage—the available tonnage of 1916, not of 1914—will be passing the Canal in all probability, and the 62½ per cent. increase in the available tonnage of 1914 may fairly be expected to represent the actual tonnage at the close of the decade ending in 1924. In this calculation it was assumed that the Panama Canal will have been put in operation by the beginning of 1914. Colonel George W. Goethals, chief engineer of the Canal, however, says that the Canal will not be opened until January 1st, 1915. President Wilson will visit the new waterway as soon as Congress adjourns.

STEEL PLANTS IN CANADA

The Dominion government will have much to consider when it takes up tariff revision in relation to iron and steel next session. Representations have been made at Ottawa respecting the absence of duty on wire rods, in particular and the inconsistencies in the iron and steel tariff in general. The government apparently admitted that the steel companies' arguments were well founded, but postponed action. Mr. J. H. Plummer, president of the Dominion Steel Corporation, at the company's annual meeting last week, stated that it must be a matter of regret to everyone interested in the welfare of the country that we are importing such an enormous amount of stuff which could be made in Canada. The growth of our foreign indebtedness is cause for anxiety, and these imports are contributing largely to this growth.

The imports of iron and steel products are large. Counting only such as in our present state of development are, or should be, made in Canada, it is found that Canada's imports for the twelve months ended March 31st, 1913, amounted to 21,168,468 tons, valued at $28,331,349 as against 273,650 tons in 1909, valued at $7,234,116. These figures include only the less finished articles, as the low average price shows. Taking the whole line of iron and steel and manufactures therefrom, excluding only automobiles, the increase is striking. The total in 1909 was $40,717,661, and in the year ended March 31st, 1913, $138,648,364.

Mr. Plummer drew attention to an important point, namely, that a strong tendency of our iron and steel tariff is to build up secondary industries in Canada, depending upon foreign manufacturers for their raw material. While it is true that the Canadian plants cannot as yet cope with the great demand for iron and steel, what is to be regretted, as Mr. Plummer says, is that people in the business are deterred by tariff conditions from increasing the primary and basic lines of manufacture; that large secondary industries are growing up whose existence may depend on the maintenance of supplies of raw material entering at low duties, or even at duty free; that these conditions will make it increasingly difficult to get the primary industries established in Canada.

The outcome may be a condition of industrial dependence on foreign makers of pig iron and of steel in its earlier stages of manufacture, except in the case of a few concerns which start with the coal and ore and sell the product in wire, nails and other finished articles. The bigger steel industries we get, the better for the country. The latest census of manufactures shows that in Canada's plants where iron and steel products are made, no less than $123,561,319 capital is invested and 48,558 employees draw wages of $25,792,388. With the great demand for steel products in Canada and a fairly regulated tariff, these figures should be considerably increased.

WHERE WE DO BUSINESS

The head office of a new company in Alberta is at "Section 10, Township 2, Range 23, west of the Fourth Meridian." Joint stock company legislation penetrates beyond far distant blades of prairie grass.

MUNICIPAL FIRE INSURANCE

The buildings destroyed by fire at the exhibition grounds, Regina, will be rebuilt immediately. They were insured for 80 per cent. of their value. Only a few weeks ago, the city council contemplated carrying all the city's insurance, but it was finally decided to place the insurance with the companies as in the past. The civic rulers may now congratulate themselves upon steering clear of the folly of municipal fire insurance.

MONEY FOR THE CROP MOVEMENT

It is inconvenient but wholesome, this financial stringency. No matter how tight money becomes, we may still have faith in the future of Canada, a faith, too, wherein sentiment plays a minor and natural resources a major key. This tightening of the purse strings in the world's markets is likely to be felt throughout the year. London underwriters have decided not to finance new loans until October. Then in North America comes the crop movement. Those who are saying that a good crop will relieve matters are relying on a forlorn hope if they expect relief of value before the spring of 1914. The crop movement this year will likely increase the stringency, and we may just as well prepare for that contingency. Sir Edmund Walker told an interviewer in London that there is bound to be considerable stringency in the autumn, and that it will not be so easy to finance the crop-moving operations this year as during the past few years. He does not, however, anticipate anything very serious. It will just be a little more difficult than usual. But that is no reason for the sale of blue spectacles—and we need a rest.

INDUSTRIES AND BOND GUARANTEES

A by-law will be prepared having for its object th guaranteeing of bonds of a company by St. Thomas t the extent of $125,000. The company proposes to estal lish a motor truck factory in that city. The citizens ma well hesitate before endorsing the scheme. The time ha arrived for new industries to stand more upon their ow feet, not to lean upon a municipal bond guarantee. promoters are not sure of the safety of their bonds, the should turn attention to channels where confidence i their own project is one of the first assets.

SMALL CHANGE

When tight money comes, everybody loves "th small investor."

"James J. Hill left, Thursday night, for his annu fishing trip up the St. John River, in north-easte Canada, near the month of the St. Lawrence," says t Wall Street Journal—evidently adding a fish story mon to the calendar.

HOME BANK'S PROGRESS.

Senator Mason, as its general manager, had many satisfactory announcements to make at the annual meeting of the Home Bank this week. The net profits for the year were nearly 12 per cent. on the average paid-up capital and deposits showed an increase of nearly $1,000,000. The whole of the authorized capital, $2,000,000, is taken, and almost entirely paid up. The reserve fund or rest has been increased by $200,000, and amounts to $650,000, being slightly more than one-third of the paid-up capital. The total assets amount to $14,735,100, an increase of more than $2,000,000 over last year.

The purchase of the assets and the taking over of La Banque Internationale increases the scope of the bank's operations in various ways; one important feature being the increased circulation following on the increased paid-up capital. The Montreal branch, said Senator Mason, should also grow in time to be of considerable usefulness, inasmuch as that city is becoming a very large grain export point, and in other respects the opening thus made in the province of Quebec should in due course materially add to the volume of the bank's business and profits.

The bank's capital stock will be increased to $5,000,00 This will only be taken advantage of from time to time the growing business of the bank may make it necessary obtain increased paid-up capital and the correspondingly i creased circulation.

The Home Bank is not only well known in Eastern, b also has a strong connection in Western Canada. Dwellin upon this fact, Mr. John Kennedy, one of the western dire tors of the bank, said: "By this connection the Home Bar depositors in the east are helping to a great extent at a points where our branches have opened in relieving th financial situation which is felt very keenly in the West. can see a great future for the Home Bank in the West, ar I would like to assure you that it is the desire of very mar of our leading farmers that the Home Bank keep pace wi the ever-increasing development and rapid growth of the pr sent time by becoming still more identified with the West."

The financial statement of the bank for the year ende May 31st, 1913, shows that the institution has considerab improved its already satisfactory position during the pa twelve months.

UNION LIFE TO BE WOUND UP

Metropolitan Life Will Reinsure Its Existing Policyholders

An order for the winding-up of the Union Life Assurance Company and the appointment of a liquidator was granted at Toronto this week. The application was made by Mr. C. A. Masters, K.C., acting for the Attorney-General, at the request of the Dominion Superintendent of Insurance. The latter in his instructions to the Attorney-General stated the company was insolvent, that its capital stock was impaired, and not likely to be restored within one year, that its license had expired, and had not been renewed within thirty days, and that it was, for other reasons, just and equitable, the company should be wound up.

Metropolitan Will Reinsure.

Actuary G. D. Finlayson, of the Dominion Insurance Department's staff, supplied a report for the benefit of the court, of the results of his investigations into the affairs of the company. He stated that an offer had been made by the Metropolitan Life Insurance Company of New York to reinsure all the existing policyholders in the Union Life on the transfer of the company's assets to the Metropolitan. This offer was conditional upon the company having to negotiate only with an official liquidator, who should be the Superintendent of Insurance, or some Government officer, and that no fees should be charged for the liquidation.

The Union Life Assurance Company was incorporated under a Dominion Act on May 15th, 1902. Its authorized capital was $2,000,000, divided into 20,000 shares of $100 each. Of these shares 6,420 were subscribed for and fully paid-up. A further 10,000 shares had been subscribed for and were partially paid-up. The total amount paid up on all shares was $742,705.65.

Poor English Shareholder.

The company made an issue in London recently of 10,000 shares at a premium of 20 per cent. A dividend of 6 per cent. was guaranteed for three years by the National Agency Company, but this was not paid. The English shareholders recently met and discussed a plan to raise a further sum of £75,000 to reorganize the company and place it under new management. The winding-up order and reinsurance arrangements will nullify this scheme.

The Monetary Times has for some time past drawn attention to the position of the company, and was in communication with the Department of Insurance on the matter. Articles which appeared in *The Monetary Times* regarding the company were read in the House at Ottawa, when the question of the company's position was raised there.

Metropolitan's Business in Canada.

The Metropolitan, of New York, is a strong and well-known company, and has been doing business in Canada for several years. Last year, its business in the Dominion was as follows:—

	Ordinary.	Industrial.
Premiums for year	$1,423,279	$2,038,616
Number of policies, new and taken up	11,545	122,071
Amount of policies, new and taken up	$13,110,817	$17,742,020
Number of policies in force	42,774	490,282
Net amount in force	$45,517,807	$59,063,018
Number of policies become claims	302	4,922
Net amount of policies become claims	$ 238,725	$ 415,850
Claims paid	$ 235,568	$ 414,786

The Metropolitan has an excellent reputation and the policyholders may feel perfectly safe in the care of that company. This corporation is the only United States life insurance company doing business in Canada which owns real estate in the Dominion. Its holdings are valued at $58,682. Its other assets in the Dominion are:—

Loans on real estate	$2,362,250
Cash loans, etc., on policies	593,515
Bonds and debentures	10,269,796
Interest and rents	197,203
Outstanding and deferred premiums	330,846

Its total assets in Canada are $13,812,294. Of the $10,401,389 premiums taken in Canada last year by United States life insurance companies, the Metropolitan's share was $3,[illegible].

At the end of 1912, the Union Life had $25,996,693 business in force. That year its premiums were $716,126. On December 31st, 1912, the company had in force policies numbering 154,258.

Mr. G. D. Finlayson, actuary of the Dominion Government Insurance Department at Ottawa, has been appointed provisional liquidator, and Mr. Geo. Kappele, K.C., Toronto, official referee.

Regarding the jurisdiction and powers of the liquidator, the Chief Justice in the order directed that Mr. Finlayson be specially authorized and empowered to negotiate on behalf of the company, an agreement for the reinsurance of the company's outstanding policies of insurance on such terms as shall to him seem proper, to execute such agreement in the name of and on behalf of the said company, and to take all such steps and perform all such acts as shall appear to him to be necessary or advisable in connection therewith, but such agreement shall not become operative until approved by the referee.

The costs of the motion, winding-up order and of the liquidation will be paid out of the assets of the company

It is reported that notwithstanding the many difficulties to be overcome, excellent progress was being made in the negotiations with the Metropolitan Life for the reinsurance of the Union Life's policyholders.

◆

ONTARIO CITIES AND THEIR BONDS.

Berlin's city council at a special meeting passed by-laws providing for the issue of debentures amounting to $202,316. Owing to difficulty in securing tenders for a block rate of accrued interest, the rate was increased from five to six per cent. The by-laws included $85,300 for a trunk sewer, $25,000 for gas extensions, $35,000 for electric extension, and the balance for local improvements in 1912 and 1913.

Hamilton board of control decided to give the public a chance to purchase local improvement debentures, and it was decided to offer $1,000 debentures. It was suggested that $100 debentures might be put on the market, but it was stated that this would be too costly.

◆

ONTARIO'S INCREASING MINERAL OUTPUT.

A decline in the output of silver did not check the steady increase in the value of minerals mined in the province during the first three months of 1913. The returns of the bureau of mines show an increase in metallic products for that period of a little over two million dollars.

The production of silver was 74,485 ounces less than for the corresponding period of last year, amounting to 7,264,559 ounces, with a value of $4,040,450. The gold mined had a value of $1,030,920. The output was 50,637 ounces, secured from 69,905 tons, or an average yield of a little under three-quarters of an ounce to the ton.

The Sudbury mines yielded 1,589 tons more of nickel and 538 tons more of copper than in the corresponding period of last year. The output of nickel was 6,311 tons, with a value of $1,309,870, and of copper 3,075 tons, with a value of $436,328. The production of pig iron was 181,042 tons, worth $2,506,175, an increase of 64,218 tons and $647,901 in value.

◆

MR. HORNE-PAYNE'S REPLY.

Mr. R. M. Horne-Payne informs Windermere of the Montreal Star, that he is apparently misrepresented in Canada regarding his speech as chairman of the British Empire Trust. He said:—

"I stated an unquestionable fact, namely, that the loss of confidence of British investors in all Canadian investments is mainly attributable to the great loss they sustained in city bonds through the continuous forced and badly regulated borrowing by Canadian cities here, and to the cities having voted large further expenditures while still carrying unfunded debts, and seeking to renew increasing amount of bills for short periods.

"I was urging English investors to have no fear of Canada and in avoiding municipal securities for the above reason, to seize the opportunity afforded by present low prices to put all their available money with every other sort of Canadian investment."

Mr. Horne Payne has nothing to say respecting the western threat to boycott the Canadian Northern, of which he is controlling director here, or regarding the suggestion that the Dominion Government should take action in the interests of the offended municipalities, in view of the recent large Canadian Northern subsidy.

THE SITUATION AND THE OUTLOOK
III.

MUNICIPALITIES ARE FEELING PINCH

Many Bonds Are Being Held and Short-term Notes Issued—Need for Municipal Economy

Municipalities throughout the country are feeling most keenly the effects of the financial stringency. In the present condition of the money market, it is difficult to dispose of municipal bonds. Many civic authorities are therefore withholding their issues and financing present requirements, either by the sale of short-term notes or with the assistance of their banks.

A large number of cities and towns are selling short-term notes. Municipalities, however, should not regard this method as complete salvation for their ills during the time of tight money. As Mr. H. V. F. Jones, a Canadian banker in London, has previously pointed out in *The Monetary Times*, the market generally becomes quickly cognizant of any plethora of securities of this description, and this knowledge tends naturally to react upon the price, not only of the securities already issued, but on the price at which the new issue is to be made. Prices will tend to fall and in the long run the borrower may have to bear the chagrin of discovering that all his manœuvres to avoid a period of apparent dear money and depreciated prices, has ended in failure and possibly severe loss.

New Westminster.

The following particulars respecting the financial position of various cities and towns have been gathered by *The Monetary Times*. The city of New Westminster is not likely to issue any short-time treasury notes. So far, what temporary advances which have been required from time to time, the city has had no difficulty in arranging with their bankers. General by-laws to the amount of $557,000 have recently been authorized by the ratepayers with large majorities. The city has also $328,500 of last year's general debentures which will be for sale. Local improvement loans of $616,000 are going through. There will be no hurry about disposing these bonds, as financial arrangements are made to take care of this year's expenditure.

Lethbridge and Brandon.

In view of the monetary stringency, Lethbridge, is projecting very few improvements this year, and is devoting its efforts to putting the city on a sound financial basis. The city will not likely be under the necessity of issuing short-term treasury notes to meet its obligations this year.

The city of Brandon recently called for tenders for debentures amounting to $215,000, and is contemplating spending $150,000 for further street railway construction, $210,000 for extensions to the waterworks system and the construction of sedimentation basins, $200,000 for the construction of sewers, sidewalks and paving streets, and $35,000 for public library, public parks and bridges.

The city council has at present no intention of issuing short-term treasury notes. Proceedings are being initiated for the above purposes, but it is not the intention of the council to proceed with any more work than they can finance other than by the disposal of debentures or advances from their bankers pending improvement in the market.

Calgary's Short-Term Notes.

Calgary recently raised $2,000,000 by the sale of treasury bills sold in London by the Bank of Montreal. Discussing the money situation, Mr. T. S. Burns, city treasurer of Calgary, writes *The Monetary Times* as follows:—"I do not think the money stringency is as great as some people think; the only thing is that we will require to pay more for it. I had a trip through the several institutions both in Scotland and England and from what I could learn the people there would have no objections to turning loose funds if the security was all right and the interest good.

"I know the Canadian cities are wanting too much money and it would be a good job for some of them if they would curtail their expenditure, which I have no doubt will require to be done. We contemplated having a lot of local and other improvements this year, but as the season is so far advanced, we cannot do all that is wanted. If we spend four to five millions this year in all kinds of by-laws that will be as much as we will be entitled to."

Edmonton is in a good position for the current year, having sold its bonds. In regard to proposed improvements, these comprise roads, sewers, water mains, etc., as well as extensions to the electric light, telephone plants, and also a replacement of temporary track by permanent track on behalf of th street railway.

The finances of the city of Winnipeg are in good shape the city having arranged for all the money it needs at presen

Present indications point to the fact that Portage la Prairi will have no need to issue short-term treasury notes. The cit intends to build some granolithic walks this summer, but wi be able to finance the construction of these in the usual way that is, by overdraft at the Merchants Bank. If the mone market loosens a little, the city will issue debentures for th cost of both 1912 and 1913 sidewalks, but not otherwise.

Hamilton, Woodstock and Kingston.

Hamilton will not likely issue any more debentures thi year with the probable exception of some local improvemen instalments which are under preparation, and may possibl be put on the open market. This city has no intention c issuing short-term treasury notes.

Woodstock is not feeling the stringency of the mone market to any extent. The city sold about $50,000 worth c 30 years' 5 per cent. debentures, close to par. The list c local and other improvements contemplated for this year i smaller than usual, so that Woodstock does not anticipate an difficulty in financing them.

Kingston, Ontario, in view of prevailing conditions, wi limit its expenditure on local and other improvements to a ver small amount. The city has no intention of issuing any shor term notes.

Quebec Has Funds.

Quebec city in January sold $1,950,000 of debentures, th proceeds of which were for general improvements. A larg amount of that loan is still on hand, and is being used fo paving streets, building fire stations, and to complete th works of a new main from Loretto that will give the city a abundant supply of water. The city treasurer does not an ticipate any more borrowing for some time.

Belleville, Ontario, has a block of $23,414.75 local im provement debentures for sale, 5 per cent. interest, runnin for 20 years, also a block of $50,000 school debentures bear ing the same interest and for 30 years, for which tenders wi be asked.

Brantford is in a very good position having recently sol $250,000 of bonds at a satisfactory price, under present con ditions, the money costing a shade under 4⅞ per cent.

Brantford is Cautious.

This issue covers the cost of all local improvements, an other works finished last fall, and provides funds for hospita and public school, now in course of construction.

The Brantford city council and their keen treasurer, Mr A. K. Bunnell, appreciate the importance of confining an capital expenditure this year to works of actual necessity, an fortunately they have funds on hand from the sale of som real estate owned by the city, to an amount, which should tak care of the cost, and obviate borrowing. The city are instal ing the necessary plant in order to connect with the hydro electric system next spring, but the amount required for thi at the present time is not great. For ordinary requirements they have an arrangement with the Bank of Montreal to ad vance what is required, pending collection of taxes, and a the first instalment is payable on July 5th, they will not re quire any large sum.

Ottawa Has Bonds for Sale.

The arrangements with the Bank of Ottawa relieves th city of Ottawa from any immediate borrowing. In the autumn however, the city will have for sale debentures amounting t $427,400. They are for the following purposes:—

General Debentures:—Providing cost of enlarging Keefe Street drain, $2,400; city's share of annex to Howick Hal $12,000; provide cost of extension of Kent Street sewer $7,500; cover shortage sales of debentures Smallpox Hospita $10,000; for fixtures, equipment, etc., Bacteriologica Laboratory, $10,000; for moving back sidewalks on Presto Street, $10,000; cost of boring wells, $15,000.

Electric Debentures:—Cost of changing 2-phase system t 3-phase, $150,000.

Waterworks Debentures:—Cost of completion of hig pressure water plant, $35,000; water main extensions and ne services, 1912, $78,000; installation of flush valves on dea ends of water mains, $4,000; re-payment of money expende on new aqueduct and intake pipe and complete same, $85 000; provide discount on sale of debentures under by-law 3412-3337, $8,500; total, $427,400.

These debentures run 20 and 30 years with interest at 4½ per cent. There will also be for sale $500,000 local improvement debentures to run the same period with similar interest.

It has been estimated that the Canadian banks are to-day carrying approximately $100,000,000 of loans to Canadian municipalities. *The Monetary Times* feels that Canadian municipalities fully appreciate market conditions and the necessity for economy and for financing of necessities only. It is opportune, however, to repeat here the excellent counsel recently given by Sir Edmund Walker in this connection. "Many of our towns and cities," he said, "who have refused to consult the banks find themselves embarrassed as a result, and improvements which may be wise and much needed must be postponed for the moment. The existing securities will doubtless be absorbed in the near future, but at lower prices than heretofore in order to meet the investor's expectations of a higher return.

"Our municipalities, however, should seriously consider whether during periods of such rapid expansion the tax rate should not be largely increased. In the days of western expansion in the United States 25 and 30 mills on a fairly high valuation of property were not uncommon rates. Again, should we not pay for local improvements in a far shorter time than we do? The western cities of the United States make their local improvements by the issue of short term securities, the average life of which is usually not more than five years. Such securities often carry six per cent. interest and do not appeal to the same class of investor as do long-term municipal debentures. We can easily see the bad effect on the credit of our municipalities of adding the heavy cost of local improvements, spread over long terms, to the ordinary general debt."

DOMINION'S DEVELOPMENT SCARCELY STARTED.

Well-Known Banker Sees West as Great Manufacturing Centre—Banking in United States and Canada.

Our country is being developed—has hardly started upon its development. We have its agricultural development, true enough, but in our great west, which some day will be the seat of a great many manufacturing industries, there is now comparatively little manufacturing, was the prophetic statement of Mr. D. R. Wilkie, president of the Imperial Bank, to the New York State Bankers' Association recently at Ottawa.

The condition of affairs there remains pretty much what existed in your west forty years ago, when I remember there was the greatest controversy between the east and the west on the question of protection, and the west in those days, as you will remember, was very frank in its opposition to a protective policy. Our own west is following that same policy pretty well. There is no question about it, our Westerners are not protectionists. They want free land, they want free goods, they want everything free, and they would rather not pay taxes, I believe, if it was their way. They look upon it as a bonus, that they are entitled to a bounty for settling in that country, and perhaps there are some of us who think they are entitled to every consideration.

System of Banking in Keeping with Progress

Now, as regards the encouraging of banking, we often wonder here how it is that you have not developed a system of banking which is in keeping with the progress of the nation and is not a product of war, suggested Mr. Wilkie. We often wonder why you have not, in a measure, adopted our system.

The Canadian system cannot be adopted exactly as we have it, but by the extension of the basis of security for circulation, by admitting real estate, municipal and other undoubted securities as the basis of circulation, and placing them all in a pot, the circulation to be issued against those securities, and the whole circulation to be guaranteed by all the bank stock, and a guarantee fund to be established on say five per cent. of the total amount circulated to be maintained throughout, the funds to be there ready to honor the notes of any bank that came to grief—if some such system were adopted, surely it would do away with what is to-day a policy that makes every man hard-up at the same time. The capital of the country is concentrated in huge centres, and when those centres become congested with loans and securities, the whole pulse of the nation is affected. This is merely a suggestion.

Banks Will Stand by Proposals

Mr. Wilkie, in alluding to banking conditions in the Dominion, remarked:

"The Bankers' Association of Canada has just gone through a very severe ordeal. We have had our charters renewed by the Dominion Government for another ten years. That is the principle adopted many years ago, and it may be right or wrong, but the public know that the banks themselves are quite prepared to stand by the system. We have just had this act gone into very thoroughly, and there have been some very important amendments to it."

ALBERTA'S FARMERS ARE ACTIVE.

Wool Clip is Large—Moisture Benefits Wheat Growers —Calgary's Taxes—Bankers Take New Appointments.

(Special Correspondence.)

Calgary, June 24th.

The discussion on single tax in the city council of Calgary earlier in the year is renewed again now that the rate has been fixed for 1913. Perhaps the most concise elucidation of the point at issue is contained in the following:

"The commissioners in striking the tax rate have estimated full assessment upon realty and personalty and 25 per cent. of the value of goods. This is the same assessment as last year except that the personalty is increased from 75 per cent. to full value, fixing the rate at 18¾ mills.

"It is interesting to notice that the tax upon buildings might be entirely eliminated and the tax rate would be only 19.8 mills. If the straight single tax was applied, removing all taxes, including buildings, personalty and the collection of all licenses, the tax rate would be 21½ mills. If the assessment eliminated everything but realty and the licenses which have already been collected, or nearly all collected, the rate would be 20.6."

Sheep in Southern Alberta

Sheep men in Southern Alberta are now harvesting their wool crop.

Mr. Roy Arkell, of Ottawa, the Dominion sheep commissioner, visited Calgary after spending some time in the south of the province in the neighborhood of Lethbridge, where shearing was going on. Mr. Arkell will be in Alberta for most of the present month, and will conduct a number of demonstrations in wool at a number of the exhibitions and fairs throughout the province.

Speaking of his work at Lethbridge and in the south, he said that he never had known of more excellent wool than that which was found this year. The shearing was almost over and a great clip of wool had been secured far in excess of anything that had been experienced before in Southern Alberta. The better facilities for shipping which were given this year by the railways made the industry in a better position than ever, and there was nothing to retard its growth.

Undoubtedly the wool industry in Alberta would prosper greatly as the result of the removal of the tariff on wool going into the States.

He also expressed satisfaction at the improved grades of sheep which were brought into the west and the greater care that was being taken in the matter of rearing and breeding.

The first shipment of this year's clip has gone from Barnwell, near Lethbridge, sent out by Mr. P. C. Harvey, president of the Southern Alberta Wool Growers' Association. The Southern Alberta horse ranch which last season was given up to sheep raising by the importation of nearly 5,000 from the States, is having its first clip, which is also all that could be desired.

Crops and Moisture

More rain fell this week and the threatened damage to the crops by hot weather is removed.

Considerable precipitation is recorded in some parts of the Calgary district and as far east or beyond Swift Current, where the danger line was very close, there has been almost general relief and grain is growing well and is making good time in the race to meet the binder. This rain is sufficient to insure that the grain will grow high enough to shade the ground and prevent the rapid evaporation of moisture which occurs during the sultry days early in the season.

Removals from Calgary

Mr. E. M. Saunders is removing from Calgary to become treasurer of the Canada Life Insurance Company. As manager of the Bank of Commerce and a recognized authority on financial matters, Mr. Saunders has enjoyed the confidence of the citizens generally. His personal inspection and report on crop conditions in the district has in itself striking illustrations of his ability to see things as they are. As chairman of the industrial expansion committee of the Industrial Bureau, Mr. Saunders reviewed the numerous industrial propositions submitted from time to time, and gave his unfaltering support to those he deemed meritorious. In these and in many other ways Mr. Saunders earned the hearty good will of a large circle of friends, and who will greatly regret his departure from Calgary.

The manager of the Bank of Montreal, Mr. W. H. Hogg, is also leaving Calgary and going to Vancouver in a more responsible position. Mr. Hogg has been more or less before the public in this city owing to his bank being the fiscal agents of the city corporation.

◆

A branch of the Metropolitan Bank is to be established at Stratford, Ontario, under the management of Mr. J. C. Massie.

ACREAGE AND AGRICULTURE IN MANITOBA.

Increased Interest in Mixed Farming—Dairying—Crop Will Show Increase.

The abundant rainfall last autumn, in nearly all portions of Manitoba, left the land moist and in excellent condition for fall cultivation, while the fine weather that followed in the spring was almost continuous, and enabled farmers to make rapid progress with seeding. The crop correspondents agree in their statements that the seeding conditions have been ideal throughout the whole season.

Where the moist soil was properly cultivated, germination was even and rapid, but because of the unusually cold weather growth has been slow, and at this date the crops are not as far advanced as usual. Now that warm, moist weather has set in, rapid growth may be expected after this date, however.

Some Increases and Decreases

A brief analysis of the crops shows an increase in the area devoted to wheat. Owing to the small amount of fall plowing reported in 1912 this was particularly noticeable. Oats show a slight decrease, but barley an abnormal increase of nearly 191,000 acres. This can be accounted for by the fact that it succeeds best on spring plowing and apparently much of land formerly devoted to flax is now occupied by barley.

The decrease of over 81,000 acres in the flax area is the natural result of the unsatisfactory returns from this crop in 1912. Peas show an increase of more than 25 per cent., which is gratifying in view of the fact that this grain is one of the most useful foods for fattening stock.

There is cause for satisfaction in the large increase also to be noted in grasses and clovers, the figures showing over 17,000 acres more than last year, states the latest bulletin of Manitoba's Department of Agriculture and Immigration. This, combined with the increase in barley and the general increase in the number of live stock, indicates that the farmers of Manitoba are entering largely into mixed farming.

Four Years' Results

The following table gives a comparison of area of the principal crops for the last four years:

	1910	1911	1912	1913
Wheat	3,118,092	3,339,072	3,123,091	3,141,218
Oats	1,564,669	1,628,562	1,939,982	1,939,723
Barley	657,520	759,977	962,928	1,153,834
Flax	41,002	85,836	196,315	115,054
Potatoes	40,745	44,478	51,878	55,743
Roots	11,782	13,448	14,109	16,275
Total	5,596,061	6,032,037	6,288,303	6,421,847

An increased interest in dairying, and the other higher forms of farming, is manifest, and particularly in the older sections of the province, where a number of new creameries have been established during the past year, bringing the total in Manitoba to twenty-nine. There are also 17 cheese factories.

Live stock in the province, numbers are as below:—horses, 300,753; pigs, 248,254; sheep, 52,142; cattle, 456,936.

◆

CANADA'S FIRE LOSSES

Fire insurance companies have, since 1869, paid losses in Canada, aggregating $213,568,106—a heavy score for the fire waste.

◆

SOLD BONDS TO LOCAL INVESTORS.

Kingsville, Ont., has disposed of $14,906 5 per cent. debentures to local investors, reports Mr. G. Pearse, the town clerk, to *The Monetary Times*.

◆

NO LACK OF MONEY.

There is no lack of money for investment in London at present, says Mr. J. W. McConnell, the well-known Montreal financier, who has just returned from Europe. As soon as the investors come to realize that Canada will continue to forge ahead, he thinks money in very great quantities will again flow towards the Dominion. Up to the present it has been hard for them to realize that western towns are increasing at the rate of five and ten thousand a year in population, and that in consequence the legitimate demand for more streets, etc., cannot be ignored by the municipalities who are consequently obliged to go into the market and borrow money to keep up with the requirements.

NEW MANAGER OF NORTHERN LIFE.

Mr. W. J. McMurtry Has Received the Appointment With Well Known London Insurance Company.

Early in the present month, Mr. W. J. McMurtry received the appointment of manager of the Northern Life Assurance Company, vacant by the resignation of Mr. John Milne, who has been its manager since the inception of the company in 1896.

The new manager is an Ontario man, beginning his business life as a merchant in Bowmanville. He spent some years in banking at various points in Ontario, and in 1888 removed to Toronto in the service of the Mutual Reserve Fund Life. Later he entered the employ of the Independent Order of Foresters, enjoying for years the confidence of its later and much improved administration.

Mr. McMurtry is a good all-round business man, and has a grasp of life assurance as well as a sufficient knowledge of commercial affairs in Canada. In earlier years he was prominent in military matters and served in the Northwest during the troublous times of 1870, retiring from the Canadian militia in September, 1874, with the rank of major.

W. J. McMURTRY.

Recently Appointed Manager of the Northern Life Insurance Company, London, Ontario.

During his long resident in Toronto, while a hard worker, he has not neglected sport. As a Tankard-winner at curling for the Granite Club, he figured in different years, and has won many trophies at the game of lawn-bowls.

Mr. McMurtry has good administrative ability, natural probity, and an appreciation of the great significance of life assurance, which leads to the belief that his conduct of the affairs of the Northern Life will be in accord with the estimable principles and methods which have characterized the company since it was founded by Mr. Milne.

COBALT ORE SHIPMENTS

The following are the shipments of ore, in pounds, from Cobalt Station for the week ended June 20th:—

Cobalt Townsite M., 50,130; Crown Reserve, 40,000; La Rose Mines, 100,000; Cobalt Lake, 63,100; Hudson Bay M., 64,582; McKinley-Darragh B. M., 126,072; Nipissing, 129,824; Temiskaming, 62,421. Total, 636,129. The total shipments since January 1st, are now 19,037,737 pounds or 9,518 tons.

In 1904 the camp produced 158 tons, valued at $316,217; in 1905, 2,144, valued at $1,437,106; in 1906, 5,835 tons; in 1907, 4,850 tons; in 1908, 29,360 tons; in 1909, 29,941 tons; in 1910, 34,041 tons; in 1911, 25,089 tons; in 1912, 21,509 tons.

◆

The Polar Ice Company has changed its name to the Polar Ice and Coal Company.

The Right of Way Mining Company has surrendered its charter to the Mining Department of the Ontario Government, and direction has been given for the dissolution of the company on July 7.

SIXTY-FOUR MILLIONS IS CAPITAL

Of One Hundred and Eleven Corporations Chartered this Week to Operate Throughout Canada

Company incorporation in Canada proceeds apace, this week no less than one hundred and eleven charters having been granted. The companies incorporated having a total capitalization of $64,414,000. The Richelieu and Ontario reorganization heads the list, with $25,000,000. This company is followed by the Canadian Steel Corporation, the United States Steel Corporation's subsidary, with a capital of $20,000,000. The other large companies are:—

National Steamship Company, Toronto	$2,000,000
Gosselin Gold Mines, Toronto	2,000,000
Clevenger-Profet Silver Mines, Toronto	1,500,000
Drummond, McCall and Company, Montreal	1,000,000
Montreal Apartment Company, Montreal	1,000,000
Fair Canadian Ventilator Company, Toronto	1,000,000
Intercolonial Securities Corporation, Ottawa	1,000,000
P. Burns Coal Mines, Calgary	1,000,000
Sherman Enterprises, Calgary	1,000,000
Canadian Macintyre Company, Moose Jaw	1,000,000

Grouping the new concerns according to provinces in which the head offices are situated, we have the following results:—

Province.	No. of Companies.	Capitalization.
New Brunswick	2	$400,000
Quebec	9	27,619,500
Ontario	26	28,849,500
Manitoba	8	375,000
Saskatchewan	13	1,625,000
Alberta	41	5,120,000
British Columbia	12	425,000
	111	$64,414,000

The following is a list of charters granted during the past week in Canada. The head office of each company is situated in the town or city mentioned at the beginning of each paragraph. The persons named are provisional directors:—

Tilley, Alta.—Lowry's Stores, $25,000.

Red Deer, Alta.—Smith Land Company, $400,000.

Hanna, Alta.—Hanna Investment Company, $10,000.

Sutherland, Sask.—Sutherland Masonic Temple, $20,000.

Broadview, Sask.—Broadview Brewing Company, $30,000.

Didsbury, Alta.—Didsbury Construction Company, $2,500.

Moose Jaw, Sask.—Canadian Macintyre Company, $1,000,000.

Punnichy, Sask.—H. C. Riddell Cattle Company, $100,000.

Lethbridge, Alta.—Plunkett and Savage, Lethbridge, $50,000.

Penticton, B.C.—Central Garage and Machine Company, $10,000.

Redcliff, Alta.—Western Canada Hat Manufacturing Company, $75,000.

Kelowna, B.C.—H. K. B. Syndicate, $10,000. Osoyoos Lands Syndicate, $10,000.

Guelph, Ont.—Aberfoyle Realty Company, $40,000. J. H. Reed, J. R. Howitt, F. W. Dollery.

Lefroy, Ont.—Innisfil Telephone Company, $12,000. E. Todd, W. J. Ralston, G. C. Allan.

North Battleford, Sask.—Munro and Son, $20,000. Northern Interior Finish Company, $30,000.

Hamilton, Ont.—Ever-Sharp Pencil Company, $40,000. G. H. Levy, M. J. O'Reilly, A. H. Gibson.

Ojibway, Ont.—Canadian Steel Corporation, $20,000,000. P. Davidson, G. A. Childs, M. Alexander.

St. Evariste, Que.—La Compagnie Miniere Fontenac, $200,000. J. Boutin, Jos. Boutin, E. Morin.

Three Rivers, Que.—N. E. Clement and Cie, $49,500. N. E. Clement, I. Trudel, F. X. Lacourciere.

Sudbury, Ont.—C. H. Parry & Company, $50,000, (grocers). C. McCrea, G. J. Valin, A. J. Manley.

Ingersoll, Ont.—Planet Investments, $25,000. J. B. McKay, A. McKay, Ingersoll; C. W. Burns, Hamilton.

Sault Ste. Marie, Ont.—Dudley Re-Action Engine Company, $100,000. J. Dudley, T. A. Hand, G. Carufel.

Victoria, B.C.—Wilson and Miller, $25,000, (architects). Fort George Gardens, $30,000. Hotel Ritz, $75,000.

Quebec, Que.—The Melville Mount Royal Park Company, $100,000. E. A. LeBel, J. W. Rousseau, F. O. Pouliot.

St. John, N.B.—Oil Motor & Manufacturing Company, $150,000. F. J. Broderick, A. F. Massie, R. Sullivan.

Saskatoon, Sask.—Maddock Dairy Company, $20,000. Cape Breton Western, $50,000. Scottish Investors, $25,000.

Sackville, N.B.—Dominion Black Foxes, $250,000. E. R. Machum, St. John; G. T. Baskin, St. Stephen; W. D. Turner, Sussex.

Alberta. Mountain View Stock Farm, $100,000. Head office, Section 10, Township 2, Range 23, west of the Fourth Meridian.

New Hamburg, Ont.—London Development Company, $32,500. D. P. Smith, H. W. Schweitzer, London; E. Merner, New Hamburg.

Point Pelee, Ont.—Point Pelee Sand and Gravel Company, $20,000. J. W. Post, Chatham; W. A. Grubb, Sr., Mersea Township; A. T. Boles, Leamington.

Fort William, Ont.—Slovack Trading Company of Fort William, $40,000. J. Janostak, J. Matulak, A. Cizmar. Dwyer Elevator Company, $250,000. J. W. Gauvreau, W. Grace, C. Hall.

Regina, Sask.—Canadian Finance & Land Company, $50,000. Empire Financiers, $20,000. Union Gravel and Crushed Stone Company, $60,000. Western Fire Brick Company, $250,000.

Ottawa, Ont.—La Compagnie de Publication Canadienne Francaise, $100,000. C. Beauchamp, J. A. Brousseau, O. E. Casault. Intercolonial Securities Corporation, $1,000,000. G. D. Kelley, C. H. Maclaren, A. J. Fraser.

Medicine Hat, Alta.—People's Wine and Spirit Company, $30,000. Metzner Felger, Ottawa Street, $100,000. Church-Campbell and Company, $250,000. Alberta Park Development Company, $150,000.

Vancouver, B.C.—Vadso Steamship Company, $30,000. Postal Securities Corporation, $100,000. Urquhart, Dick and Campion, $10,000, (dry goods). Vancouver Terminal Securities, $100,000. Coast Agencies Corporation, $10,000. Rosenbaum Brothers Wholesale Meat Company, $15,000.

Edmonton, Alta.—Alberta Motor Boat Company, $15,000. Dechene and McNeil, $100,000. Acme Securities, $300,000. Grouard and Peace River Locators, $25,000. Grand Prairie Milling Company, $100,000. Huff Gravel Company, $250,000. Edmonton Produce Company, $10,000. Whyte and Company, $10,000. Capital Coal Company, $50,000. Chapman and Turner Decorating Company, $10,000. Capital City Taxi, $100,000. Edmonton Cement Products, $10,000. Strathcona Securities, $25,000. North Star Land Company, $10,000. British American Land Company, $15,000.

Calgary, Alta.—Crystal Ice Company, $250,000. Rockland Marmalade Company, $100,000. Marsh and Son, $10,000. Sherman Enterprises, $1,000,000. Sheffield Investment Company, $250,000. Lay Theatres, $50,000. Mutual Brokers, $25,000. James A. Allen, (Alberta), Company, $25,000. Bijou Amusement Company, $25,000. Co-operative Bungalow Company, $25,000. Kootenay-Waldo Fruit Lands, $100,000. R. E. Holland Company, $10,000. Moose Jaw Syndicate, $112,500. Ontario Crushed Rock and Gravel Company, $15,000. P. Burns Coal Mines, $1,000,000. P. Burns, W. Corlet, F. S. Albright.

Montreal, Que.—British American Tobacco Company, $50,000. A. E. Woodworth, A. E. Wright, H. J. Hague. Drummond, McCall and Company, $1,000,000. A. W. P. Buchanan, T. S. Owens, R. Wilton. Montreal Apartment Company, $1,000,000. A. Pacaud, St. Joseph de B. Beauce; J. A. Handfield, W. Handfield, both of Montreal. Radio Electric Company of Canada, $200,000. C. A. Pope, G. Barclay, W. B. Scott. Canada Transportation Lines, $25,000,000. R. C. Smith, F. H. Markey, G. G. Hyde Ville Pointaux-Trembles Annexe, $49,000. J. U. Dumont, A. Vale, J. D. Langlier. Silverzone Chemical Company, Limited, $20,000. H. J. Trihey, P. Bercovitch, W. P. Kearney.

Winnipeg, Man.—Universal Electric Company, Limited, $60,000. H. S. Simpson, J. H. Ferguson, W. M. Noble. Kildonnan Land and Development Company, $150,000. T. Wright, H. R. Backhouse, J. Warnock. Arbeiter Ring Temple Association, $30,000, (real estate). H. Hirsh, J. Prasow, F. Simkin. Brown the Hatter, $10,000. A. W. Morley, C. L. Richardson, D. C. Montgomery. The Porters' Club, $5,000. A. Livingstone, E. Smith, A. Young. Economic Securities Company, $75,000. H. Phillips, H. St. C. Scrath, C. S. A. Rogers. Searle Securities Company, $25,000. H. Phillips, C. S. A. Rogers, H. St. C. Scrath. St. Anthony Securities Company, $20,000. H. Phillips, C. S. A. Rogers, H. St. C. Scrath.

Toronto, Ont.—Clevenger-Profet Silver Mines, $1,500,000. J. D. Montgomery, A. Cochrane, V. F. Gray. Cook Brothers and Allen, $350,000, (dry goods). D. I. Grant, M. Macdonald, E. Smily. Beaver Realty Company, $40,000. E. C. Ironside, W. J. McLarty, I. Finberg. Sutherland Construction Company, $40,000. R. W. Hart, G. M. Miller, C. H. C. Leggott. Mabees, $40,000, (real estate). E. W. Mabee, D. McGill, J. W. Payne. Gosselin Gold Mines, $2,000,000. R. Bowlby, Milton; P. W. McCaffrey, A. H. Harkness, Toronto. Tweed Realty, $40,000. A. S. Lown, W. J. McWaters, C. R. Munro. Beaver Lumber Company, $75,000. W. J. Mitchell, E. Constant, W. S. Thomas. Macpherson Investments, $40,000. A. D. Johnston, G. T. Irwin, W. H. Tutty. Evans Tailoring Company, $40,000. T. J. Harrison, C. Evans, W. H. Haines. National Steamship Company, $2,000,000. C. Mulock, G. F. Perry, J. B. Foote. Fair Canadian Ventilator Company, $1,000,000. H. Riley, D. A. MacRae, H. E. McKitrick. Holmes Restaurants, $250,000. R. H. Holmes, D. H. Holbrook, C. M. Preston.

BOND TENDERS INVITED

Lougheed, Alta.—The village council has been authorized to borrow $2,000 for streets and sidewalks.

Viking, Alta.—The village council has been authorized to borrow $6,000 for firehall and police station.

Lloydminster, Sask.—Until July 14th for $5,000 6 per cent. debentures. H. C. Lisle, secretary-treasurer.

Wabamun, Alta.—Until July 1st for $5,000 6 per cent. 10-year debentures. E. B. Shields, secretary-treasurer.

Grandview, Man.—Until June 12th for $17,000 6 per cent. 20-year debentures. W. Dickie, secretary-treasurer.

Yorkton, Sask.—Until July 1st for $15,000 5 per cent. 20-year school debentures. C. J. Macfarline, secretary-treasurer.

Halifax, N.S.—Tenders will be received up to July 28th for debentures totalling $299,750. W. L. Brown, city treasurer.

Coulee R.M., No. 136, Sask.—The municipality has been authorized to borrow $5,000. Secretary-treasurer, F. R. Bolin, Neidpolk.

Dufferin R.M., No. 190, Sask.—The municipality has been authorized to borrow $15,000. Secretary-treasurer, J. Slater, Bethune.

Wheatlands, No. 163, Sask.—The municipality has been authorized to borrow $6,000. Secretary-treasurer, G. F. Cliff, Mortlach.

Colonsay R.M., No. 342, Sask.—The municipality has been authorized to borrow $12,000. Secretary-treasurer, R. A. Baird, Colonsay.

Usborne R.M., No. 310, Sask.—The municipality has been authorized to borrow $15,000. Secretary-treasurer, E. D. Gardiner, Lockwood.

Invergordon R.M., No. 430, Sask.—The municipality has been authorized to borrow $5,000. Secretary-treasurer, W. E. Brock, Invergordon.

Berlin, Ont.—Until July 3rd for debentures totalling $202,317. E. Huber, city treasurer. (Official advertisement appears on another page.)

Nokomis, Sask.—The town will have $18,000 6 per cent. 20-year local improvement debentures for sale after July 1st. W. A. Armour, secretary-treasurer.

Maple Creek S.D., No. 80, Sask.—Until July 1st for $25,000 30-year 7 per cent. debentures. C. A. King, secretary-treasurer, Maple Creek, Sask.

Collingwood, Ont.—Up to July 15th for $54,000 debentures. A. D. Knight, town treasurer, Collingwood. (Official advertisement appears on another page).

Prairie R.M., No. 408, Sask.—The council have been authorized to borrow $5,000 for permanent improvements. Secretary-treasurer, S. C. Bowen-Smith, Wilkie.

Broadview, Sask.—Until July 12th for $25,000 6 per cent. 20-year town hall debentures. A. Sinclair, secretary-treasurer. (Official advertisement appears on another page.)

Hanley, Sask.—Until July 9th for $15,000 6 per cent. 20-year municipal building debentures. A. Holm, secretary-treasurer. (Official advertisement appears on another page.)

Snipe Lake Rural Municipality No. 259, Sask.—Until July 14th for $5,000 6 per cent. 20-year road construction debentures. Maitland Barkwell, secretary-treasurer, Richlea P.O.

Eldersley R.M., No. 427, Sask.—The municipality has been authorized to borrow $4,000 for permanent improvements. Secretary-treasurer, W. Littlejohn Robertson, Tisdale.

Merritt, B.C.—Until June 30th for $45,000 6 per cent. 30-year waterworks; $25,000 6 per cent. 30-year electric light, and $10,000 6 per cent. 10-year sidewalks debentures. Harry Priest, treasurer.

Welland County, Ont.—Until July 15th for $100,000 4½ per cent. 30-year highway improvement debentures. R. Cooper, county clerk, Welland, Ont. (Official advertisement appears on another page.)

Regina, Sask.—By-laws for the following purposes were carried by the electors:—Sewer work, $143,754.00; paving, $88,772.60; plank sidewalks, $6,321.00; water mains, $190,831.43; trunk sewer, $100,000; parks improvements, $40,000.

EUROPEAN PULP IMPORTERS BENEFITED

The United States will give up $[illegible] to European importers of wood pulp and paper as a result of the treasury department's decision not to appeal to the supreme court from the recent decision of the customs court that all countries having "favored nation" treaties with the United States were entitled to free wood pulp and paper because that privilege was granted to Canada. The importations were made from France, Germany, Norway, Sweden, Denmark, and other European countries.

VALUE OF LIFE INSURANCE

XVIII.

Relations of Partners, Active and Sleeping

BY C. A. HASTINGS.

On the one hand the sleeping partner risks his capital, and on the other hand, the active partner risks his labor. The one puts in credit, the other man's assets are his time, vigor and brains.

As the business increases and becomes successful, the sleeping partner is looked upon as a nuisance, his term of popularity having ceased when the assistance of his cheque book is no longer called upon. Usually there is a change in the deeds of partnership, giving the active partner the right to buy out the sleeping partner, and there is only one sure way of doing it.

The active partner takes out an endowment policy on the life of his sleeping partner and pays the annual premiums himself, out of his own profits in the business, for it is up to him to provide the wherewithal.

Mature on Date Fixed.

This policy can be arranged to mature on the date fixed upon in the deed of partnership, and, of course, the policy matures in the event of the death of the assured partner. A with profit endowment policy will be earning good interest, in short a proportion of the interest that is being paid by the active to the sleeping partner. In due course the capital necessary to buy out the sleeping partner is increasing rapidly, and when the opportunity arrives the sleeping partner may be paid off in spot cash, without any danger of dislocating the business.

Methods not Appreciated.

Commercial failures are mainly due to the fact that the number of methods in which life assurance can be employed are not appreciated, and the business man, whether he has a limited amount of capital or not, can protect himself and has only himself to blame if he does not. Imagine the case of a partner who exercises his right to sell his share in the business, what a splendid position the man is in who has discounted this right by the means pointed out.

NORTHERN CROWN BANK.

The Northern Crown Bank made net profits of $112,009 for the half-year ended May 31, 1913. With the balance of credit of profit and loss account on the 31st December, 1912, $181,672.54, there was a sum available of $293,681.62, which was appropriated as follows:—Dividend at 6 per cent. per annum, payable June 2nd, 1913, $81,827.37, and balance carried forward at credit of profit and loss account, $211,854.25, after deducting expenses of management, payment of taxes, and making provision for interest due to depositors and for bad and doubtful debts.

The Northern Crown Bank is making good progress under the capable management of Mr. R. Campbell, general manager.

◆

Branches of the Canadian Bank of Commerce have been opened at Highland, Alta., and at the corner of Union and Rodney Streets, St. John, N.B., under the supervision of the Hanna, Alta., and St. John, N.B., managers respectively.

UNLICENSED FIRE INSURANCE.

Nearly Two Hundred Millions of this Business Was Written in Canada Last Year.

The amount of fire insurance carried on property in Canada by fire insurance companies not licensed to transact business in Canada was, in 1912, $197,918,437, compared with $191,038,071 in 1911. The following table shows how the amount was divided among the various provinces:—

Ontario	$83,082,360
Quebec	63,983,612
British Columbia	12,502,428
Manitoba	11,873,923
Alberta	7,903,590
Saskatchewan	7,156,543
New Brunswick	5,656,373
Nova Scotia	5,758,608
Prince Edward Island	1,000
	$197,918,437

Nearly half the amount, or $83,082,360, of this "unlicensed insurance," was placed in Ontario, while $63,983,612 went to Quebec. British Columbia comes third with $12,502,428, and Manitoba fourth with $11,873,923. In 1911, the provinces ranked in the same order as this, only each with smaller amounts.

Nature of Property Insured

Here is a table showing the nature of the property insured by the "unlicensed" concerns last year and in 1911:—

	1911	1912
Lumber and lumber mills	$ 15,084,067	$ 12,532,097
Other industrial plants and mercantile establishments	111,077,541	108,319,947
Stock and merchandise	27,139,444	51,918,433
Railway property and equipment	36,243,272	23,842,495
Miscellaneous	1,493,747	1,305,465
	$191,038,071	$197,918,437

There was a decrease last year in all classes which carry unlicensed insurance, as compared with 1911, with one exception. This was "stock and merchandise," which showed a large gain, the figures increasing from $27,139,444 to $52,918,433.

Who Are Doing the Business?

The following table shows the classes of insurers which transacted this business in Canada last year and in 1911:—

	1911	1912
Lloyds Association	$59,629,932	$64,129,595
Reciprocal Underwriters	13,571,461	13,887,644
Mutual Companies	73,835,539	86,347,397
Stock Companies	41,581,705	33,553,801
Not specified	2,419,434	....
	$191,038,071	$197,918,437

The business of Lloyds increased by about $5,000,000 last year. While the reciprocal underwriters carried practically the same amount of business in the two years, the mutual companies in 1912 gained about $13,000,000, and the stock companies lost $8,000,000 of business as compared with 1911.

What the Law Says

Section 139 of the Insurance Act regulates unlicensed insurance in Canada. It reads in part as follows:—

"Notwithstanding anything in this Act contained, any person may insure his property, or any property in which he has an insurable interest, situated in Canada, with any British or foreign unlicensed insurance company or underwriters, and may also insure with persons who reciprocally insure for protection only and not for profit; and any property insured or to be insured under the provisions of this section may be inspected and any loss incurred in respect thereof adjusted; provided such insurance is effected outside of Canada and without any solicitation whatsoever directly or indirectly on the part of such company, underwriters or persons by which or whom the insurance is made; and provided further that no such company, underwriters or persons shall within Canada advertise their business in any newspaper or other publication or by circular mailed in Canada or elsewhere, or maintain an office or agency therein for the receipt of applications or the transaction of any act, matter or thing relating in any way to their said business."

When the Act was being revised in 1910, the licensed insurance companies very naturally protested against the practice of unlicensed insurance, but their arguments were unavailing.

PUBLICATIONS RECEIVED.

The Prosperity edition of the Calgary News Telegram, contains authoritative and interesting articles relating to Calgary. It is a great credit to the editors and publishers.

SIGNIFICANCE OF THE FIRE WASTE.

Everybody's Pocket is Affected—Saskatchewan's Commissioner is Busy.

The fire loss in Canada for the year 1912 amounted approximately to $23,000,000, or a per capita loss of $3.07. To this must be added a per capita cost of maintaining fire brigades of $1.25, making a total tax of $4.32 per capita. The number of lives lost as a direct consequence of fire amounted to 203 for the same period. These appallingly large figures indicate a condition of affairs that demands prompt attention and strenuous action. The absence of interest in the problems presented by our national fire waste has been no less appalling than the magnitude of the waste itself. An unpardonable apathy and indifference have characterized our people in this regard until recent years. The economic significance of fire waste has been too long overlooked, and a campaign of education to emphasize this aspect of the fire waste problem is the first necessary step towards its solution. Once people realize that they themselves are being impoverished in consequence, they will not be slow to perceive the absolute necessity of hearty co-operation with every scheme devised to accomplish the reduction of fire loss.

Destruction of Accumulated Capital

Every fire means the actual destruction of so much accumulated capital, leaving the country with that much less means to finance its enterprises. The fire waste touches the pocket of every man, woman and child in the Dominion of Canada, and, figure it out how he may, the tax falls on that individual known as the "ultimate consumer." Until quite recently, the shallow and unaccountable idea found place in many minds that the fire losses were being borne by the insurance companies. This idea is gradually disappearing before an increasing realization of the fact that insurance companies are merely collectors and distributors of a fire tax. The greater the fire loss the more they must collect to meet that loss.

A recognition of the true significance of fire waste is rapidly gaining ground, however, and, as a consequence, legislation along preventive lines is receiving earnest attention. The United States has thoroughly awakened to the necessities of the case, and in most of the states fire marshal departments are in operation and fire prevention associations are growing in number and influence. Canada, which has proved rather tardy in this regard in the past, is also showing signs of awakening.

Two Provinces Have Commissioners

For several years Manitoba has stood alone among Canadian provinces in the matter of having fire prevention legislation. Saskatchewan has followed suit by enacting an act along the same lines and appointing a fire commissioner, whose duties it is to investigate all fires, where necessary, with a view to determining their cause. Furthermore, a record of all fires occurring in the province shall be kept and shall be available for public inspection. During the three months that the office has been in operation considerable progress has been made and hearty co-operation has been given by insurance companies, civic and municipal authorities and fire chiefs. A bulletin, issued to upwards of thirty cities and towns in the province, urging the necessity of a clean-up or fire prevention day, met with a hearty and loyal response in most cases and, doubtless, much good has resulted. A by-law, providing for systematic inspections of premises by the members of the fire departments and regulating many conditions which constitute a fire menace, has been submitted to the cities of the province. To Prince Albert belongs the credit of having promptly adopted it almost in toto, whilst other cities have it under consideration.

Uniform Standard in By-laws

The attainment of as uniform a standard as possible of fire prevention by-laws and regulations is a consummation "devoutly to be wished," and, to this end, an effort will be made to bring the subject before every town and village council in the province.

That much can be accomplished is evident from the fact that considerably over 50 per cent. of fires already reported are due to preventible causes. The publication of facts and figures from time to time in the columns of the press will, it is hoped, start all responsible authorities and the general public a thinking about our truly scandalous fire waste and thus lead to better methods and practices in the future, are statements of Mr. R. J. Lean, Saskatchewan's fire commissioner. No country in the world has a greater problem, in regard to fire waste, than Canada. With an average per capita fire loss which is eight times as great as the average loss in European countries, it is obvious that there must be a great awakening if we are to rid ourselves of the disgrace and penalty of the largest per capita fire waste in the world. "Eternal vigilance is the price of safety."

Victoria, B.C. board of trade is seeking to effect a better freight service with the growing markets of the northern part of the province.

CANADA AND INVESTORS.

Money Has Mostly Been Used Wisely—Necessities of a Growing Population Are Many.

It would be unjust if Canada, as a whole, should suffer because of that occasional error from which no large series of investments was free. Taken altogether, the securities created in Canada during the last few years had been inferior to nothing offered by any foreign country or oversea dominion. No promise of Canada's future made in good faith in the past was less likely of fulfilment now than it was when made. Indeed, the future of the country was assured past all manner of doubt, and for the moment it was not necessary to consider what the population would be eventually, was the convincing remark of Sir Edmund Walker at a luncheon of the Royal Colonial Institute in London recently.

When they had a population of 5,000,000, and but a small stream of immigrants, they had a surplus of exports over imports, and did not need to come here for loans. Now they were borrowing in fairly close proportion to their immigration, because they were forced to build the things needed to harness the country for the continually increasing population, and for the new areas being opened for settlement. They had a population of less than two to the square mile, while the United States had 25 and Great Britain 471, or, to give another illustration which might make the magnitude of their problem still plainer: They were receiving five new people each year for each 100 people already in the country, and if they separated those who settled in the prairie provinces they found that that part of Canada had to take care of ten new people in each year for each 100 already there. Imagine what that meant in new houses, farms, roads, bridges, railways, merchandise and all other implements necessary even to the rude civilization in which most of them began.

SIR EDMUND WALKER

Who Told a Distinguished London Gathering that the Investor Will Soon See that the Brightest and Most Wholesome Spot in the Empire is in British North America.

Remained for Investor to Supply

No one could suppose that the savings of the hundred could each year provide the capital expenditure necessary to take care of the new five, and except that they encouraged immigration they had no power to stop this need of new building.

Sir Edmund next touched upon the wide difference between the imports and exports. The question, he said, was sometimes asked as to why the exports did not respond more quickly to the increased immigration. He explained that the newcomers, to a large extent, went to work in connection with the building of the country and earned money before going on the land. In doing this they ate food that would otherwise be exported. When the transcontinental lines were finished, and when the growth of western cities was a little less rapid, and the main features of municipal expenditure had been accomplished, things would begin to work easier, but until then it was impossible to expect that they would overcome their imports with exports. They knew, of course, that in the last analysis it remained for the investor, if he was both able and willing, to supply the money necessary for their rapid development. It was, in any event, a matter of great importance to consider whether the money invested was being wisely used or not, and in the main he was sure that it was wisely used. In regard to the building of railways, it would not be overdone for many a year to come, and so far as the provincial governments were concerned, there was no probability whatever of their incurring obligations beyond their capacity to protect, even though they might undertake some phases of state ownership in which some of them might not happen to believe.

Requirements of Cities and Towns

The money required for cities and towns was much greater, proportionately, than that needed by provincial governments, but during the past year bankers had tried to impress upon the municipalities that the investor was the one who really decided, not whether the investment ought to be made, but whether it could be made.

Apart from the scarcity of money, Sir Edmund contended that there had been nothing to check Canadian growth and prosperity except the decline in real estate speculation—a thing not to be regretted. Countless men had made fortunes, about the reality of which there was no doubt, out of real estate in Canada. Many more now held real estate out of which great wealth would arise. But, again, money had entered into ventures, especially in city sub-divisions, long in advance of actual requirements, which could only be classed as gambling, and which had no more relation to legitimate transactions in central city properties or in farming lands than some wild mining venture had to a first-class security.

Brightest and Most Wholesome Spot

Of one thing he felt sure, and that was that the land mortgage, trust and life assurance companies, who made most of the loans on real estate, had not made loans of a speculative nature to any extent; and, of course, banks in Canada were not allowed to lend money on real estate in any manner. Nothing had happened, repeated Sir Edmund, to change the confidence of the investor in Canada, except that, money being scarce instead of plentiful, he had turned the currents of his mind into pessimistic channels instead of optimistic, and when money was a little easier and he looked about for his investment instead of having it thrust upon him, that he would again see that the brightest and most wholesome spot in the empire was in British North America.

◆

LONDON IS APATHETIC

Public Take Very Small Part of Dominion Glass Issue —National Drug Loan

The Canadian Associated Press understands that only three and a half per cent. of the Dominion Glass Company's issue of seven per cent. preference stock has been subscribed by the public.

Such a result carries its own comment as to the British investors' present attitude towards Canadian industrial issues, even when the latter are offered under unimpeachable sponsorship.

Syndicate Has Taken Stock.

In reference to this dispatch Messrs. C. Meredith and Company, Limited, Montreal, state that all the shares of the Dominion Glass Company, Limited, which were offered in London, amounting to $1,437,500 preference stock, have been disposed of by them to a strong London syndicate, on whose behalf the issue was made, in order to comply with an agreement made with them some months ago. The syndicate did not expect any considerable amount of the stock to be taken by the public, as large blocks were placed with private investors.

No bonus of common stock went with the preferred stock issue, the price of which was 97½.

National Drug Issue.

The National Drug and Chemical Company of Canada this week offered £200,000 preference one pound sixes at 21 shillings. The Financial Times criticizes the method of presenting the issue, saying it is difficult to understand why no better way of publishing details could not be found than in a letter from the company's president to the London branch of the Royal Bank. The Financial Times, in view of the meagreness of the information, doubts if the issue will appeal to the cautious investor.

The British Foreign and Colonial Corporation is offering $750,000 Dominion Canners 6 per cent. first mortgage sinking fund bonds in London at 99½ cents.

The following issues have been listed in London: Cape Breton Coal and Iron Company, £250,700, sixes, and Sao Paulo Electric, £120,000, fives.

Dr. Shearer has been elected president of the Huntsville, Ont., board of trade.

Mr. Alfred Tarut, Paris representative of the Montreal firm of Messrs. O'Brien and Williams, has returned from France, to spend until the early autumn in Canada.

Mr. E. P. Miller, general manager of the Dominion Trust Company, Vancouver, was a visitor to *The Monetary Times* office this week.

CANADIAN TRANSPORTATION LINES, LIMITED

Richelieu and Ontario Shareholders Approve Proposals —Questions as to Financing—Companies to be Included

Monetary Times Office,
Montreal, June 25th.

The result of the meeting called by the directors of the Richelieu and Ontario for the purpose of considering, and if deemed advisable, approving of the proposals whereby the Richelieu and Ontario shareholders would exchange their stock for the stock of the new Canadian Transportation Lines, Limited, was that the shareholders almost unanimously accepted the proposals submitted to them. This was that the shareholders of the Richelieu and Ontario would exchange their holdings for $12,500,000 of the preferred 7 per cent. cumulative shares of the new company, and in addition thereto $4,000,000 of the common stock. This would mean that each holder of ten shares of Richelieu and Ontario would receive twelve of the 7 per cent. preferred shares of the new company and four common shares. Inasmuch as the Richelieu and Ontario stock is now paying dividends of 8 per cent., it will be seen that the immediate return from 12 shares of preferred stock would be $4 per year more than is now being received for the 10 shares of the Richelieu and Ontario exchanged therefore, and that the shareholders would, therefore, not only be receiving more immediately, on their stock, but would have the chances of increase afforded in the four extra shares of common stock in the new company.

Messrs. A Haig Sims and George Caverhill, both of whom were directors of the Richelieu and Ontario before the present directors took over control, asked a number of questions at the meeting which would naturally occur to anyone particularly interested in the project. It will be remembered that the Canada Transportation Lines was incorporated with a capital of $25,000,000, of which one-half is in 7 per cent. cumulative preference shares and the other half common shares. In addition to this, the company has a right to issue 30-year first mortgage debentures to the amount of $8,000,000, bearing interest at 5 per cent. The company also has power to increase the amount of these debentures, but the money can only be used for the purchase of new boats or other property.

Impossible to Answer at Present.

An interesting point to which reference is now made is that both Messrs. Sims and Caverhill were desirous to know what would become of the $8,500,000, of common stock which remains after the $4,000,000 had been given to the Richelieu and Ontario.

The situation with respect to this would seem to be that up to the present time the deal is not sufficiently far advanced to make any definite statement as to what is being given for the other companies. As pointed out by Mr. Aemilius Jarvis, of Toronto, the charter for the Canada Transportation Lines was just issued and no directors had been appointed, so it was impossible for them to give the answer desired by Messrs. Sims and Caverhill.

It is further stated that the only company for which the arrangements have yet been completed is the Richelieu and Ontario. This company receives, according to the directors mentioned above, $12,000,000 of the preferred shares and $4,000,000 of the common. This means that $500,000 of the preferred and $8,500,000 of the common is left for the other companies. Out of this remaining $500,000 preferred stock, a certain proportion is given in exchange for the Canada Interlake Company and the Quebec Steamship Company. In addition to this these two concerns will receive common stock. A number of other companies are also being taken in.

Companies that will be Acquired.

So many changes have taken place during the past few years concerning these navigation projects that it is difficult to follow the matter accurately any longer. The companies to be taken in are as follows:—

Richelieu and Ontario Navigation Company. (This includes the Inland Lines, Limited, the Northern Navigation Company, Limited, the Richelieu and Ontario Company of the United States, and the Niagara Navigation Company, in which the latter is included the Hamilton Steamboat Company); Canada Interlake Line, Limited (formerly Merchants' Mutual Line); St. Lawrence Steamboat Company, Limited; Quebec Steamship Company, Limited; Ontario and Quebec Navigation Company; Merchants' Montreal Line; SS. "Haddington"; 1,000 Island Steamboat Company.

It will be seen from this that outside of the Richelieu and Ontario Company, quite a number of concerns remain to be taken in. The general feeling on the street is that the bulk of the $500,000 of preferred and a considerable proportion of the $8,500,000 of the common stock remaining after the Richelieu and Ontario has been paid for, together with a quantity of debentures, will be given in exchange for the companies mentioned, stock being given for goodwill, etc., and the debentures for the actual assets. While it is not absolutely stated that these companies will be taken in, the announcement made to the shareholders of the Richelieu and Ontario Navigation Company by their directors—who will have control of the new concern—is to the effect that it is expected that these companies will be acquired. The inference from this is that there is every likelihood that the deal will go through.

Appraisal of Properties.

The appraisal of all the properties mentioned in the above list has been made by the Canadian Appraisal Company; and Messrs. Marwick, Mitchell, Peat and Company, chartered accountants, have presented the statements of profit and loss assets and liabilities of the various concerns. The Appraisal Company shows that the assets amount to $33,055,538. The amount is made up in part as follows:—

Vessels	$16,866,834
Real Estate, Dock Property, etc.	5,450,268
Cash	661,531
Leases, Contracts and Goodwill	8,698,970

Against this would be accounts receivable to the extent of $555,538; $8,000,000 of 5 per cent. debenture stock; $12,500,000 preferred and $12,000,000 common stock. It is evident from this that it is not the intention of the directors to issue all the new common stock at the present time, but to leave $500,000 in the treasury.

The total net earnings of all the companies for the year 1912 amounted to $1,494,554, which is sufficient to meet the interest on debenture stock and dividends on preferred stock and to provide for reserve account and leave a balance against common stock.

It is considered also that on the basis of new tonnage now owned by the companies, but which was not in operation in 1912, the earnings should increase $263,000 during the present year, besides which it is claimed that a reduction of at least $100,000 can be effected on the insurance premiums.

Some questions have also been asked concerning the Richelieu and Ontario Navigation Company of the United States of America. This company was apparently formed some four or five years ago for the purpose of carrying on a service between Clinton and Rochester, it being illegal for boats owned by Canadian companies to operate direct between American ports. Questions have also been asked concerning the Canada Interlake Line, Limited. This is the company which some time ago took over the old Merchants' Mutual, and it is a distinct company from the Merchants' Montreal Line. The SS. "Haddington" is evidently a single boat owned by private interests.

◆

PERSONAL NOTES

Mr. J. McConnell has resigned from the directorate of the Ames-Holden-McCready Company.

Messrs. A. Claude Macdonell and Charles B. McNaught were elected directors of the Home Bank at the annual meeting of shareholders.

Mr. C. Hamilton Wickes, British Trade Commissioner in Canada, has just returned to Montreal, after a lengthy trip through the prairie provinces and to the Pacific coast.

Mr. J. B. McKechnie, of the Manufacturers' Life Insurance Company, has been made Fellow of the Institute of Actuaries (England).

Mr. C. J. Brown, on completion of thirty years' service as city clerk of Winnipeg, was the recipient of a handsome travelling bag, from the officials and members of the city council.

Mr. J. A. Lee, ex-mayor of New Westminster, died suddenly in that city last week. The late Mr. Lee was president of the board of trade and associated with other public interests.

Mr. Gerald Murphy, who for the last six months has been acting manager of the Dominion Bank at High River, Alta., has been transferred to Calgary, Alta., as manager of the Hillhurst branch of that bank.

Hon. R. Regis de Olivera, Brazilian ambassador to Cuba, is on a visit to Toronto. He states that the natural resources of Brazil have not yet been developed, and he desired to see Canadian capital invested in the republic.

Mr. Duncan C. Grant, formerly assistant manager of the Bank of Toronto in Montreal, is now connected with the head office staff at Toronto. Before leaving Montreal he was presented by the Montreal staff with a gold watch and chain.

ALBERTA PAYS FIVE AND THREE-QUARTERS PER CENT.

At the end of June, £1,500,000 of province of Alberta bills will fall due, and in order to provide for their maturity fresh bills in replacement thereof were offered in the London market last week. The new bills are for six months, and are due on December 30, 1913. The new bills were placed on the basis of 5¾ per cent. per annum.

NEW TREASURER OF CANADA LIFE ASSURANCE COMPANY.

When the Canada Life Assurance Company desired to fill the office of treasurer, they went west to bring an easterner back east, an event which indicates the choosing of the best man for the job. The treasurership of this progressive corporation, made vacant by the death of Mr. H. L. Watt, has been filled by the appointment of Mr. E. M. Saunders, who since 1886 has been connected with the Canadian Bank of Commerce, and who for several years has been its manager at Calgary. Mr. Saunders, who is a son of the Rev. Dr. Saunders, of Halifax, received his education in Dalhousie College, at Halifax. He spent 15 years in eastern Canada in the service of the bank, and 11 years ago went to the west where he has represented it as branch manager at Moosomin and Moose Jaw, as well as at Calgary. Mr. Saunders has also studied conditions at various points throughout the west on behalf of the bank, and the establishment of a number of its branches in that country has been on his recommendation.

E. M. Saunders.

His experience of western conditions and his first-hand knowledge of the country has had something to do in confirming the directors of the Canada Life in their choice, for, while a man of first-class attainments and standing is necessary for so important an office, his value to his company will be materially enhanced by his knowledge of that country, in which most of our life companies are now investing a substantial part of their assets.

Mr. Saunders is well known both in eastern and western Canada. He is a keen business man, a capable executive, and a gentleman of attractive personality. No matter how busy as bank manager, he had always a spare minute for the seeker of information. During past years, he has made a multitude of friends who will all wish him every success in his new appointment.

◆

MUST PAY FIVE PER CENT.

South Vancouver has been advised by the town clerk to consolidate certain by-laws and raise the debenture interest to five per cent.

◆

ANOTHER FREIGHT LINE FOR GREAT LAKES.

Mr. Cawthra Mulock, financier, Toronto, and Mr. Gordon F. Perry, manager of the National Iron Works, Toronto, are interested in a new navigation concern. They and Messrs. J. B. Foote, E. H. Lashinger and M. Stobie have secured a Dominion charter incorporating the National Steamship Company with capital of $2,000,000, and head office in Toronto.

Mr. Perry tells *The Monetary Times* that the company will operate a freight steamship service on the Great Lakes. One vessel has already been purchased and others will be contracted for. The boats will carry the products of the National Iron Works and return with cargoes of grain.

NEW CURRENCY LEGISLATION.

United States Will Endeavor to Get More Elastic Currency System.

A determined effort is to be made to improve the banking system of the United States. Representative Glass, chairman of the House Banking and Currency committee, has issued the following statement of the provisions and objects of the proposed currency bill. President Wilson, in a message to Congress, said that it was ''absolutely imperative that we should give the business men of this country a banking and currency system by means of which they can make use of the freedom of enterprise and of individual initiative which we are about to bestow upon them.''

Responsive to Sound Credit

''We must have a currency,'' added President Wilson, ''not rigid as now, but readily, elastically responsive to sound credit, the expanding and contracting credits of everyday transactions, the normal ebb and flow of personal and corporate dealings. Our banking laws must mobilize reserves; must not permit the concentration anywhere in a few hands of the monetary resources of the country or their use for speculative purposes in such volume as to hinder or impede or stand in the way of other more legitimate, more fruitful uses. And the control of the system of banking and of issue which our new laws are to set up must be public, not private, must be vested in the government itself, so that the banks may be the instruments, not the masters, of business and of individual enterprise and initiative.''

Representative Mann, representing the opposition, curtly says that ''the President's message is a fine example of classic construction, but there is nothing more to it, unless it be considered a threat that patronage will be withheld until a banking and currency bill is passed.''

The following is the statement of Representative Glass:—

The bill prepared by Representative Glass of Virginia, and to be introduced in the House as a basis of legislative action, will be gone over in detail for such alterations as a majority of the Banking and Currency committee may care to make. The purpose of the bill is to be a comprehensive revision of the currency system of the country so as to obtain these principal objects:—

1. Provision of a means for re-discounting commercial paper of specified types.
2. Provision of a basis for elastic note issues properly safeguarded.
3. Provision of machinery for doing foreign banking business.

In order to accomplish these purposes fully, it is necessary to repeal certain portions of existing law, to rectify various conditions in the present national banking system, which are in some cases only indirectly connected with the objects sought; to furnish a new class of institutions for the performance of some functions which cannot well be entrusted to existing banks, or at all events can better be performed by others, and to alter the present reserve system to a very material degree.

The scope of the bill can best be understood by an analytical review of its contents.

Present Situation

The present banking situation in the United States rests upon the National Bank Act proper, as slightly modified from time to time, and upon the so-called Aldrich-Vreeland Act of May 30, 1908. Of these Acts, the latter is completely superseded on the ground that it has never become operative, probably will not become operative except under extreme stress, and was never satisfactory. The National Bank Act itself is modified in numerous essential particulars. In a separate measure, a general revision of the administrative provisions of the National Bank Act will be provided.

New Class of Banks

Fundamental to the idea of the bill is the creation of a new class of banks, to be known as federal reserve banks, the chief points about which are as follows:

1. The number is to be twelve, with possible increase later as provided.
2. The ownership is to be in the hands of the stockholding banks of the twelve districts in which the reserve banks are situated. The national banks are compelled to be members and state banks and trust companies are permitted to be members.
3. The capitalization is to be 20 per cent. of the capital of the stockholding banks, one-half paid in and one-half subject to call.
4. The business of these federal reserve banks is to be as follows:—
   (a)—Re-discounting of paper presented by stockholding banks under specified conditions, provided such paper grows out of actual agricultural, commercial or industrial transactions, and does not run more than a specified number of days.
   (b)—Buying and selling government securities, gold and silver bullion, and foreign coin, foreign exchange and open market bills of given maturity.
   (c)—Government fiscal operations.

Issue of Notes

Every national bank is allowed to continue its note issue ex[illegible] present and in addition federal reserve treasury notes are authorized to be issued to an amount not exceeding $500,000,000. These notes will, upon application, be issued to the federal reserve banks upon prime short-time commercial paper and other liquid collateral. While the notes will, on their faces, purport to be obligations of the United States, they are required to be secured by a gold reserve of 33 1-3 per cent. provided by the federal reserve bank, and are a first and paramount lien on all the assets of these banks and are redeemable in gold on demand at the Treasury Department in the city of Washington or at any federal reserve bank. Stringent provisions are made against counting any [illegible] notes as a part of bank reserves, and the system is guarded against inflation by lodging power with the Federal Reserve Board to exact an interest charge upon treasury notes in [illegible] prompt redemption. The notes are not made legal tender, but are receivable by the government and every bank of the system at par without exchange. No change is made in the elements of protection afforded existing bank notes.

Overseeing the whole system is created a Federal Reserve Board, consisting of seven members, including the Secretary of the Treasury, the Secretary of Agriculture, and the Comptroller of the Currency as members ex-officio. Four other members are chosen by the president of the United States, by and with the advice and consent of the senate, for a term of six years each. One of the members thus appointed by the president is to be governor of the Federal Reserve Board, one vice-governor and one secretary.

Their term of office is for eight years except that of those first appointed, one is to serve two years, one four, one six and one eight years. At least one of the members appointed by the president is to be a person of banking experience. Thus it will be noted that the government will have absolute control of the system. The salary of each member of the board except the two cabinet officers, who are ex-officio members, is fixed at $10,000, the Comptroller of the Currency to receive $5,000 in addition to the salary which he receives under the existing law.

The powers of the Federal Reserve Board are as follows:

(a) To examine at its discretion the accounts and books of each federal reserve bank, and to require such statements and reports as it deems necessary.

(b) To require, or on application to permit, a federal reserve bank to re-discount the paper of any other federal reserve bank.

(c) To establish each week, or as much oftener as required, a rate of discount which shall be mandatory upon each federal reserve bank and for each class of paper, provided that said rate of discount need not be uniform for all federal reserve banks, but shall be made with a view to accommodating the commerce of the country and promoting a stable price level.

(d) To suspend for a period not exceeding thirty days (and to renew such suspension for periods not to exceed fifteen days) any and every reserve requirement specified in this act.

(e) To supervise and regulate the issue of treasury notes to federal reserve banks.

(f) To add to the number of cities classified as reserve and central reserve cities under existing law in which national banking associations are subject to the reserve requirements set forth in the act; or to re-classify existing reserve and central reserve cities and to designate the banks therein situated as country banks at its discretion.

(g) To require the removal of officials of federal reserve banks for incompetency, dereliction of duty, fraud or deceit.

(h) To require the writing off of doubtful or worthless assets upon the books and balance sheets of federal reserve banks.

(i) To suspend the further operations of any federal reserve bank and appoint a receiver therefor.

(j) To perform the duties, functions or services specified or implied in the act.

Federal Reserve Banks

The bill is based on the belief that no one should participate in the control of the system unless he is financially interested himself, or chosen by those who are, except in so far as the government steps in and aserts the authority of the whole community. With this in mind, the system has been devised so as to provide for the continuation of existing national banks, with their organization, powers and function unchanged. In addition there is established a system of federal reserve banks, which are incorporated institutions holding federal charters, and in all respects managed like national banks, except as to the election of directors.

As stated, there are twelve of these federal reserve banks, each managed by a board of nine directors, three of whom will be expert bankers, selected by the banks; three will be members selected in the same way, but required to represent the commercial, industrial or agricultural interests of the district, and subject to removal by the Federal Reserve Board in case they do not fairly represent these interests. The remaining three directors are to be chosen by the Federal Reserve Board, and one of them is to be designated by said board as chairman of the board of directors of the federal reserve bank of the district to which he is appointed and is to be the agent of the Federal Reserve Board.

The national banks are compelled to be stockholding members of the federal reserve bank of their respective districts, and state banks and trust companies are permitted to be members under certain well-defined regulations. All the domestic transactions of the federal reserve bank must be with member banks and the government, except that it may purchase bankers' bills and bills of exchange in the open market from individuals, as well as from domestic or foreign banks.

Division of Business

The object of the bill is to effect a moderate division and classification of banking business along indicated lines, the net result, presumably, being summed up as follows:—

1. National reserve banks will be strictly limited to re-discounting actual commercial and industrial transactions evidenced by very short term paper and on rare occasions, under carefully prescribed conditions, to financial operations protected by collateral. They will also be able to engage in foreign exchange operations, sales of government securities; etc., as already explained.
2. National banks will be subjected to precisely the same restrictions as at present, with a relaxation in favor of a moderate amount of real estate loans by country banks under carefully guarded conditions.
3. By a revision of the administrative features of the National Banking Act, provision will be made for close oversight of national institutions with a view to holding them strictly up to the requirements of a legitimate banking business.
4. In order to possess themselves of the kind of paper entitling them to re-discounts, national banks will find themselves obliged to keep a reasonable proportion of their assets in the form of paper eligible for re-discounting, and this will mean very considerable emphasis upon the strictly commercial aspects of the business done by national institutions.

It is believed that the present sub-treasury system is unsatisfactory, clumsy, injurious to business, and difficult to manage in times of stress. The bill, therefore, provides for:

1. The placing of all current funds of the treasury in federal reserve banks and the payment of government creditors by check thereon.
2. The equalization of the public funds between the different reserve banks by direction of the Secretary of the Treasury and subject to a rate of interest to be fixed by the Federal Reserve Board.
3. The trust funds of the treasury are to be held as at present in the vaults of the treasury.

Division of Earnings

Under the terms of the bill, the federal reserve banks, after the payment of all expenses and taxes, are entitled to pay an annual cumulative dividend of 5 per cent. on paid-in capital to their stockholding members. One-half the net earnings of the bank must be paid into the surplus fund until said fund shall amount to 20 per cent. of the paid-in capital of the bank. The remaining one-half of the bank's earnings shall be paid to the United States and whenever and so long as the surplus fund of each federal reserve bank amounts to 20 per cent. of the paid-in capital, the shareholders having received their permissible dividend of 5 per cent., all excess earnings shall be paid to the United States. Every federal reserve bank in exempt from federal, state and local taxation, except in respect to taxes upon real estate.

In the belief that the present reserve system is antiquated and unsatisfactory, that the massing of funds in New York and other financial centres, of which so much has been said in recent years, is largely due to the present reserve requirements of national banks, and that in order to get the real benefit from the system of re-discount, which has been proposed as a remedy for many existing evils, it is necessary to base such system upon an actual control of reserves, provision has been made for re-casting the present bank reserve system. The plan includes:—

1. Transfer of reserves from existing national banks in reserve and central reserve cities to national reserve banks.

2. Spreading out of this process of transfer over a period of thirty-eight months in order to give as little shock as possible to market conditions.

3. Ultimately the establishment of a reserve system at the end of the transition period in which (1) country banks will have 15 per cent. of reserve, i.e., 15 per cent. of total demand liabilities, such 15 per cent. to be held 5 per cent. in the bank's vaults, 5 per cent. with the national reserve bank, and 5 per cent. either at home or with the reserve bank; while (2) reserve and central reserve city banks will have reserves of 20 per cent. of demand liabilities, of which 10 per cent. will be at home, 5 per cent. with the reserve bank of the district, and 5 per cent. either at home or with the reserve bank.

4. The presumed effect of this plan will be to end the placing of reserves with central reserve city banks for use in stock market operations, to keep reserve in some measure at home, and to require speculators to get the funds they need in their operations, either by directly borrowing them from persons who hold them and want to lend the cash for that purpose, or else by borrowing from the banks in the places where the operations are to be carried on.

Foreign Banking

In order to meet the view so often expressed in commercial circles, to the effect that the prosecution of American business in foreign countries would be greatly helped by improved banking facilities, the bill authorizes any national banking association with a minimum capital of $1,000,000 to establish branches in foreign countries for the furtherance of foreign commerce of the United States and to act as fiscal agents of the United States abroad. The Federal Reserve Board is required to pass upon all applications of national banks to establish such banks abroad.

BRITISH EMPIRE TRUST COMPANY.

The report of the British Empire Trust Company for the year ended April 30 last shows a profit of £60,900, which is equivalent to 10⅓ per cent. on the capital employed. For 1911-12 the corresponding figures were £67,600 or 13½ per cent. on the capital outstanding. Including £6,600 brought forward, the credit balance now to be dealt with is £67,500, of which £15,000 has been transferred to reserve, as against £35,000 so employed twelve months ago; the dividend on the new issue of cumulative 5 per cent. perpetual preference shares requires £4,000, and £24,000 has, as usual, been absorbed by the 6 per cent. distribution on the preferred ordinary shares. The directors propose to write off the cost of issuing the new preference shares—namely £8,900—and to make the dividend on the deferred shares up to 8 per cent., the same as for the previous year, leaving to be carried forward £7,300. With the addition now made, the reserve fund will amount to £150,000. As regards the investments held by the company, over 67 per cent. of these relate to railways, electrical enterprises, together with gas and water power companies, and over 82 per cent. of the company's investments are quoted on the London Stock Exchange.

CASUALTY AND SURETY UNDERWRITERS.

The programme for the annual meeting of the International Association of Casualty and Surety Underwriters at the Chateau Frontenac at Quebec, July 8 to 11, has been arranged. The address of welcome will be made by Mayor Napoleon Drouin. The remainder of the morning session will be taken up by President Charles H. Holland's annual address and routine business. Wednesday morning will be devoted almost exclusively to addresses, among which are:

Address of the vice-president.—J. Schofield Rowe, vice-president Ætna Life of Hartford. Address.—"The Economic and Essential Functions of the Insurance Companies in the Administration of Workmen's Compensation Laws," R. L. Drake, secretary Industrial Accident Board of Michigan, Lansing, Mich. Address.—"Merit Ratings for Liability and Workmen's Compensation Risks," Carl M. Hansen, secretary Accident Prevention, Inspection and Merit Classification Department, Workmen's Compensation Service Bureau, New York, N.Y.

At the afternoon session vice-president Victor E. H. Hoagland, vice-president of the New Jersey Fidelity and Plate Glass of Newark, will make an address, to be followed by others, which will be announced later. That evening the various sectional meetings will take place. Thursday morning will be devoted to the personal accident and health meeting. Addresses will be made by vice-president Hedley R. Woodward, vice-president of the Fidelity and Casualty of New York, which will be followed by reports of the various committees. The last day will be begun with a general discussion of subjects entered into at the first general session, and this will be followed by the election of officers.

ANOTHER ENGLISH FIRM HAS CANADIAN PLANT.

Boving and Company Extend Organization in the Dominion and Purchase Plant at Lindsay.

The incorporation of Boving and Company of Canada, Limited, with a Dominion charter, marks the establishment of yet another Canadian branch plant of an English house. The company has authorized capital stock of $1,000,000, and its head office will be in Toronto.

According to the second clause of the charter, the company may carry on the business of chemical, metallurgical, mining, electrical, mechanical, and civil engineers and contractors for the construction, erection, alteration and repair of public and private works and undertakings, and any business in which the application of electricity or any other power is or may be useful or convenient to carry on the business of treating, smelting and refining mineral ores or other substances, and for such purpose to install all necessary plant, machinery and apparatus, and to purchase, sell and otherwise deal in ores of various kinds or other substances capable of being treated, and to buy, sell and deal in any products or by-products of such ores or substances.

Plant Purchased at Lindsay

The Monetary Times learns that the company has purchased the Madison Williams plant at Lindsay, Ontario, which will be adapted to the needs of the Boving Company. The company have had an important organization in Canada for many years, but the purchase of the Lindsay factory is an important development of their Canadian business, which hitherto was conducted as an agency. Among the Boving turbine plants installed in Canada may be mentioned the following:—City of Winnipeg, 30,000 h.p.; Ocean Falls Pulp and Power Co., 12,000 h.p.; Calgary Light and Power Company, 9,000 h.p.; Midland Construction Company, 6,500 h.p.; Sydney Power Company, Trenton, 6,400 h.p.; Chicoutimi Pulp Company, 9,200 h.p.; City of Farnham, 1,200 h.p.

Duty, Freight and Repairs

The new company has taken over the Boving agencies and entire business in the Dominion, and, with a view to manufacturing a considerable part of the hydraulic machinery and pumps required for its Canadian contracts, has acquired a plant admirably suited for its purposes. The import duty and freight upon hydraulic machinery supplied to Canada are equal to about 50 per cent. of the net manufacturing cost in Europe. Notwithstanding this fact, Messrs. Boving and Company, have acquired in competition with all Canadian and United States manufacturers, many of the most important contracts in the Dominion. This is due to the admitted superiority of European designs and workmanship in hydraulic machinery. In view of this, the importance of establishing a Canadian plant to manufacture at least a part of the machinery used is obvious. An incidental and important advantage will accrue in the matter of repairs.

The large contracts for installation of power companies, etc., will, as in the past, be financed entirely by the English company. The capital provided by an issue of stock will be devoted solely to the manufacturing business to be conducted at the Canadian plant. The following is the capitalization of the company:—

	Authorized.	Issued.
Preferred 7 per cent. cumulative stock....	$250,000	$195,000
Common stock	750,000	403,000

Offering of Stock

The company is offering $100,000 7 per cent. cumulative preference shares of $100 each at par, carrying a bonus of 100 per cent. common stock. Messrs. R. C. Matthews and Company, Toronto, are underwriting this issue, practically all of which has been subscribed. Several prominent Canadians will be on the directorate.

Mr. Douglas Spencer, one of the representatives of the parent company in England, is now in Canada completing arrangements for the establishment of the branch factory. Mr. Clayton will be manager in Canada. Mr. Jens Orten Boving is the head of the parent firm.

COMPANIES INCREASE CAPITAL.

The Equitable Investment Company has increased its capital from $100,000 to $250,000.

The Mooney Seed Company has increased its capital from $100,000 to $250,000.

The capital stock of the Lake Winnipeg Shiping Company has been increased from $500,000 to $1,000,000 by the issue of 40,000 shares of preference stock of $5 each and 60,000 shares of common stock of $5 each.

The Montreal Reform Club has been authorized to increase its capital stock to $100,000, dividing the new capital stock of $80,000 into 16,000 shares of $5 each.

The Trader's Company has been authorized to increase its capital stock from $40,000 to $50,000, dividing the new capital stock of $10,000 into 400 shares of $25 each.

RECENT FIRES

Monetary Times' Weekly Register of Fire Losses and Insurance

Cavan, Ont.—June 18—Mr. R. Reynolds' barns. Loss $2,200. Cause, bush fire.

Keene, Ont.—June 18—Mr. A. Gillespie's barn. Loss unknown. Cause, lightning.

Lemberg, Sask.—June 13—Lemberg Flour Mills. Loss $15,000. Cause unknown.

Merlin, Ont.—June 18—Several buildings. Loss unknown. Cause, defective chimney.

Prairie Siding, Ont.—June 14—Mr. M. Crow's barn. Loss and cause unknown.

Kingston, Ont.—June 16—Grand Trunk Railway, carload sulphur. Loss and cause unknown.

Liverpool, N.S.—June 19—Coffin's Island lighthouse. Loss unknown. Cause, lightning.

Sutherland, Sask.—June 7—"Echo" newspaper plant. Loss $4,000. Cause, gasoline lamp.

Sydney, N.S.—June 16—No. 2 Colliery. Loss $15,000, partially insured. Cause unknown.

Peribonka, Que.—June 16—Peribonka pulp mills, and 20 houses. Loss $50,000. Cause unknown.

Port Colborne, Ont.—June 19—Cork Works. Loss $10,000, partially insured. Cause unknown.

Wingham, Ont.—June 25—Messrs. J. A. McLean's sawmills. Loss $15,000. Cause unknown.

Port Carling, Ont.—June 19—Messrs. William Davies' steamer "Ada Alice." Loss and cause unknown.

Ingersoll, Ont.—June 18.—Mr. W. Butler's barn, Dereham Centre. Loss unknown. Cause, gasoline engine.

Quebec, Que.—June 24—Canadian Packing Company's factory, 4th Street. Loss $25,000. Cause unknown.

Fasset, Que.—June 24—Fasset Lumber Milling Company's mills and storehouses. Loss $125,000. Cause unknown.

Hamilton, Ont.—June 19—Mr. E. C. Cope's residence, 41 Tisdale Street. Loss $500. Cause, children and matches.

Midland, Ont.—June 19—Mr. M. Moses' storehouse, Toronto Street. Loss $3,000. Insurance $1,000. Cause unknown.

St. Thomas, Ont.—June 16—Mr. N. J. Tufford's home near Middlemarch. Loss unknown. Cause, gasoline stove exploded.

Gananoque, Ont.—June 24—Lorne cheese factory, Lansdowne Township, owned by Mr. H. Stewart. Loss $4,500, partially insured. Cause unknown.

Fredericton, N.B.—June 12—Farmhouse and three barns owned by Mr. Coles Kitchen, and occupied by Mr. J. Shannon. Loss $4,000. Cause, brush fire.

New Westminster, B.C.—June 12—Mr. J. Randall's residence, 615 5th Avenue. Loss, building, insurance, none on building, $100 on stock. Cause,. supposed carelessness.

Alvinston, Ont.—June 19—Elevator owned by Mr. J. S. Dilliot, of Rutherford, and occupied by Mr. J. C. McKillop. Loss on contents $10,000, partially insured. Cause, lightning.

Berlin, Ont.—June 17—Messrs. Pinder and Nelson's livery stable, and Merchants Printing Company. Loss $1,000. Cause unknown.

June 25—Berlin Gasoline and Engine. Loss $100. Cause unknown.

Welland, Ont.—June 23—Residence owned by Mr. H. Fairclough, of Hamilton, and occupied by Mr. L. Merritt, Sixth Ward. Loss, building $300, contents $200. Cause, supposed defective wires.

Hull, Que.—June 19—Four frame houses on St. Joseph Street. Mr. Pore's loss $1,200, Mr. C. G. Goulet's loss $350, Mr. T. Cote's loss $200, Mr. A. Cote's loss $1,300, Mr. A. Ricard's loss $300. Cause unknown.

St. John, N.B.—June 18—Messrs. R. Sullivan and Company, premises owned by Mr. E. R. Owens, London, England. Loss $50,000. Insurance on improvements, $1,500 stock; $1,000 furniture, $100 bottling plant. Cause, supposed incendiary.

Saskatoon, Sask.—June 9—Mr. S. Oesterle, 10 Avenue North Park. Loss $[illegible]. Cause defective chimney. Insured with Northern Assurance Company.

June 11—Residence at 317 Avenue P. South, owned by Mr. Roberts. Loss, building $50, contents $50. Insured with Canada National Company. Cause, stove pipes near woodwork.

St. Catharines, Ontario.—June 10—Mrs. Sutton's residence. Loss, building $40, contents $5. Insurance, building $2,000, contents $350.

June 21—Brick residence owned by Mr. T. Nihan, occupied by Dr. Klotz. Loss, building $100, contents $335. Cause, defective wire.

June 22—Mr. Dingham's store. Loss $500. Insured. Cause unknown.

Ottawa, Ont.—June 10—Row of frame structures. Loss approximately $19,000. Loss to buildings, $5,000. Loss to stocks: War Lung, Chinese laundry, $700; no insurance; Samuel Cassidy and Company, lunch, $3,000, partly insured; Cadieux's bakery, $1,500, partly insured; C. R. Paquette, tobacconist and barber shop, $2,000, insurance, $800; Chinese lunch, loss, $700, no insurance; Max Friedman, shoemaker, loss $700, insurance $450; Stephens Brothers, paint shop, $6,000, insurance $4,000. Cause unknown.

June 16—Mr. J. McQuat, Euclid Avenue, Highland Park. Loss $2,000. Cause unknown.

Toronto, Ont.—June 11—Mr. D. Porsilvosky, 207 Brock Avenue. Loss $200. Insured, Queen City, $4,000; Ross and Wright, Toronto, adjusters for the insured, 207 Brock Avenue. Messrs. Hyde Brothers' store, Danforth Avenue and Don Mills Road. Loss $30. Cause unknown.

June 14—Mr. I. Roher, 131-3 Sackville Street. Loss $1,000. Insured in Queen Company. In rear. Loss $600, insured $400; contents, loss, $3,000. Insurance, $1,000, in fireman's. Ross and Wright, adjusters for the assured, Toronto. 207 Brock Avenue, building owned by T. Yaskewitz, $300. Insured. Ross and Wright, adjusters for the assured.

June 19—4 Lonsdale Avenue. Loss $10. Cause, electric iron.

Fort William, Ont.—June 10—1327 Stanley Avenue, occupied by B. Poleski, and owned by Mr. J. Okronic. Loss, building $1,000, contents $50. Insurance, building $1,300, contents $500. Cause unknown. 1612 Mountain Avenue, owned by Mr. P. Bashowski. Loss, building $1,100, contents $100. Cause unknown.

June 11—Imperial Restaurant, 119 North May Street, owned by Mr. L. L. Pelltier, Syndicate Avenue South. Loss $50. Cause, bonfire.

June 15—228 Leith Street, occupied by Mr. O. Kursmanan, owned by Mr. A. W. Fordsham. Loss, building $150, contents $100. Cause unknown.

June 14—Northern Engineering Company's moulding shop. Loss slight. cause, spark from cupola.

Montreal, Que.—June 19—Messrs. Kavanagh, Masterton and Company's packing house, 500 Notre Dame West. Loss $2,000. Cause unknown. Old New York Laundry, Bronsdon Lane. Loss $4,000. The building was occupied by the Crown Press Company, on the first floor, the New York Cloak and Suit Company on the second, and the British Paper Box Company on the third. Cause unknown.

June 21—Messrs. O. Langlois and Company's furniture storage. Loss $5,000. Cause, supposed incendiary.

June 22—Messrs. Itzweire and Sarrazin, sash and blind factory. Loss $125,000. Cause, matches or cigarettes. Four deaths.

June 24—Champlain School, 220 Falham Street. Loss $50,000. Cause, dropped match or cigarette.

Winnipeg, Man.—June 22—Garwood Avenue. Total loss $13,850. 639 Garwood Avenue, owner, J. F. Johnson—loss, covered by insurance with Robertson and Black agency, $500. Contents on above—J. F. Johnson, occupant, uninsured, $100. 641 Garwood Avenue, owner, J. F. Johnson, loss covered by insurance with Robertson and Black agency, $1,600. Contents on above, H. J. Sutherland, occupant, uninsured, $500. 643 Garwood Avenue, owner, H. Tillotson, uninsured, loss $2,000. 645 Garwood Avenue, owner H. Tillotson, uninsured, loss $2,000. 647 Garwood Avenue, owner, Mrs. Alice Gibbs, loss covered by insurance. Damage to house and contents, $2,000. 662 Fleet Street, agent, Oldfield, Kirby and Gardner. Damage to house, $300. Contents of 622, R. Huggen occupant, damage $50. 664 Fleet Street, owner, J. Lennox, loss covered by insurance, damage $300. Contents of 664, J. E. Ross, occupant, $150. 666 Fleet Street, owner, J. D. McArthur, loss covered by insurance. Damage $500. To contents of 666, W. Thompson, occupant, $100. 668 Fleet Street, agents, Oldfield, Kirby and Gardner, loss covered by insurance. Damage, $50. To contents of 668, C. Pickersgill, occupant, $75. 670 Fleet Street, agents, Oldfield, Kirby and Gardner, loss covered by insurance. Damage $600. To contents of 670, G. H. McAlpine, occupant $200. St. Michael's and All Angels' Church, loss covered by insurance. Damage $1,000. Minor losses, $100.

Peart's Investment Company has now changed its name to Canadian Financial Corporation.

BRITISH CAPITAL CALLS A HALT

Underwriters Overseas Agree to Give the Market a Rest Until October — Canada's Loans this Year

It is estimated that Great Britain can provide annually new capital for new securities, apart from the capital needed for buildings and private enterprises, to the extent of £220,000,000. For the first five months of this year, new securities amounting to nearly £150,000,000 have been placed. That the underwriters have decided to dam the tide of applications for funds is, therefore, not surprising. In presenting interesting figures, Sir George Paish states that last year the total subscriptions reached £211,000,000 for the year, of which about one-half was raised in the first five months. In the period to the end of May of this year the subscriptions have been nearly £150,000,000, in comparison with £104,000,000 last year and £110,000,000 in 1911. In considering the amount of capital placed in the five months just ended we must not forget that the subscriptions in the last five months of 1912 were abnormally small, amounting to only £50,000,000, and that the instalments on loans placed last year which had to be paid in the early part of the present year were unusually light. Still, when all the circumstances are taken into account, it is obvious that the issues of new securities are heavier and faster than can be easily absorbed, and it is probable that after the end of June a halt will be called until October in order that the accumulations of securities in the hands of the underwriters may be disposed of.

New Issues in May.

In May, 1913, the new issues have reached the large total of about £38,500,000, in comparison with £29,000,000 in May last year and £24,000,000 in May, 1911. Of the £38,500,000 subscribed for this month no less than £17,000,000 has been for Government loans, consisting of £10,670,000 for Brazil and £6,675,000 for China. An exceptionally large amount of capital has been asked for by miscellaneous undertakings of various kinds and descriptions.

The destination of the capital subscribed in London in the first five months of 1912 and 1913 is shown in the following statement:—

	First five months.	
	1913.	1912.
United Kingdom	£ 22,871,317	£ 25,021,776
India and Ceylon	2,902,467	3,222,818
British colonies	58,701,120	25,582,782
Foreign countries	62,915,546	50,390,252
Total	£147,390,450	£104,817,628

What Canada Has Had.

Canada has applied overseas for considerable capital. Its public flotations this year to the end of May number thirty and amount to £18,694,882. The following is a detailed list:—

Company.	Amount.	Left with under-writers, %.
Jan. —British Columbia Elec. Ry.	£ 750,000	73
" Grand Trunk Pacific	479,000	48
" City of Quebec	400,600	..
" Quebec Government	400,600	85
" Toronto Power Co.	616,438	..
" City of Toronto	1,075,000	85
" Edmonton, Dunvegan and British Columbia Ry. ..	738,356	98½
" Canada Southern Ry. Co.	411,520	..
" Canadian Farms, Ltd....	5,000	..
" Terminal Cities of Canada	679,012	82
Feb.—City of Winnipeg	750,000	75
Mar.—City of Montreal	1,438,300	..
Mar.—Pacific Great Eastern Ry.	£1,000,000	60
" A. Macdonald Co.	432,098	..
" Algoma Central Terminals	527,300	10
Apr.—Manitoba Province	400,000	..
" City of Prince Albert.....	102,700	..
" City of Port Arthur......	415,000	..
" Saskatchewan Province ..	1,000,000	85
" Southern Alberta Land Co.	250,000	65
" City of Regina	533,900	Fully subs'd
" City of Edmonton	1,068,000	80
" Grand Trunk Pacific......	2,000,000	80
" City of Maisonneuve	187,600	50
May —Phœnix Bridge and Iron Works	154,100	..
" Phœnix Bridge and Iron Works	164,383	..
" Amalgamated Land and Mortgage Co. of Winnipeg, Limited	102,917	..
" City of Montreal	1,430,600	66
" Columbia Western Lumber Yards	514,403	..
" Canada Car and Foundry Co.	185,185	..
" City of Victoria	482,870	82
Total	£18,694,882	

The large percentage left with the underwriters in many cases, shows the tendency of the investor to new issues at present.

Five Months' Record.

For the first five months of each year since 1905, the Canadian issues overseas have been as follows:—

First 5 months.	First 5 months.	Year.
1905	£9,737,287	£13,530,287
1906	3,645,000	6,427,500
1907	2,936,211	11,203,711
1908	13,589,600	29,354,721
1909	13,696,278	37,411,723
1910	24,289,957	38,453,808
1911	18,723,207	39,855,517
1912	17,651,373	32,956,603
1913	18,694,882	......

During the first five months of the current year, therefore, Canada has obtained in London, through the medium of public issues, £1,043,509 more than in the similar period of 1912 and £2,216,581 more than half of the sum obtained in the twelve months of 1912. In view of the tight money market conditions this year, we should feel gratified at this record. The prospects are for heavy Canadian loans in the London market next fall—if the market opens its heart and purse.

The capital stock of the Milton Pressed Brick and Sewer Pipe Company, Limited, has been increased from $250,000 to $1,000,000, by the issue of 7,500 shares of new stock of $100 each, of which 4,000 are preference shares and 3,500 are common shares.

Regina's tax rate will be cut down by about two mills. The assessment will reach approximately $80,000,000, and the city's expenditure to be made up out of current taxes will not likely exceed $600,000. Last year including school, collegiate and library taxation, the rate was but 15.88 and it is expected to be about 13 mills this year.

THE MARCONI AFFAIR

(Specially contributed to *The Monetary Times.*)

When British cabinet ministers are tempted to speculate again, it will likely be under a nom de plume. The "Marconi affair" caused their honor to be assailed, although the later investigation left spotless characters. But as speculators the ministers appear to have been prime failures. According to The Round Table, which prints an interesting story of the happenings, "the City" thinks, and says so quite plainly, that the ministers have been gambling. "It things also, and does not hesitate to say, that, considering their positions and their salaries, they had no need, and certainly no business, to be gambling, and that the discredit of their particular gamble is enhanced rather than excused by the fact that they were losers. For what two of them did is what every tyro does—what every parson or old lady having a half-guilty 'flutter' in the haunts of Mammon with an aunt's legacy or some other unexpected windfall does. Their method was the same as that habitually pursued by a well-known client of the Stock Exchange called 'Mr. Juggins—he takes a tip. He buys half-way up the 'boom'; sells excitedly at a profit; then, his wholly undeserved good luck for some natural and infallible sagacity, at the first serious drop he buys in again in larger quantities than before. But on this occasion, as he has bought half-way down the 'slump,' he finds himself at settling day, as the saying is, 'left.' "

Sir Rufus Isaacs is in a different category from the other two—Mr. Lloyd George and Lord Murray. He bought intending, whatever rise might take place, to retain at least one-half of his original purchase as an investment, and this he has done. Moreover, he did not enter the market a second time.

Here is a chronicle of the facts which caused all the commotion. On April 9th, 1912, nearly five weeks after the acceptance of the Marconi tender by the British Post Office, Mr. Godfrey Isaacs, the managing director of the English Marconi Company, who had just returned from the United States, invited his two brothers, Sir Rufus and Mr. Harry Isaacs, to lunch with him. He told them that the American Marconi Company had been reconstructed, that it had been successful in litigation of a critical character, that it had bought out certain competing interests, and that it had arrived at an advantageous arrangement with the Cable Companies. He spoke warmly of its prospects, and informed his relatives of the decision to issue £1,400,000 new capital, of which he had undertaken to place £500,000. He offered his brothers a portion of his allotment at par or a little over. He recommended this stock as a good investment, and estimated that the £1 shares would probably soon be worth 25s. to 30s. He further told them that the only connection between the English and the American companies was that the former was a large shareholder in the latter, and that three directors of the American company, out of a total of nine, were also directors of the English company. He himself was one of these three.

Sir Rufus made up his mind not to take any of these shares. He had three reasons for his refusal. He "thought it was a very large issue of capital"; he did not wish to have any dealings with the English Marconi Company, having regard to their recent negotiations with his own Government; nor, on similar grounds, did he wish to have any transactions of this sort with his brother, the managing director.

On April 17th, Sir Rufus met his brother, Mr. Harry Isaacs, who expressed his regret that Sir Rufus had not bought any shares. It was in his opinion an excellent investment, and, although the shares were not yet issued to the public, they were already quoted at £2 1/16. He thought they were going to rise still higher. Sir Rufus thereupon bought from his brother, Mr. Harry Isaacs, 10,000 shares at £2 per share. Seeing that his object was investment, this seems a high price to have paid, because Mr. Godfrey Isaacs (who ought to have known if anyone did) had not, upon the former occasion, put the ultimate value of the shares higher than from 25s. to 30c.

Sir Rufus, however, upon reflection had apparently come to the conclusion that the new issue of capital, although large, was not too large. He also appears to have concluded that as he was buying his shares from Mr. Harry Isaacs (and at a premium of 100 per cent.) he could not in any sense be held to be buying them either from Mr. Godfrey Isaacs or from the English Marconi Company. Nor was it his opinion that he was now incurring any obligation to the English company or to its managing director. He knew, however, that the shares he bought were part of a lot which Mr. Harry had bought from Mr. Godfrey as the result of the former conversation.

On the same day Sir Rufus sold 1,000 of these shares to Mr. Lloyd George, and another 1,000 to the Master of Elibank. The price he charged them was the same as that which he had paid—£2 per share. He told them that they need not bother about payment for the time being, as the shares would not be actually issued for some considerable time. The understanding between the three friends was that, even if the shares rose in price, each would retain at least half of his original purchase as an investment, but that each was free to deal as he chose with the remainder.

Two days later, on April 19th, the American shares were offered to the public at £3¼, and so great was the demand for them on the London Stock Exchange that the price touched almost £4 the same afternoon. Sir Rufus thereupon sold 3,570 shares on behalf of himself and his two friends, at an average price of £3 6s. 9d.

On April 20th Mr. Lloyd George asked Sir Rufus if he and the Master of Elibank might sell the halves (500 each) which they had undertaken to hold. Sir Rufus agreed, and these shares were sold at an average price of £3 7s. Out of this transaction Mr. Lloyd George and the Master of Elibank had done very well. After settling up, each of them had made a profit of £743, and each of them still held 143 shares—even at present prices, worth something over £150—into the bargain. Sir Rufus, however, was less fortunate. If he were compelled to sell to-day at present prices the balance which he originally undertook to keep, and which he still holds, he would make a loss of something like £1,200 on the whole transaction.

But Mr. Lloyd George and the Master of Elibank were unwisely venturesome. On May 22nd, more than a month later—the shares having meanwhile fallen to £2 5/32—they made a second "investment" on their own account, and apparently without consultation with Sir Rufus. They then bought 3,000 shares for their joint account. On these—reckoning at present prices—they have lost heavily. On June 19th, 20th and 21 these shares were "delivered" to them by their stockbroker, and the balance owing to him upon the tw transaction was £3,413.

Several obvious morals are to be drawn from the story. The boy who chalks the prices on the stock exchange blackboard will also have opinions on the matter. Turning from Westminster to Ottawa, it would seem, from this quiet vantage point, that for many decades past, cabinet ministers have gambled not and speculated never. If they have, however, the job was performed with the skill of past masters of the arts.

◆

COBOURG IS SEEKING INDUSTRIES

Mr. T. S. Chatterton, manager of the Metropolitan Bank, Cobourg, has been elected secretary-treasurer of the Cobourg board of trade, to whom all enquiries regarding factory sites should be addressed. This famous summer resort is determined to get more industries and is offering special inducements to obtain them.

ONTARIO MUNICIPAL STATISTICS

In 1886, the population of Ontario municipalities was 1,828,495, which in 1911 had increased to 2,358,719. Other comparisons follow:—

Ontario municipalities.	1886.	1911.
Total assessment	$694,380,659	$1,417,367,117
Taxes	9,009,385	26,363,325
Rate per head	4.93	11.18
Mills on the dollar	12.97	18.60

The statistics of debts for 1911 are not available. Those of 1910 compare as follows:—

Ontario municipalities.	1886.	1910.
Total debenture debt	$29,924,863	$107,470,346
Rate per head	16.37	46.80
Floating debt	4,841,717	15,812,084

The amount accumulated in sinking funds on December 31, 1910, was $17,980,214, so that the net debenture debt was $89,490,132 as compared with $83,242,049 in 1909, an increase of $6,248.083, while the floating liabilities increased $2,555,319.

The following cities of Ontario owned and operated gas or electric light plants in 1910, aggregating in value $3,866,393.

Belleville	$106,505
Chatham	21,500
Fort William	*733,823
Guelph	†534,305
Kingston	341,328
London	182,874
Niagara Falls	131,944
Ottawa	350,000
Port Arthur	‡924,484
St. Thomas	330,853
Stratford	60,000
Toronto	¶33,717
Windsor	30,000
Woodstock	85,000

---

*Including $174,000 for telephone system and $372,500 for street railway.

†Including $123,999 for radial railway.

‡Including $135,500 for telephone system and $373,984 for street railway.

‖Including $75,000 for street railway owned by city but operated on lease by company.

¶Being $15,000 for electric light plant taken over from former city of West Toronto, and $18,717 for electric light plant taken over from former town of East Toronto on their annexation to Toronto City.

The following villages and towns in Ontario owned and operated gas or electric plants in 1910, aggregating in value $3,517,147: Acton, $8,200; Alexandria, $12,350; Almonte, $38,000; Amherstburg, $5,300; Aylmer, $25,000 Barrie, $84,659; Beeton, $6,000; Berlin, *$468,502; Blenheim, $13,750; Bobcaygeon, $25,000; Bothwell, $6,200; Bracebridge, $120,113; Brockville, $164,012; Brussels (telephone), $41,891; Campbellford, $10,000; Cayuga, $300; Chesterville, $130; Chippawa, $1,100; Clifford, (acet. gas), $3,025; Cobalt, (arc lights), $500; Collingwood, $45,274; Deseronto, $19,000; Dresden, $14,500; Dundalk, $5,000; Fenelon Falls (estimate), $20,000; Fort Erie, $3,636; Fort Frances, $10,078; Glencoe, $18,000; Goderich, $42,348; Gore Bay, $250; Gravenhurst, $100,000; Hagersville, $200; Haileybury, $18,679; Hespeler, $13,505; Huntsville, $22,052; Iroquois, $10,000; Jarvis, $300; Kenora, †$443,487; Kincardine, $21,196; Kingsville (nat. gas), $2,500; Leamington, $25,000; Listowel, $20,470; Lucan, $5,000; Madoc, $16,444; Markham, $8,000; Merriton, $11,008; Midland, $48,000; Milton, $14,948; Milverton (acet. gas), $300; Mitchell, $15,000; Morrisburg, $108,100; Mount Forest, $13,000; Napanee, $48,000; New Hamburg, $18,000; Newmarket, $19,000; Niagara, $24,000; North Toronto, $9.000; Oakville, $18,000; Orillia, ‡$300,000; Owen Sound, $328,288; Palmerston, $14,000; Paris, $55,324; Parry Sound, $71,451; Perth, $13,000 Picton, $30,000; Port Colborne, $725; Port Perry, $8,000; Port Rowan, $150; Port Stanley, $300; Prescott, [illegible] Preston, $53,687; Renfrew, $39,745; St. Mary's, [illegible] Stirling, $11,000; Strathroy, $20,000; Streetsville, $27,500; Sturgeon Falls, $44,376; Sudbury, $70,471; Thamesville, $6,250; Thessalon, $12,851; Thorold, $25,000; Tottenham, $6,000; Trenton, $9.000; Uxbridge, $18,000; Waterloo, $55,135; Weston, $9.000; Whitby, $21,861; Wingham, $30,000; Woodville, $400; Wroxeter, $1,900.

---

*Including $127,046 for street railway.

†Including $370,741 for Hydro-Electric Power plant and $17,453 for telephone system.

†Including power transmission plant.

LABOR ORGANIZATION IN CANADA.

The second annual report on labor organization in Canada, covering 1912, has been issued by the Department of Labor. From the introductory pages it is noted that trade union membership, in common with other activities of industrial life in Canada during the past year, increased considerably during the year 1912. At the end of 1911 the membership was reported at 133,132; at the close of 1912 it stood at 160,120.

Much interesting information is given as to the classes of labor chiefly affected or unaffected by organization. The compilers of the report estimate the proportion of organized labor in Canada at about 8 per cent. of the whole number of wage-earners, the total of which is placed at 1,300,000. Not much organization, the report states, is found among women workers.

A chapter of the report is devoted to a discussion of the beneficiary systems of trades unionism. Not all the unions have reported on this subject, but the information collected shows the wide and important influence which organized labor of North America plays in this department of industrial life. The beneficiary expenditures of sixty-eight of the international central trade union organizations operating in the United States and Canada are shown to be of great magnitude. The grand total of the disbursements of these organizations for the last fiscal year reported (usually 1911-12), is placed at $13,799,000, more than half of this amount being on account of death claims. The largest expenditures reported for an individual organization is that recorded for death benefits in the case of the Brotherhood of Locomotive Engineers, where the disbursements reached $1,869,934. While returns were not received from all central organizations operating in the Dominion and the United States, the leading unions reported, and their statements represent the great bulk of expenditure. These disbursements are for Canada and the United States taken together, the returns for Canada alone not being available.

The report gives some attention to new movements in labor organization, known respectively as Industrial Unionism and Syndicalism.

* * *

WOOD-BLOCK PAVING

The paving of city streets with wood is again coming into favor, new methods of laying the pavements making this one of the most satisfactory of pavements. Vancouver's pavements are largely of the same material. Eighty-two per cent. of the new paving in Minneapolis is wood-block, and Saskatoon and other western towns are giving the wood-block paving the preference.

Best results are obtained from rectangular-shaped blocks cut from Southern or Norway pine which are thoroughly seasoned and creosoted. This latter process not only lengthens the life of the wood but reduces its absorptive capacity for water, thus preventing the weakening of the wood-fibres and reducing its tendency to buckle. The most approved method of laying this pavement used in London, New York and other large cities, is to first make a concrete foundation four to six inches thick on which is laid a thin layer of sand, or better still, of moist Portland cement, into which the blocks are closely set.

The blocks are from five to nine inches in depth and must be free from defects. Care must be taken to place them with the grain perpendicular to the road-bed. If laid with the long edges at right angles to the curb the joints are apt to become worn by the calks on the horses' shoes, so to prevent this and to best provide for possible expansion, the paving is laid at an angle of about sixty-seven degrees with the curb. The joints are usually filled with ground cement and the surface of the paving is then covered with a thin dressing of coarse sand, which beds into the pores of the blocks and roughens them.

Such a pavement has the smoothness of asphalt and will last almost without repair for fifteen years under ordinary conditions. It is sanitary, noiseless, easily kept clean and has a certain springiness lacking in asphalt, and so is much easier on horses' feet. Expert labor is not required in its laying, and the cost of maintenance is practically nil, so that from the standpoint of cost as well, it compares favorably with the asphalt, macadam and brick now being used in Canadian towns and cities.

The manufacture of wood-blocks for paving would furnish sawmill owners with a means of utilizing the many defective logs of Norway pine unfit for saw material, and, could a steady market be developed, much of the waste in connection with present lumbering and milling operations could be avoided.

HEAVY FIRE INSURANCE CARRIED

Over Two and Half Billion Dollars Represent Net Amount at Risk in Canada—British Companies Are Doing Large Business

Fire insurance in Canada has assumed large proportions. The net amount at risk at the end of 1912 was $2,680,154,028 as compared with $2,279,868,340 in 1911. The British companies have more than half of that total, viz., $1,430,072,127. The Canadian companies have $640,808,340 and United States and foreign companies, $609,273,561. Last year $30,277,245 represented the gross cash received for premiums. Of that sum, British companies claim $14,292,521; Canadian companies, $8,770,837, the remainder going to United States companies and to the Union Assurance of Paris, France, one of the recent additions to Canadian underwriters.

Reinsurance and return premiums last year totalled $7,082,727, as compared with $6,566,561 in 1911. These amounts were divided as follows:—

Companies.	1911.	1912.
Canadian	$3,661,466	$3,707,428
British	2,156,920	2,200,396
United States and foreign	836,865	1,174,903

It will be seen from figures printed on this page that the net amount of losses incurred during 1912 by the 28 Canadian, 23 British, 29 United States and foreign companies totalled $11,771,436, as compared with $10,816,929 in 1911. The net amount paid for losses in 1912 was $12,072,797, against $10,936,948. The losses in Canada continue at an alarming rate. The fire waste

[1] Including the business of The Manitoba Assurance Company

1869 amounting to $213,000,000.

The gross amount of policies, new and renewed, last year was $2,374,261,732, compared with $1,987,640,591 in 1911. British companies obtained of that sum $1,148,396,318; Canadian companies, $653,582,426, and United States companies, $572,282,988. This makes interesting the following table referring to other phases of fire underwriting in Canada since 1869:—

1869 to 1912		Canadian Co.'s.	British Co.'s.	U. S. Co.'s.	Total
Premiums received -	$	76,555,581	212,560,434	54,125,749	343,241,764
Losses paid - -		48,534,648	133,819,249	31,214,209	213,568,106
Net Cash Premiums Received -		76,555,581	212,554,440	54,125,749	343,235,770
Policies taken During Year - - -		$8,296,636,292	19,451,177,061	4,689,215,669	32,437,029,022

The assets of the Canadian companies total nearly $17,000,000. The largest item in their assets is bonds and debentures of $7,319,752. Agents' balances and premiums outstanding amount to $1,670,990; cash on hand and in banks, $1,735,519, and loans on real estate, $2,159,310. The total liabilities, not including capital stock, amount to $7,576,646.

The bonds and debentures of British companies amount to $13,716,715 of total assets of $37,522,408 in Canada. Their loans on real estate approximate $17,400,247. They hold real estate in Canada valued at $2,420,000. The United States companies have no real estate in this country. Of their total assets, amounting to $6,742,501, $5,149,287 is represented by bonds and debentures.

The liabilities of Canadian fire insurance companies at the end of 1912 were divided as follows:—

Unsettled losses	$ 837,572
Reserve of unearned premiums	5,757,002
Sundry	982,072
Total liabilities, not including capital stock	7,576,646
Excess of assets over liabilities, excluding capital stock	9,394,178
Capital stock paid up in cash	9,145,607

T. C. BOVILLE,

Deputy Minister of Finance

MAY BANK STATEMENT MAINTAINS GOOD POSITION

Only Slight Decreases Were Made in Important Accounts—Effects of Tight Money

	May, 1912.	April, 1913.	May, 1913.	Year's inc. or dec.	Month's inc. or dec.
Deposits on demand	$376,953,217	$365,340,002	$364,159,642	— 3.3	—0.3
Deposits after notice	625,294,344	631,160,280	630,755,603	+ 0.8	—0.06
Current loans in Canada	837,282,550	898,964,181	898,959,650	+ 7.3	—0.00
Current loans elsewhere	33,478,564	36,310,033	37,691,786	+12.5	+3.8
Call loans in Canada	68,305,157	69,757,912	69,982,540	+ 2.4	+0.3
Call loans elsewhere	115,832,736	103,212,185	96,151,209	—14.4	—6.8
Circulation	93,819,333	98,100,111	102,997,936	+ 9.7	+4.9

The above are the principal changes in the position of the chartered banks during May. Deposits slightly decreased during the month, those on demand having declined 0.3 per cent. and those after notice having dropped 0.06 per cent. Compared with a year ago the demand deposits are $13,000,000, or 3.3 per cent. less, while the savings deposits have appreciated by $5,000,000 or 0.8 per cent. during the year. Current loans in the Dominion are practically the same as in April although, if predictions come true, they are likely to show a decrease during June. This account last month was 7.3 per cent. greater than a year ago. Current loans abroad were a little heavier in May than in April. Call loans last month decreased about $7,000,000 or 6.8 per cent. More than half of these are carried by one chartered bank. This account has decreased 14.4 per cent. in the past twelve months. Circulation made a gain of 4.9 per cent. last month. The following table shows the course of the deposits accounts for the past thirteen months:—

	On demand.	After notice
1912—May	$376,953,217	$625,294,344
June	373,500,189	631,317,687
July	372,012,494	640,592,345
August	360,575,425	643,663,590
September	374,368,917	640,536,65[illegible]
October	383,814,572	040,097,926
November	376,829,372	635,810,703
December	379,777,219	632,641,340
1913—January	354,518,964	635,000,056
February	349,661,830	630,467,518
March	357,756,659	630,434,708
April	365,340,002	631,160,280
May	364,159,642	630,755,608

Demand deposits were at their highest point in October when they stood at $383,000,000. Since then they have shown a tendency to decline, the lowest point being in February. Last month, however, they were $15,000,000 greater than in February. After notice deposits are greater than a year ago and have never dropped below $625,000,000 in the past thirteen months. The trend of the deposits accounts during the past five years is indicated in the following table:—

May	On demand.	After notice.	Total.
1909	$216,016,294	$453,599,117	$670,515,411
1910	256,651,635	524,680,979	781,332,614
1911	298,784,206	562,209,148	860,993,354
1912	376,953,217	625,294,344	1,002,247,561
1913	364,159,642	630,755,603	994,915,245

Last year the total deposits for the first time exceeded a billion dollars. Last month this account was about five million dollars short of that amount. Since 1909, total deposits have increased $324,000,000 or 48.3 per cent. Deposits after notice in the same period have increased $177,000,000 or 39 per cent. Demand deposits have gained $147,000,000 or 67.8 per cent. Here is a table showing the fluctuations of loans in Canada during the past thirteen months:—

Loans.	Current in Canada.	Call in Canada.
1912—May	$837,282,550	$68,305,157
June	848,940,088	68,701,855
July	852,256,651	70,407,734
August	852,045,624	75,194,735
September	859,341,193	72,205,261
October	879,676,055	73,959,866
November	874,721,593	70,668,521
December	881,331,981	70,655,661
1913—January	874,705,616	71,376,510
February	882,112,726	71,286,799
March	890,513,446	70,731,030
April	898,964,181	69,757,912
May	898,959,650	69,982,540

Despite tight money, current loans in Canada are considerably greater than a year ago and have been maintained at about the same mark for the past thirteen months. The same remark applies to call loans. The following table shows how these accounts, as well as loans abroad, have changed during the past five years:—

May.	Current loans in Canada.	Current loans elsewhere.	Call loans in Canada.	Call loans elsewhere.
1909	$528,313,141	$34,487,649	$49,771,929	$124,877,955
1910	643,246,518	38,014,462	58,159,050	125,480,266
1911	708,093,677	33,918,314	57,709,853	88,745,080
1912	837,282,550	33,478,564	68,305,157	115,832,736
1913	898,959,650	37,691,786	69,982,540	96,151,209

That continually expanding credit has been granted by the banks to legitimate business is clearly reflected in the above figures. Current loans in Canada have been extended during the past five years by $370,000,000 or 70 per cent. Call loans in Canada have grown by $20,000,000 or 40 per cent. Current loans out of the country have increased only 9 per cent. and call loans elsewhere than in the Dominion—an account which is often the subject of unfair criticism—have decreased $28,000,000 or 29.8 per cent.

The May bank statement is an unusually satisfactory document, in view of the world-wide financial stringency. If the June statement is equally good, there should be little cause for complaint.

SOME CROP STATISTICS

A cablegram received this week from the International Agricultural Institute, Rome, gives the following official preliminary estimates of the 1913 production of cereal crops in several countries, compared with the final estimates for 1912:—

	1913, bushels.	1912, bushels.
Wheat—		
Bulgaria	67,977,000	63,750,000
Italy	[illegible]	165,721,000
United States	744,000,000	730,267,000
India	358,316,000	366,930,000
Japan	27,029,000	25,692,000
Barley—		
United States	177,000,000	223,824,000
[illegible]	[illegible]	[illegible]
Oats—		
United States	1,104,000,000	1,418,337,000
Flax Seed—		
India	21,428,000	25,648,000

ENGLISH ENGINEERS FOR UNDERWRITERS' LABORATORIES

Messrs. Heap and Digby, engineers, of London, England, have been appointed agents and engineers for the Underwriters' Laboratories in Great Britain and Ireland. The establishment of a Laboratories' office in England is made in response to recommendations of Mr. C. H. Wickes, the British Trade Commissioner in Canada; and in accordance with desires expressed by a number of manufacturers in England who are exporting goods which properly come within the scope of the examination and test work carried on by the Laboratories. Messrs. Heap and Digby are well and favorably known both in England and America as active in all branches of engineering work. Mr. Arthur C. Heap, the senior member of the firm, has made two visits to the United States and Canada recently, inspecting electrical apparatus being built for power transmission plants in England. He spent some time at the Chicago Laboratories the other week and has now returned to England.

Rounding Out of Big Steamship Consolidation

New Company to be known as Canada Transportation Lines, Limited. Consolidation will bring large amount of British Capital into Canada. Many Benefits will Accrue to Canadian Shipper.

The special meeting of the shareholders of the Richelieu & Ontario Navigation Company, Limited, marked one of the most important steps to be made in the rounding out of one of the large consolidations of Canadian steamship companies. The shareholders at the meeting unanimously ratified the proposal submitted by the directors to sell out the entire undertakings of the Richelieu & Ontario Navigation Company, Limited, to the proposed new Canada Transportation Lines, Limited. With a view of affording the fullest information regarding the proposed deal Mr. James Carruthers, the president, has submitted a memorandum dealing with the important parts of the proposed offer to the shareholders of Richelieu & Ontario. Reviewing same Mr. Carruthers said:—

Montreal, 18th June, 1913.

To the Shareholders of the Richelieu & Ontario
Navigation Company, Limited.

Gentlemen,—Referring to the notice of shareholders meeting, which has just been read by the secretary, whereby you have been called together for the purpose of considering, and if found advisable, ratifying, confirming and sanctioning an agreement of sale of the assets and undertaking of this company as a going concern, I may say to you that this matter has received the most earnest and careful consideration by your board of directors and before sending out this notice, they were unanimously of the opinion that it was in the interests of this company that a sale of the character set forth in the agreement should be made.

A new company has been formed called the "Canada Transportation Lines Limited," the authorized capital of which is $25,000,000, divided into 125,000 7 per cent. cumulative preference shares of $100 each and 125,000 ordinary shares of $100 each, and with authority to issue thirty-year first mortgage debenture stock of $8,000,000 bearing interest at 5 per cent. with power to increase the amount of such mortgage debenture stock from time to time, providing the proceeds thereof are used for the purchase of new boats or other property necessary for the company to acquire, and on the terms more fully set forth in the mortgage trust deed. The trustees for such debenture stock will be the Law Debenture Corporation, London, England, and the Prudential Trust Company, Limited, Montreal. The registrars for such debenture stock will be the Royal Trust Company, Montreal, and Brown-Shipley & Company, London, England; the registrars for shares will be the Royal Trust Company, Montreal and London; transfer agents, Prudential Trust Company, Montreal and London; bankers, the Bank of Montreal; brokers, Messrs. J. & A. Scrimgeour and Messrs. Linton, Clarke & Company; Auditors, Messrs. Marwick, Mitchell, Peat & Company.

COMPANIES TO BE INCLUDED.

Further particulars of the new company and other matters connected therewith will in due course be given to shareholders. It is expected the new company will eventually acquire as going concerns, including all their assets, goodwill and profits for the current year, the following companies:—

Richelieu & Ontario Navigation Company.
Inland Lines, Limited.
Northern Navigation Company, Limited.
Niagara Navigation Company, Limited.
St. Lawrence River Steamboat Company, Limited.
Richelieu & Ontario Navigation Company of U.S.A.
Quebec Steamship Company, Limited.
Canada Interlake Line, Limited.
Ontario & Quebec Navigation Company, Limited.
Merchants Montreal Line.
S.S. Haddington.
Thousand Island Steamboat Company, Limited.

ASSETS OF COMPANY.

The assets of the above companies have all been appraised by the Canadian Appraisal Company and the accounts have been audited by Marwick, Mitchell, Peat & Company. The Appraisal Company's reports and the auditors' statements are open to the inspection of the shareholders and have been carefully examined by your board. Assuming the purchase to be carried out on the lines proposed, the new company will have assets, as shown by the statement of the Appraisal Company, of $33,055,538, in which vessels have been valued at $16,866,834; real estate, buildings and dock properties at $5,450,267.99, and $661,531.04 would be cash on hand, and the sum of $8,694,969.89 would represent the value of leases, contracts and goodwill acquired by the company and covered by ordinary shares. The new company would be free from debt over and above the debenture stock issued and current accounts. The net earnings of the consolidated companies for the year ending December 31st, 1912, was $1,494,554.48, which shows an ample amount for the payment of interest on debenture stock and interest on the preference stock with a fair amount applicable to reserve and ordinary stock.

Allowing for the new tonnage not in operation in 1912, on the same basis as earnings on similar tonnage in 1912, the increase in net earnings from this source alone over last year would amount to $263,000. In the item of insurance premiums I am advised by competent authority that a reduction of a considerable amount per annum can be effected.

I may say that the impression that prevails in some quarters that it will be necessary for the new company to advance rates in order to improve its financial position is entirely unfounded. After giving the matter careful consideration I am of the opinion that the saving that can be effected by the new company, over the individual companies, in handling their boats, in preventing overlapping, and by giving a prompter and more efficient service, would be very great.

TERMS OF EXCHANGE.

The important points that the directors had to consider was whether, in their opinion, it was in the interests of the Richelieu shareholders to sell out the assets and undertakings of that company, and, if so, whether the Richelieu shareholders were, in their opinion, obtaining a fair share of the stock of the new company for the stock which they now hold. It is proposed, as you will see by the agreement, that the shareholders of this company receive $12,000,000 7 per cent. cumulative preference shares and $4,000,000 ordinary shares of the new company for the $10,000,000 of Richelieu stock. For example, each holder of ten shares of Richelieu will receive twelve fully paid 7 per cent. cumulative preference shares of the new company, and, in addition, four fully paid ordinary shares which, I think, you will agree with your directors is an excellent arrangement.

The most important reason for your board being willing to advise the sale of the Richelieu assets and undertaking at the present time, is the fact that in their opinion it is essential to put the affairs of the company on the soundest possible financial basis both for present and future requirements.

GROWTH OF WATER TRANSPORTATION.

The growth of the water transportation on the Great Lakes is assuming enormous proportions and if Canada in the future is to continue to go ahead as she has in the past, the growth of this trade from year to year is going to be very great. This means that if we are to give satisfactory service to the farmers and shippers of this country we must be in a position to provide new boats from time to time and see that the grain grown in the country gets out of it in the promptest, cheapest and most efficient manner. In view of the world-wide financial stringency and the fact that requirements for money would be practically a matter from year to year it commended itself to the judgment of your directors to become part of a larger organization, which in our opinion will be able to finance the new company on a much better and more satisfactory basis than any smaller individual company can possibly do.

Furthermore, we believe it to be in the interests of the water transportation companies of Canada that they should get English capital on a large scale interested in this business just as it is to-day interested in the great railroads of the country. The only way this could be accomplished successfully in the opinion of your board was to be connected with a new company large enough to command the interest of some of the most important financial houses in London. The names which are connected with the proposed financing of the new company are in my opinion the best available and the result will be in my judgment the placing of the new company, which means your company, on a permanently sound financial basis where it can from time to time reach the money markets of the world on the most favorable terms.

Moreover, the fact that the $25,000,000 authorized capital of the new company will be listed on the London Stock Exchange and a substantial portion of the preference stock will be taken at par by strong financial interests in London, is, in my opinion, a strong factor in advising the shareholders of this company to confirm the sale which your directors advise.

Yours truly,

JAMES CARRUTHERS.

The Monetary Times learns that it is intended that the names of all the various companies included in the proposed consolidation shall be maintained and that the name Canada Transportation Lines, Limited, shall be inserted under the names of the different companies.—28-6-13.

HOME BANK OF CANADA

ANNUAL REPORT

Great Gains in Deposits—Assets Advance $2,349,545—Two New Members on Board—Eugene O'Keefe Misses First Annual Meeting in 40 Years

The annual meeting of the Home Bank of Canada was held at the head office, 8 King street west, Tuesday afternoon at 12 o'clock. Among those present were:—

The Hon. J. J. Foy, K.C., F. E. Luke, C. Pendrith, John Batho, Edward Galley, E. B. Thompson, C. B. McNaught, C. E. P. McWilliams, W. Crocker, Dr. J. A. Todd, James Matthews, Thomas Flynn, H. S. Harwood, M. J. Haney, C.E., J. B. O'Higgins, Col. the Hon. James Mason, Jesse Ashbridge, John White, the Hon. A. McCall, W. T. Kernahan, G. H. Muntz, J. Cooper Mason, L. J. Cosgrave, L. J. Applegath, John Kennedy, E. Flanagan, T. J. Medland, J. O. Paterson, E. G. Gooderham, W. G. Mitchell, R. L. McIntyre.

The Vice-President, Mr. Thomas Flynn, was elected to the chair, and Mr. O. G. Smith was appointed secretary of the meeting. The following report of the Directors was then submitted:—

The Directors have much pleasure in submitting to the shareholders the Eighth Annual Report, giving the result of the bank's business for the year ended 31st of May, 1913, together with the Balance Sheet at that date.

Four quarterly dividends at the rate of seven per cent. (7%) per annum have been paid and provided for; $200,000 added to the Rest, making that account $650,000, and $40,000 set aside to be written off Bank Premises, which will leave a net balance of $100,470.31 for Profit and Loss Account.

Towards the close of the year an agreement was entered into with the directors of La Banque Internationale du Canada for the purchase of the assets of that institution, to be paid for by shares of the Home Bank at the price of $128 per share. These assets were carefully and thoroughly inspected by experienced officers of the Home Bank, whose valuation was accepted by La Banque Internationale. The agreement was submitted to the shareholders of that bank at a general meeting and approved, and then, having received the approval of the Governor-in-Council, was formally carried into effect on the 15th day of April last. The result of this purchase is that the balance of our unsubscribed capital has been taken up, a substantial sum received for the Rest, and a connection established in Montreal and in the province of Quebec which should prove valuable, and ten branches taken over and continued.

Authority was given under by-law No. 8 to establish a pension fund, and you will be asked to vote a sum for that purpose. Some necessary changes in the by-laws will be submitted for your approval, and also a by-law to authorize the increase of the capital stock to $5,000,000.

During the year Mr. W. Parkyn Murray resigned from his position on the board, and Mr. C. B. McNaught was elected a director in his stead.

No new branches of the Home Bank were opened, but arrangements are being made to open two more offices in the city of Toronto.

One hundred and sixty-five (165) shareholders have been added during the year, and the total number now is 1,836.

The usual examination by the directors of the treasury and securities was made, and the branches inspected.

Senator James Mason, the General Manager, then read the following report:—

The net profits for the year are nearly 12 per cent. on the average Paid-up Capital—deposits show an increase of nearly $1,000,000. The whole of the authorized capital, $2,000,000, is now taken, and almost entirely paid up—the Reserve Fund or Rest has been increased by $200,000, and amounts to $650,000, being slightly more than one-third of the Paid-up Capital. The total assets amount to $14,735,100.29, an increase of considerably more than $2,000,000 over last year.

The purchase of the assets and the taking over of La Banque Internationale—referred to in the Directors' Report—increases the scope of the bank's operations in various ways—one important feature being the increased circulation following on the increased Paid-up Capital. The Montreal branch should also grow in time to be of considerable usefulness, inasmuch as that city is becoming a very large grain export point, and in other respects the opening thus made in the province of Quebec should in due course materially add to the volume of the bank's business and profits.

Your approval will be asked for a by-law to increase the capital stock to $5,000,000—this will only be taken advantage of from time to time as the growing business of the bank may make it necessary to obtain increased Paid-up Capital and the correspondingly increased circulation.

The Bank Act, after long and careful consideration, both in and out of Parliament, has been extended for a further period of ten (10) years—the changes made being considered beneficial both to the public and the banks. Some slight alterations in the by-laws will require to be made by reason of this new Act.

Much regret must be felt at the severance of an active connection, extending over a great many years with the bank and its preceding institutions, of the retiring President, Mr. Eugene O'Keefe, that gentleman having intimated that, owing to continued ill-health and constant inability to attend the meetings of the board, he is compelled to decline re-election. It should be added that the interest always taken by Mr. O'Keefe in the affairs of the bank contributed largely to its success.

Mention should also be made of the death of Mr. R. B. Street, late inspector of the bank. Mr. Street's connection with the Home Savings & Loan Company, the predecessor of the bank, dated back to the year 1879, and he was ever a faithful and efficient officer.

The financial stringency which prevails throughout the business world, chiefly caused by the Balkan War, not yet completely settled, is felt in Canada, and aggravated by the unwise and unwarranted speculation in real estate until recently so widespread, and also by the great expansion of the business of the country, this stringency is likely to continue throughout the year, and more especially during the season when the crops require to be moved, but should prove more or less beneficial by checking overborrowing on the part of our municipalities, and putting an end to speculative trading of all sorts. The large and steadily increasing immigration into Canada, the extensive railway construction, and the sound condition generally of business and of the manufacturing and other industries can be taken as a reassuring factor.

Crop conditions in the Northwest may be considered fairly satisfactory, the acreage being somewhat increased, and, from the most recent reports, an average crop may be looked for.

The advisability of establishing a pension fund has been for some time under consideration, and it is felt that it should be no longer deferred.

That pension funds are considered useful and necessary is evidenced by the fact that they have been in existence for years in almost every bank in the country. Where this fund is established bank officers feel that long and faithful service will be rewarded, and a competency more or less adequate secured for themselves or their families, and this necessarily creates a feeling of loyalty that must prove beneficial to the institution.

In the discussion which followed the submission of the General Manager's Report, Mr. John Kennedy, Vice-President of the Grain Growers' Grain Company, addressed the meeting, and referred to the three-weeks' trip he had taken through the Northwest provinces before he arrived to attend the meeting of the Home Bank.

Mr. John Kennedy, one of the Western directors of the Home Bank, and Second Vice-President of the Grain Growers' Grain Company, addressed the meeting, and stated as follows:—I am pleased once more, at this very important meeting, to report good progress from the West, and to say that the Grain Growers' Grain Company, the Home Bank's biggest customer in the West, and one of the largest shareholders, is having another successful year, and will handle more grain than the previous year, which was 28,000,000 bushels.

The leasing of the Manitoba Government system of line elevators, comprising 176 in number, was a very wise move, and gives every indication of being beneficial to producers at all points where they are located.

The action of the company in also leasing from the C.P.R. one of their terminal elevators at Fort William, with a capacity of 2,500,000 bushels, is proving quite successful, and is giving us a wider knowledge of the grain trade. It is gratifying for me, as a director of the Home Bank, to say that the Home Bank is looked upon by many Western producers and others as being an important factor in helping to bring about conditions which are much desired by the farmers of the West.

I am also pleased to say, and in no uncertain way, that the connection formed through the opening of a number of branches of the bank in Manitoba and Saskatchewan is being looked upon as mutually valuable, and requests for opening new branches are very frequently presented.

Our shareholders and customers generally are well pleased with the accommodation received at the hands of the Home Bank throughout our Western provinces.

I wish to point out as clearly as possible that by this connection the Home Bank depositors in the East are helping to a great extent at all points where our branches have opened in relieving the financial situation which is felt very keenly in the West. I can see a great future for the Home Bank in the West, and I would like to assure you that it is the desire of very many of our leading farmers that the Home Bank keep pace with the ever-increasing development and rapid growth of the present time by becoming still more identified with the West.

At the last annual meeting our General Manager referred to the land speculation in the West, and it is to be noted that this still continues, but in a modified way, and I hope that in the future our Canadian banks will be enabled to more largely assist the farmers of the West, who are the real wealth producers of the country.

In conclusion, I would like to refer to the crop conditions in the West this year. I believe that 85 per cent. of the three provinces has had sufficient moisture to assure an average crop, some points not having sufficient moisture.

In a motion from Senator Alexander McCall, seconded by Mr. Edward Galley, the thanks of the shareholders were extended to the officers and directors for their attention to the affairs of the institution.

In moving a vote of thanks to the General Manager and the officers of the bank, the Honorable Attorney-General referred to the attention that he had always observed was extended to customers of the Home Bank. The Honorable Mr. Foy's motion was seconded by Mr. William Crocker.

The by-law to increase the capital of the Home Bank from two to five million dollars, according to the by-law No. 10, was moved by Mr. M. J. Haney, C.E., and seconded by Mr. H. S. Harwood.

The by-law to establish a pension fund for the employees of the Home Bank was moved by Mr. F. E. Luke, and seconded by Mr. J. A. Todd.

The scrutineers reported the election of the following directors for the ensuing year:—

Messrs. Thomas A. Crerar, Thomas Flynn, E. G. Gooderham, John Kennedy, A. Claude Macdonell, M.P., the Hon. James Mason, C. B. McNaught, John Persse.

At a subsequent meeting of the Board of Directors, held immediately after the general meeting, the following officers were reported as elected to office for the ensuing year:—Colonel the Honorable James Mason, President, and Thomas Flynn, Vice-President.

ANNUAL STATEMENT.

Statement of the result of the business of the bank for the year ending 31st of May, 1913:—

Profit and Loss Account.

Cr.

Balance of Profit and Loss Account, 31st May, 1912	$ 86,001.68
Net profits for the year, after deducting charges of management, accrued interest, making full provision for bad and doubtful debts, and rebate of interest on unmatured bills	167,125.58
	$253,127.26

Capital Profit Account.

Premium on Capital Stock received during the year	$183,768.82
	$436,896.08

Which has been appropriated as follows:—

Dr.

Dividend No. 23, quarterly, at the rate of 7 per cent. per annum	$22,548.33	
Dividend No. 24, quarterly, at the rate of 7 per cent. per annum	22,595.04	
Dividend No. 25, quarterly, at the rate of 7 per cent. per annum	22,637.46	
Dividend No. 26, quarterly, at the rate of 7 per cent. per annum	28,644.94	
		$ 96,425.77
Transferred to Rest Account		200,000.00
Balance (Of this balance $40,000 will be written off Bank Premises and Office Furniture)		140,470.31
		$436,896.08

Liabilities.

To the Public—		
Notes of the Bank in Circulation		$ 1,752,220.00

Bank Premises, Safes and Office Furniture	665,557.18	
Other Assets	18,931.58	
		$ 9,520,686.92
		$14,735,100.29

JAMES MASON,
General Manager.

Toronto, 31st May, 1913.

Gresham Life Assurance Society

LIMITED

The Sixty-Fourth Annual Meeting

was held on May 8th at the Chief Office,
St. Mildred's House, LONDON, ENGLAND

PROGRESS OF BUSINESS

THE POLICIES issued during the year 1912 amounted to 6,825 for **$12,290,800**—an increase over the previous year.

THE INCOME amounted to **$7,407,600** and the Funds to **$52,946,275.**

A gratifying saving in mortality was experienced. The Funds available for investment are being placed at very remunerative rates of interest.

CANADIAN BRANCH

The Chairman referred to the complete and satisfactory basis upon which this Branch has been established. A very considerable sum is invested in Canadian Bonds and Mortgages.

AGENCY OPPORTUNITIES

The Society has excellent openings for Agents. Assistance and instruction is given to Agents.

For particulars, address

ARCH. R. HOWELL, Manager for Canada

Gresham Life Assurance Society Limited

GRESHAM BLDG., 302 ST. JAMES STREET

MONTREAL, P.Q.

MONEY MARKETS

Messrs. Glazebrook and Cronyn, exchange and bond brokers, Toronto, report exchange rates as follows:—

IMPORTANT NICKEL COMPANY FORMED.

The Canadian Nickel Corporation, Limited, represents the first venture of Canadian prominent financial men into the nickel-producing field. The International Nickel Company, which has Mr. Ambrose Monell for president, has been making an overwhelming percentage of the world's nickel at Sudbury for some time. The list of sponsors of the Canadian Nickel Corporation includes:—Dr. F. S. Pearson, M.I.C.E., president of the Brazilian Traction, Light and Power Company, and of many other South American corporations; Mr. J. Frater Taylor, vice-president and managing director of the Lake Superior Corporation; Mr. J. E. McAlister; Mr. Benjamin B. Lawrence, Consulting Engineer, New York; Mr. E. R. Wood; Mr. Walter Gow, director Brazilian Traction, Light and Power Company; and Mr. Miller Lash, director Mexican Light and Power Company.

The capitalization consists of $10,000,000 6 per cent. debenture stock and $20,000,000 of common stock, all issued. The debenture stock is to be redeemed at or under 100 by means of annual sinking fund payable out of earnings, which will enable the entire issue to be redeemed in twelve years. The interest and sinking fund payments must be made before any dividends are declared on the common stock. The properties cover approximately 17,500 acres in the Sudbury region—the most important source of the world's nickel supply—and include the following:—Murray, Elsie and Lady Violet group, Gertrude group, Whistle and Wild Cat group, Victor and Blue Lake group, Falconbridge group, and Nickel Lake group. From developing and prospecting work to May 1, 1913, 6,850,000 tons of ore are said to have been blocked out, or sufficient to operate on the basis of 1,500 tons of ore daily for almost thirteen years, while the engineers estimate that the properties contain at least a further equal amount.

DIVIDEND NOTICE

THE A. MACDONALD COMPANY, LIMITED

DIVIDEND NOTICE

Notice is hereby given that the quarterly dividends at the rate of 7 per cent. per annum on the Preferred Stock, and at the rate of 5 per cent. per annum on the Common Stock of this Company have been declared for the quarter ending 30th June, payable on the 15th July, to shareholders of record on 5th July. The Transfer Books of the Company will be closed from 5th to 14th July, both days inclusive.

By order of the Board,

A. A. MACDONALD,
Assistant Secretary-Treasurer.

TENDERS FOR PULPWOOD LIMIT

Tenders will be received by the undersigned up to and including Friday, the 15th day of August next, for the right to cut pulpwood on a certain area tributary to the Lake of the Woods, in the District of Kenora.

Tenderers shall state the amount they are prepared to pay as bonus in addition to dues of 40c. per cord for spruce, and 20c. per cord for other pulpwoods, or such other rates as may from time to time be fixed by the Lieutenant-Governor-in-Council, for the right to operate a pulp mill on or near the area referred to.

Such tenderer shall be required to erect a mill or mills on or near the territory, or in such place as shall be approved by the Lieutenant-Governor-in-Council, and to manufacture the wood into paper in the Dominion of Canada.

Parties making tender will be required to deposit with their tender a marked cheque payable to the Honorable the Treasurer of the Province of Ontario for ten per cent. of the amount of their tender; to be forfeited in the event of their not entering into an agreement to carry out conditions, etc.

The highest or any tender not necessarily accepted.

For particulars as to description of territory, capital to be invested, etc., apply to the undersigned.

W. H. HEARST,
Minister of Lands, Forests and Mines.

Toronto, Ontario, May 20th, 1913.

The British Trade Commissioner in Canada, Mr. C. H. Wickes, has been informed by a collector of customs in Canada that Canadian importers are deterred from ordering goods directly from the United Kingdom (instead of through firms in Montreal and Quebec) by the lengthy, complicated and confused invoices which often accompany the goods and involve a great deal of work in order to make the proper Customs entries. Many continental and United States firms, it is stated, in cases where the invoices are very complicated, make the entries for the importer in such a manner that he has only to take it to the customs' officer and sign it.

A Manager for our Sales Department wanted—An experienced and capable man who can systematically direct Salesmen so that they will get profitable results—Initial Salary $4,000 per annum or better. Telephone for appointment.

H. H. WILLIAMS
38 King Street East
TORONTO

LEGAL NOTICES

THE HERBERT MORRIS CRANE & HOIST COMPANY, LIMITED.

PUBLIC Notice is hereby given that under the First Part of chapter 79 of the Revised Statutes of Canada, 1906, known as "The Companies Act," letters patent have been issued under the Seal of the Secretary of State of Canada, bearing date the 27th day of May, 1913, incorporating James Steller Lovell, accountant; William Bain, bookkeeper; Robert Gowans, Joseph Ellis and John Joseph Dashwood, solicitors' clerks, all of the city of Toronto, in the Province of Ontario, for the following purposes, viz.:—(a) To carry on business as iron founders, mechanical engineers, makers of and dealers in lifting machinery, agricultural implements and other machinery and motors and motor cars, tool makers, brass founders, metal workers, boilermakers, millwrights, machinists, iron and steel converters, smiths, wood workers, gun makers, builders, painters, plumbers, metallurgists, electrical, sanitary and water supply engineers, gas fitters, farmers, printers, carriers and merchants, and to buy, sell, manufacture, repair, convert, alter, let on hire and deal in machinery, implements, rolling stock and hardware of all kinds; (b) To carry on any other business, whether manufacturing or otherwise, which may seem to the company capable of being conveniently carried on in connection with the above or calculated directly or indirectly to enhance the value of or render profitable any of the company's property or rights; (c) To carry on any business relating to the winning and working of minerals, the production and working of metals, and the production, manufacture and preparation of any other materials which may be usefully or conveniently combined with the engineering or manufacturing business of the company, or any contracts undertaken by the company, and either for the purpose only of such contracts or as an independent business; (d) To undertake and execute any contracts for works involving the supply or use of any articles manufactured or sold by the company and to carry out any ancillary or other work comprised in such contracts; (e) To apply for, purchase or otherwise acquire any patents, brevets d'invention, licenses, concessions and the like, conferring an exclusive or non-exclusive or limited right to use or any secret or other information as to any invention which may seem to the company capable of being used for any purposes of the company, or the acquisition of which may seem calculated directly or indirectly to benefit the company, and to use, exercise, develop, grant licenses in respect of, or otherwise turn to account the property, rights and information so acquired; (f) To purchase or otherwise acquire and undertake all or any part of the business, property and liabilities of any person or company carrying on any business which this company is authorized to carry on, or possessed of property suitable for the purposes of the company; (g) To construct, carry out, maintain, improve, manage, work, control and superintend any buildings, foundries, factories, workshops, wharves, warehouses, shops, electric works, and other works and conveniences which may seem directly or indirectly conducive to any of the company's objects; (h) To enter into partnership or into any arrangement for sharing profits, union of interests, joint adventure, reciprocal concession or co-operation with any person or company carrying on or engaged in, or about to carry on or engage in, any business or transaction which this company is authorized to carry on or engage in, or any business or transaction capable of being conducted so as to directly or indirectly benefit this company, and to take or otherwise acquire and hold shares or stock in or securities of any such company, and to lend money to, guarantee the contracts of, or otherwise assist any such company, and to sell, hold, re-issue, with or without guarantee, or otherwise deal with the same; (i) Generally to apply for, purchase, take on lease, or in exchange, hire, or otherwise acquire any real or personal property and any rights or privileges which the company may think necessary or convenient for the purposes of its business, or with reference to any of these objects, or capable of being profitably dealt with in connection with any of the company's property or rights for the time being, and in particular any land, buildings, easements, licenses, designs, patents, machinery, plant and stock-in-trade; (j) To distribute any of the property of the company in specie among the members; (k) To aid in the establishment and support of associations or institutions calculated to benefit persons employed by the company, or having dealings with the company, and to subscribe money for philanthropic, charitable or benevolent purposes; (l) To sell the undertaking of the company or any part thereof or the property and assets of the company as a going concern, for such consideration as the company may think fit, and in particular for shares, debentures or securities of any other company, having objects altogether or in part similar to those of this company; (m) To promote any company or companies for the purpose of acquiring all or any of the property, rights and liabilities of the company, or for any other purpose which may seem directly or indirectly calculated to benefit this company, and to amalgamate with any other company having objects altogether or in part similar to those of this company; (n) To raise and assist in raising money for, to lend money to and to aid by way of bonus, endorsement, guarantee or otherwise any customer or other person having dealings with the company, any corporation in the capital stock of which the company holds shares or with which it may have business relations, and to act as employee, agent or manager of any such corporation and to guarantee the performance of contracts by any such corporation or by any person or persons with whom the company may have business relations; and to guarantee payment of the principal of or dividends and interest on shares, bonds, debentures or other securities of any company or corporation having objects altogether or in part similar to those of the company; (o) To obtain any provisional order or Act of Parliament, for enabling the company to carry any of its objects into effect, or for effecting any modification of the company's constitution, and to oppose and resist any measures, proceedings, or applications which may seem calculated directly or indirectly to prejudice the company's interests; (p) To pay out of the funds of the company all costs, charges and expenses preliminary and incidental to the formation, incorporation and organization of the company; (q) To pay, with the approval of the shareholders, out of the funds of the company, commission to any person or company for subscribing or agreeing to subscribe for any shares of the company or for procuring or guaranteeing or agreeing to procure or guarantee the subscription of any shares in the company's capital or any debentures, debenture stock, shares, stock or securities whether issued by the company or not; (r) To purchase, take up or otherwise acquire and hold shares, stock or securities in any other company or corporation and to apply the funds of the company for the purpose. Also to invest and deal with any moneys of the company not immediately required for carrying on its business upon such securities and in such manner as may from time to time be determined by the directors; (s) To draw, make, accept, endorse, execute and issue bills of exchange, promissory notes, debentures, bills of lading and other negotiable or transferable instruments or securities; (t) To sell, improve, manage, develop, lease, exchange, dispose of, turn to account or otherwise deal with all or any part of the property and rights of the company; (u) To do all or any of the above things either as principals, agents, trustees, contractors or otherwise, and either alone or in conjunction with others, and either by or through agents, sub-contractors, trustees or otherwise; (v) To do all such things as, in the view of the company, are incidental or conducive to the attainment of the above objects. The operations of the company to be carried on throughout the Dominion of Canada and elsewhere by the name of "The Herbert Morris Crane & Hoist Company, Limited," with a capital stock of one hundred thousand dollars, divided into 1,000 shares of one hundred dollars each, and the chief place of business of the said company to be at the city of Toronto, in the Province of Ontario.

Dated at the office of the Secretary of State of Canada, this 29th day of May, 1913.

The value of any paper as an advertising medium is the circulation multiplied by the purchasing power per subscriber, then divided by the rate. The reasonable advertising rates and good circulation of The Monetary Times are strong points in its favor, but the unusually high purchasing power per subscriber makes it one of the very best advertising mediums obtainable in Canada.

REGULATING SECURITIES SALES.

Manitoba Sales of Shares Act Reviewed After Operation—Amendment Suggested.

The Manitoba Public Utilities Commission has published its first report. This covers the six months ended November 30th, 1912.

One of the most important matters dealt with therein is the Sale of Shares Act which came into effect on July 1st, 1912. Its object, as is well known, was to regulate the offering of shares in untried enterprises operating out of Manitoba. There was previously no limit to the practice. Concerns unknown here, and frequently entirely foreign to Canada, were enticingly advertised with representations and promises which proved a snare for the unwary. Examination of the status and financial condition of such concerns was made a pre-requisite to the right to offer shares here by advertisement or otherwise. A high standard was set, and while the Act provides that a certificate shall not be construed as an assurance that such securities have a true value, or will be profitable, nevertheless the examination not only excludes worthless enterprises from the investment field here, but affords an implication that there is some real value in the shares or bonds offered. The Act was subjected to the criticism that large extra-provincial institutions of unquestioned merit were treated in the same way as the unknown and doubtful concern, and were liable to the same inquisition.

Listed on Stock Exchange

This was fully met by pointing out that section 4 of the Act excludes any possibility of impediment to business in such cases, by enabling the Commission to authorize the listing of securities of the high classes mentioned, upon an approved stock exchange, which may be done on a moment's notice. This does not limit the dealings to such exchange. Anything so authorized to be there sold may be sold anywhere. In this way the possibility of oppressive result from the statute is eliminated. This might be made the means of a general approval, and establishing a list to be added to or altered as occasion should require.

The only other criticism of any importance (except those made by persons against whom the Act was directed) is that the Act does not cover the whole object, in that foreign companies, otherwise within its purview, may evade its application by obtaining a license under the Extra-Provincial Companies Act. This is not an objection to the principle of the Act, but merely an argument that it does not go far enough. While the objection may appear, on its face, to be a reasonable one, nevertheless, as far as has come to the knowledge of the Commission, it cannot yet be said that the exception of foreign companies, which so take out a license, has actually been made a means of evading the Sale of Shares Act. The fee required of such companies for license would not alone exclude any operator in such shares as are within the purview of the Act, but companies under that Act are subject to the obligation of making returns and revealing their condition. They are not free from all supervision. It may be that if the privilege of licensing is abused so as to evade this Act some measure should be taken, but the undersigned cannot, as far as experience has gone, say that companies licensed under the Extra-Provincial Companies Act should be made subject to the Sale of Shares Act.

Practical Result of Act

The practical result of the Sale of Shares Act has been to exclude the offering, by advertisement and otherwise, of shares in companies incorporated in various states of the Union and in certain of the other provinces. In very few instances, altogether only five, did the application take formal shape. Matters were dealt with, in many cases, informally, a short discussion making it quite apparent that the step of a formal application would result in nothing, whereupon those interested did not press the matter further. As a matter of fact only one certificate has been granted, that being to a mortgage company, under the powers already referred to, to authorize listing on an exchange. It is felt that it can be fairly said that the general exclusion, from this field, of the many ventures which were advanced, was not due to an overstrict interpretation of the Act, but to the fact that it was not demonstrated that the enterprises had gone beyond a speculative stage, and shown themselves to come up to a reasonable standard for safe investment. One instance showed a possibility of a slight improvement in the Act. A company may issue mortgage bonds or preferred shares. These bonds or shares may be a safe and legitimate investment. Its common stock may be without foundation in substance.

As the Act at present reads, all these securities must be excluded. An amendment, allowing discrimination between classes of issues by a company, would, it is submitted by the Commission, be desirable. Mr. A. J. Robson is the Public Utility Commissioner for Manitoba, and Mr. A. Wilson Smith is secretary of the Commission.

The Intercolonial Railway will be double tracked from Halifax to Moncton.

FARMERS ADOPTING MODERN MACHINERY.

United States and Canadian Implement Firms Give Evidence as to Foreign Trade.

While in Canada and United States modern farm implements and machinery are extensively used, the following remarks show that in older countries these are only now coming into vogue, and that much business is anticipated by manufacturers.

"Excluding North America only 41.36 per cent. of the small grain crop is gathered by machinery. In Europe, Asia and South Africa, the percentage is 39 per cent. South America, New Zealand, the United States and Canada gathered their grain entirely by machinery. In Siberia the crop is gathered by the old fashioned rakes. Eventually the binder will replace them.

"Millions of acres of tillable land have not yet been plowed. This acreage is mainly in Siberia, Australia and Argentina. Necessarily in the near future it must be tilled, and we now regard the foreign market as a primary one and far from being a dumping ground for our machinery," was the statement of Mr. C. H. Haney, chief of the International Harvester Company's foreign department, testifying in behalf of his company in the government's dissolution case, gave some interesting statistics as to how the world's crop of small grain is gathered and as to soil production. He said::—"The foreign field holds promise of a very great development in the future. For instance, by 1918 we are estimating the International Harvester Company's foreign trade will amount to $81,000,000, and by the same computation we figure in 1923 it will be $100,000,000.

Growth of Implement Business

"Not only are we basing our figures on the opening of new land, but upon the awakening of soil tillers to the need of improving the quality of their land. For instance, Siberia raises only 10 bushels of wheat to the acre; the United States raises only 15.49 bushels, while Germany, an older country, which has paid attention to its land, raises 30.6 bushels.

"In travelling through the undeveloped part of Siberia I have been reminded constantly of it being almost a duplication of Nebraska—a prairie country admirably adapted to grain production—and yet only 1.8 inhabitants per square mile live in that country."

Mr. Haney attributed the growth of the farming implement business abroad largely to the exhibit made by United States firms at the Paris exhibition in 1900. He said that prior to that time it was largely pioneer work in Europe. He said that the International Harvester Company now has 30,288 agents abroad.

Large Canadian Company

Vice-president Finlay, of Massey-Harris Company, Toronto, testified that its foreign business has been largely through branch houses since its beginning in 1840, because experience showed the difficulty of getting efficient foreign jobbers. The company did considerable business through jobbers in Russia as late as 1902, because "Russia is difficult from a credit standpoint," and the company considered the large amount of capital required to change its methods there at a time when Western Canada was rapidly expanding. It has known for thirty years that it could greatly extend its Russian trade by making the change.

Massey-Harris Company's business has increased about 100 per cent. in 10 years, the most rapid expansion being in foreign sales. Prices have been continuously lower in United States than Canada, and lower in Canada than any other country except United States in all that time, and still are.

◆

VICTORIA'S FINANCES.

Here is a statement of Comptroller Raymur regarding Victoria's finances. The city has in the hands of the Dominion Securities Corporation, its fiscal agent, approximately $4,600,000, composed of the $2,350,000 registered stock which has been underwritten and placed on the London market, and a number of short-term debentures.

Out of the $2,350,000 the city has received $955,000. That money is in Victoria and the balance, about $1,300,000, is to be paid on July 7. Out of the 10 and 25-year debentures the city has received $1,326,050.96; that is, $816,221.06 of local improvements, which has been used in the reduction of the overdraft and the retirement of treasury bills, $366,535.46 of school money which has been placed to the credit of the school board, and $5,448.66 accrued interest.

The balance of all the short-term debentures is being sold in New York and Toronto. The company and the city expect to have them sold by the end of July.

◆

Messrs. Wood, Gundy and Company, the well-known bond house, have moved into more commodious offices in the Canadian Pacific Railway building, Toronto.

CANADIAN MUNICIPAL SECURITIES CRITICIZED

Railway Magnate's Advice to British Investors—Causes of Market Conditions.

The low price of Canadian securities, said Mr. R. M. Horne-Payne, chairman of the British Empire Trust Company, was due almost entirely to the loss of confidence consequent upon recent forced and badly regulated borrowing of Canadian cities, followed by news of fresh expenditure aggregating millions of pounds. Many Canadian cities had spent and were still spending large sums before they had raised the money, and consequently had been forced to risk the costly expedient of securing accommodation for a few months at a time, when finances were still in this dangerous position and they were embarking on further large outlays. The British investor had had his confidence shaken by witnessing the scramble for money by responsible municipal bodies.

The municipalities have been regardless also of the serious loss inflicted on those who previously bought city bonds.

Turning Point is Well in Sight

The British investor never favored municipal securities, and this last experience is not likely to increase his liking nor is the rate of interest, however high, likely to tempt more than a small section of the community to invest in city bonds.

The reasons alleged for this dislike are that cities raise a constantly increasing and practically unlimited sum on the same assets, and that the city assessment and valuation is not independent or reliable valuation.

This callous destruction of municipal credit has thoroughly unsettled the public mind. The Canadian provinces are great countries, and larger than Great Britain, with vast wealth and resources, but the prices of provincial government securities have fallen away under the influence of the fall in price of city bonds. Prices of railway and industrial securities have fallen in sympathy, and great harm been done, but I think the turning point is well in sight, it being made increasingly evident that British investors will take no more city bonds when this is once realized on.

Advice to Investors

On the other side of the Atlantic there should be no more expensive attempts to force issues on this market and other Canadian investments will gradually recover popularity and their prices on their merits, with the exception of these difficulties in city finances and the troubles of a few small enterprises. There is nothing to cause the least anxiety in connection with Canada. The prosperity of the Dominion is very great. My advice, however, is to leave municipal securities severely alone and to take this opportunity to invest what money you can in those sound Canadian railway and industrial investments, which have recently fallen most heavily in price. There never can be a more favorable opportunity of investing money at a high rate of interest, with certainly a great increase of capital, in the course of a few years.

Another Side Stated

A high London financial authority, whose position places him above all imputation of self-interest, made the following statement to Windermere, of the Montreal Star:—

"General surprise is felt in Canada that Mr. Horne-Payne should speak disparagingly of Canadian municipal securities, for he knows that far better judges than he can be had. They rank with the best class of investments outside of Britain. Mr. Horne-Payne's preference for railway industrial securities, with which his life has been associated, may be reasonable enough in its way, but it is regarded as playing it rather low down to seek this advantage with the investing public by disparaging rival and unquestionably superior public securities.

"What especially rankles in the minds of financial houses handling municipals is his assumption that blame for the entirely exceptional conditions in the Canadian market, which is chiefly due to far-reaching international causes, must be laid at the door of Canadian municipalities."

Singular and Biased

Mr. Horne-Payne's statements are regarded in London as quite singular and biased, says a Canadian Associated Press cable.

There is, however, a very general feeling in the London market, among Canada's best friends, that Canadian cities generally, and certain ones in particular, should for a time, at any rate, limit their commitments to strictly necessary undertakings. It would be invidious to mention names, but there is not the least doubt that two Canadian cities of secondary rank have created larger floating indebtedness than any cities in the Empire outside Britain. All the same, it is a fact that London has practically never lost money by investments in municipal securities, and there is no Canadian city to-day, in the opinion of those in London, best qualified to know, which is not perfectly good for its obligations. They must, however, take the future into account, and if certain cities don't exercise greater care both as regards the amount and the method they will certainly bring trouble on themselves and on the whole situation.

Horne-Payne's orations, it may be added, do not always carry much weight, although his ability is unquestioned.

◆

DEBENTURES AWARDED

Kingsville, Ont.—$14,906 5 per cent., to private purchasers.

St. Vital, Sask.—$25,000 6 per cent. 30-years, to Western School Supply Company, Regina.

Redford R. M., Sask.—$6,000 7 per cent., 10 instalments, Messrs. H. O'Hara and Company, Winnipeg.

Odessa Village S.D.—$5,000 7 per cent. 20-year debentures, to Messrs H. O'Hara and Company, Winnipeg.

Manitoba, Saskatchewan and Alberta School Districts.—$23,000, Messrs. H. O'Hara and Company, Winnipeg.

TALKING SPANISH RIVER MERGER IN MONTREAL.

An impending merger of Spanish River Pulp and Paper with Lake Superior Paper, a subsidiary of Lake Superior Corporation, is being talked in Montreal.

Mr. Garnet P. Grant, president of Spanish River, has been in London for some time.

The paid-up capitalization of the two companies is as follows:—

	Com.	Pfd.	Bonds.
Lake Superior	$4,000,000	$1,575,000	$3,999,320
Spanish River	3,000,000	3,000,000	2,500,000
Total	$7,000,000	$4,575,000	$6,499,320

The directors of Lake Superior are H. E. Talbot, president; Geo. H. Mead, vice-president; Capt. D. C. Newton, vice-president; T. J. Drummond, W. E. Stavert, J. Frater Taylor, and W. K. Wingham.

Those of Spanish River are:—E. P. Grant, president; T. H. Watson, vice-president; T. H. Sheppard, R. A. Lyon, A. H. B. Mackenzie, R. L. Innes, and James Bicknell.

RAILROAD VALUATIONS.

In a letter to the Press, Mr. J. M. Fair, of the National Appraisal Company, says:—

"It must seem to ordinary business men that the ability required to appraise properly blocks of buildings in cities o large manufacturing properties, with special machinery, jigs, dies and other special tools, together with land and land improvements, must be equal at least if not far superior t that required to appraise rights of way, locomotives, cars, bridges, station houses, terminals and other property involved in railway valuations.

"Ever since the question of the physical valuation o railway property was first mentioned, years ago, the reading public has been treated regularly, if not politically, to the very great difficulty or utter impossibility of doing suc work and arriving at proper results.

"The decision of the United States Supreme Court jus rendered clears away much that has been done and said regarding the difficulty by establishing, once and for all, th basis upon which the valuations are to be made. It is no simply a matter of method and detail."

The National Appraisal Company is one of the leadin concerns of its kind and is doing considerable business i Canada.

STOCKS AND BONDS TABLE—NOTES
